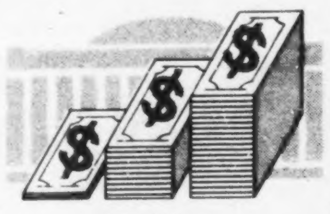
Banks Seize on Fed Ruling to Buy Healthy Thrifts

By BART FRAUST

NEW YORK — A little-publicized decision last year by the Federal Reserve Board paves the way for two cross-industry, interstate acquisitions announced in New England in recent days.



Thrifts

In the July 1984 ruling, the Fed permitted the Frankford Corp., a Philadelphia-based bank holding company, to acquire Colonial Savings Bank, a state-chartered savings bank located in Philadelphia.

That ruling is expected to be cited as precedent for the acquisition of the Provident Institution for Savings in Boston by the Hartford National Corp. and the sale of Old Colony Savings Bank in Providence, R.I., to the Boston-based Bank of New England Corp.

If the Fed approves the Hartford National and Bank of New England applications, it will be the first time it has permitted interstate acquisitions of healthy thrifts.

Also pending at the Fed is an application by a bank holding company to acquire a savings bank located in the same state, the purchase of Morris County Savings Bank in Morristown, N.J., by First Fidelity Bancorp. Inc. of Newark, N.J.

According to several banking observers, the Frankford-Colonial decision was the first time the agency permitted a bank holding company to buy a healthy thrift in a state other than New Hampshire and Rhode Island. The Fed has allowed banks and thrifts in those two states to maintain their traditional ownership links.

Banking analysts said they see no reason why the Frankford decision, in which the Fed basically looked at state-chartered stock savings banks as commercial banks, should not be extended to include interstate mergers.

The decision did not affect bank holding company acquisitions of either federally chartered savings and loan associations or savings banks.

Bank Board's Hovde: FSLIC Not in Peril

He Worries that Recapitalization Talk May Undermine Consumer Confidence

By DAVID LAGESSE
and NINA EASTON

A member of the Federal Home Loan Bank Board on Thursday disputed the recent bleak assessments of the state of the federal thrift industry fund.

In an interview Thursday, board member Donald Hovde said he does not agree that the Federal Savings and Loan Insurance Corp. needs an immediate injection of new capital, and said he worries that talk about recapitalizing the fund could spawn consumer doubts.

Mr. Hovde and Mary Ann Grigsby, the board's third member, are said to have been angered when Bank Board Chairman Edwin J. Gray suggested, though did not endorse, a levy of $8.5 billion on the industry, totaling 1% of all deposits. Mr. Gray mentioned the levy in congressional testimony Oct. 17.

"If the perception is that the fund is weak or insolvent, then I'm concerned about that — because it simply isn't the truth," Mr. Hovde said.

Mrs. Grigsby could not be reached for comment.

In other developments, sources say a Bank Board plan for a new corporation that would manage and dispose of troubled thrift assets may initially exclude the involvement of the system's district banks.

Backers of this corporation are hoping Mr. Gray will announce the details of the plan at the annual convention of the U.S. League of Savings Institutions in Dallas next week. The conference schedule includes a speech by Mr. Gray on Tuesday.

The growing dispute over the health

Minority-Owned Thrifts Grow Rapidly

By KENNETH J. HICKS

NEW YORK — Many minority-owned thrifts maintained their explosive asset and deposit growth for the second consecutive year in 1984 by using more aggressive and innovative marketing techniques. This gave them the funds to expand the services they can offer their communities.

However, minority-owned thrifts did not escape the earnings problems that afflicted the industry as a whole.

These are among the findings made in conjunction with the *American Banker's* second survey of minority-owned thrift institutions. The table on page 14 lists those thrifts that responded to questionnaires sent by *American Banker* and compares data from Dec. 31, 1984, with data from Dec. 31, 1983.

For the approximately 60% of minority thrift respondents who were able to provide two years of data, deposits soared 43.2%, to $2.7 billion from $1.9 billion, and assets jumped 44.1%, to $3.3 billion from $2.3 billion. Minority thrifts' share of total thrift deposits also increased, to .004% from .003%. Deposits for all thrifts in 1984 were up 14.1%.

Deposit and asset growth also were extremely high for minority-owned thrifts in the period from Dec. 31, 1982, to Dec. 31, 1983, with increases of 49.5% and 51.0%, respectively.

Net income for the survey's minority-owned thrifts, however, plummeted 49.7% to $6.0 million in 1984, from $11.9 million the year before. Although the sample is small, these results can be reflective of the industry as a whole.

Minority Thrift Rankings, Page 14
Atlas S&L Struggles to Survive, Page 11

Mark Clark, senior vice president for public relations at the U.S. League of Savings Institutions, pointed out that the "interest rate environment in 1984 was not as favorable" as in 1983. "The ability of thrifts to earn on interest rate spreads was more difficult." In 1983, earnings at surveyed minority-owned thrifts skyrocketed 267.1%.

Mr. Clark said the figures for the relatively small sampling of minority-owned thrifts (70 thrifts could be iden-

First Tennessee, Insurance Agency To Alter Agreement

By LYNN BRENNER

NEW YORK — Craddock Insurance Agency and First Tennessee Bank, partners along with Aetna Life & Casualty in one of the most publicized joint ventures to market insurance products to bank customers, are redrafting their agreement. Among the planned changes is the way in which the bank is compensated.

First Tennessee now leases lobby space in six branches to the Craddock Agency in exchange for 4% of gross premiums written. In the future, the bank's compensation will be changed to a still-to-be-determined flat fee.

The Craddock agency will also reduce its representation in First Tennessee branches and concentrate more fully on direct response sales.

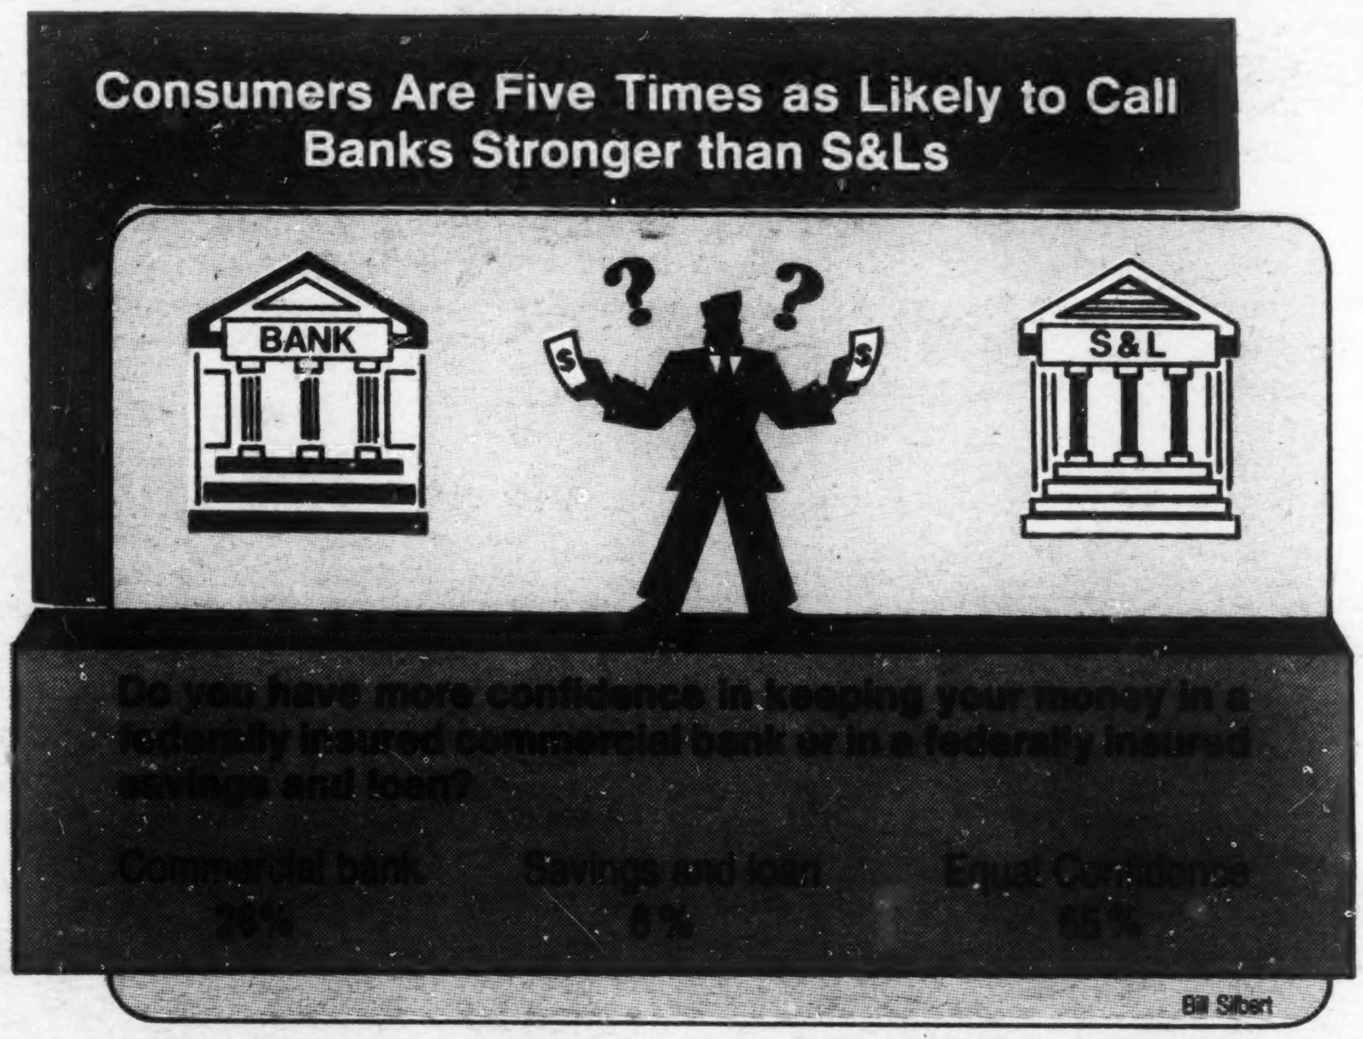
Banks Outpace Thrifts in Public Confidence



Consumers Are Five Times as Likely to Call Banks Stronger than S&Ls

Do you have more confidence in keeping your money in a federally insured commercial bank or in a federally insured savings and loan?

Commercial bank	Savings and loan	Equal Confidence
26%	6%	65%

Bill Silbert

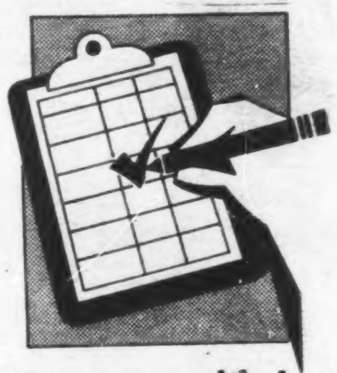
Savings Industry Leaders Are Disappointed, But Not Startled, By Finding of Consumer Survey

"The depositors couldn't get their money, and the government stepped in and temporarily closed the savings and loans."

— A young man from the South, recalling the problems of thrifts in Ohio and Maryland.

By DAVID LaGESSE

In the most profitable year on record for American thrifts, evidence has surfaced that the industry has lost some grip on its most cherished asset — public confidence.



Two in three consumers still express equal confidence in banks and thrifts. But that remaining third is four times more likely to choose a bank to protect its money, according to a nationwide survey commissioned by the *American Banker*.

"It's the first-choice reflex among our customers that it looks like we're losing," says Paul Willax, chairman of Empire of America in Buffalo. He and other thrift leaders express disappointment in the findings, but little real surprise.

They point to the temporary thrift closings in Ohio and Maryland, promptly recalled by the young man quoted above and many others nationwide. Those thrift crises developed last spring, just months before the survey was conducted.

But few thrift executives would expect to see improvement in the public's confidence in thrifts since the survey, which was conducted in late July. "You can bet that if you asked the same questions today, the numbers would

As the Biggest Parents Grow Bigger, Recent Arrivals Open with Optimism

Creation of New Savings Institutions Is Unchecked by Bleak Assessments

By MARK BASCH

NEW YORK — The gloomy picture of the thrift industry painted recently by some regulators hasn't stopped new thrifts from organizing this year, even with Federal Home Loan Bank Board limits on growth for new institutions. In the first half of this year, 47 new thrifts opened, after 64 opened in 1984.

Part of the optimistic hopes for new institutions stems from the fact that they weren't in business during the bad times of the late 1970s and early 1980s. The industry learned the dangers of having a large portfolio of long-term, fixed-rate loans in a time when interest rates are rising. With that les-

As Thrifts' Earnings Soar, Consumer Confidence Wanes

Continued from Page 1

son in mind, new thrifts starting with a clean slate can match up assets and liabilities to minimize interest rate risk.

And another problem new thrifts are unlikely to face is runaway growth that has caused several institutions to fail this year. The Bank Board requires new thrifts to keep their net worth at higher levels than older institutions, so if a new thrift wants to speed up its asset growth, it will also have to speed up its capital growth to keep pace.

Any thrift that applied for a charter before Nov. 3, 1983, can open with initial capital of $2 million, but it must keep its net worth at a level equal to 7% of its assets for its first three years. Thrifts that applied after that date must capitalize at $3 million or more. The net worth requirement for those institutions is 7% the first year of operation, 6% the second, and 5% the third.

"It's the largest single factor in terms of limiting growth," said Pat Berbakos, assistant director of the Bank Board's office of district banks.

The new thrifts are also required to have an income maintenance agreement, in which the investors of the thrift or its holding company, if there is one, agree to supply capital to the thrift if it falls below regulatory levels, Mr. Berbakos said.

Applicants for new thrifts must also submit a detailed business plan as part of their application. "Any deviation from the business plan needs [regulatory] approval," Mr. Berbakos said.

"As a former regulator, I can understand the Bank Board's concern, but I think that's created a hardship," said Anita Miller, chairman and chief executive officer of AmeriFederal Savings Bank in Lawrenceville, N.J., and a former Bank Board chairman.

AmeriFederal, which opened Oct. 16, 1984, is nearing $30 million in assets, with capital equal to 11.2% of assets, Mrs. Miller said.

Several thrift failures this year, most notably in California, can be attributed to excessive growth. They include:

- Centennial Savings and Loan Association, Santa Rosa, Calif. The thrift, which opened in 1976, saw its assets rise from $49 million to $226 million during 1983. It had $405 million in assets when it was seized by the Bank Board in August.
- Butterfield Savings & Loan Association, Santa Ana, Calif. The four-year-old institution had $803 million in assets when it was taken over by regulators.
- Farmers Savings Bank, Davis, Calif. The seven-year-old savings bank had deposits grow from $186 million at yearend 1983 to $582 million at yearend 1984.
- Sunrise Savings and Loan Association, Boynton Beach, Fla. It opened in 1980 and had assets of $1.5 billion when the Bank Board stepped in.

Even though those four thrifts were more than three years old, the new Bank Board regulations won't let new thrifts off the hook at the end of their first three years. The new institutions will have to apply to their Federal Home Loan District Banks if they want to lower their capital ratios after three years, Mr. Berbakos said.

One way to maintain a high capitalization ratio is to open the institution with more capital than required. The Gold Coast Savings and Loan Association in Pembroke Pines, Fla., opened last year with $8 million in capital.

"With $8 million in capital, we do not find [the capital requirements] limiting," said Gold Coast president John R. Morris.

Gold Coast, which had assets of $54 million as of Sept. 30, has a business plan which aims for deposit growth of $50 million a year. With the $8 million in capital, "we have two years before we have to sweat," Mr. Morris said.

He said he thought $50 million was "a comfortable growth range for an S&L. At $100 million, you're bumping the limit."

Some New Thrifts Doing Well

Whether they need the growth limits or not, several new thrifts that have been open for about a year seem to be doing pretty well. All new thrifts lose money at the start, but Mr. Morris said Gold Coast has already recovered its initial losses.

New Thrift Openings Through June 30, 1985

California	12
Florida	11
Texas	10
Arizona	3
Virginia	3
Georgia	2
Maryland	2
Alabama	1
Connecticut	1
Louisiana	1
New Mexico	1
Total	**47**

"Earnings potential is very good, particularly for new institutions," he said. "We've done real well."

Although 23 new thrifts have opened in Florida in the last year and a half, there's always room for more. "It's very cash rich down here because of the retirees," Mr. Morris said. "People think their savings belong in the savings institutions."

First Commercial Savings and Loan Association in Sterling, Okla., began turning a monthly profit after three months, and is "almost in the black totally," according to its president, Brian Hooper.

First Commercial, which opened Sept. 18, 1984, is run by former commercial bankers, Mr. Hooper said. "The savings and loan industry has more opportunities than the banking industry," he said.

The biggest advantage for an Oklahoma thrift is the authority for unlimited branching. Commercial banks in the state have to charter a new institution when they want to open new offices. "We got tired of having to get a new charter every time," Mr. Hooper said.

AmeriFederal in New Jersey has also turned profitable from operations, Mrs. Miller said. The institution opened with a mortgage banking office in New York City, but it has since closed that office down. "We found the expense and communications problem was inappropriate for a start-up business," she said.

The institution benefited from a rate chart that was printed in a local newspaper "on the very week that we opened the bank," Mrs. Miller said. The institution's initial rates drew customers right away.

The savings bank now has about $21 million in retail deposits, with no brokered deposits, she said.

What do you look for in a CPA firm you recommend?

As a banker, you sometimes are asked to recommend a CPA firm to audit a customer's financial statements. Before you suggest one, you should know whether that firm is a member of the Division for CPA Firms of the American Institute of CPAs.

Why? Because member firms have to go through a special type of audit themselves, called a peer review.

Many CPAs don't feel it is necessary to belong to the Division. But you should know that hundreds of firms voluntarily take this extra step to test their quality controls. And quality control is as important in CPA firms as it is to you and your customers

The Division for CPA Firms was founded in 1977 by the American Institute of CPAs to provide a voluntary, objective means of monitoring adherence to professional standards.

Each member firm is required every three years to subject its audit and accounting practice to a comprehensive quality review by specially trained outside CPAs.

Peer review reports are available to the public—and they can tell a lot about the firm.

If you would like the latest report on a particular CPA firm or a directory of Division members, ask the firm itself or write or call the Division Coordinator,

THRIFT UPDATE

California S&Ls in 1985: To Have and Have Not

After a year of biting the bullet, West Coast thrifts are split between the strong and the restructuring.

By Cathy Louise Taylor

The era of the go-go thrift in California is fast giving way to the age of the haves and have-nots.

The haves are reporting third-quarter earnings, while the have-nots are restructuring as their new managers slow growth or sell much-criticized investments.

Both contingents have recognized that fast-growth asset building is out. They also realize that traditional mortgage loan origination, with some direct investment in real estate or securities, is in.

The situation is the result of the events of 1985.

"It has been a watershed year, the year we bit the bullet," says Gerald D. Barrone, president and chief executive officer of Fidelity Federal Savings and Loan Association in Glendale. He is also the newly elected chairman of the California League of Savings Institutions, trade group for the state's 212 savings institutions.

William Popejoy, chairman of the nation's largest association, American Savings and Loan Association based in Stockton, characterizes the situation as a "dichotomy."

"We [in California] have some very sick companies, which have been identified and put into receivership," he says. "That's almost a whole different industry."

Gone from the California thrift scene are associations like the old Bell Savings and Loan of San Mateo. The 18-branch thrift grew to $1.9 billion in assets by year-end 1984, up nearly five-fold from $422 million two years earlier, before it was placed in receivership by the Federal Home Loan Bank Board in July.

Another casualty was Santa Ana-based Butterfield Savings and Loan, the thrift regularly referred to by Edwin J. Gray, chairman of the Federal Home Loan Bank Board, because of its ownership of an unprofitable chain of Love's Woodpit Barbecue restaurants.

All told, nine California associations have been placed in receivership so far this year. And two, Central Savings and Loan Association and Eureka Federal Savings and Loan, have elected new boards of directors at the behest of the federal regulators. Assets of the 11 associations total $12.2 billion.

Last year, only two comparable actions — both conservatorships — were taken by federal regulators.

New Tools

The two tools that facilitated the 1985 actions were net worth certificates and management consignment contracts. Net worth certificates are issued by the Federal Savings and Loan Insurance Corporation (FSLIC) to boost the net worth of a foundering institution. Management consignment contracts provide a team of new managers from a stronger association for temporary management assistance. California accounts for 9 of the 13 management consignment contracts arranged nationwide.

By using them, the bank board did not do one assisted merger, liquidation, or payout to depositors in California. Thus, the Federal Savings and Loan Insurance Corporation fund was untouched.

Instead, regulators are relying on the management expertise of the "big buddies," such as California Federal Savings & Loan Association, Home Federal Savings and Loan Association, and Glendale Federal Savings & Loan Association — as well as net worth certificates — to help nurse those ailing institutions back to health.

The aggressive regulatory activity has sent a clear signal to the industry: "You would have to be a Bozo not to see the handwriting," says Sal Serrantino, president of California Research Corp., a banking consultant group based in Santa Monica. He was referring to the bank board's disdain for excessive growth and nontraditional direct investments.

Mr. Gray of the bank board has been vocal about his irritation. In a recent speech to lenders here, he charged that California law "goes well beyond what the Congress intended."

He was referring to California's 1982 legislation, which allows state-chartered thrifts considerably more latitude than those under federal regulation.

For instance, a state association may have unlimited authority to invest directly in real estate, while federal associations may make such investments only through service corporations — and the investment may not exceed 3% of the association's net worth.

The big pinch on this expanded authority, however, occurred in March, 1985, when a new FSLIC regulation became effective. FSLIC members were limited in their direct investments, including real estate development, service corporations, and equities, to 10% of assets or twice net worth, whichever is greater.

A Damper on Activity

The rule put a damper on much California activity because all savings and loans in the state are required to have FSLIC insurance.

"We definitely think the direct investment threshold will help alleviate

Docutel/Olivetti Line 1

The Smartest Solution To Your Biggest Problems

The Line 1 Branch Automation System from Docutel/Olivetti.

Already, it is setting standards for the financial automation systems of the future to follow—standards in design, adaptability, usability and performance that have never been matched in the past. Now you can have more control, more flexibility, more effective features and more problem-solving abilities than you ever before thought possible from a bank automation system.

Line 1 performs where it counts: on the bottom line.

Line 1 solves your biggest problems with the most productive management tools you can have…tools to create greater profitability for you:

- **Sophisticated distributed intelligence.** Line 1's unique distributed intelligence configuration allows any transaction to be shown at any work station at any time. The result: greater flexibility, throughput and customer service.
- **The communications protocol support you expect.** The Line 1 System will support almost any communications protocol, including SNA/SDLC.
- **The components you need—where you need them.** Line 1's system components go wherever you need them—at a teller window, a platform desk, even in the back office. And, as your Line 1 System grows, Docutel/Olivetti supports you with the industry's most complete line of keyboards, CRT's, printers and other peripherals.
- **Plus, other innovative functions and features, including:** extensive totaling capabilities; enhanced balancing techniques; item truncation to reduce massive paper handling problems; electronic journalization; dedicated or shared floating printer; exclusive Tri-Valent screen display; auto-reentry functions…and much more.

Broaden your horizons with Line 1.

Docutel/Olivetti listened hard to the problems you face. And then we answered with an idea that can solve them: The Line 1 Branch Automation System. But you wouldn't expect anything less from Docutel/Olivetti—the company that has developed a complete family of bank and office automation systems and products to serve you—from the Line 1 System to ATM's, personal computers and word processors.

Contact your Docutel/Olivetti representative, or write or call us today. And discover all the reasons Line 1 is the smartest solution to your biggest problems.

We want more of your business.

California S&L Regulatory Actions

The Federal Home Loan Bank Board has placed nine California thrifts in receivership so far this year, and requested new boards of directors be elected at two other institutions. Only two comparable actions were taken in 1984.

Association, City	Assets ($ Mil.)	Action
Western Community, El Cerrito	$110.6	Receivership; insured accounts and some accounts transferred to First United Federal, a new Calif. unit of Atlantic Financial, Bala Cynwyd, Pa.
Beverly Hills, Mission Viejo	$2,900	Receivership; new federal mutual assn. formed; management contract with First Nationwide
Central, San Diego	$2,200	Former directors asked to elect new board; management contract with First Federal of Arizona
Southern Calif., Los Angeles	$1,500	Receivership; new federal mutual assn. formed; management contract with Great American First
Eureka Federal, San Carlos	$1,800	Former directors asked to elect new board; management contract with Home Federal
Bell, San Mateo	$1,700	Receivership; management contract with Glendale Federal
Butterfield, Santa Ana	$803	Receivership; management contract with Downey
Centennial, Guerneville	$405	Receivership; new federal mutual formed; management contract with Great Western
Presidio, Porterville	$286	Receivership; management contract with California Federal
Golden Pacific, Windsor	$43	Receivership; given a new charter; two directors added; president retained
Farmers, Dixon	$833	Receivership; management contract with California Federal

problems in California," says Martha Gravlee, a bank board spokeswoman.

And there is a state regulatory move afoot to limit direct investments. California Insurance Commissioner William Crawford says he expects a new regulation, allowing only 20% of assets in direct investments, to become effective in mid-January.

"With the way the federal regulations now stand, I can't see anyone being hurt by the new regulation. But at least we won't have anybody going around making speeches," he says, referring to the many attacks on California's liberal investment stand.

Another bit of fallout is a wane in interest in opening new state-chartered savings and loans. In fact, 18 groups that received approval from the state department of savings and loans let their applications lapse. As a result the department revoked the approvals.

More are expected to wash out of the logjam of applicants as extension filing deadlines pass. There are 96 associations that have been approved but have not opened their doors, and 68 awaiting a decision, according to the department.

Commissioner Crawford isn't worried about the lack of new applications. He would like to see the approval rate return to the historical level of seven per year.

Tighter federal regulations also dampened enthusiasm at federally chartered associations to switch to state chartered, according to Mr. Barrone.

"My sense is there is no stampede now to convert from a federal to state charter," he says. "We have enough authority as federal associations and some of the fringe investments [allowed by a state charter] we're not interested in," he added.

That's a change from 1984, when six savings and loans switched: Gibraltar Savings & Loan Association, Beverly Hills; Great American First Savings Bank, San Diego; Imperial Savings Association, San Diego; Coast Savings and Loan Association, Los Angeles; Pacific Savings Bank, Costa Mesa; and United Savings Bank, San Francisco.

Five more have filed in 1985 to convert, the largest being Beverly Hills-based Great Western Savings, with $21.7 billion in assets. None have been approved.

"Our application is still pending; we have not made up our mind," says Lance Erikson, a spokesman for Great Western. He quickly points out that Great Western never intended to make broad use of the expanded powers and, in fact, federal rules may suffice.

Great Western's response reveals a new sensitivity at savings and loans about their investment activity.

For instance, Mutual Savings and Loan, a $340-million association based

How Monumental General Insurance Services help you pull more profits from current business without adding to your costs.
BUSINESS
100

Everytime we put this brochure in the hands of a profitable banker ...he gets even more profitable.

Interest margins have never been slimmer. And competition for the consumer dollar has never been more intense. That's why it's more important than ever for financial institutions to look for increased income and profit from the "non interest" areas of banking.

With this brochure Monumental General introduces the Monumental Profit System...a proven sales and marketing program designed to increase your profits from the sale of credit insurance, mortgage protection, and other direct mail customer related insurance.

A one-of-a-kind program, it can be put into place almost immediately, without added cost or personnel, and show tangible results after the very first month.

A total program, the Monumental Profit System combines advanced sales training, incentive plans, a Monumental account executive to assist in day to day operations and Home Office support that includes computer monitoring of sales progress ...plus one of the most marketable lines of customer related insurance products in the industry.

If you'd like to see immediate profit increases from the sale of credit insurance, mortgage protection, and other customer related products, write for this brochure or ask us to send a Monumental General representative to explain the program in detail.

Total Assets: consolidated assets for the parent company and all its subsidiaries are use, whenever possible. However, some diversified companies do not consolidate the assets of their savings institution subsidiaries. In many cases, these diversified companies have established financial services holding companies, which are the direct parent of their savings institution subsidiariers. In these cases, the assets for the financial services holding companies are used, whenever possible. **Total deposits:** the deposits for the savings institution subsidiary only are used. If a company has more than one savings subsidiary, coimbined deposits for all of these subsidiaries are used, whenever possible. **Net Income:** income after taxes and loan loss provisions, but before extraordinary items is used. If a company has more than one savings institution subsidiary, the combined net income for all of these institutions is used, whenever possible. **(a)** — Types: D—Diversified, N—Non-Diversified. **(b)** — If a holding company owns more than one savings institution, as indicated in the last column, the name of the largest institution is reported below the name of the company. **(c)** — Also owns Citicorp Savings, FS& LA, San Francisco, and Citicorp Savings of Florida, FS& LA, Miami. **(d)** — Palmetto Federal S&L Assn., Palmetto, Fla., and Goldome Savings Assn., St. Petersburg, Fla., were merged in Dec. 1984, to form Goldome Savings Bank. **(e)** — Company is, in turn, owned by National Intergroup, Inc., Pittsburgh. **(f)**— In August, Ford Motor Co. agreed to acquired First Nationwide Financial Corp. for $493 million. **(g)** — Also owns Gibraltar Savings of Washington FA, Seattle (formerly Queen City S&L Assn.), which was acquired in July 1984. **(h)** — Also owns American Savings Association of Kansas, Wichita. On June 30, 1984, the company merged another of its S&L subsidiaries, Silver State S&L Assn., Denver, into American Savings.The 1984 deposits and net income shown for savings institution subsidiaries are for Imperial Savings Assn. only. **(i)** — Current data are as of July 31, 1985, and are for Associates First Capital Corp., the financial services subsidiary of Gulf & Western. **(j)** — A direct subsidiary of Associates First Capital Corp., which in turn is owned by Gulf & Western. **(k)** — Also owns First Texas Savings Association, Dallas. **(l)** — As of Aug. 1985, Great Western Financial Corp. has a definitive agreement to acquire Citadel. **(m)** — Acquired Transohio Financial Corp. on 7/24/84. **(n)** — In Oct. 1984, Old Stone Bank, a commercial bank, converted into a federal savings bank. Old Stone Corp. also owns Guild Loan and Investment Co., Providence, R.I., and Old Stone Savings and Loan, High Point, N.C. Old Stone Savings and Loan name was changed from Perpetual Savings and Loan Association when Perpetual Savings was merged with First Federal S&L Assn., Catawba County, N.C., on 4/1/85. **(o)** — Net income figures are for the fiscal year ending 6/30/85. **(p)** — Data are for the fiscal year ended 9/30/84. **(q)** — Also owns City S&L Assn., San Angelo, Tex. **(r)** — Data are for the fiscal year ending 6/30/85. **(s)** — Maine Savings Bank converted from mutual to stock ownership in the middle of 1984 and formed The One Bancorp. **(t)** — Data are for fiscal year ended 6/30/84. **(N.A.)** — Not available.

Continued from Page 20

in Pasadena, stridently distances itself from a recent action of its parent, Wesco Financial Corp.

Wesco announced it formed a Nebraska-based, wholly-owned subsidiary with authority to engage in the property and casualty insurance and reinsurance business. Wesco contributed $45 million in cash and cash equivalents to the new company, called Wes-FIC. The company's volume of earned reinsurance premiums is expected to hit $60 million in the first 12 months.

"This in no way impacts Mutual Savings and Loan — I want that to be perfectly clear," says Jeffrey Jacobson, vice president and chief financial officer of Wesco Financial and Mutual.

Mr. Jacobson says the move is the result of planning on the part of the firm's 80% owner, Berkshire Hathaway, the Omaha-based reinsurer and operator of children's apparel stores. Berkshire wants to take advantage of what it sees as an impending upturn in the insurance business.

While the unusual is downplayed, capital adequacy has become the clarion call as all institutions rush to project safety and soundness. Mr. Serrantino calls it the "my rock is bigger than your rock" phenomenon, as he views the recent crop of advertising messages equating an institution's health with the longevity of Yosemite's El Capitan, giant sequoia trees, and other natural wonders.

Many California institutions are justified, observers say, because overall the industry "is terribly improved from a year ago," as Mr. Popejoy put it.

The "haves" among California thrifts have entered an era of "managed, controlled growth," Mr. Serrantino says.

It is evidenced by several factors. For one, the combined assets of California savings institutions increased by little more than 1% from March 31 to June 30. In the same period in 1984, combined assets rose 10%.

And thanks to stable interest rates and healthy lending increases, scores of thrifts posted record earnings for the third quarter ended Sept. 30.

American Savings and Loan, among the weakest thrifts in the nation a year ago, reported its first profitable quarter in a year.

Stronger institutions did even better. H.F. Ahmanson, parent of Home Savings of America with $24.6 billion in assets, reported its earnings rose nearly 18-fold in the latest quarter.

CalFed's quarterly earnings increased to $40.7 million from $3 million the prior year; Great Western's profit swelled to $57.4 million from $15.8 million in third-quarter 1984.

Smaller institutions were just as robust. Mercury Savings and Loan, a $2 billion association based in Huntington Beach, posted $2.3 million in net earnings in the quarter, up from $444,000 the year before.

The good earnings news is likely to extend to full-year results, Mr. Popejoy and Mr. Barrone say.

"The key [to good earnings] is to use them to restructure the balance sheet for the next roller coaster ride," Mr. Crawford says. He cites Great Western's loan portfolio, which has 65% of its earning assets in adjustable-rate mortgages and short-term investments.

But there still are problems ahead. The real estate troubles that have plagued thrift balance sheets will not be left behind in 1985, Mr. Popejoy believes. Asset writedowns, though not as deep as in the past, are in the offing.

And everyone is keeping a close eye on the interest rates.

"We have several plans, with several interest rate assumptions," Mr. Popejoy says. "We are guiding our company under the one that assumes a little worse than [the optimism] in our hearts and heads." ■

Industry Downturn Brings Lone Star Thrift Scrutiny

State savings and loan commissioner recognizes some bad apples in the Texas thrifts basket.

By Tom Scott

THE STATE OF HEALTH of Texas savings and loans is drawing the interest of a lot of people in light of the massive downturn in the oil industry and record foreclosures on residential and commercial property in Houston.

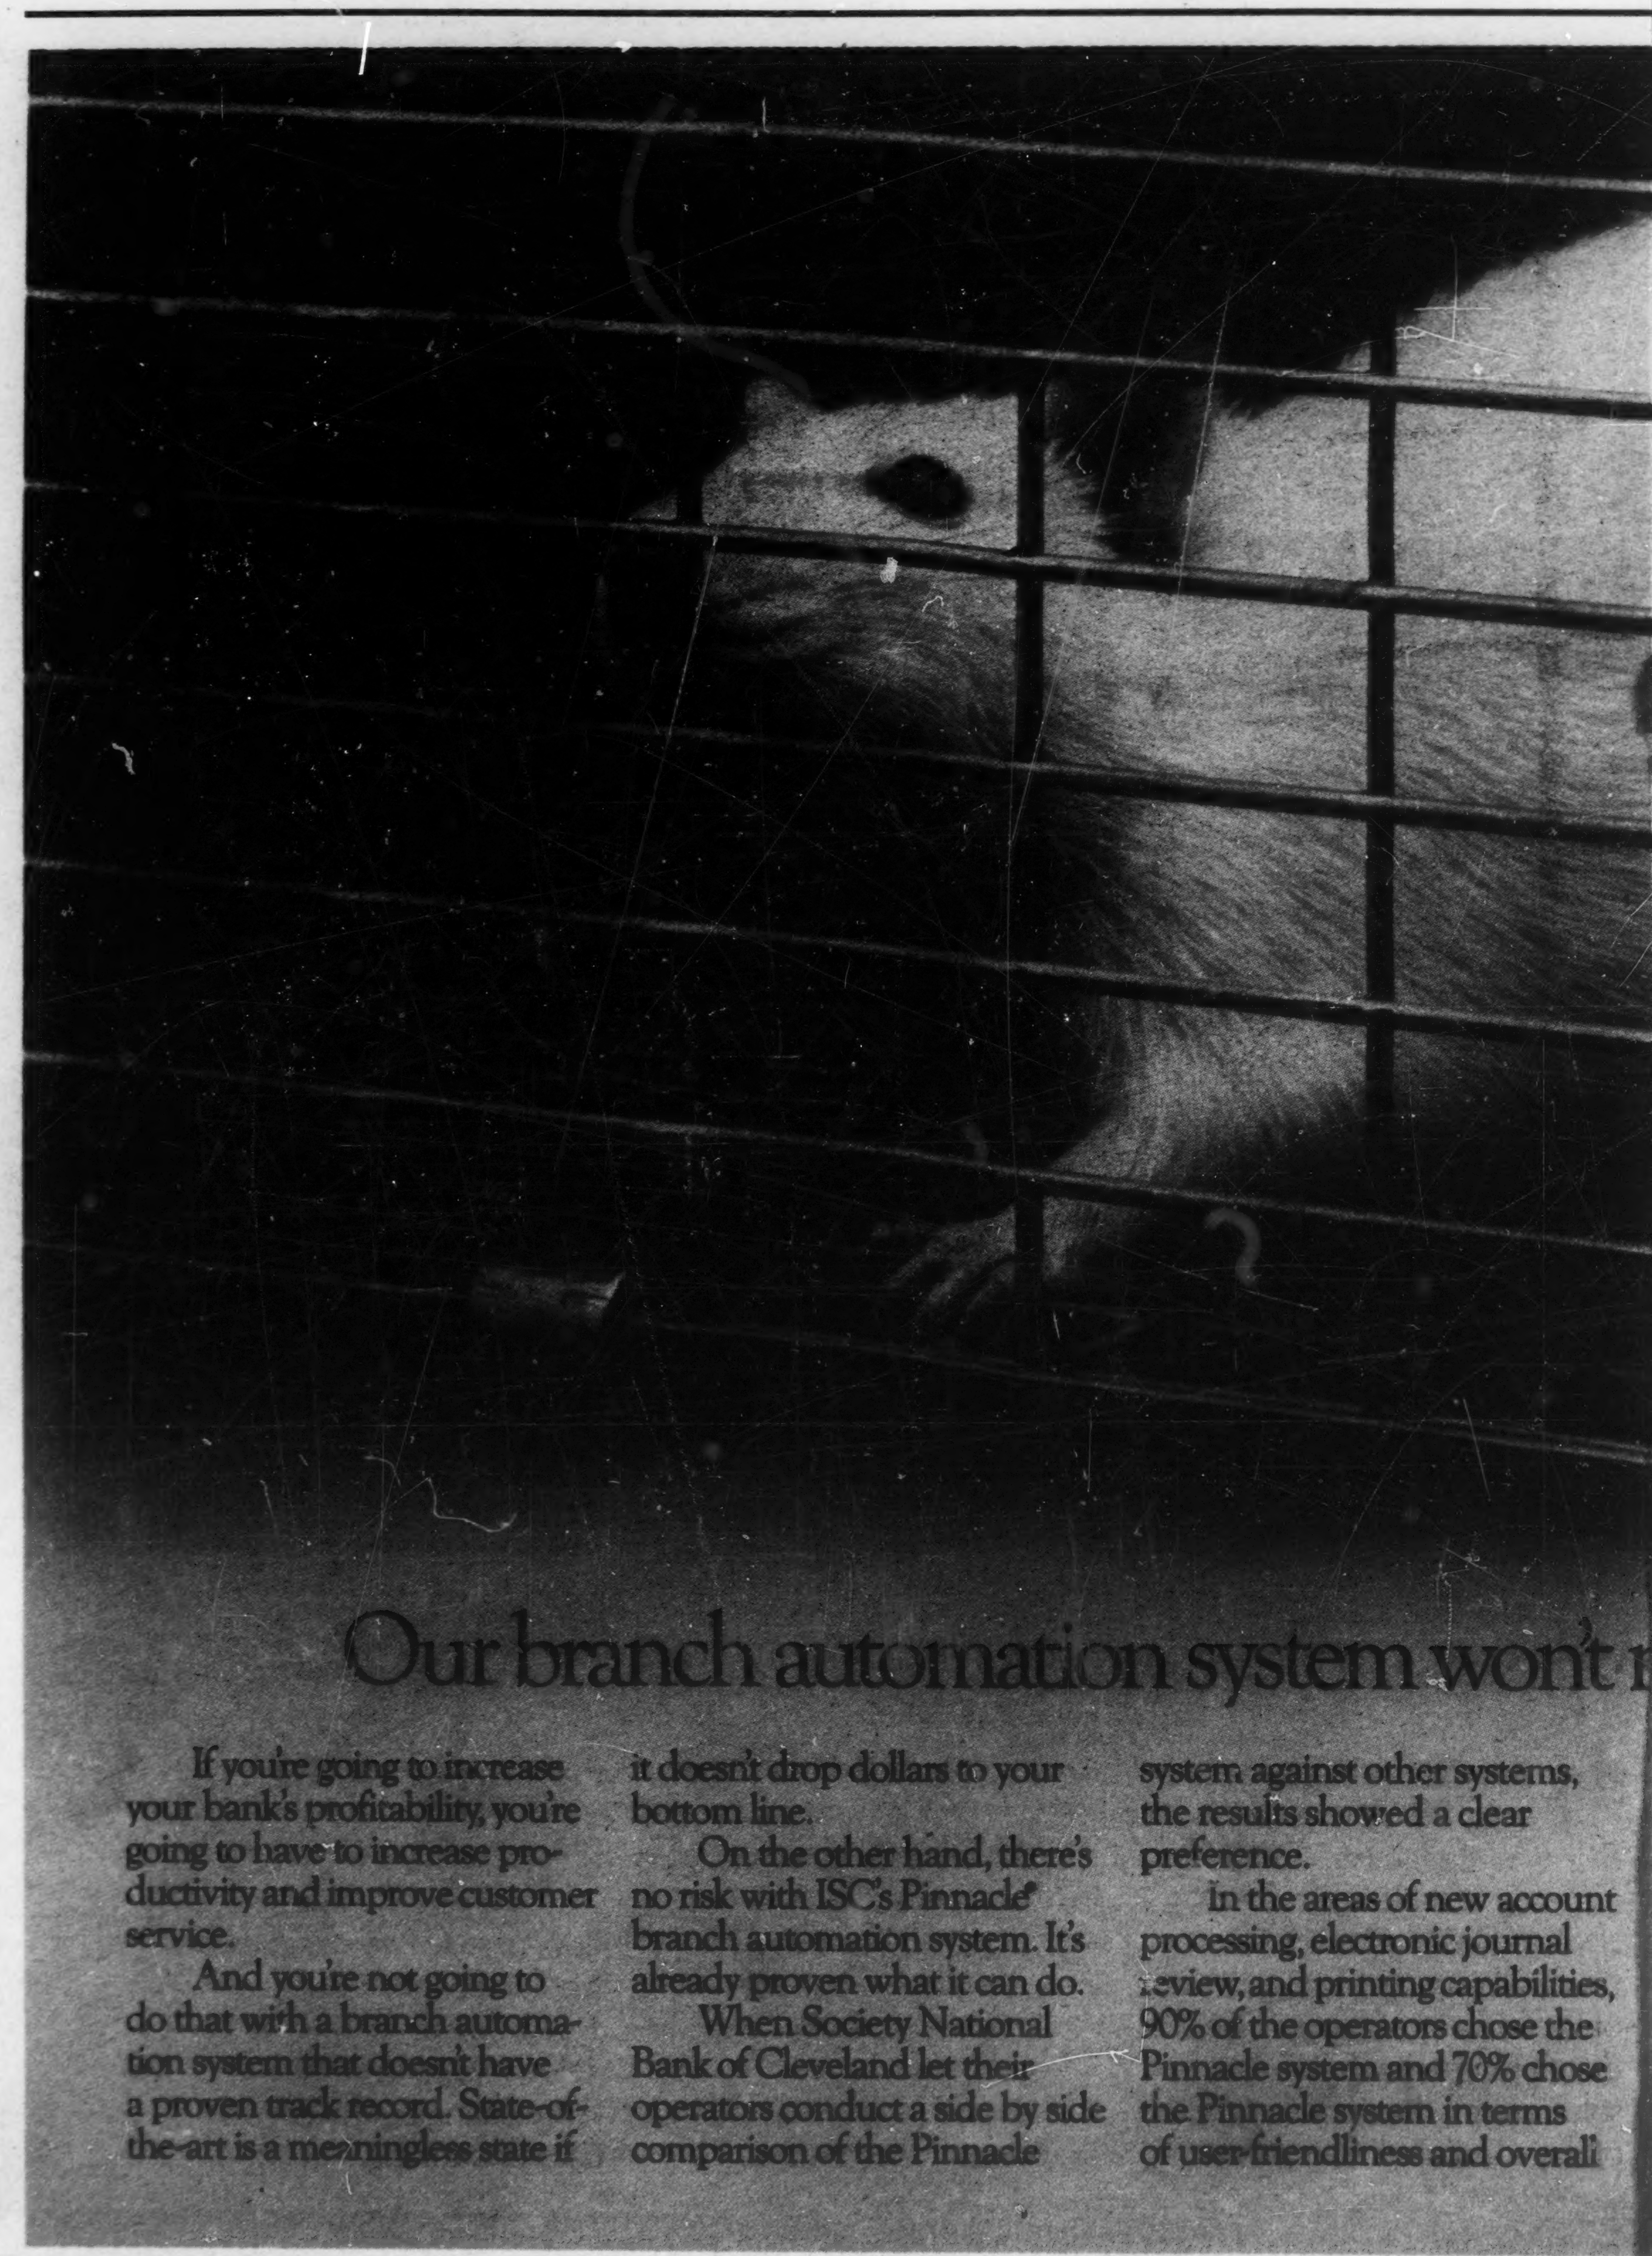
An indication of the concern was evidenced by state and federal regulators this summer. The Federal Home Loan Bank Board (FHLBB) of Dallas last June announced that it would not insure any new state S&Ls in Texas until certain reporting requirements were met. Officials of the Bank Board reportedly were unhappy with the state's regulatory procedures involving the savings and loan industry.

The matter blew over the next month after FHLBB regulators and L.L. Bowman, state savings and loan commissioner, resolved their differences — but not before drawing public attention to the problem.

The agreement calls for periodic review by the FHLBB and sets out certain examination procedures to be followed — evidence of the federal government taking a more than cursory interest in the state's S&Ls.

It is Mr. Bowman's job to see that the Texas institutions are overseen properly, and in a recent interview he admitted that the health of certain S&Ls in Texas is questionable.

"I'd say about 80% are O.K.," Mr. Bowman said. "The reason I characterize it that way is because there are still



If you're going to increase your bank's profitability, you're going to have to increase productivity and improve customer service.

And you're not going to do that with a branch automation system that doesn't have a proven track record. State-of-the-art is a meaningless state if it doesn't drop dollars to your bottom line.

On the other hand, there's no risk with ISC's Pinnacle® branch automation system. It's already proven what it can do.

When Society National Bank of Cleveland let their operators conduct a side by side comparison of the Pinnacle system against other systems, the results showed a clear preference.

In the areas of new account processing, electronic journal review, and printing capabilities, 90% of the operators chose the Pinnacle system and 70% chose the Pinnacle system in terms of user-friendliness and overall

Top 50 Thrift Parents Post Big Increase In Deposit Share, According to Survey

Continued from Page 1

dustry — savings banks and savings and loans — rose by only 11.2% in 1984, to $904.9 billion from $807.2 billion.

These are some of the findings of *American Banker's* fifth annual survey of the nation's top thrift holding companies. The listing includes holding companies for both savings banks and savings and loan associations.

Two acquisitions by the $151 billion-asset Citicorp — the nation's top commercial banking firm and the nation's top thrift holding company — accounted for more than 11% of the deposit gain posted by the top 50 firms. In January 1984, Citicorp acquired two troubled S&Ls: First Federal Savings and Loan Association of Chicago and New Biscayne Federal Savings and Loan Association of Miami. Subsequently, the thrifts were renamed Citicorp Savings of Illinois FS&LA and Citicorp Savings of Florida FS&LA. The Chicago-based thrift ranked 27th in deposits at yearend 1984 with $3.6 billion, and the Miami-based S&L ranked 66th with $2.1 billion.

Citicorp became an S&L holding company in 1982 with the acquisition of Fidelity Savings and Loan Association in San Francisco. At yearend 1984, Citicorp Savings FS&LA, as the S&L is now known, had $2.8 billion in deposits to rank 44th among the top thrifts in deposits.

An acquisition by the $7.2 billion-asset Texas Financial Corp. of Dallas, the 15th largest thrift holding company, accounted for more than 6% of the deposit gain posted by the top 50 firms. Texas Financial acquired the $3.1 billion-deposit Gibraltar Savings Association of Houston on June 29, 1984. Texas Financial also owns the $2.4 billion-deposit First Texas Savings Association in Dallas.

Despite the gain in market share, the top 50 firms in the savings industry hold a substantially smaller share of their market than commercial banking firms. The top 50 commercial banking firms controlled almost 46% of commercial banking deposits at yearend 1984.

American Banker also found that the number of companies registered by the Federal Home Loan Bank Board to become savings and loan holding companies rose 27.8% last year, after increasing by almost 30% in 1983. The major factor in this increase is the movement by many S&Ls to stock ownership.

According to data from the Bank Board, there were 262 registered holding companies at yearend 1984, up 27.8% from 205 registered holding

Addenda: Late Changes In Top-50 Thrift List

Four corrections in the listing of the top-50 savings institution holding companies on page 22 arrived too late for inclusion in the table. All of the corrections reflect changes in the total deposits category. Production schedules did not make it possible to correct the listing before publication.

The listing includes savings institutions that also own other savings institutions. Two of the corrections involve such institutions: seventh-ranked Goldome FSB, Buffalo, N.Y., and 18th-ranked Peoples Bank, Bridgeport, Conn. The 1984 deposits shown for these institutions only include the deposits of the respective savings institutions which they own. However, since they are savings institutions themselves, their deposit totals should include their deposits.

- Goldome had $9.8 billion in deposits on Dec. 31. If these deposits are added to the $1.5 billion in deposits reported for Goldome Savings Bank, St. Petersburg, Fla., Goldome FSB controlled $11.3 billion in savings institution deposits at yearend.
- Similarly, Peoples Bank had $3.444 billion in deposits at yearend. When the $1.7 million in deposits of Guardian Federal S&L Association are added to this total, Peoples Bank controlled savings institution deposits of $3.445 billion at yearend.
- The Dec. 31, 1983, deposit total for 10th-ranked First Nationwide Financial Corp., San Francisco, is not shown. Its deposits totaled $5.9 billion.
- The fourth error is the Dec. 31, 1984, deposit figure reported for 19th-ranked United Financial Group Inc., Houston. The deposits controlled by this institution totalled $2.29 billion and not $2.29 million as reported. ■

The Sears Sounding Board

"Technology is driving radical change in the delivery and even the definition of financial services."

"All forms of banks and financial institutions should have equal opportunity to diversify and to offer services to meet the changing demands of the economy and customers."

In the marketplace of ideas, just as in the marketplace of goods and services, vigorous competition best serves the American consumer. The ***Sears Sounding Board*** *is a forum created to enable business and government leaders to share their views on the increasingly vital consumer issue of financial service deregulation.*

Walter B. Wriston, former Chairman, Citicorp/Citibank, speaks out on the subject of financial services deregulation.

Quoted above is a sample of Walter B. Wriston's thoughts on this controversial topic. For your FREE COPY of his complete white paper, fill out the coupon and mail to: Sears Financial Network, P.O. Box 8597, Chicago, Illinois 60680.

Levy . . .

Continued from Back Page

der control of the old management," he said. "Management consignment contains the problem, utilizing talent out in the field."

"What we're looking at is a mosaic," Mr. Levy said, with the management consignment program as one piece of the mosaic that the board is creating to solve the thrift industry's problems. Another piece of the mosaic is the so-called "406 Corp.," he said.

The proposed new corporation would be a savings and loan set up by the Bank Board to dispose of the assets of failed institutions. The corporation is not yet operational because it has to go through the Bank Board's charter approval process, Mr. Levy said.

"We're not creating a federal agency," he stressed. "We're establishing a savings and loan."

The application process for a new thrift charter is slow, even for a special association like this one. "Nothing gets acted on in three weeks," Mr. Levy said.

The FSLIC has only 23 or 24 people who work on disposing of assets of failed institutions, he said. "They can't deal or cope with problem assets. They just don't have the people to deal with it."

The new asset corporation would "bring in new entrepreneurial types, not savings and loan types," he said. "It needs people who are creative in putting deals together."

The thrift industry's image has taken a beating this year, due in part to the well-publicized problems in Ohio and Maryland. But Mr. Levy doesn't think the image problem is unique to thrifts. "I think there's a sense of concern by the public about all institutions," he said. "Both industries [thrifts and commercial banks] have to build back credibility."

Farm Credit Bank Woes

Problems associated with any financial institution affect the public's perception of all institutions, he said, citing the huge losses recently announced by the Farm Credit Banks. "People don't even understand what [a Farm Credit Bank] is," he said. "It's a continuation of the kind of bad news that shakes people up."

On the positive side of the thrift industry, Mr. Levy points to the strong earnings performance this year. "We're moving to a real change in the economic picture and bottom-line profits," he said.

The U.S. League is predicting net income for the industry of more than $5 billion this year, topping the record of $3.9 billion set in 1978. About 85% to 90% of the institutions are profitable, he said.

Mr. Levy's institution, Guaranty Savings, had a return on assets of 0.95% for the fiscal year that ended Sept. 30. Guaranty, with more than $200 million in assets, is primarily involved in mortgage banking. "We have focused on our strength, which is mortgage lending."

Thrifts have benefited from lower interest rates this year, but will probably not be hurt if rates rise next year, Mr. Levy said. "Even if rates were to turn around at yearend and start rising, there would be a lag effect," and earnings would still be strong.

Mr. Levy is looking to a profitable year for the industry in 1986. "The outlook is essentially tied to interest rates," he said.

A second straight year of strong earnings would be a big boost for the industry as it recovers from its problems over the last few years. "It would go a long way to restoring health," he said. ■

Top 50 . . .

Continued from Page 41

companies in 1983. In 1982, 158 holding companies were registered, and in 1981, there were just 93 holding companies.

180 Companies Surveyed

American Banker surveyed 180 holding companies. Of this total, 83 submitted data for the survey. Three others indicated that they began operating in 1985, while five no longer exist, having been either acquired through merger or collapsed into their savings subsidiary. Four stated that they no longer owned a savings institution, and 85 did not respond.

From those reporting, the top 50 — based on their consolidated assets on Dec. 31, 1984 — are listed. However, some diversified companies do not consolidate the assets of their thrift subsidiaries. In many cases, these diversified companies have established financial services holding companies, which are the direct parent of their thrift subsidiaries. In these cases, the assets for the financial services holding companies are used whenever possible.

The listing includes both diversified holding companies, such as Sears, and nondiversified holding companies, such as Citicorp. A diversified holding company is defined as a company whose income comes primarily from activities not related to their thrift business. A nondiversified holding company is one whose nonthrift holdings and activities are related to the thrift business. Included among the nondiversified companies are thrifts that own other thrifts.

Other Survey Findings

- Assets of the top 50 thrift holding companies were $461 billion on Dec. 31, 1984, up 26.4% from $364.6 billion for the top 50 firms a year earlier. The top 50 controlled 58 thrifts at yearend 1984, compared with 56 institutions controlled by the top 50 a year earlier.
- The top 50 companies consisted of 45 nondiversified companies with combined assets of $378.1 billion and five diversified companies with combined assets of $82.9 billion. A year earlier, the top 50 firms had 44 nondiversified firms and six diversified firms, with assets of $292.6 billion and $72 billion, respectively.
- The largest gain in rank among the top 50 was posted by the Homestead Financial Corp. of Burlingame, Calif. Its assets increased 115% to $3.04 billion at yearend 1984 from $1.41 billion at yearend 1983, moving it up seven places in rank to 22d place. Homestead Financial is the parent of Homestead Savings FS&LA, San Francisco, the nation's 61st largest thrift with deposits of $2.2 billion at yearend. ■

The Bond Buyer Municipal Bond Index

	Nov. 1, 1985	Oct. 31, 1985	Oct. 25, 1985
Index	87-06	86-23	86-01
Yield	9.74%	9.81%	9.92%

The Bond Buyer Municipal Bond Index was designed by the Chicago Board of Trade to serve as the basis for trading Long-Term Municipal Bond futures contracts when approved by the Commodity Futures Trading Commission. The Index represents an average of the figures obtained when the price of each of 40 select term bonds is divided by a figure derived from the amount at which the bond would be priced to yield 8%. In all computations, the maturity of a bond is represented by its first call at par. The Index is computed daily and is quoted in points and 32nds.

AmeriFederal could probably expand faster without taking risks, Mrs. Miller said. The savings bank is heavily involved in mortgage banking, which she said is a labor intensive business. AmeriFederal could take on more assets without having to significantly increase its staff or add on more expenses, she said.

"We could grow prudently faster than we're allowed to," she said. "The few high-flyers are making it difficult for all of us." ■

Bankers Trust Unit Joins New York Exchange

By ANDREW ALBERT

NEW YORK — An institutional brokerage unit of Bankers Trust New York Corp. was accepted as a member of the New York Stock Exchange Friday and immediately launched its trading operations on the exchange floor.

Last summer, Bankers Trust announced plans for its subsidiary, BT Brokerage Corp., to begin executing stock trades for the institutions and wealthy individuals already using the bank's custody services.

BT Brokerage won Federal Reserve Board approval in April and last summer was registered with the Securities and Exchange Commission as a broker-dealer. Friday's acceptance as a Big Board member represented the final obstacle for the unit.

Through BT Brokerage, Bankers Trust becomes one of a dozen or so banks with affiliates that hold seats on the New York Stock Exchange. The new Bankers Trust subsidiary is believed to have paid between $380,000 and $480,000 for its seat on the exchange.

Big Board membership allows the unit to set up its own floor trading operation, which BT Brokerage started under the leadership of Paul I. Olsen. Mr. Olsen was hired from A.G. Edwards & Sons Inc., a regional brokerage firm based in St. Louis. He was named vice president and director of the unit's floor trading.

Paul W. Higgins, a vice president of Bankers Trust Co., was named chairman of the brokerage unit. Janice M. Deluis, also a vice president at the bank, will serve as president.

BT Brokerage will execute trades for customers of Bankers Trust Co.'s Wall Street Account, its discount brokerage unit. A Bankers Trust spokeswoman emphasized that BT Brokerage would not serve customers of the bank's trust department because of restrictions in some trust agreements.

BT Brokerage is based in a Midtown Manhattan office and opened for business with a dozen employees and about $2 million in capital. ■

reductions in corporate and individual tax rates."

James Q. Riordan, senior vice president of Mobil Corp., charged that this was unrealistic: "The statement assumes that Congress can achieve rate reduction, dividend reduction, take the poor off the tax rolls, maintain the research and development credit, maintain appropriate capital investment and international competitiveness provisions, and still come up with a revenue-neutral income tax package."

Mr. Riordan went on to say, "It is for this reason that the statement concludes we can defer consideration of a consumption tax. I disagree with the assumption and the conclusion. We will need to enact a consumption tax at the same time we lower income tax rates and increase exemptions if we wish to keep total tax revenues neutral. We should be working on a consumption tax now." ■

Chemical Promotes 3 To Sr. Vice Presidents

NEW YORK — Chemical Bank has named three new senior vice presidents and a managing director.

Named senior vice presidents were Charlene T. Coutre, chief of staff for administrative services in the bank's operations division; Rusty L. Myer, divisional director of human resources for the world banking group; and Gary M. Sherman, group head of the emerging investor area of Chemical's trust and investment division.

The new managing director is M. Guy Heald, head of Chemical's international foreign exchange activities, based in London. ■

Many successful lenders rely on Insured Credit Services' Loan Profit Programs to build volume and to safeguard principal and profit against loss. ICS Programs are available to guarantee principal and yield thereby maximizing a lender's potential gain while eliminating risk!

Insured Credit Services, Inc., a wholly-owned subsidiary of Old Republic International Corporation, is the nation's leading insurer of property improvement and home equity loans. ICS can provide a wide range of services including...

- full protection covering principal, interest and costs arising from borrower default for any reason,
- guaranteed rate protection safeguarding profits on fixed rate loans against rising money costs,
- the development of insured consumer loan portfolios through established dealer/contractor networks,
- bulk purchase of high yield, insured, fully serviced consumer loan portfolios.

Since 1954, more than 1,900 financial institutions have used Insured Credit Services to build and protect their consumer loan business most efficiently and effectively.

To find out more about these proven, successful programs, complete and return the coupon below. Or, for immediate information, call William F. Schumann, President, direct at 312/621-9400. By the end of the week you could have the "Lender's Edge" working for you.

ICS: THE LENDER'S EDGE.

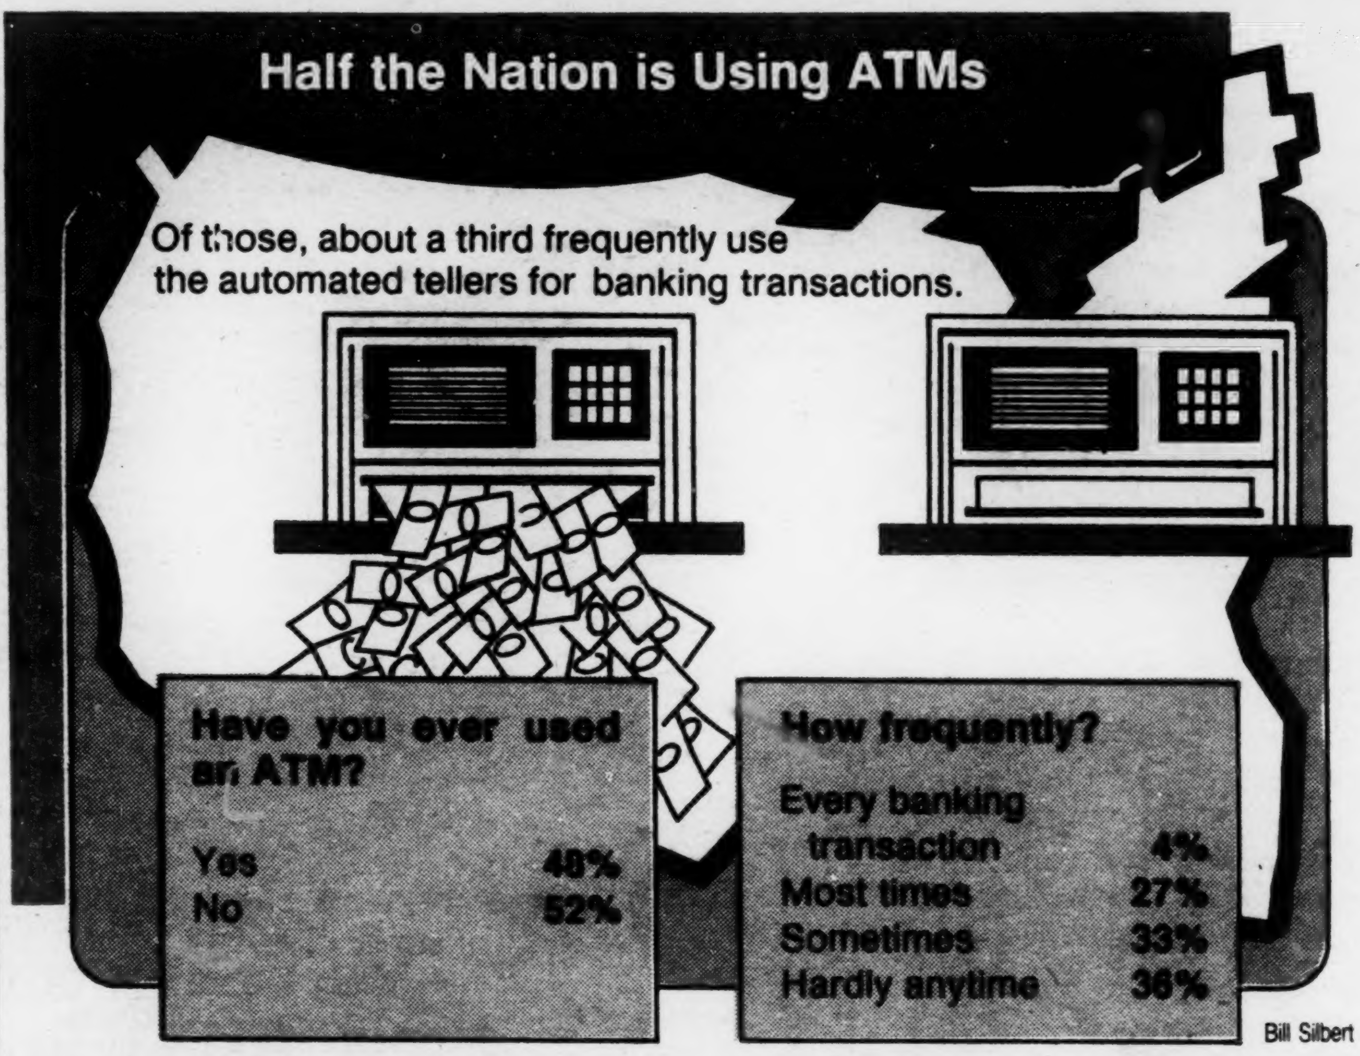
Wooing Customers to ATMs: Beyond Puppy Love



Bill Silbert

By DAVID LaGESSE

The public's affection for the automated teller machine has become more than a casual affair, with about half the country having used the electronic version of the great American money machine.

How Consumer America Views the Changing Financial System

Half of those who have tried ATMs, though, say they still prefer handling routine business through teller windows, according to responses to a nationwide survey commissioned by the *American Banker.*

That finding disturbs some of those charged with encouraging customer use of the estimated 60,000 to 70,000 ATMs currently in place nationwide.

➵ ATMs: Page 12

Self-Evaluation Will Put Overdrafts in New Light

By TOM FERRIS

NEW YORK — The banking industry is quietly preparing for a government program that could have far-reaching implications for wholesale banking operations and on how the marketplace judges the creditworthiness of individual banks.

The program, effective March 27, limits the size of overdrafts any institution can incur during the day while transferring funds over the government's Fed Wire network and over private payment systems.

To comply, thousands of banks have to rate themselves on the basis of creditworthiness, operational controls, and credit policies. The evaluation determines each institution's permissible level of so-called "daylight overdrafts," which occur when a bank wires out more funds than are in its reserve account or when it has sent more funds over a private network than it has received.

Experts say the risk-reduction policy could affect transaction-processing operations, competitive positioning, corporate customers, and even bank credit ratings. Implementing

Bank Failure No. 100

Conditions Indicate that Toll Will Continue

By BART FRAUST

NEW YORK — One hundred banks insured by the Federal Deposit Insurance Corp. have failed so far in 1985 — the most since 1933, the year before commercial banks were first required to obtain federal deposit insurance.

100th
BANK FAILURE
1985

Buried on Friday were No. 99 and No. 100. Number 99 was the $9.3 million-asset Auburn Savings Bank in Auburn, Iowa, a farm bank. No. 100 was the $47 million-asset Northshore Bank, Houston, closed because of real estate woes.

Exactly one-half of the banks on the 1985 failure list were designated as farm banks, that is, at least 25% of their loans were related to agriculture. Farm

Number of Problem Banks Mounts in Year with 100 Failures

Continued from Page 1

banks represent about 27% of all commercial banks.

The failures have been concentrated in a handful of states. Forty-four percent occurred in Iowa, Kansas, Texas, and Oklahoma. Banks in those states have heavy concentrations of loans to the farm and energy sectors, two depressed areas in the economy.

Another 15 to 20 banks will probably go under before the end of the year, according to FDIC officials. There are no signs that the situation will abate next year, and FDIC officials are predicting another 100 or so failures in 1986.

In all of 1984, 79 banks failed, itself a record for post-Depression America. There were 48 failures in 1983.

The FDIC attributes almost all of the increase in failures from 1984 to 1985 to the troubled farm sector. However, to many observers, including many officials at the insurance agency itself, a common thread runs through all bank failures, farm and nonfarm alike: Banks fail because of mismanagement.

Farm bankers, like energy lenders, overextended their institutions in boom times, and now that farm land values are depressed and exports are down, these lenders are paying the price.

Another persistent problem is bank fraud. Stephen Katsanos, a spokesman for the FDIC, noted that insider abuse and other kinds of criminal activities are believed to have occurred in about one-third of the failures this year.

The worst single day since the Depression in terms of bank failures occurred this year. On May 31, seven commercial banks were closed, including one relatively large institution, the $108 million-asset Bank of Oregon in Woodburn.

In and of itself, the rising tide of commercial bank failures is not a cause for major concern and simply reflects a more competitive environment in banking with the advent of deregulation of interest rates on deposits. Before deregulation, bank profits were more or less protected by the government. Today, banks have to compete for deposits and for loans, and some small banks are unable to survive in this climate.

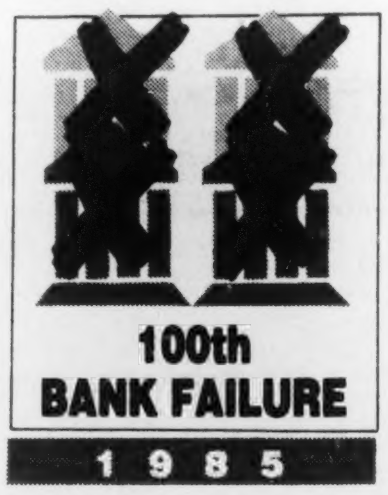
Still, most small banks do survive, and, in fact, thrive. Small banks generally are more profitable than large banks in terms of return on assets.

David Cates, a principal of Cates Consulting Analysts Inc., a New York bank consulting firm, is an often-quoted proponent of the view that the increase in bank failures does not represent a crisis situation. "One hundred failures is not 100 disasters," points out Mr. Cates.

Mr. Cates adds that about four new banks are formed each year for each bank that fails. Last year, 438 new banks opened.

Generally, the failed banks are small institutions. In the first half of 1985, for example, 81% of the failed banks had less than $50 million in assets, and only 6% had more than $300 million in assets.

The largest FDIC-insured institution to fail in 1985 was the $5.4 billion-asset Bowery Savings Bank, New York City, which was sold recently to individual investors in a transaction assisted by the insurance agency.



Including the Bowery, the average asset size of a failed bank this year was $82.6 million. Excluding the Bowery, the average asset size was $28.7 million. The Bowery made up about 65% of the total assets of failed banks.

Most failed banks are taken over by new owners, like the Bowery, rather than liquidated. Of the first 98 bank failures this year, only 18 were liquidated, or 18.4%. Of the 79 failures last year, 16 were liquidated, or 20.3%.

In addition, the numbers pale in comparison with those before the establishment of federal deposit insurance in 1934. Between 1923 and 1933 a total of 13,937 banks failed, almost as many banks as are operating today. In 1933 alone, 4,000 banks became insolvent.

Fulton Posts First Quarterly Profit in Years

Special to the American Banker

ATLANTA — Fulton Federal Savings and Loan has reported its first quarterly profit since late 1982.

The Atlanta-based mutual S&L, the second largest in Georgia with assets of $2 billion, said it earned $590,000 in the third quarter, including a profit of $300,000 in September.

Henry Garmon, chairman and chief executive officer, said the earnings included several extraordinary gains, including $1 million on the sale of commercial real estate loans. The company had an operating loss of about $600,000 in the third quarter, he said.

"We aren't out of the woods yet," he added.

For the first nine months, the company reported a loss of $5.4 million, compared with $15 million during the same period a year ago.

Mr. Garmon said he expects Fulton Federal to lose less than $5 million for all of 1985, after losses of $21 million in 1984 and $19 million in 1983. He said he did not rule out the possibility that the company would be profitable this year.

Mr. Garmon said the company's operating results are expected to turn into the black in the second quarter of 1986 if interest rates remain stable. He said the company may consider converting from mutual to stock ownership next year.

Many of Fulton Federal's difficulties stem from a series of statewide acquisitions of small S&Ls in the early 1980s. Consolidating those institutions and their computer systems led to a period of chaos in the company's data processing operations.

In the midst of those problems in early 1984, Fulton Federal's board named Mr. Garmon to replace Edward H. Schweers, who resigned as chief executive officer. Several other top-level managers left the company in 1984. ■

T.A. Pardue, Kentucky Banker, Dies at 88

Special to the American Banker

LOUISVILLE — T.A. Pardue, a former director of Farmers Bank and Capital Trust Company in Frankfort, Ky., died Oct. 28 in Louisville. He was 88.

Mr. Pardue began his banking career with Farmers National Bank in Scottsville, Ky., and became a vice president.

From 1933 to 1939, Mr. Pardue was a bank examiner for the Federal Deposit Insurance Corp. He went to Frankfort in 1939, joining Farmers Bank as a vice president. A year later, he became a director of the bank. When Mr. Pardue retired in 1972, he was senior vice president and trust officer.

Mr. Pardue was a 50-year member of the Kentucky Bankers Association. ■

Treasury Implements South African Loan Ban

By NINA EASTON

WASHINGTON — The Treasury Department on Friday issued regulations implementing President Reagan's Sept. 9 ban on new loans to the South African government.

The regulations forbid financial institutions from making any loans — directly or indirectly — to the South African government "or any entity controlled by that government."

The rules go beyond direct loans to cover trade credits and debt securities issued after Nov. 11. Financial institutions also are prohibited from purchasing loans made to South Africa by others.

President Reagan announced the ban as a way to pressure the South African government to implement reforms in its apartheid system.

The ban applies to banks, savings and loans, trust companies, securities brokers and dealers, investment companies, and employee pension plans. Parent companies and subsidiaries of these institutions also are forbidden from lending to South Africa.

The rules lay out some exceptions to the ban, including loans for educational, housing, or health facilities that "would benefit all persons on a nondiscriminatory basis." Loans that will "improve the economic situation of South Africans disadvantaged by apartheid" also are exempt from the ban. ■

Mismanagement Cited Among Failed Banks' Ills

Continued from Page 28

The number of bank failures fell to 61 in 1934, and of these, only nine were insured by the FDIC.

Even if 150 banks failed this year, that would represent only about 1% of the nation's 14,469 commercial banks.

Signs of More Serious Nature

However, the rising number of bank insolvencies looks more serious when other factors are taken into consideration, including the increasing number of banks on the FDIC's problem bank list, the continuing woes of federally insured thrift institutions, the precarious state of the Federal Savings and Loan Insurance Corp., and the collapse earlier this year of private deposit insurance funds in Ohio and Maryland.

A spokesman for the FDIC said there are now 1,097 banks on its problem list, compared with 848 at yearend 1984. Problem-list banks are those rated 4 and 5 on the agency's 5-point CAMEL rating system. CAMEL evaluates a bank's capital, asset quality, management, earnings, and liquidity.

The FDIC did not disclose how many farm banks are currently on the problem list, but as of August 1985, they made up 37.2% of the total 975 banks then on the list, up from 36.1% at yearend 1984.

In addition, a total of 148 final cease-and-desist orders have been issued by the insurance agency this year, compared with 125 in 1984. The orders are often issued to stop what the FDIC considers to be risky or unsound banking practices.

Mr. Cates' firm has its own rating system for banks — based on several financial ratios — and he says the number of banks given its most unfavorable rating is about 1,500.

Not all banks on either problem list fail.

Over the last few years, fewer federal thrifts have failed than commercial banks. So far in 1985, 40 thrifts regulated by the Federal Home Loan Bank Board have failed, including 15 assisted mergers, eight liquidations, and 17 institutions that are being managed by other thrifts. Twenty-seven thrifts failed in 1984.

The comparatively low number of thrift failures masks deeper problems. Despite higher earnings in the industry in general, hundreds of thrifts are being kept afloat by federal income capital certificates and other accounting techniques.

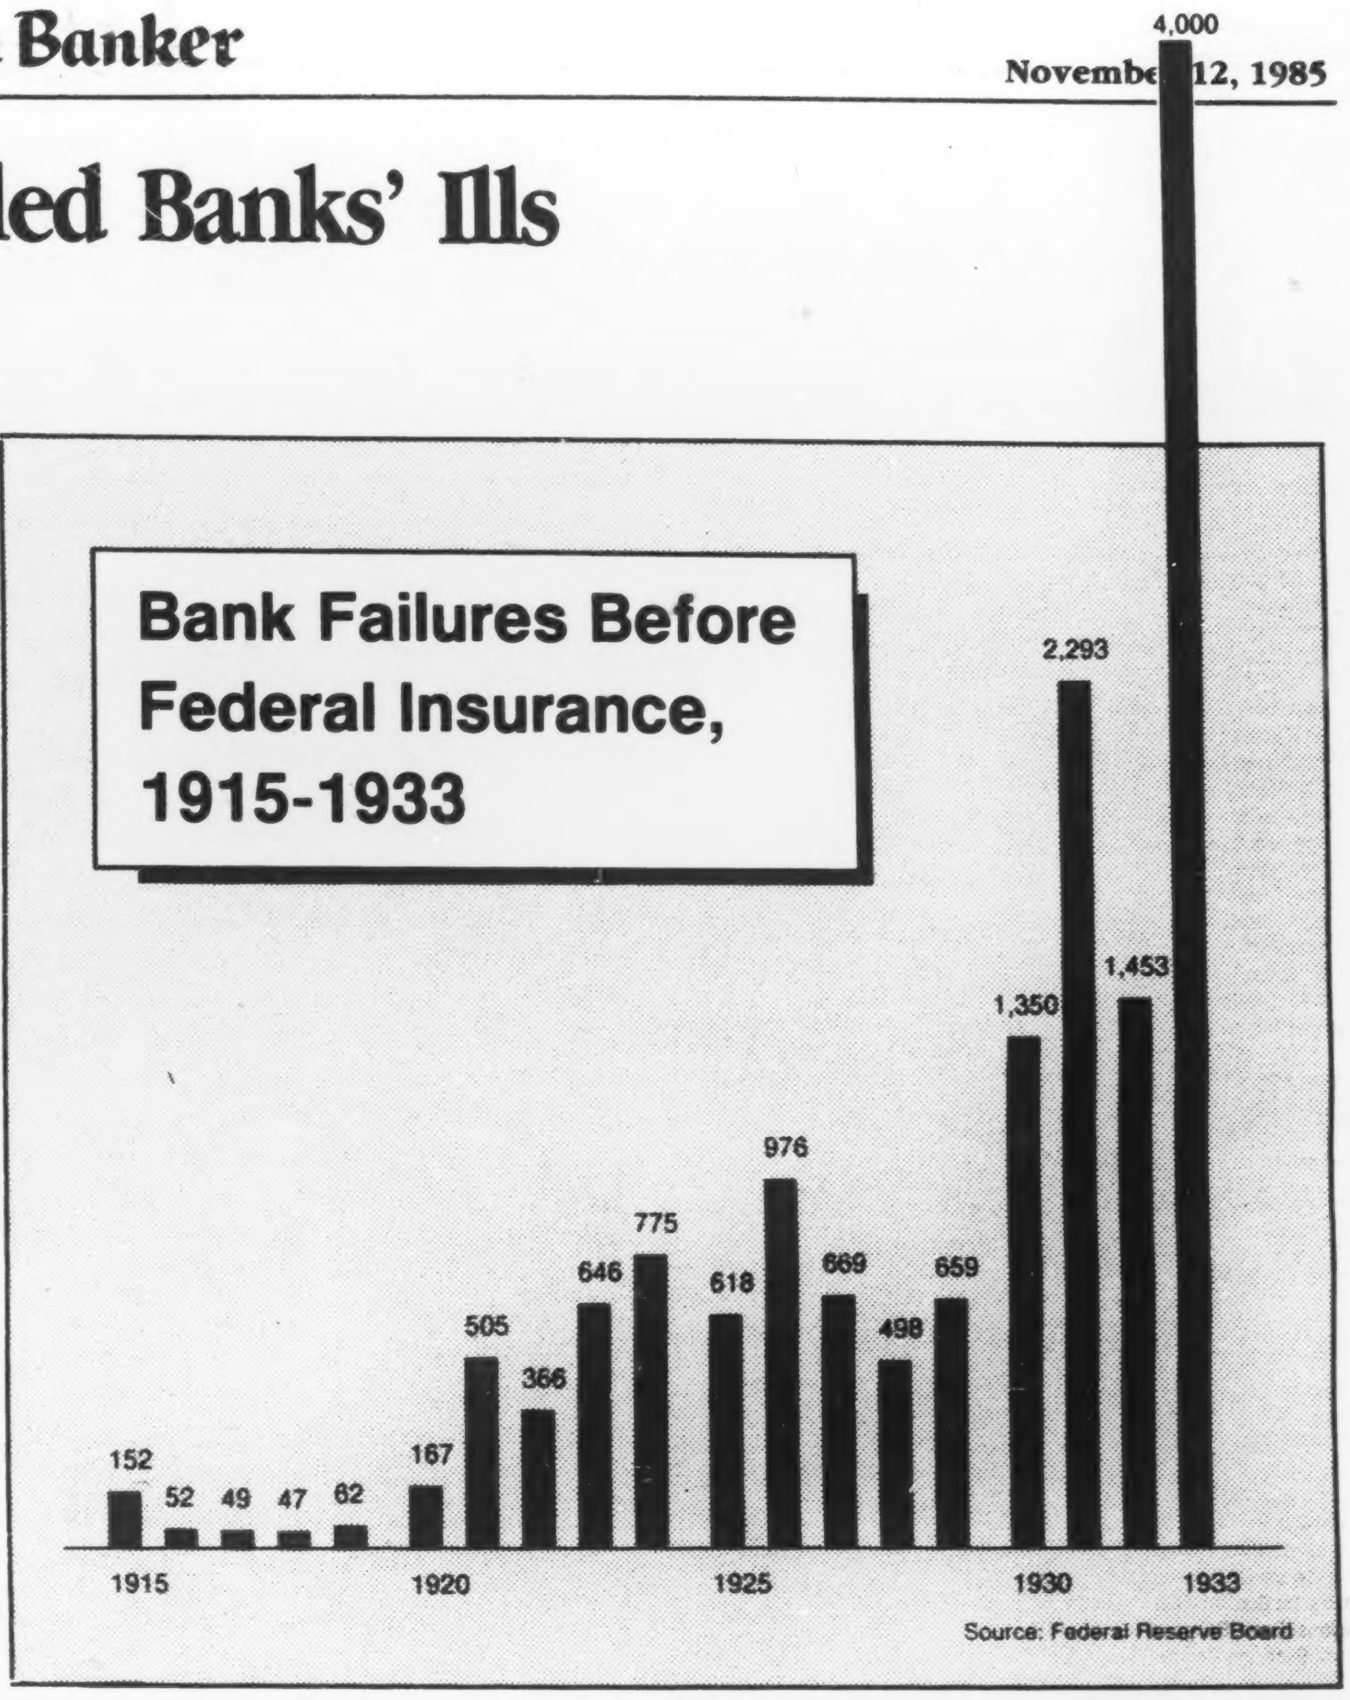
Depleted Insurance Fund

The Federal Savings and Loan Insurance Corp.s insurance fund has been seriously depleted, and Federal Home Loan Bank Board Chairman Edwin J. Gray has suggested as one option to aid the fund that Congress allow a special $8.5 billion insurance premium. He conceded that the additional assessment could put 50 to 100 thrifts out of business.

Aid for the troubled insurance fund is expected to come from formation of a corporation to manage and dispose of assets acquired by the FSLIC from failed thrifts.

The FSLIC fund has reserves of $6.8 billion. The FDIC has net worth of $19.5 billion.

There is some evidence that the thrift's problems are starting to affect the public's perception of the financial industry in general.



Source: Federal Reserve Board

Dennis P. O'Connell/American Banker Nov. 8, 1985

A recent *American Banker* survey of consumer attitudes found that six of 10 consumers have heard that savings and loans are having troubles. Those who said they heard of the problems also were more likely than others to express doubts about the overall health of the U.S. financial system, the survey found.

So far, however, consumer doubts have not been translated into bank runs. "I am not really aware of any bank-run situations," says Stanley C. Silverberg, the FDIC's director of research and strategic planning.

"The runs we've seen have been by big depositors — at Continental Illinois and First National Bank of Midland, Tex. There is not much evidence of depositors losing faith in the insurance system."

Farm Woes Biggest Factor

The major factor in the increase in bank failures since last year has been the agricultural sector, depressed by falling land values, lower commodity prices, and falling exports.

In the September 1985 edition of its *Economic Review,* the FDIC noted: "During the past 14 months, farm banks accounted for just over 50% of all bank failures. Nonagricultural banks have been failing at about the same pace as in 1984, meaning that agricultural bank failures almost totally account for this year's higher failure rate."

And there is no help in sight, particularly given the continued low demand abroad for U.S. farm products. "Loan problems at agricultural banks are high relative to those of other banks and relative to the recent past. Given the outlook for the agricultural economy, further problems at agricultural banks seem almost certain," according to the FDIC report.

While the publicly released FDIC papers point the finger at the agricultural economy, in confidential documents the agency is critical of the farm bankers themselves.

"A study of 28 agricultural bank failures that occurred between Jan. 1, 1984, and Feb. 5, 1985, indicates that none was solely due to adverse economic conditions," according to a confidential agency report obtained by the *American Banker* through the Freedom of Information Act.

"Although a depressed agricultural economy no doubt aggravated conditions and perhaps accelerated the failures, the primary cause in all instances was mismanagement coupled, in many cases, with insider abuse."

The FDIC did not release specific details of the 28 agricultural bank failures.

"Just as farmers who fail are farmers who overexpand, banks that fail are

At 70, William Proxmire Looks To Regain Banking Panel Chair

If GOP Loses the Senate, Deregulation Will Lose Momentum

By BARTLETT NAYLOR

Bankers who want Congress to open new markets, be alert: You may have only one year to accomplish your task. The clock is ticking, say many political observers, because the Democrats stand a good chance of regaining control of the Senate in the 1986 election.

That means that the ranking Democrat on the Senate Banking Committee, Sen. William Proxmire of Wisconsin, likely will retake the committee's reins.

And Mr. Proxmire has some pretty conservative ideas about shaping the financial industry, ideas he outlined during a recent interview in his quiet fifth-floor office on Capitol Hill:

- He opposes nationwide banking, regional banking, and virtually all new products proposed for the industry.

Interstate banking "is a mistake," he says. "In Wisconsin, we're going to lose all the headquarters. Local people are going to find it troublesome to go to Minneapolis to get things approved. They're going to get turned down for loans. With a local bank, you never had that problem."

An Interview With...

- He says he would stiffen regulation, assess insurance premiums on foreign deposits, and raise capital standards.
- On requiring big banks to pay insurance premiums on foreign deposits, Mr. Proxmire asks rhetorically, "Why shouldn't they pay?"
- He says that risk-based insurance premiums, or the idea of charging some financial institutions more for deposit insurance, is "an intriguing idea." But he acknowledges that there are "practical problems": Publicizing risk ratings, for instance, could stigmatize the ability of a bank to attract deposits. "But then," he counters, "that's the point."

Respected Statesman

If Mr. Proxmire's ideas are considered outdated by some, he nevertheless is expected to be a powerful chairman. He himself does not face the voters until 1988, and Mr. Proxmire is a widely respected statesman with 30 years in the Senate who can marshal support for his ideas.

Sen. Jake Garn, R-Utah, has ushered two banking bills through the Congress in his four-year tenure as banking committee chairman. Mr. Proxmire, however, can count more than 10 bills during his six-year tenure as chairman — from the Depository Institutions Deregulation Monetary Control Act of 1980, which set the stage for financial deregulation, to the Financial Institutions Regulatory and Interest Rate Control Act of 1978, known as the "Bert Lance Bill," which toughened laws against insider abuse.

Under Sen. Garn, the banking committee has called no hearings on such industry scandals as E.F. Hutton & Co., the brokerage firmthat pleaded guilty earlier this year to bilking millions from dozens of banks in a check overdraft scheme.

Observers agree that "Prox" would have called hearings into problems of that magnitude.

Mr. Proxmire is cautious about criticizing his colleague and chairman. "I like Sen. Garn. We get along very well. I don't want to get into the subject of his chairmanship."

But the activist legislator says he feels that these are important times. Although he has seen his share of crises, the Senate veteran says banking problems "are worse now."

'Only a Prologue'

"The farm problem [we've seen] so far is only a prologue," Mr. Proxmire says. He also cites the international debt problem. "Some time," he says, "I think we're going to be in really serious trouble."

As the ranking minority member on the Banking Committee, he has no power to call hearings, and he leaves most of the bill-writing to Mr. Garn. At hearings, however, he often serves as the most probing interrogator.

Other members ramble through disorganized speeches or ask questions whose answers are found in high school textbooks. Others simply do not attend the hearings.

Mr. Proxmire attends nearly all hearings, and he asks prepared questions that he has researched with his staff. At confirmation hearings, Mr. Proxmire is famous for bringing up problems concerning nominees that other committee members have ignored.

He has not missed a floor vote since 1966 — the longest record in Senate history.

And although he turned 70 yesterday, Mr. Proxmire remains vigorous by jogging five miles each day to work. He is not too old to be just a little jealous of the superior jogging speed of Mr. Garn: "I couldn't keep up with him, but he's only about 45." (Mr. Garn is 53.)

Mr. Proxmire inspires respect among a wide circle of public officials, including ideological adversaries, and even bankers. John W. Johnson, former president of the Wisconsin Bankers Association and president of the Bank of Spring Green, differs on major banking issues with his senator.

Yet, Mr. Johnson says, Mr. Proxmire "understands the problems of banks," and if he becomes chairman of the Senate Banking Committee, "I see that as a positive." Mr. Johnson adds that he also supports Mr. Garn.

As an antagonist of bank expansion, Mr. Proxmire is hailed by the Independent Bankers Association of America, which is composed largely of community banks. Says Kenneth Guenther, executive director of the Independent Bankers: "Bill Proxmire is the best man in the Senate for promoting, protecting, and nurturing a diversified banking system."

Consumer advocates generally laud Mr. Proxmire. Says Alan Fox, banking expert for the Consumer Federation of America: "He is accessible and understands the need to deal with problems of the unsophisticated consumers."

Though he has seen his share of crises, Sen. William Proxmire says banking problems "are worse now." The farm problem "so far is only a prologue." And the international debt problem? "Sometime, I think we're going to be in really serious trouble."

Even lobbyists fighting for additional bank powers express respect for Mr. Proxmire.

"Prox draws his intellectual roots from Midwest populism and many of the trends in Wisconsin, where there is a deep distrust of banking powers," says Karen Shaw, a lobbyist who represents several large California institutions. "That populism is a strong force, and it's tough to argue with."

Ken McLean, Mr. Proxmire's chief banking aide of 16 years, says "Prox" should not be read as anti-banking. Mr. McLean cites his boss' support for limited new powers such as underwriting mortgage-backed and municipal securities.

Superior Education

Born in a Chicago suburb, Mr. Proxmire was afforded by his physician father the best in education: Yale University and the Harvard Business School.

When he decided to enter politics, Mr. Proxmire chose Wisconsin because it lacked a strong central political party, meaning that he would not have to serve an indenture of 15 years before running for office. That kind of independent bent has characterized his career. While establishing himself in the state, he got a job as a journalist, but was fired after attempting to organize a union.

He won election to the state legislature, but then lost three bids for governor. But in a special election in 1957 to fill the seat of then-Sen. Joseph McCarthy, who died of alcoholism after being censored by the Senate, Mr. Proxmire won, defeating the governor.

Since then, Mr. Proxmire has been reelected with ample margins. Wisconsin Republicans consider him an impregnable institution.

Politically, Mr. Proxmire is a maverick. While often labeled a liberal, he opposed the federal bailouts of New York City, Lockheed Corp., and Chrysler Corp. However, last year he did support the rescue of Continental Illinois National Bank and Trust Co.

He is among the stingiest of senators on fiscal policy, winning top honors from the National Taxpayers' Union.

And on social issues, you might confuse Mr. Proxmire for a southern Republican; he opposes busing and abortion.

In an age of campaign financing scandals, the Wisconsin Democrat appears squeaky clean. He accepts no political contributions nor any speaking engagement fees. He will not accept transportation and accommodation for speeches out of town.

Mr. Proxmire says he makes no investments in any institution where there may be a conflict, and he publishes his tax return every year in the *Congressional Record.* His latest shows a net worth of $563,315, most of that in his Washington, D.C., home.

A saint may raise an eyebrow at the $70,000 in municipal and state bonds; the $37,684 in a Shearson Lehman Brothers money market account; and the $5,334 in a Chevy Chase Savings and Loan account. Chevy Chase is one of the Maryland thrifts that was privately insured and that the federal government came close to bailing out during a statewide run last spring. ■

Nader Group Hits PACs; St Germain Parries

With consumer protection bills before the House Banking Committee, a leading consumer interest group and Committee Chairman Rep. Fernand J. St Germain, D-R.I., have traded some barbed comments.

The U.S. Public Interest Research Group, founded by Ralph Nader, recently let Mr. St Germain see its study of political contributions from banks to members of the House Banking Committee. Mr. St Germain alone received $194,050 during the last four years from the 265 bank political action committees, or PACs, surveyed by the PIRG. Committee members received $2.37 million, and an average of $27,000 each during the 1984 election cycle. This represents a 50% surge in PAC money to committee members over the 1982 election.

Since most members won easy reelection, the consumer organization concluded that the PAC donations were "multimillion-dollar investments well targeted to influence pending legislation." This might seem to be a definition rather than an indictment of PACs, but in publishing these figures, PIRG says it wants to see PACs banned.

In a statement, PIRG bank lobbyist Michael Caudell-Feagan said that "consumers have much to lose if banks' investments pay off. As the House Banking Committee addresses these issues, we hope members will ignore the investments of bank PACs and support strong consumer protection measures."

Mr. St Germain called the PIRG study a smear campaign. "Members of the committee listed in the PIRG release have some of the finest consumer records in the Congress, and it is despicable that a so-called public interest group is so free in smears by innuendo. The release is highly misleading and unfair."

Mr. St Germain exchanged brief words with Mr. Caudell-Feagan and asked in a letter for a reply void of "innuendo or smooth double-talk." In response, Mr. Caudell-Feagan wrote, "We believe there has been a misunderstanding of our intention."

He detailed his organization's case against PAC funds, concluding that the group is "critical of the apparent intent of the bank PACs, not the votes of the members."

— Bartlett Naylor

Failures of 1985 Are Concentrated Among Farm Banks

Continued from Page 30

those that thought the good times would never end," Mr. Cates says. "Management is the crucial thing that determines the survival of a bank."

A Climate for Failure

The point is stated more strongly in a recent report by Carlton Hill Jr., a senior associate at Swords Associates Inc., a Kansas City-based bank consultant with several clients in the Farm Belt.

"Nobody stopped to think that maybe this, like other inflation balloons, would someday burst, and reality would be upon us," he said. "They seem to have forgotten the lessons learned back in the '20s and '30s and even in the early '50s. The catch phrase was that land will always increase in value because God is not making any more land. He may not be making any more land, but we have learned that it is not always increasing in value."

And the FDIC's Mr. Silverberg, director of research and strategic planning, noted that there is more vulnerability in places where there has been fast growth and a high degree of optimism, creating a climate where lenders tend to be less careful about who they lend to and how the loans are secured.

"That's why there have been so few failures in places like New England and the industrial Midwest," he said. "Lenders have been more cautious in those states because they've been hurt before."

Of the first 100 failures this year, the most have occurred in Kansas with 11, Oklahoma with 11, Iowa with 11, Texas with 11, Nebraska with 9, Colorado with six, and California, Minnesota, Missouri, and Wyoming with five each.

Last year and the year before, Tennessee led the nation with 11 and 12 bank failures, respectively. So far this year, four Tennessee banks have failed.

Fraud Continuing Problem

Another nagging problem is bank fraud, which historically has been estimated to occur in some form in about one-half of the failures, although fraud itself rarely causes a bank to fail.

The year's most publicized alleged bank fraud involved the Golden Pacific National Bank, in New York City's Chinatown. The bank was closed June 21 by the Comptroller of the Currency, which cited accounting discrepancies as a reason for shutting down the bank.

The FDIC, acting as receiver, refused to release $14 million to holders of "yellow CDs," so named for the color of the paper they were printed on. The insurance agency, drawing an outcry from the holders as well as from Congress, maintained that it was uncertain whether the funds were insured deposits of the bank.

The agency recently threw the issue into the courts through a lawsuit against the CD holders. The agency also has sued two Golden Pacific officials, charging that they distributed the yellow CD funds to related businesses.

In addition, the FDIC is questioning whether some of the CD holders knowingly took part in the scheme.

As 1985 draws toward a close, the issue of brokered deposits appears to be waning in importance, at least in the eyes of the FDIC, which had been the principal opponent of this means of bank funding.

L. William Seidman, the new chairman of the agency, said in a recent speech before the U.S. League of Savings Institutions that he was "not opposed to brokered deposits per se."

His predecessor, William M. Isaac, maintained that use of brokered deposits caused banks to increase lending risks and often led to their failures.

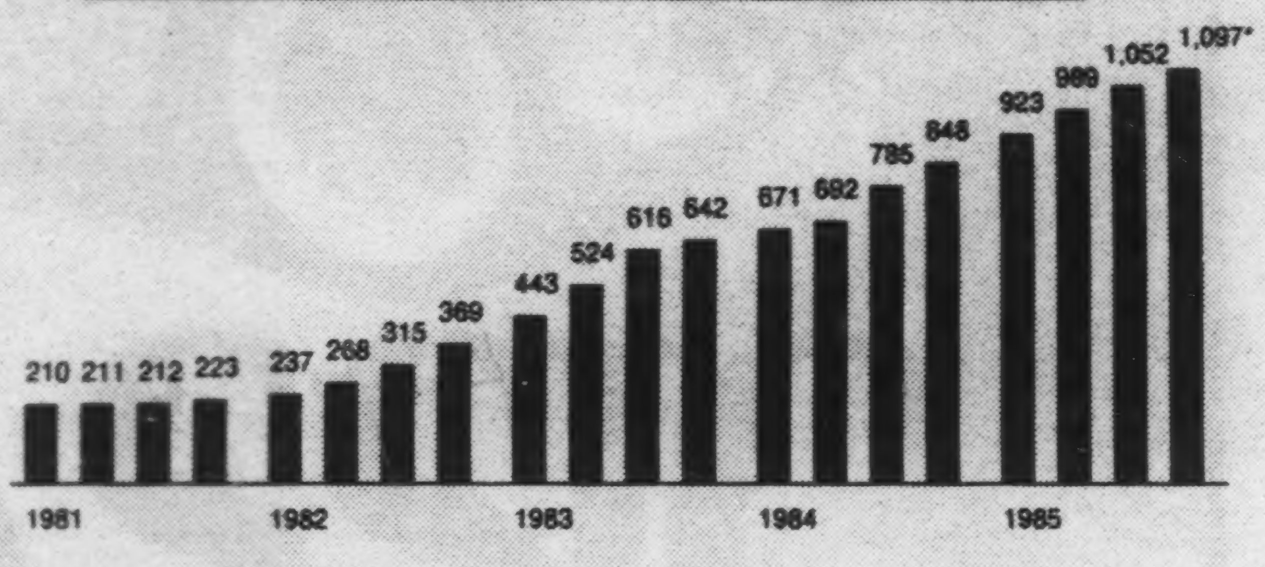
Another sign of the FDIC's softened position on brokered deposits is that the agency's press releases on bank failures no longer include the names of deposit brokers or other intermediaries.

The switch in chairmen is one explanation of the change. In addition, attempts by the FDIC to restrict insurance coverage on brokered deposits have been struck down in the courts.

Legislation to curb brokered deposits has been proposed in Congress. However, last April a House subcommittee found that brokered deposits were a declining factor in bank failures. For example, the study found that in the first three months of 1985, 17% of failed banks held brokered deposits representing 5% or more of their total deposits, compared with 23% in the second half of 1984 and 56% in 1983.

Banks on FDIC's Problem List

Banks under federal supervision are examined by the CAMEL system, which rates banks from 1 (good) to 5 (bad) based on the quality of capital, assets, management, earnings, and liquidity, plus a composite rating. 'Problem' banks supervised by the Federal Deposit Insurance Corp. consist of 4- and 5-rated institutions.



Banks on problem list at end of quarter. *At Nov. 7, 1985. Source: Federal Deposit Insurance Corp.

Dennis P. O'Connell/American Banker Nov. 8, 1985

A First for the FDIC

Brokered deposits were cited in a number of bank failures this year. The FDIC made its toughest stand at Strong's Bank in Dodgeville, Wis., when in June it seized the funds of 11 institutions that placed deposits in the bank through High Yield Management Inc., a Clifton, N.J., money broker.

This was the first time the FDIC had ever withheld paying off on insured deposits, those that fall within the maximum $100,000 in coverage provided per depositor.

High Yield sued the FDIC to gain release of the funds, and in September the agency agreed to pay off the depositors.

The FDIC had suspected that the brokered deposits were used to fund fraudulent activities at Strong's Bank. The agency recently agreed to release the deposits after it could find no evidence that the depositors were aware of the fraud, which resulted in criminal charges being filed against several individuals, including the bank's former president, William Taynor.

One factor that has not changed since last year is that the FDIC and the Bureau of Indian Affairs are still at each other's throats.

On two occasions this year the FDIC has blasted the bureau for placing funds in banks that later failed. The bureau has responded that as a federal agency it has no choice but to obtain the highest rates available.

The FDIC itself has drawn sharp criticism from farm bankers who believe the agency and its examiners are insensitive to the problems of their banks and from banking specialists such as Mr. Cates who maintain that the FDIC is ineffective in spotting problem banks.

In recent years, the FDIC has moved to upgrade its operations in the face of the growing numbers of bank failures. The FDIC staff now totals 6,502, compared with 3,836 at yearend 1984. The sharpest growth, according to Mr. Katsanos, the FDIC spokesman, has occurred in the liquidation division, which has increased to about 3,000 from 300 a few years ago.

In its Kansas City office alone, for example, the staff is expected to increase to 60 by yearend from 15 in September.

The agency also is relying on more specialists from outside the agency to

assist in bank closings and is modernizing the supervisory functions, relying on computerized monitoring of banks.

In addition, the FDIC is now turning toward briefer visits by examiners rather than complete examinations, in some cases looking at a particular area, for example farm or energy loans.

As for the next few years, it is unlikely that the failure rate will ease, particularly if the agricultural sector remains in poor shape.

"I wish I knew what to do about the ag sector," said the FDIC's Mr. Silverberg. "But there doesn't look to be any quick or easy answers." ■

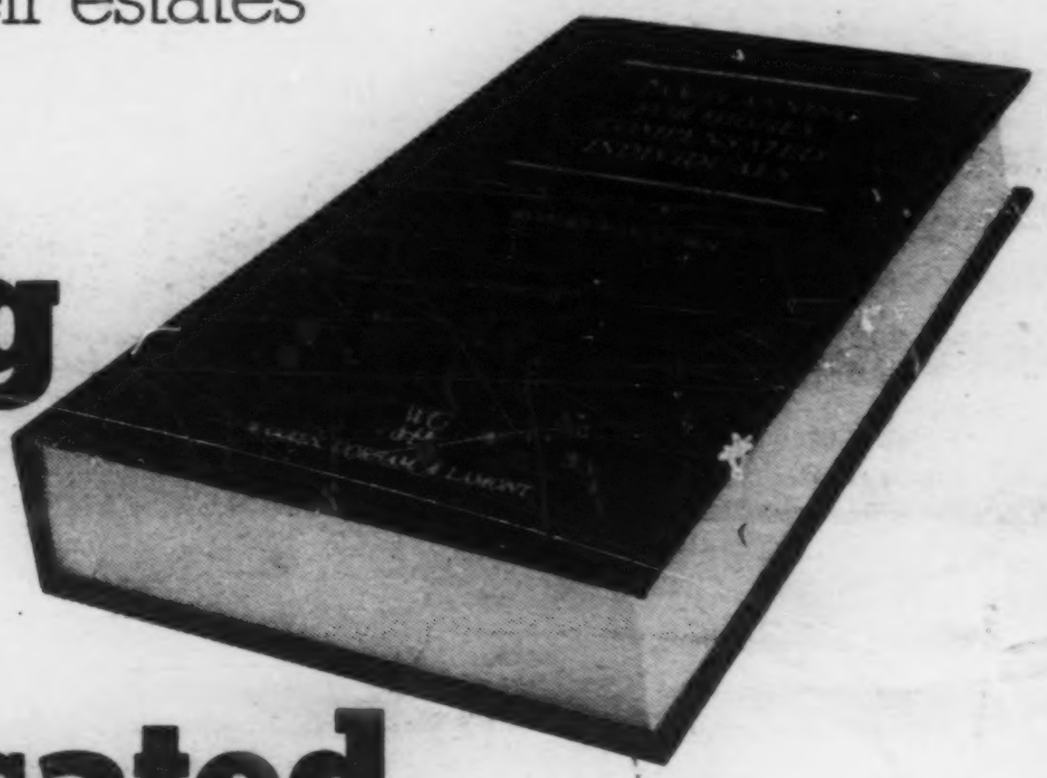
Iowa, Kansas, Oklahoma, and Texas with 11 failures are tied for the greatest number of closed banks up to Nov. 8, 1985. In 1984 and 1983 Tennessee had the most bank failures of any state in the country, with 11 and 12 shut banks, respectively.



Now you can reduce your clients' income taxes while preserving their estates

Tax Planning for Highly Compensated Individuals Robert E. Madden

This practical reference shows you how to put together well-balanced tax plans that integrate lifetime income tax planning with the development of a sound estate plan. It analyzes the impact of all planning actions, then helps you weave them into well thought out plans designed to save your clients income and estate tax dollars. By covering a wide range of planning actions specifically for the highly compensated individual, this reference enables you to answer any questions your client has and to consider all the possible tax ramifications.

And, **Tax Planning for Highly Compensated Individuals** provides the authoritative legal analysis you need to back up any tax plan. It analyzes the law as it relates to a particular tax plan, shows the best time to use that plan, and its effect on other areas of liability. You also get the strategies you need to put that plan into action while alerting you to the estate tax consequences.

Turn to **Tax Planning for Highly Compensated Individuals** for answers to important questions such as:

- How do you devise an estate plan for corporate compensation benefits?
- When is life insurance in a qualified plan preferable to additional group term coverage?
- What tax planning strategies should high-income individuals always consider?
- What are the problem areas with a "Crummey Trust"?
- How can an estate plan be modified to best counter the effects of inflation?
- What are the best ways to make lifetime gifts?
- What are the major differences between incentive stock options and non-qualified options?

Penney Probes Financial Services

Retailer Is Testing CD Market and Will Later Try Mutual Funds

By LAURA GROSS

HONOLULU — Which financial services will consumers buy from the J.C. Penney Co., and under what circumstances are they most comfortable making those purchases?

Those are some of the questions Penney executives are trying to answer through a number of direct response marketing tests.

JCPenney

One test, soliciting six- and 12-month certificates of deposits, began last month in Tucson, Ariz., and has initially exceeded Penney executives' expectations, according to Thomas J. Lyons, executive vice president of the New York-based J.C. Penney Co.

In an interview following a talk he gave during the Bank Marketing Association's annual convention here this week, Mr. Lyons said that, later this year, the company will attempt to solicit mutual funds deposits and possibly unit investment trust business, also through direct response methods.

He said an advertisement in the *Arizona Daily Star* offering 9.3% yield for one year and 9.11% for six months, and telling readers to "talk to your J.C. Penney Insurance representative about these great new CDs," is "one of a number of different types of offers we're trying out to determine what you have to do to move

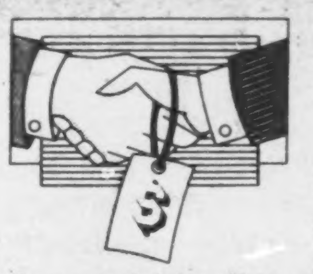
Competition from Commercial Paper Adds to Sluggish Bank Lending Picture

By LISABETH WEINER

CHICAGO — Competition from the commercial paper market and relatively modest economic activity is likely to keep the demand for short-term bank loans just about steady for the rest of 1985 and into the first quarter of 1986.



Commercial Lending

"Commercial and industrial loans at the large banks remain stagnant and haven't changed much since the beginning of the year," said William Sullivan, senior vice president and director of money market research at Dean Witter Reynolds Inc.

A flurry of merger and acquisition activity in September and October boosted numbers a little, but that is over now, he said. "It's sluggish at money center banks and at regional banks as well," he added.

Indeed, the numbers bear him out. According to the Federal Reserve Board's weekly report, commercial and industrial loans — which represent more than 51% of total short-term business credit demand — were only 2% higher as of Oct. 16 than the level of 12 months ago and 1% below the figures of six months ago.

Meanwhile, total short-term business credit demand grew at a rate of 12.2% from last year and 6.6% from six months ago.

Most of the growth in short-term credit, then, continues to be propelled by the commercial paper market, which remains a fertile borrowing

InterFirst Plans Layoffs in Face of Flat Loan Demand

Special to the American Banker

DALLAS — Forecasting flat loan demand in real estate and energy, the InterFirst Corp. announced it will lay off some of its 10,200 workers in an effort to contain costs.

Spokesman Joe Bowles would not disclose the size of the planned cutbacks involving InterFirst — the state's second largest bank holding company — and its 68 member banks. However, industry analysts said they expect a 10% operating reduction, possibly involving more than 1,000 people statewide.

The cost reductions are directly attributable to weak prospects in the energy and real estate sectors and is in line with similar measures undertaken by other regional bank holding companies in Texas.

"These are difficult times in the banking business in Texas," Mr. Bowles said Tuesday, noting the state's 8.1% unemployment rate exceeds the national average by one percentage point.

"We are looking at productivity. We are looking at cost control," he said. "There are some layoffs involved."

Some InterFirst workers learned of the planned layoffs Tuesday. The company expects to announce the full extent of the program between late February and May.

"Each market is being looked at separately," Mr. Bowles said. "There is not a hard and fast rule."

Few workers leaving InterFirst offices in downtown Dallas Tuesday knew of or would speak about the cutbacks. One woman nodded affirmatively when asked whether she had been told.

Analysts said they believe the InterFirst program will mirror a 10% cost containment effort implemented in May by the Houston-based Allied Bancshares Inc.

➻ InterFirst: Page 23

"There is nothing sinister in so arranging one's affairs to keep taxes as low as possible. Everybody does so, rich and poor; and all do right, for nobody owes any public duty to pay more than the law demands: taxes are enforced exactions, not voluntary contributions. To demand more in the name of morals is mere cant."

Big Commercial Banks Increased Farm Lending in 2d Quarter

By L. MICHAEL CACACE

NEW YORK — Farm loans at the top commercial banks in farm lending rose 4.5% in the second quarter over the first quarter of 1985.

In a special listing published today, the *American Banker* identifies all banks with $50 million or more in domestic farm loans outstanding on June 30. There were 47 such banks at midyear, and they had farm loans totaling $8.58 billion on June 30. This was up $370 million from $8.21 billion on March 31.

The four largest banks in farm lending are all California-based. They are:

- Bank of America, San Francisco, with $1.96 billion in farm loans at midyear — up 2.2% from $1.92 billion on March 31.
- Wells Fargo Bank, San Francisco, with $746 million, up 10% from the first quarter.
- Security Pacific National Bank, Los Angeles, with $638 million, up 0.9%.
- Crocker National Bank, San Francisco, with $400 million, up 5.9% from the first-quarter total of $378 million.

California — with the four largest, identified above, plus three others — had the greatest number in the listing of the top banks in domestic farm loans on June 30. Next in the rankings, with four banks each, were Idaho, Texas, and Washington. Nebraska, New York, and North Carolina follow, with three banks each.

Of the 47 top banks in farm loans outstanding, only seven are from the agricultural Midwest region, which comprises 10 states: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Nebraska, North Dakota, Ohio, and South Dakota.

These banks are: eighth-ranked First Bank South Dakota NA, Sioux Falls; ninth-ranked Norwest Bank South Dakota NA, Sioux Falls; 23d-ranked Omaha National Bank; 31st-ranked Norwest Bank Omaha NA; 37th-ranked First National Bank, Holdrege, Neb.; 42d-ranked Continental Illinois National Bank and Trust Co., Chicago; and 44th-ranked Monticello State Bank, Iowa.

The bank with the largest gain in farm lending was RepublicBank Dallas NA. Its farm loans rose by more than 45% in the second quarter to $53.2 million from $36.5 million. And it advanced 27 places to rank 43d in farm lending on June 30.

First Security Bank Idaho NA, Boise, had a 31% gain in farm lending to $119.2 million at midyear from $91.3 million on March 31. This moved it up three places in rank to 18th position.

Citibank NA, New York, had the sharpest drop in domestic farm lending in the second quarter of 1985. Its domestic farm loans outstanding fell 26% to $117 million from $158 million, as it fell five places to 20th position.

First National Bank and Trust Co., Oklahoma City, had the next largest drop in lending as of the end of the second quarter. Its farm loans were down by over 22% to $134.6 million from $172.8 million, as the bank moved down four places to rank 16th.

Farm loans, or agricultural loans, are the sum of domestically booked loans secured by farmland plus loans to finance agricultural production and other loans to farmers. The data were taken from the federal regulatory report of condition, Schedule RC-C, item 1.b. (Column B — Domestic Offices) plus item 3, Column B.

Errors in Previous Survey

On Aug. 16, the *American Banker* published a listing of the top 100 banks in farm loans booked by a bank in both its foreign and U.S. offices as of Dec. 31, 1984. At that time, the *American Banker* stated that "because of the extensive revisions in the Loan Schedule of the Report of Condition, the *American Banker* has observed increased reporting errors by banks as well as increased computer keying errors by the federal regulators."

Some of the data shown in the listing, therefore, may be erroneous, reflecting these data collection and processing problems. The *American Banker* will notify its readers of any major errors of this type upon their discovery.

One such error has already come to light. The Summit Trust Co. in New Jersey was ranked 19th on that listing. The bank informed the *American Banker* that it has no farm loans. The federal regulators had keyed the bank's business loans into the farm loan data field by mistake. ■

Data are from the June 30, 1985, and March 31, 1985, Federal Regulatory Report of Condition (RC). Farm loans are the sum of loans secured by farm land (Schedule C Loans, item 1b) plus loans to finance agricultural production and other loans to farmers (Schedule C, item 3). Only domestically-booked farm loans (loans booked by the U.S. offices of a bank) are included. Foreign-booked farm loans (loans booked by the foreign offices of a bank) are excluded.

(†)— The March 31 rank and farm loans are for Oneida National Bank, Utica, N.Y., which was merged into Norstar Bank of Upstate NY on April 1.

Raw data provided by Data Resources, Inc., Lexington, Mass.

American Banker has edited the raw data for input errors made by the Federal regulators in the preparation of their computer tape of Schedule C.

has the potential to exacerbate difficulties for problem banks. For those reasons, the penalty on high-risk banks is modest. If the system is put in place and works effectively — we think it will — then it may be appropriate to vary insurance assessments much more steeply in the future. At the present time, we are looking for improvement through risk-related premiums, but not for dramatic change.

I would like to shift my attention to two options that potentially could change the banking system and the handling of failures more dramatically.

Modified Payoff

In the spring of last year, the FDIC tested a so-called modified payoff procedure. I won't go into the details here other than to say that we attempted to make the procedure for paying off insured deposits (as opposed to purchase and assumptions) less disruptive to the system, with the view that this might be the standard way to treat all bank failures. The modified payoff worked from the standpoint of mechanics — it clearly was superior to a traditional payoff because it conserved FDIC personnel and financial resources and was less disruptive to the community.

Still, the transaction was far more people-intensive than a purchase and assumption. We stopped using the modified payoff as the standard approach in April 1984 in order to examine how well it was working and to catch our breath. Then Continental came along, and thereafter it did not seem appropriate to continue the modified payoff, except in situations that called for payoffs. It is important to note that many at the FDIC did not consider the modified payoff to be an unqualified success or the way to go in the future.

There were practical problems compared with a purchase and assumption. It required more manpower and, sometimes, more time between the bid process and the closing and eventual reopening of the banking facilities. The larger the bank and the more accounts it had, the longer would be these time gaps. We did not think we could do a modified payoff on a really large bank without a substantial delay.

Many of us were skeptical about "depositor discipline." Depositors generally have ample notice to get out of a troubled bank without incurring any loss. Once unfavorable news becomes public, they have no incentive to stay with a troubled bank, even if they think it is likely to survive and turn itself around. Actually, the increased probability of depositor loss makes it difficult for a troubled bank to turn itself around.

Decisions on the timing of bank closings become very important. If the Fed makes secured advances, uninsured creditors are allowed to get out at no cost while the loss ultimately realized by uninsured creditors that remain is increased. The latter, I believe, have a reasonable basis for action against the Fed and the primary supervisor in such situations.

If we could and did pay off a large failing bank, what would be the impact on the system and on other banks funding primarily through uninsured creditors? Lots of assets would be tied up in liquidation, as would the claims of many depositors and lenders. Flights of deposits from large institutions perceived to be at risk might be considerable. How great this problem would be is hard to say. I think we are talking about considerable risk and potential disruption.

Would System Be Better?

Some say we eventually would get to a better system, although it may be difficult or impossible to get from here to there. I'm not so sure it would be a better system. I believe it is apt to be more unstable, and that depositor discipline has its limits in an environment where most liabilities are very short-term funds can be readily transferred, lever-

News from ABA Agricultural Convention

Farm Bill's Impact Will Be Slight Regardless of Bent, Scholar Says

By ANDREA BENNETT

DALLAS — More than 100,000 farmers probably will go out of business before the end of the decade no matter what type of farm bill is enacted, a farm economist has said.

"The farm bill will not solve the farm credit crisis, and anyone who thinks it will is kidding themselves," Ronald J. Knutson, a professor at Texas A&M University, told the American Bankers Association agricultural bankers conference here.

But Mr. Knutson said that the form the farm bill takes can have a great influence on the number of farmers who do survive. Under a farm bill that is a continuation of present farm policies in terms of target prices, loan rates, and set-asides, farmers with debt-to-asset ratios of 60% or more probably will not make it through 1990, Mr. Knutson said.

As of the beginning of this year, the U.S. Department of Agriculture estimated that there were 123,000 farmers in that situation.

But Mr. Knutson said the probability that farmers will survive under a market-oriented farm bill like the one currently advocated by the Reagan administration is even less. Under the administration approach, most farmers with debt-to-asset ratios of 30% or more have little chance, he said.

A free-market approach, "under the current agricultural situation, is pure disaster," he said. "This is the worst time to pull the plug in terms of agriculture policy."

He added that corn farmers probably would fare better than wheat or cotton farmers under a free-market approach because the corn farmers are less reliant on farm programs.

Mr. Knutson said agriculture is going through transitions. Consumer demands have shifted and in some cases declined. At the same time, economies of scale in agriculture recently have "increased substantially," making larger farms more efficient.

"That presents some major problems for the family farm survival over the long haul," he said. He said these major adjustments make short-run strategies such as credit programs less effective.

Another Story on the Farm Crisis, Page 12

He also said that broader economic issues, such as budget deficits and the value of the dollar, may be more important to farmers in the long run than the farm bill.

Low-budget deficits and moderate money growth probably would be the most effective policy for improving the financial health of farmers, but even under those conditions, Mr. Knutson said, net farm income would not improve much through the decade.

A continuation of the current economic path of high budget deficits and fast money supply growth could lead to short-term improvements as farm exports increase and interest rates drop.

However, Mr. Knutson said, in the long run it would lead to a return of economic conditions that existed at the end of the Carter administration, Mr. Knutson said. Net farm income would also decrease substantially, he said. ■

Young Virginia Bankers Install Hardy, Chapman

RICHMOND, Va. — Julian D. Hardy Jr., executive vice president of First National Bank of Christiansburg, is the new president of the young bankers section of the Virginia Bankers Association. He was installed during the group's recent annual conference.

James H. Chapman 3d, vice president for Colonial American National Bank in Roanoke, was elected first vice president of the young bankers section. ■

Farmers Still Have Good Opinion Of Their Bankers, Survey Shows

By ANDREA BENNETT

DALLAS — Despite increased financial stress in agriculture, a majority of farmers continue to have a good opinion of agricultural lenders, a new survey shows. More than half — 55% — of the farmers responding to the survey said they had a very favorable or somewhat favorable opinion of farm lenders.

The farmers also said their relationship with their lender was the most important agricultural-related relationship they had. Only 15% of those surveyed said they had an unfavorable opinion of farm lenders, although almost a third had no opinion on the subject.

Farmers responding to the survey were also concerned about the financial strength of U.S. lending institutions.

The Farm Credit System prompted the strongest concern, with 65% of the farmers saying they were concerned about the financial health of the Federal Land Banks and 53% concerned about the Production Credit Associations. One-quarter of those polled were concerned about the financial health of commercial banks.

The results are from a survey sponsored by the J.I. Case Co. of Racine, Wis. The survey, which was conducted by an unnamed independent research firm in early September, tallied responses from 679 farmers.

Results were released at the recent American Bankers Association agricultural bankers conference. Jerome K. Green, president and chief executive officer of J.I. Case, said that the 55% who had a favorable opinion of bankers, combined with the 30% who had a neutral opinion, "adds up to an overall approval rating of 85%, which is a

➸ **Survey: Page 17**

Comment . . .

Continued from Page 6

age is substantial, and information is easily transmitted.

The modified payoff would do nothing to increase discipline in the many banks (and most thrifts) that have practically no uninsured deposits. More payoffs would also encourage circumvention through pooling devices and increased use of brokered deposits.

The modified payoff has recently received considerable support from some large banks. Why? They don't view themselves as failure candidates and may question, legitimately, our ability or willingness to pay off a really big bank. Paying off smaller banks will preserve and enhance the big bank edge in competing for funds. General reliance on payoffs weakens the argument for bringing foreign office deposits into the assessment base. If the purchase and assumption is not the standard transaction, foreign office deposits don't get de facto coverage so there is no logic in adding to the assessment base.

My own view and the prevalent view in the FDIC is that the modified payoff is not the way to go.

FDIC Capital Proposal

For a long time I have felt that the best way to go was to raise capital requirements and allow subordinated debt to count in meeting a significant portion of those requirements.

Increased capital will provide a greater cushion to the deposit insurance fund and enable supervisors to raise the threshold at which demands for more capital or other corrective action is made. This is a key aspect of the proposal. Such supervisory demands would occur at levels where institutions are still solvent and still have value for existing stockholders or potential acquirers. If banks can't take corrective action, sanctions (restrictions on growth, acquisitions, etc.) would be imposed, and eventually banks might be closed while still "book solvent." In most instances, it will pay to recapitalize on terms that dilute existing shareholders or merge on unfavorable terms. Thus, there would be fewer failures, less FDIC management of failures, and more private sector solutions.

Increased capital imposes costs on bank services and adversely affects the ability of banks to compete with other institutions and foreign banks. However, permitting subordinated debt to meet a considerable share of capital requirements will enable strong banks, perceived to be financially sound, to maintain their leverage without significantly increasing their capital costs. Subordinated creditors will perform a disciplinary role and the marketplace will determine permissible leverage.

Despite statements to the contrary, implementation of this proposal is unlikely to persuade banks to shift to riskier loan portfolios. The consequences of unfavorable performance — the need and pressure to recapitalize — would substantially raise the risks associated with such portfolio shifts.

I believe the market for subordinated debt could expand significantly. Even moderate-sized banks in strong financial situations will find market access through private placements, sales to other banks, or direct sales to customers.

Overall, smaller banks will benefit from implementation of this proposal. Generally, they start out with much higher capital ratios so that most won't have to go to the market. Many, as I have suggested, will have access to debt markets, though not necessarily public markets. They will be in a stronger position to compete for deposits with larger banks. And, to the extent that there are fewer bank failures and reduced FDIC losses, the net insurance assessments on all banks will be reduced.

It will be necessary to phase in higher capital requirements. There is certainly nothing sacred about 9%. It may be appropriate to go to, say, 7% or 7.5% in two or three years and then see if it is desirable or necessary to raise the level further.

There will be problems in accurately measuring capital ratios. Chargeoff policies become critical. There are questions related to which, if any, off-balance-sheet exposure should be included in the denominator of the ratio.

It should be noted, however, that these problems exist under the present system, and there are reasonable, if not perfect, solutions to them. Somehow it will be necessary to phase in higher capital requirements on thrifts.

While the capital proposal isn't perfect, it is, I believe, the best option available to improve our system. ■

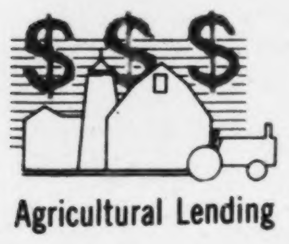
Farmers' Silos Are Bulging, But Financially It's a Grim Harvest

By **RICHARD RINGER**

The farmers got bumper crops. Their lenders got burdened credits.

Somehow, it just does not seem possible. But that is how it is these days in farm lending. Farmers and lenders alike cannot expect the expected.



In normal times, a bumper crop would produce higher income for farmers, who would then be better able to repay their debts. But this year, the bountiful crop is lowering commodity prices, and thus income. So as farm lenders line up for loan payments, they realize that not all of their cash-strapped farmer-borrowers will be able to pay them back.

The year started off badly. Lenders, saddled with farm-loan losses in earlier years, said they were going to have to be tightfisted. So farmers had to scramble to line up operating loans from increasingly stingy creditors. But by the time planting season got into full swing, fewer than 5% of the farmers were denied operating loans. That was far less than projections of up to 15% of farmers being denied credit.

Anxious to dig their way out of financial problems of the previous four years, and with more borrowed money, the farmers returned to fence row-to-fence row planting, which helped produce the bumper crops.

Lenders said they had little choice but to extend more credit. It was that or force a large number of farmers into foreclosure. That tactic would have glutted the depressed agricultural markets with even cheaper farm land and equipment and threatened a rebellion by angry farmers pushed into foreclosure. Bankers understandably could not warm up to the idea of placard-carrying farmers protesting in front of their banks.

The year is ending with matters even worse. Some farm-town banks that lent money in the spring are on the brink of failure. Others already have been closed. The Federal Deposit Insurance Corp., receiver of the failed banks, is left to collect on many of the loans.

Even the Farm Credit System, the largest farm lender, is humbled by the mounting financial problems. Following months of denials that the system was facing enormous loan losses that threatened its solvency, Farm Credit officials finally conceded that a federal bailout may be needed.

The crisis warning sounded, commercial banks and farmers intensified lobbying efforts to assure that they be included in any rescue. And the farm financial problems were much discussed this week as bankers gathered in Dallas for the annual American Bankers Association agricultural bankers conference, which ends today.

These statistics, published recently by the Federal Reserve, detail just how serious the problems are:

- **Farm loan delinquencies and chargeoffs.** The delinquency rate on banks' farm loans has increased. As of June 30, past due and nonperforming farm production loans at all banks totaled $3.6 billion, or 9% of outstanding production loans. That's up from $2.7 billion, or 6.6%, at June 30, 1984.

Nonaccrual farm loans accounted for much of the increase. At the end of June, $2.9 billion in farm production loans were nonperforming, up from $2.1 billion at the same time a year earlier.

Nonaccrual farm production loans increased despite rising farm loan chargeoffs. In the first half of 1985, farm loan chargeoffs amounted to $520 million. In all of 1984, chargeoffs equaled $900 million.

Predictably, the quality of loans at agricultural banks has been deteriorating most rapidly in the Great Plains and the western corn belt states. Particularly hard-hit is Iowa. Delinquency rates on farm production loans at Iowa banks rose to 7.2% of total loans outstanding at the end of June, about a half-point higher than the national average. A year earlier, the Iowa delinquency rates had been about equal to the national averages at agricultural banks, and two years earlier they had been slightly lower.

- **Agricultural bank failures.** "More agricultural banks have been moving into vulnerable positions," said Emanuel Melichar, senior economist in the economic activity section of the Federal Reserve. "Many of the agricultural banks that have failed were earlier found among the banks at which delinquent loans exceeded total capital. The generally upward trend in the number of agricultural banks in that potentially vulnerable position suggests that failures of agricultural banks may continue at recent higher levels."

Through Oct. 21, 54 of the 94 banks that failed were agricultural banks, or 57% of total bank failures. Farm loans at all of the failed banks through Oct. 21 amounted to $388 million, or 19% of total loans at those banks. In all of last year, farm loans at the 78 failed banks amounted to $199 million, or 10% of total loans at those banks. ■

Hutton Leader Denies Firm Knew of Illegality

HARTFORD (UPI) — Top executives of E.F. Hutton and Co. had no prior knowledge of the bank overdrafting that led to the investment firm's pleading guilty to federal fraud charges, its chairman said.

Robert M. Fomon told a state banking department hearing that Hutton was aware that the U.S. Department of Justice was investigating the company but that the firm did not expect the investigation to result in indictments.

Mr. Fomon, who is chairman and chief executive officer of E.F. Hutton Group Inc., said he learned of the illegal conduct only shortly before Hutton agreed to plead guilty to 2,000 counts of mail and wire fraud.

"The company did not realize we were engaging in illegal practices. That only developed in the last few days before we entered into the guilty pleas," Mr. Fomon said. ■

Bank Computer Fails, Disrupts US Securities

Bank of NY Said to Borrow $24 Billion Overnight from Fed

NEW YORK — Serious computer problems at the Bank of New York last Thursday disrupted the government securities market and forced the bank to borrow more than $20 billion overnight from the Federal Reserve Bank of New York, according to industry sources.

The computer failure, involving the bank's link with the government securities network operated by the Federal Reserve System, prevented the bank from transferring upwards of $20 billion in U.S. Treasury instruments, sources said. Some estimates ranged as high as $60 billion. The Fed's securities wire was kept open until 2:15 a.m. on Friday in an attempt to process as many transactions as possible, the sources said.

This story was reported by Tom Ferris, Robert M. Garsson, and Bart Fraust. It was written by Mr. Ferris.

Unable to complete all its trades, the bank said it needed "to borrow a large sum overnight from the discount window" of the New York Fed to meet its reserve account requirement. Industry sources put the loan at $24 billion.

The computer problems continued into Friday, and the New York Fed informed its member banks at 11:45 a.m. that securities transactions destined for the Bank of New York would not be accepted. That suspension was lifted at 1:31 p.m. after the Bank of New York informed the Fed it had cleared up the "system malfunction."

A Federal Reserve spokesman said it was unclear whether the wire would close on time Friday.

AN AMERICAN BANKER SPECIAL REPORT

Banks Turn to Captive Insurers

Directors', Officers' Policies Proving Too Dear in Usual Market

By LYNN BRENNER

NEW YORK — Bankers today are reluctantly planning to get into the insurance business in a way they neither desired nor contemplated even a year ago — as insurers of their own directors' and officers' liability risks.

Premiums for that coverage have soared in the conventional market during the past year — sometimes going up 4,000%, according to insurance brokers. Even worse, the insurance is now sharply restricted, excluding many types of claims. Claims arising from suits by governmental agencies, by the institution against its own officers, or from losses due to mergers and third world loans, for instance, are no longer covered.

Bankers who want higher limits and broader coverage are going to have to manufacture it. Many plan to do so, and state regulators are encouraging their plans. In New York last week, for instance, the state banking superintendent met with banking association representatives to swap notes on the crisis. The same day, a group of banking companies led by Chemical announced its intention to create a Bermuda captive to provide the coverage.

Directors' and officers' coverage has become an emotion-charged issue at many institutions. "The whole question of confidence pervades this issue," explains Albert L. Salvatico, managing director of insurance broker Marsh & McLennan's fi-

Trade Groups Also Trying to Fill Void

By JAY ROSENSTEIN

WASHINGTON — Bank and thrift trade groups are becoming directly involved in efforts to insure members that can't buy directors' and officers' liability coverage in the tight insurance market.

Trade groups and individual institutions are worried that without the insurance, they can't attract and retain top managers, especially good outside directors. Some bankers say that's already difficult at a time when the federal government is putting limits on bank loans to officers and directors and is putting new emphasis on bank disclosures of financial dealings with bank insiders.

Among the trade group responses to the directors' and officers' liability crisis:

- The American Bankers Association and the U.S. League of Savings Institutions are both considering industry-owned insurance captives.
- The Independent Bankers Association of America, whose members are mostly small and medium-size banks from farm states, and the National Council of Savings Institutions, comprised mostly of savings banks, are both trying to expand current group coverage written by conventional insurance companies.

Trade groups are also:

- Initiating contact with the London reinsurance market. Reinsurers' reluctance to accept bank risks is partly responsible for the insurers' withdrawal from the market. The idea is to con-

9	Chase Manhattan Bank	$ 1.61	19.8%
10	Manufacturers Hanover Trust	$ 1.25	17.8%

Source: The Nilson Report, company representatives

Rep. Charles E. Schumer last week attacked the nation's largest credit card issuers as "usurious" and released a list of 30 card-issuing financial institutions that offer lower interest rates.

The largest credit card issuers charge interest rates ranging between 18% and 21%, and only one of the top 10 issuers, Manufacturers Hanover Trust Co. of New York, offers a rate under 18%, Mr. Schumer said. Manufacturers dropped its rate to 17.8% in October. The other large issuers charging 18% to 21% rates include Sears, Roebuck and Co.; Citicorp; Montgomery Ward; Bank of America; American Express; J.C. Penney; the First National Bank of Chicago; Chemical Bank; and Chase Manhattan Bank.

Mr. Schumer, a New York Democrat and member of the House Banking Committee, criticized these issuers for failing to lower their credit card rates when interest rates began falling. "Over the past five years, the cost of money has fallen, and the rate that banks and corporations pay for the money they lend out is now below 10%," he said. "But while the cost of money has fallen, the cost of credit cards has actually risen."

The list of the 30 "best buys" that Mr. Schumer released included interest rates ranging from 10.5%, offered by Dominion Bank in Vienna, Va., to 17.9% offered by Philadelphia National Bank in Wilmington, Del. Most of the issuers on the list offer rates in the 16% to 17% range. New York's Apple Bank for Savings, which last month introduced a Visa card with an annual interest rate of 15.8% and a $20 annual fee, was also on Mr. Schumer's list.

"It's a new product for us, but we're bringing it into a mature market," explained Anthony M. Ronda, Apple's vice president of marketing. "We wanted to give people a reason to switch to our card."

While most of the more than 2,700 financial institutions that issue credit cards charge from 18% to 21% on credit card balances, some institutions, especially thrifts such as Apple, were late getting into the credit card business, so they offer lower rates to gain market share. Others have targeted the most profitable cardholders — those who carry outstanding balances from month to month — and have structured low-rate cards to appeal to them. Some banks offer low rates through no choice of their own: State usury laws — in Arkansas and Washington, for example — cap interest rates.

The American Bankers Association said it applauded Mr. Schumer's attempt to inform consumers about lower interest rates. However, Kirk Willison, an ABA spokesman, rejected Mr. Schumer's allegation that the largest credit card issuers were charging usurious rates. The variety of rates available to consumers, Mr. Willison said, "shows that there's quite a bit of competition already out in the market." ■

Step Aside, Banks: Thrifts Are Going Interstate, Too

Unusual Deals Planned in New England and West

By JEFFREY MARSHALL

Most of the noise on the interstate banking front has been made by big banking companies, but thrifts, increasingly, are making noise of their own. In two recent deals, in fact, thrifts are seeking federal regulatory approval for deals that would have been unheard of not long ago.

The first of these involves Citizens Financial Group Inc., a thrift holding company based in Providence, R.I. Citizens Financial, a strong performer, wants to pull a switch on the time-honored ploy of banks buying thrifts across state lines: It wants to buy a banking company, Capitol Bancorp., of Boston.

Citicorp, Security Pacific Corp., and a few other big banking firms have acquired or plan to acquire thrifts in states outside their home territory. In fact, Citicorp put another egg in its interstate basket earlier this month when it took over a failed thrift in Nevada, All State Thrift, and obtained a full-service bank charter in the process.

The architects of the Citizens-Capitol Bancorp. deal are expected to cite a 1984 Federal Reserve Board ruling allowing a bank holding company to buy a healthy state-chartered, stock savings bank. Two banking companies already are using that ruling to try to buy savings banks across state lines, but the Citizens-Capital deal is the first effort to gain approval for the reverse transaction.

Analysts say such bank-thrift unions make strategic sense because the industries have different earnings cycles and offer each type of institution an avenue to different kinds of markets.

James Jones

At least 10 thrifts or thrift holding companies have acquired or agreed to acquire savings institutions in other states so far in 1985.

State laws in Massachusetts and Rhode Island do not bar the deal, which is valued at $80 million in cash. Citizens is paying 2.35 times book value for Capital, which is being called one of the highest multiples ever paid in New England.

Across the country, Great American First Savings Bank of San Diego is seeking approval for a seemingly convoluted deal involving a troubled thrift in San Francisco and a healthy one in Arizona.

Great American says it has agreed to acquire United Bank SSB, San Francisco, an ailing institution that is the largest minority-owned thrift in the nation. But Great American says it would complete that deal only if it were also allowed to acquire Home Federal Savings and Loan Association of Tucson, Ariz.

And there's the rub. Under Federal Home Loan Bank Board policy, healthy thrifts can be acquired across state lines only if the acquirer has paid an "entry fee" by buying a failing thrift in the other state. ■

New Warning On Dividends

The Federal Reserve Board became the second regulator to warn troubled banks not to pay high dividends to stockholders. In a policy statement, the agency said banks with poor earnings should not pay out dividends that exceed their net income, nor pay stockholders dividends that weaken a bank's capital position or that can be funded only in ways that weaken its health.

Earlier this month, the Office of the Comptroller of the Currency issued a similar policy statement, telling the national banks it regulates that cash dividends on stock should be pegged directly to the bank's current and expected earnings streams.

On the heels of the warnings, Wells Fargo & Co., San Francisco, last week raised its quarterly dividend on common stock to 68 cents from 60 cents a share, marking the company's second stock dividend increase this year.

Wells chairman Carl E. Reichardt said that Wells' directors "will continue to review the dividend and will make appropriate changes when warranted by the company's earnings performance, capital, and related trends."

Baltimore-Based Mortgage Company Folds

By DAVID LaGESSE

Maryland regulators and E.F. Hutton & Co. reluctantly shared the spotlight in the closing last week of the First American Mortgage Co., a Baltimore-based firm that wrote more than $100 million in high-risk mortgages.

First American closed the same day that a subsidiary of E.F. Hutton, the E.F. Hutton Mortgage Corp., charged First American with fraud and breach of contract in a federal court action stemming from a 1984 deal.

First American originated loans for resale, of which E.F. Hutton had bought some $64.6 million. E.F. Hutton Mortgage, based in Little Rock, Ark., retained about $13 million and sold the rest.

Equitable Bancorp., a bank holding company in Baltimore, was the only other institution publicly to acknowledge an exposure, which it termed minimal, to First American.

First American's founder, Michael H. Clott, 34, denied that he cheated E.F. Hutton. He said the brokerage subsidiary understood that it was buying high-risk loans for a higher yield. He cited troubles caused by the firm's rapid growth, including "primitive" facilities, with documents stored in a shoe box.

First American's loans carry insurance from Rockwood Insurance Co., Rockwood, Pa., which reported $44 million in capital at June 30. Rockwood officials predicted that their company will suffer no material loss.

The spotlight on Maryland, though, echoed the state's earlier troubles with private thrifts and another mortgage banking firm. Mortgage firms like First American come under little supervision in most states, noted Susan Rittenhouse, Maryland's assistant attorney general. "I realize, though, that's no consolation," she added. ■

Quote

One would think that with over 2,000 issuers, there would be lots of competition, but that's not the case.

Rep. Charles Schumer, who criticized credit card issuers for generally high interest rates and released a list of card-issuing banks that offer low rates.

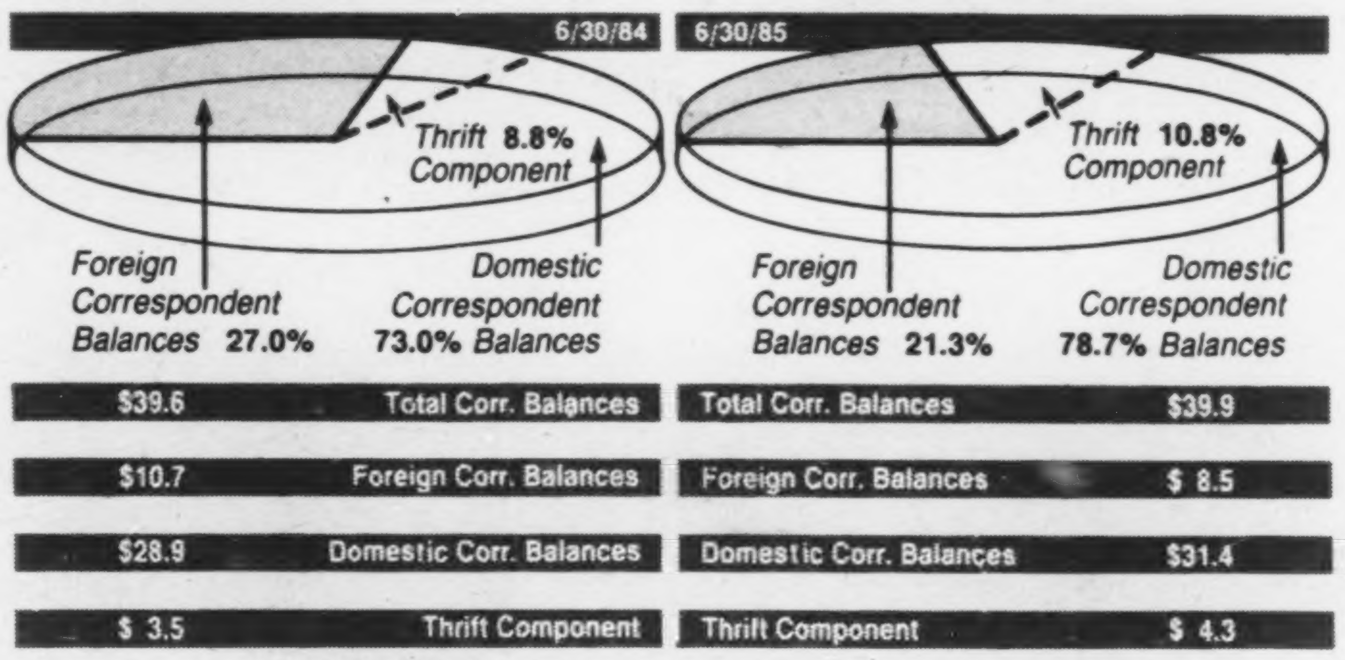
Some of Banks' Best Customers Are Thrifts

The Composition of Total Correspondent Balances*

In billions of dollars



*For 336 banks with $10 million or more in total correspondent balances on 6/30/85.

Their Correspondent Balances Grew While Others' Stood Still

By L. MICHAEL CACACE

NEW YORK — The thrift industry has become the fastest growing sector of the correspondent banking market, *American Banker's* annual survey of correspondent banking shows.

Correspondent bank balances deposited by thrifts into U.S. commercial banks grew by 23% over the 12-month period ended June 30. In contrast, correspondent bank balances deposited by domestic and foreign commercial banks —which make up the main sector — were virtually unchanged. As a result, thrift correspondent balances now account for a larger share of the total correspondent deposit market — 10.8% this year, compared with an 8.8% share a year earlier.

Correspondent Banking Tables, Page 27

The main reason for the growth in the thrift correspondent sector is the growth in checking accounts offered by thrifts. Most of these checks are cleared by a thrift's correspondent bank. As the volume of checks at thrifts grows, bigger correspondent balances are required to compensate the banks for their clearing services.

According to data from the National Council of Savings Institutions and the Federal Home Loan Bank Board, checking accounts — demand deposit accounts, NOW accounts, and Super

Competition Heats Up in California Among Sellers of Services to Thrifts

By ROBERT M. GARSSON

NEW YORK — In California, the market for traditional thrift correspondent services is being squeezed on all sides.

In one corner are the age-old providers of check processing, wire transfers, demand deposit accounting, and other such traditional services: the correspondent banks.

Correspondent Banking

In another corner is one of the new providers, the Federal Reserve Bank of San Francisco, which is required under the 1980 Monetary Control Act to sell services equally to all depository institutions. A third competitor is the Federal Home Loan Bank of San Francisco, which has also set up check processing facilities that can, in at least some cases, provide better clearing times than the banks.

And looming in the future is a new competitor, the big California savings and loans that are bringing their check processing in-house. They are making big investments — a reader-sorter for processing checks can cost upwards of $1 million — and someday they will almost certainly want to take advantage of the excess capacity in their system by selling it to others.

"More and more we see competition from the big agencies that control the market, the Fed and the Home Loan Bank," said one traditional provider, John Hendricks, a senior vice president and manager of the financial institutions division at Union Bank, Los Angeles.

As a result, Mr. Hendricks said, Union Bank's mix of correspondent businesses is changing. Check processing, demand deposit accounting, and funds transfer still

Cutting Down on Creditors

HNG/Internorth to Go from 74 to 25 or 30 Banks, Treasurer Says

By LISABETH WEINER

CHICAGO — When two become one, somebody has to lose. And in the case of HNG/Internorth, some of the losers may be the company's bankers.

Corporate Window

HNG/Internorth is the product of Internorth Inc.'s $2.3 billion acquisition of Houston Natural Gas Corp. last July. The end result — HNG/Internorth — spouts an estimated $12 billion in sales, $10.5 billion in assets, and a 37,000-mile natural gas transmission system that stretches from California to Florida and from Texas to the Canadian border.

And it also means a total of 74 banks serving just the credit needs of the combined companies at the corporate level.

"We're just trying to get our arms around this, needless to say," said vice president and treasurer Donald Gullquist. "We're trying to get this down to a manageable bank group."

Manageable, Mr. Gullquist said, is a group of 25 to 30 banks that will be the source for the company's $3 billion of floating-rate debt. So indeed there will be some losers.

"If you have the major money center banks, the major Far Eastern banks, the European banks, and the Canadian banks, and they each take $100 million, that's $3 billion right there," he said. "All of our banks expect this consolidation." Still, he said, the bankers have been calling and letting him know that they want to remain in the credit.

It's not that Mr. Gullquist objects to any of his bankers. It's just that a group of 70 banks would be unmanageable if for no other reasons than logistics and

Sources, Definitions, and Definition Changes in the Survey

Definitions and Data Sources

The data for the *American Banker* survey of correspondent banking are taken from an *American Banker* questionnaire asking for information from the federal regulatory report of condition, or "call report," of June 30, 1985.

Specifically, the data requested were from schedule RC-E, Part 1, of the call report. This part asks for a breakdown of deposits for a bank and its domestic subsidiaries. In addition, banks with Edge banking subsidiaries were asked to report selected deposit data, as of June 30, for their domestic Edge banking offices from Federal Reserve form FR2886b, which is the Edge bank call report.

Domestic correspondent balances are defined as the sum of demand deposits due other depository institutions in the United States, plus demand deposits due other commercial banks in the United States. Other depository institutions include mutual and stock savings banks, building or savings and loan associations, homestead associations, cooperative banks, and credit unions. Demand deposits due these other depository institutions are called **correspondent balances due thrift institutions.**

Foreign correspondent balances are the the sum of demand deposits due other banks in foreign countries plus demand deposits due foreign government and official institutions. Added to these foreign correspondent balances are the **clearing balances** in the bank's domestic Edge bank subsidiaries.

Clearing balances are the sum of the Edge bank's transaction accounts due foreign government and official institutions, plus transaction accounts due commercial banks in the U.S. and transaction accounts due banks in foreign countries.

Total correspondent balances are defined as the sum of domestic correspondent balances plus foreign correspondent balances.

Changes in Definitions

This year, the *American Banker* changed its definition of domestic and foreign correspondent balances. The change reflected the change in the deposit schedule of the call report, which eliminated the breakdown of "demand deposits due commercial banks in the U.S." into its two component parts: "demand deposits due other commercial banks in the U.S." and "demand deposits due the U.S. branches and agencies of foreign banks."

The breakdown was important, because "demand deposits due other commercial banks in the U.S." are domestic correspondent balances and "demand deposits due the U.S. branches and agencies of foreign banks" are foreign correspondent balances. Since the breakdown no longer is available, the entire amount reported by banks under "demand deposits due commercial banks in the U.S." will be classified by the *American Banker* as **domestic balances.**

The elimination of the deposit breakdown causes a significant problem in identification of domestic and foreign correspondent balances for the major New York City banks, which clear many of their foreign trade, foreign exchange, and foreign correspondent transactions through the U.S. branches and agencies of foreign banks. These foreign bank-related transactions will be classified as domestic balances, as they were prior to 1978. The 1978 changes in the call report created the breakdown of U.S. commercial bank deposits between branches and agencies and other U.S. banks. Therefore, for the large New York banks, total correspondent balances may now be the best overall measure of a bank's correspondent banking activity.

The impact of the change can be seen by looking at the two pie charts on page 1. In 1984, foreign correspondent balances accounted for 27% of total correspondent balances, and domestic correspondent balances accounted for 73%. This year, with the U.S. branches and agencies included in the domestic totals, domestic balances account for 78.7% of total balances, and foreign balances account for only 21.3%. The *American Banker* estimates that demand deposits due the U.S. branches and agencies of foreign banks account for $1.8 billion, or 4.5%, of total correspondent balances at midyear. ■

Correspondent . . .

Continued from Page 1

NOW accounts — at savings banks and savings and loans totaled $39.95 billion on June 30, up 22.5% from $32.62 billion on the same day in 1984.

Over the year ended June 30, domestic and international commercial bank correspondent balances, which combined comprise about 90% of total correspondent balances, were down a modest 1.1%. The lack of growth in the sector is attributable to two factors.

First, a recent survey of correspondent bankers conducted by Robert Knight Associates of Alliance, Neb., finds that the prices for many correspondent services declined marginally over the period. If interest rates and services do not change dramatically over a period, a decline in the price of correspondent services would cause correspondent balances to fall, because the bulk of correspondent services are paid for by compensating demand balances maintained by respondent banks with their correspondent bank.

Interest rates did not change substantially. Correspondent banks generally use the 90-day Treasury bill rate to value correspondent balances. This rate, which is called the "earnings credit factor," fell by only 55 basis points over the year ending June 30. Also, there is no indication of a sizable shift in the demand for correspondent services by respondent banks.

The second factor that helps to explain the movement in commercial bank correspondent balances is the volatility of these balances. Sharp day-to-day fluctuations in these balances are not uncommon. Since the *American Banker* examines data for only two points in time, the aggregate data are affected by this volatility.

There were 336 banks in the United States with total correspondent balances of $10 million or more on June 30. These deposits totaled $39.9 billion, up 0.8% from $39.6 billion for the same banks a year earlier.

The thrift correspondent balance component of total correspondent balances rose 23% over the 12-month period ended June 30. The 336 banks had $4.3 billion in thrift correspondent balances at midyear 1985, or 10.8% of total correspondent balances. A year earlier, these banks had $3.5 billion in

Thrifts Take Bigger Slice of Correspondent Banking Pie

Continued from Page 22

thrift correspondent balances, or 8.8% of the midyear 1984 total.

The domestic and international commercial bank component of total correspondent balances fell 1.2% over the period. The 336 banks had $35.6 billion in these balances on June 30, down from $36.1 billion the year before.

Total correspondent balances are the sum of demand deposits due: U.S. commercial banks, U.S. thrifts, foreign banks, and foreign government and official institutions. The sum of demand deposits due U.S. commercial banks and thrifts are called domestic correspondent balances, and the sum of demand deposits due foreign banks and foreign government and official institutions are called foreign correspondent balances. Data are for the bank and its domestic and Edge bank subsidiaries. A listing of the top 336 banks in total correspondent balances appears on pages 28 to 31.

Thrift correspondent balances are the sum of demand deposits due: mutual and stock savings banks, building and savings and loan associations, homestead associations, cooperative banks, and credit unions. Data are from the banks' federal regulatory report of condition, or "call report." Before 1984, only deposits due mutual savings banks were reported on the call report. In 1984, banks for the first time were required to report deposits due all thrift institutions. A listing of the top 100 banks in thrift correspondent balances appears on pages 35 and 36.

Definition Changes Reflect Fed

This year the *American Banker* changed its definition of domestic and foreign correspondent balances to reflect changes in the federal regulatory report of condition. The change moved a sizable deposit category — demand deposits due the U.S. branches and agencies of foreign banks — from foreign correspondent balances to domestic correspondent balances.

Although total correspondent balance comparisons are not affected, domestic and foreign correspondent balance comparisons of the June 1985 data and the June 1984 data are affected. *American Banker* estimates that demand deposits due the U.S. branches and agencies of foreign banks account for approximately 4.5% of total correspondent balances.

For more detailed information concerning the definitions, the changes in definitions, and data sources used in today's survey, see the story beginning on page 22.

The Manufacturers Hanover Trust Co. retained its position as the nation's top correspondent banker, with $3.02 billion in total correspondent balances at midyear. In addition, Manufacturers Hanover ranked as the top bank in domestic correspondent balances, with $1.64 billion; and in foreign correspondent balances, with $1.38 billion.

For the second consecutive year, Union Bank of Los Angeles was the top bank in thrift correspondent balances, with $402 million on June 30, up 19.5% from $336 million the year before.

Among the top 10 banks in thrift correspondent balances, Citibank of New York posted the largest percentage gain in these deposits. Thrift deposits rose 137% from $30 million to $71 million, making Citibank the ninth largest commercial bank in thrift correspondent balances at midyear.

Six correspondent banking tables are published in today's edition — the ta-

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Correspondent Banking** tables that appear in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

Competition Heats Up in California Thrift Market

Continued from Page 1

account for about 60% of the department's profits.

But credit services and stand-alone products such as discount brokerage support are gaining momentum, and Mr. Hendricks said he expected those latter two areas to account for 60% of the area's profits in the next several years.

For much the same reasons, another big California correspondent bank sees its business with thrift institutions shifting from operational services to credit products.

"Right now, 70% of our business is operations and 30% is from credit services," said Walt Gerstenberg, a vice president in the savings and loan division of First Interstate Bank of California's financial institutions area.

"A lot of S&Ls, especially in California, are going in-house with their processing," he noted. "So we will get less and less of that business."

Union Bank placed first, by a wide margin, in *American Banker's* ranking of thrift correspondent balances. Since the balances are maintained in large part to compensate banks for services provided, they are a key measure of the scale of an institution's correspondent bank business.

First Interstate placed third, just behind Savings Banks Trust Co., New York, an uninsured state-chartered commercial bank that is owned by savings banks in New York. Savings Banks Trust Co. provides correspondent services to thrifts nationwide.

Fastest growing among the top 10 was New York-based Citibank, with $71 million in correspondent balances, an increase of 137%.

Citibank did not respond to inquiries about its correspondent business, but Union Bank's Mr. Hendricks said the New York bank is making an aggressive showing in his state, at least in its marketing of non-operational products.

"We see Citibank on the credit side and on the capital markets side," he said.

Union Bank's success in courting thrifts owes in part to its location, Mr. Hendricks said. California, with its bustling real estate industry, is a state in which thrifts have thrifts. According to the California League of Savings Institutions, the Golden State accounts for 20% of the nation's thrift assets.

A second reason is the bank's orientation as a wholesale, or corporate bank, rather than a provider of consumer services.

"Outside of the correspondent business, we serve the middle market, businesses with $5 million to $125 million in sales," he said. "The thrifts are primarily consumer oriented, so we are not seen as a competitive threat."

Union Bank also "identified thrifts as a market segment" and went after the business, he added.

All told, Union Bank has correspondent relationships with 450 thrifts, with a large number concentrated in California and the western states.

"Going east, we moved into states with a large number of thrifts, Texas, Florida, New Jersey, and Illinois," he said. "We also got into some states because of the acquisitions made by some of our customers."

Among the last group is First Nationwide Savings, which acquired thrifts in New York and Florida.

First Interstate has correspondent relationships with 120 thrifts, all in California. First Interstate has banks in 11 western states, and those affiliates also maintain correspondent relationships with thrifts in their states. Mr. Gerstenberg said he was not sure how many thrifts those banks serve.

Increasingly, Mr. Gerstenberg said, respondent thrifts are looking to First Interstate for help in balance sheet restructuring and in that business, the bank has thrift clients nationwide.

A big item now, he said, is interest rate swaps, which thrifts use to trade the interest payments from long-term, fixed-rate instruments for variable rate payments, primarily from instruments issued in the Euromarkets.

"We're basically helping them become more involved in capital markets," he said.

"We're doing a lot of work in CMOs [collateralized mortgage obligations] and securitization of assets," said

bles listing the top banks in total correspondent balances and in thrift correspondent balances, and four other listings:

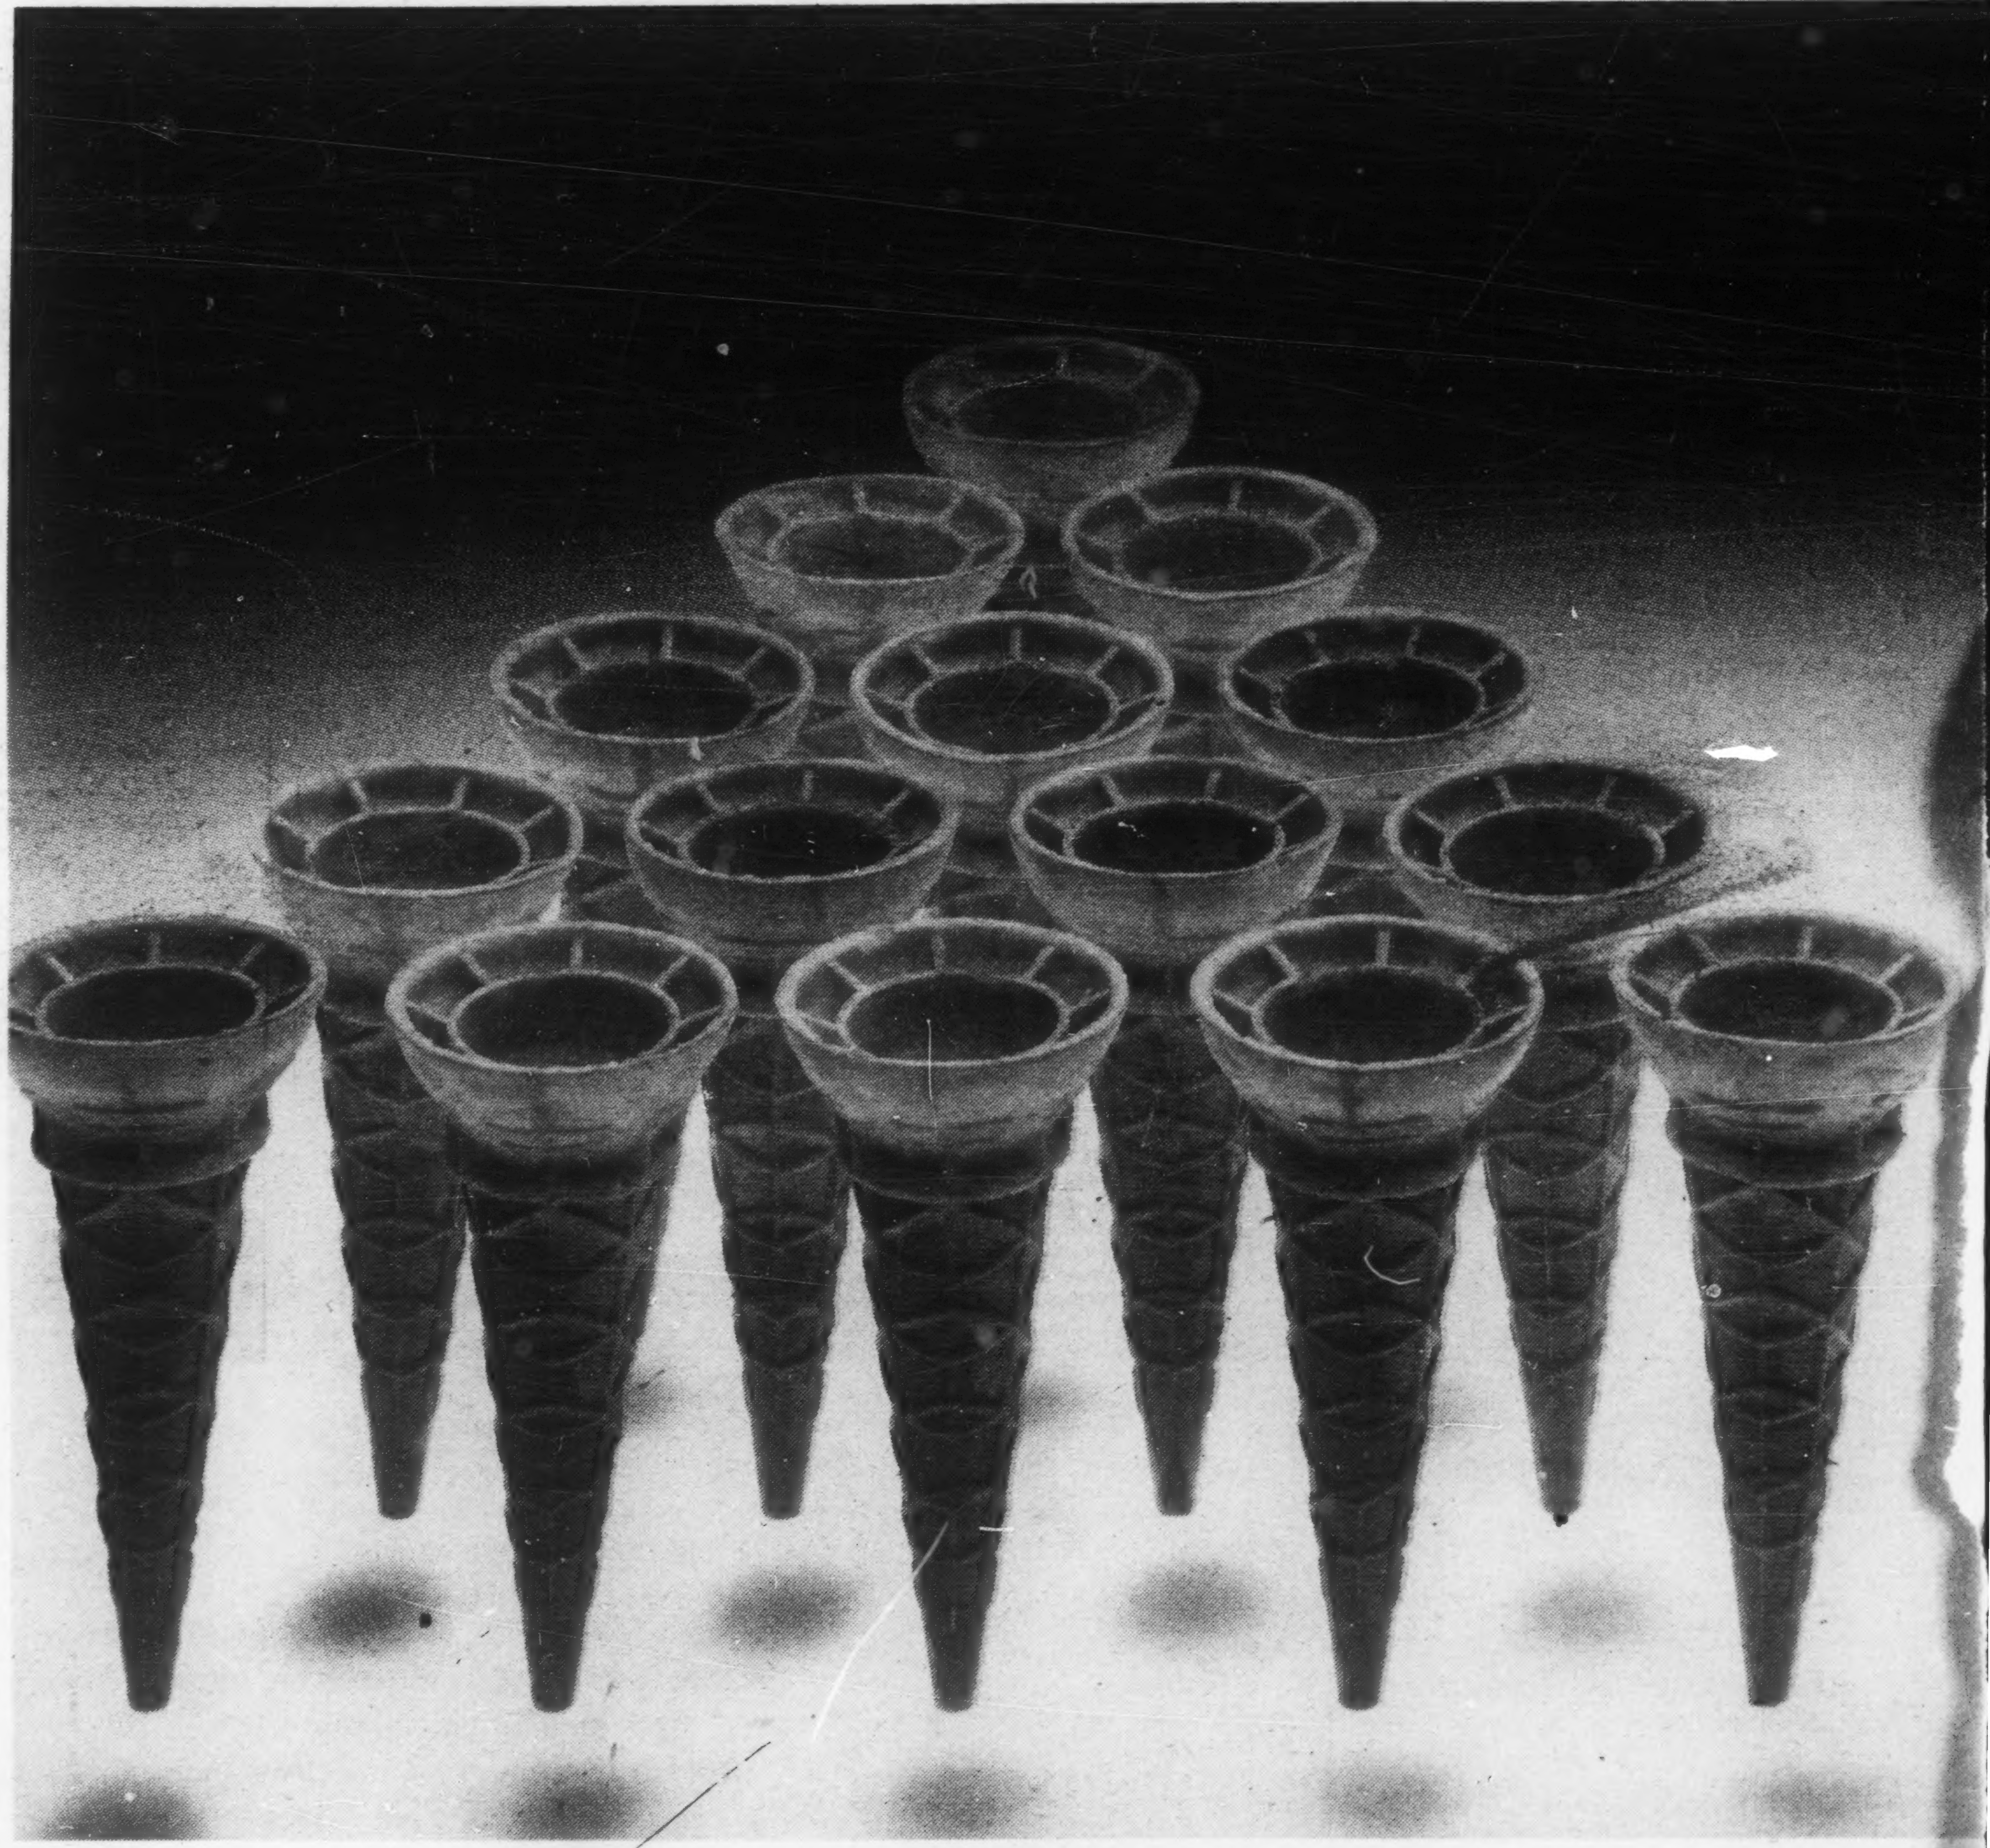
- The table on pages 32 to 35 lists all banks with $10 million or more in domestic correspondent balances.

There were 326 banks with $10 million or more in domestic correspondent balances at midyear, compared with 344 a year earlier. These banks had $31.39 billion in domestic correspondent balances, up 8.6% from $28.9 billion a year earlier. The major reason for the gain was the change in definition of domestic balances this year. This year, domestic correspondent balances are the sum of demand deposits due all other commercial banks in the United States — including branches and agencies — plus demand deposits due thrifts.

- The table at the bottom of page 31 breaks down the domestic correspondent balances of the top 326 banks by Federal Reserve district.
- The table on page 36 lists all banks with foreign correspondent balances of $10 million or more.

This year 46 banks had $10 million or more in foreign correspondent balances, compared with 57 banks a year earlier. The total of foreign correspondent balances for the 46 banks on June 30 was $8.16 billion, down 19.8% from a year earlier. The decline is attributable to the reclassification of branch and agency deposits as domestic this year.

- The table on page 37 lists the Edge bank component of foreign correspondent balances for the banks listed on page 36. Foreign correspondent balances are the sum of domestically booked demand deposits due foreign banks and foreign government and official institutions, plus correspondent balances on the books of an Edge bank subsidiary. ■



Franchising give

Not long ago, few people considered the idea of bank franchising to be a sweet deal.

But today, a franchise from First Interstate is proving itself as a way for banks to meet growing competition from larger banks and other financial institutions. And the advantages of joining the nation's second-largest retail banking organization look better and more numerous than ever.

Franchising: Best of both worlds.

As a First Interstate System franchisee, you continue operating under the same management and ownership. You share a recognizable, highly respected name–one associated with over $46 billion in assets and 1,100 full-service banking offices in 15 states–while retaining your independence.

Specifically, you gain opportunities to expand, diversify, and take advantage of sophisticated services that would otherwise be too costly. You can benefit from advanced data processing services mortgage banking, discount brokerage, international trading, and much more. To your customers, you become a bank that's local but far-reaching, friendly but strong, conservative but innovative.

Franchising: The proven alternative

We laid the foundation for

Component Change Accounts for Drop in Foreign Balances

By JOSEPH F. PEREZ

NEW YORK — Forty-six banks had foreign correspondent balances of $10 million or more as of June 30, 1985, according to the *American Banker*'s survey of correspondent banking.

These deposits totaled $8.16 billion, representing a decrease of 19.8% from last year's total of $10.18 billion for the same banks.

A major reason for the decrease in foreign correspondent balances was the reclassification of "demand deposits of the U.S. branches and agencies of foreign banks" from a component of foreign correspondent balances to a component of domestic correspondent balances. The reclassification by *American Banker* reflects the change in the federal regulatory report of condition. Demand deposits due to the U.S. branches and agencies of foreign banks are no longer reported separately on the report of condition. These deposits are now included in the report item, "deposits due other U.S. commercial banks."

Top 5 Banks
Deposits Due Foreign Banks

		Demand Deposits ($ Millions)
1	Manufacturers Hanover	$1,377
2	Chase Manhattan Bank	998
3	Citibank NA	924
4	Irving Trust Co.	675
5	Bankers Trust Co.	605

Foreign correspondent balances are now defined as the sum of domestically-booked "demand deposits due banks in foreign countries" and "demand deposits due foreign government and official institutions" plus "clearing balances" booked by the bank's Edge bank subsidiary.

Clearing balances are the Edge bank's transaction accounts due foreign government and official institutions plus transaction accounts due commercial banks in the U.S. plus transaction accounts due banks in foreign countries.

The new deposit definition also has caused the number of banks with foreign correspondent balances of $10 million to drop from 57 banks at midyear 1984 to 46 banks this year. In addition, the change in definition makes 1985-to-1984 data and rank comparisons difficult. Caution is advised, therefore, in comparing domestic and foreign correspondent balances for some banks — especially the large New York City banks that have the bulk of the correspondent balances due foreign banks' U.S. offices.

For example, the same seven New York City banks top the listing of banks ranked by foreign correspondent balances this year as topped it last year. But their balances and rankings have changed substantially.

Manufacturers Hanover Trust Co.'s foreign correspondent balances have jumped up 30%, to $1.38 billion on June 30, 1985, from $1.06 billion on June 30, 1984. As a result of this gain, Manufacturers Hanover moved up two places in rank to first place in these deposits.

Chase Manhattan Bank, which ranked as the top bank in foreign correspondent balances last year, fell to second position with $998 million in these balances, down 25% from a year earlier.

➞ **Foreign: Page 26**

California . . .

Continued from Page 24

Union Bank's Mr. Hendricks. "We're giving thrifts access to the European markets."

Among the stand-alone products Union Bank is offering these days is discount brokerage. For equities, Union Bank simply provides the link between thrifts and Fidelity Brokerage, the Boston firm that supplies back-office support for a number of bank-sponsored discount brokerage services.

It handles trades in fixed-income and money market instruments itself.

The largest of Union Bank's stand-alone products, however, is individual retirement account and Keogh account processing. The California League of Savings Institutions, the trade association for thrifts in that state, contracted with Union Bank to purchase support services for its member thrifts. Union Bank now provides processing for some 740,000 accounts at 250 institutions, Mr. Hendricks said.

One obvious concern for any institution doing business with the thrift industry is the fact that many thrifts remain in poor health, despite the prolonged period of lower interest rates.

"Sure, we're concerned," said Mr. Gerstenberg. "But as long as the S&Ls have fairly stable rates, the healthy ones will get more profitable.

"The problem ones," he acknowledged, "are so deeply mired that it will take a while to get out."

First Interstate, he said, deals with both the healthy and the unhealthy, but keeps a sharp eye on the latter. ■

First Texas Arranges To Automate Branches

DALLAS — First Texas Financial Corp., holding company for the largest savings and loan system in Texas, has arranged with Docutel/Olivetti Corp. to automate its branches throughout the state.

Under an $8.8 million contract, Docutel's Line 1 Branch Automation System will be installed in the 113 branches of First Texas Savings Association and Gibraltar Savings Association. Previously, Docutel placed nearly 1,000 First Texas automated teller machines in 7-Eleven stores throughout Texas. ■

s you just desserts.

franchising in 1981 after uniting our own affiliates in 11 western states under the First Interstate name.

Since then, franchisees have come aboard from eight states–Hawaii, Alaska, Montana, Wyoming, Colorado, Wisconsin, New Mexico, and Iowa. These operations represent 34 banks with 113 offices and $3.8 billion in combined assets.

Here's how one franchisee bank profited immediately after changing its name:

First Interstate Bank of Wisconsin, positioned in America's dairy heartland, helped our trading division arrange the sale of $1 million worth of premium cattle to a major dairy products company in South Korea. The bank quickly found sellers and established itself as an organization that could handle complex international trade agreements.

To learn more about our franchising program, call John Dean, President, First Interstate System, Inc., at (213) 614-3043. He'll give you the scoop.

First Interstate Bancorp

Drop in Foreign Balances

Continued from Page 25

Citibank also fell one place in rank, to third position, with $924 million in foreign correspondent balances, down 13% from midyear 1984.

Irving Trust Co., despite a 6% decline in these balances, moved up two places in rank, to fourth, with $675 million; Bankers Trust Co. again was fifth with $605 million, although its balances dropped 39%; Morgan Guaranty Trust Co. moved up one notch, to sixth place, with $539 million, down 25% from the year before; and Chemical Bank fell three places, to seventh place, with $499 million, down 51% from its 1984 level.

Usually, increases and decreases in these types of deposits are influenced by the day of the week that these deposits are reported. For example, these deposits tend to be higher on Mondays than on Fridays, because banks withdraw funds Friday in order to take advantage of the Eurodollar market. Banks then redeposit these funds in American banks on Mondays. However, the report date is not a factor in the comparison of the 1984 and 1985 data, since both report dates fell on the weekend. June 30, 1984, was a Saturday, and June 30, 1985, was a Sunday.

The rankings of two of the banks were affected by their failure to report all of their June 30, 1985, foreign correspondent balances. Security Pacific National Bank, Los Angeles, and Mellon Bank, Pittsburgh, did not provide *American Banker* with the clearing balances in their respective Edge bank subsidiaries. Both of these banks had about $90 million in Edge bank clearing balances on June 30, 1984. ■

Suspension . . .

Continued from Page 2

Glancz noted. If the administrative decision is then appealed, he added, the process could take up to two years.

In the meantime, lawbreakers can move from one bank to another without the clearance of the federal regulators. "You have got to be able to prevent that, or you're always one step behind," he said. Mr. Glancz called Judge Greene's ruling on this matter "a serious setback."

The banker in this case is currently the subject of an administrative proceeding, where he will have the opportunity to present his side of the case to an administrative law judge. As Geoffrey Vitt, the attorney who argued the case against the FDIC noted, when emergency suspension orders are issued "there is no opportunity for you to present your case." The only recourse the banker has, he said, is to appeal the order in the courts.

Suspension powers are "generally reserved for the more serious cases," said Arthur L. Beamon, the FDIC's assistant general counsel in charge of enforcement. Mr. Beamon said that of the roughly two dozen removal actions the FDIC has taken this year, only a handful were suspended immediately. Others were barred at the close of an administrative proceeding, or after the banker voluntarily agreed to stay out of the business.

While the federal agencies view their suspension powers as an important enforcement tool, others view these powers as potentially harmful to innocent people.

'Irreparable Injury'

"In an area where there is potential to severely injure both the person and the institution, Congress limited the regulators' authority," said Mr. Vitt, who is with the Washington office of Caplin & Drysdale.

Judge Greene agreed. "The severe and permanent potential injury to [the banker's] business reputation as a result of a nine- to 12-month interim suspension, together with economic hardship caused by the destruction of [the banker's] banking career, clearly constitute irreparable injury," he wrote.

The FDIC, Judge Greene concluded, "may not issue a blanket, nationwide order where only interim conclusions have been reached, especially given the serious hardship of a suspension from office upon an individual and the length of time an interim suspension is likely to be in effect."

The judge concluded that the agency must suspend individuals on a "bank-by-bank, individualized basis."

Already, one banker — the subject of an enforcement case brought by the Comptroller of the Currency — has cited Judge Greene's decision in his defense. The court in that case, however, did not buy the argument, according to Robert Serino, the Comptroller's deputy chief counsel for operations.

Despite Judge Greene's decision, regulators at each of the federal banking agencies contend that they do have clear authority to suspend individuals nationwide, and some predicted that if the case is appealed it will be overturned. ■

Reuters to Buy Options For More Instinet Stock

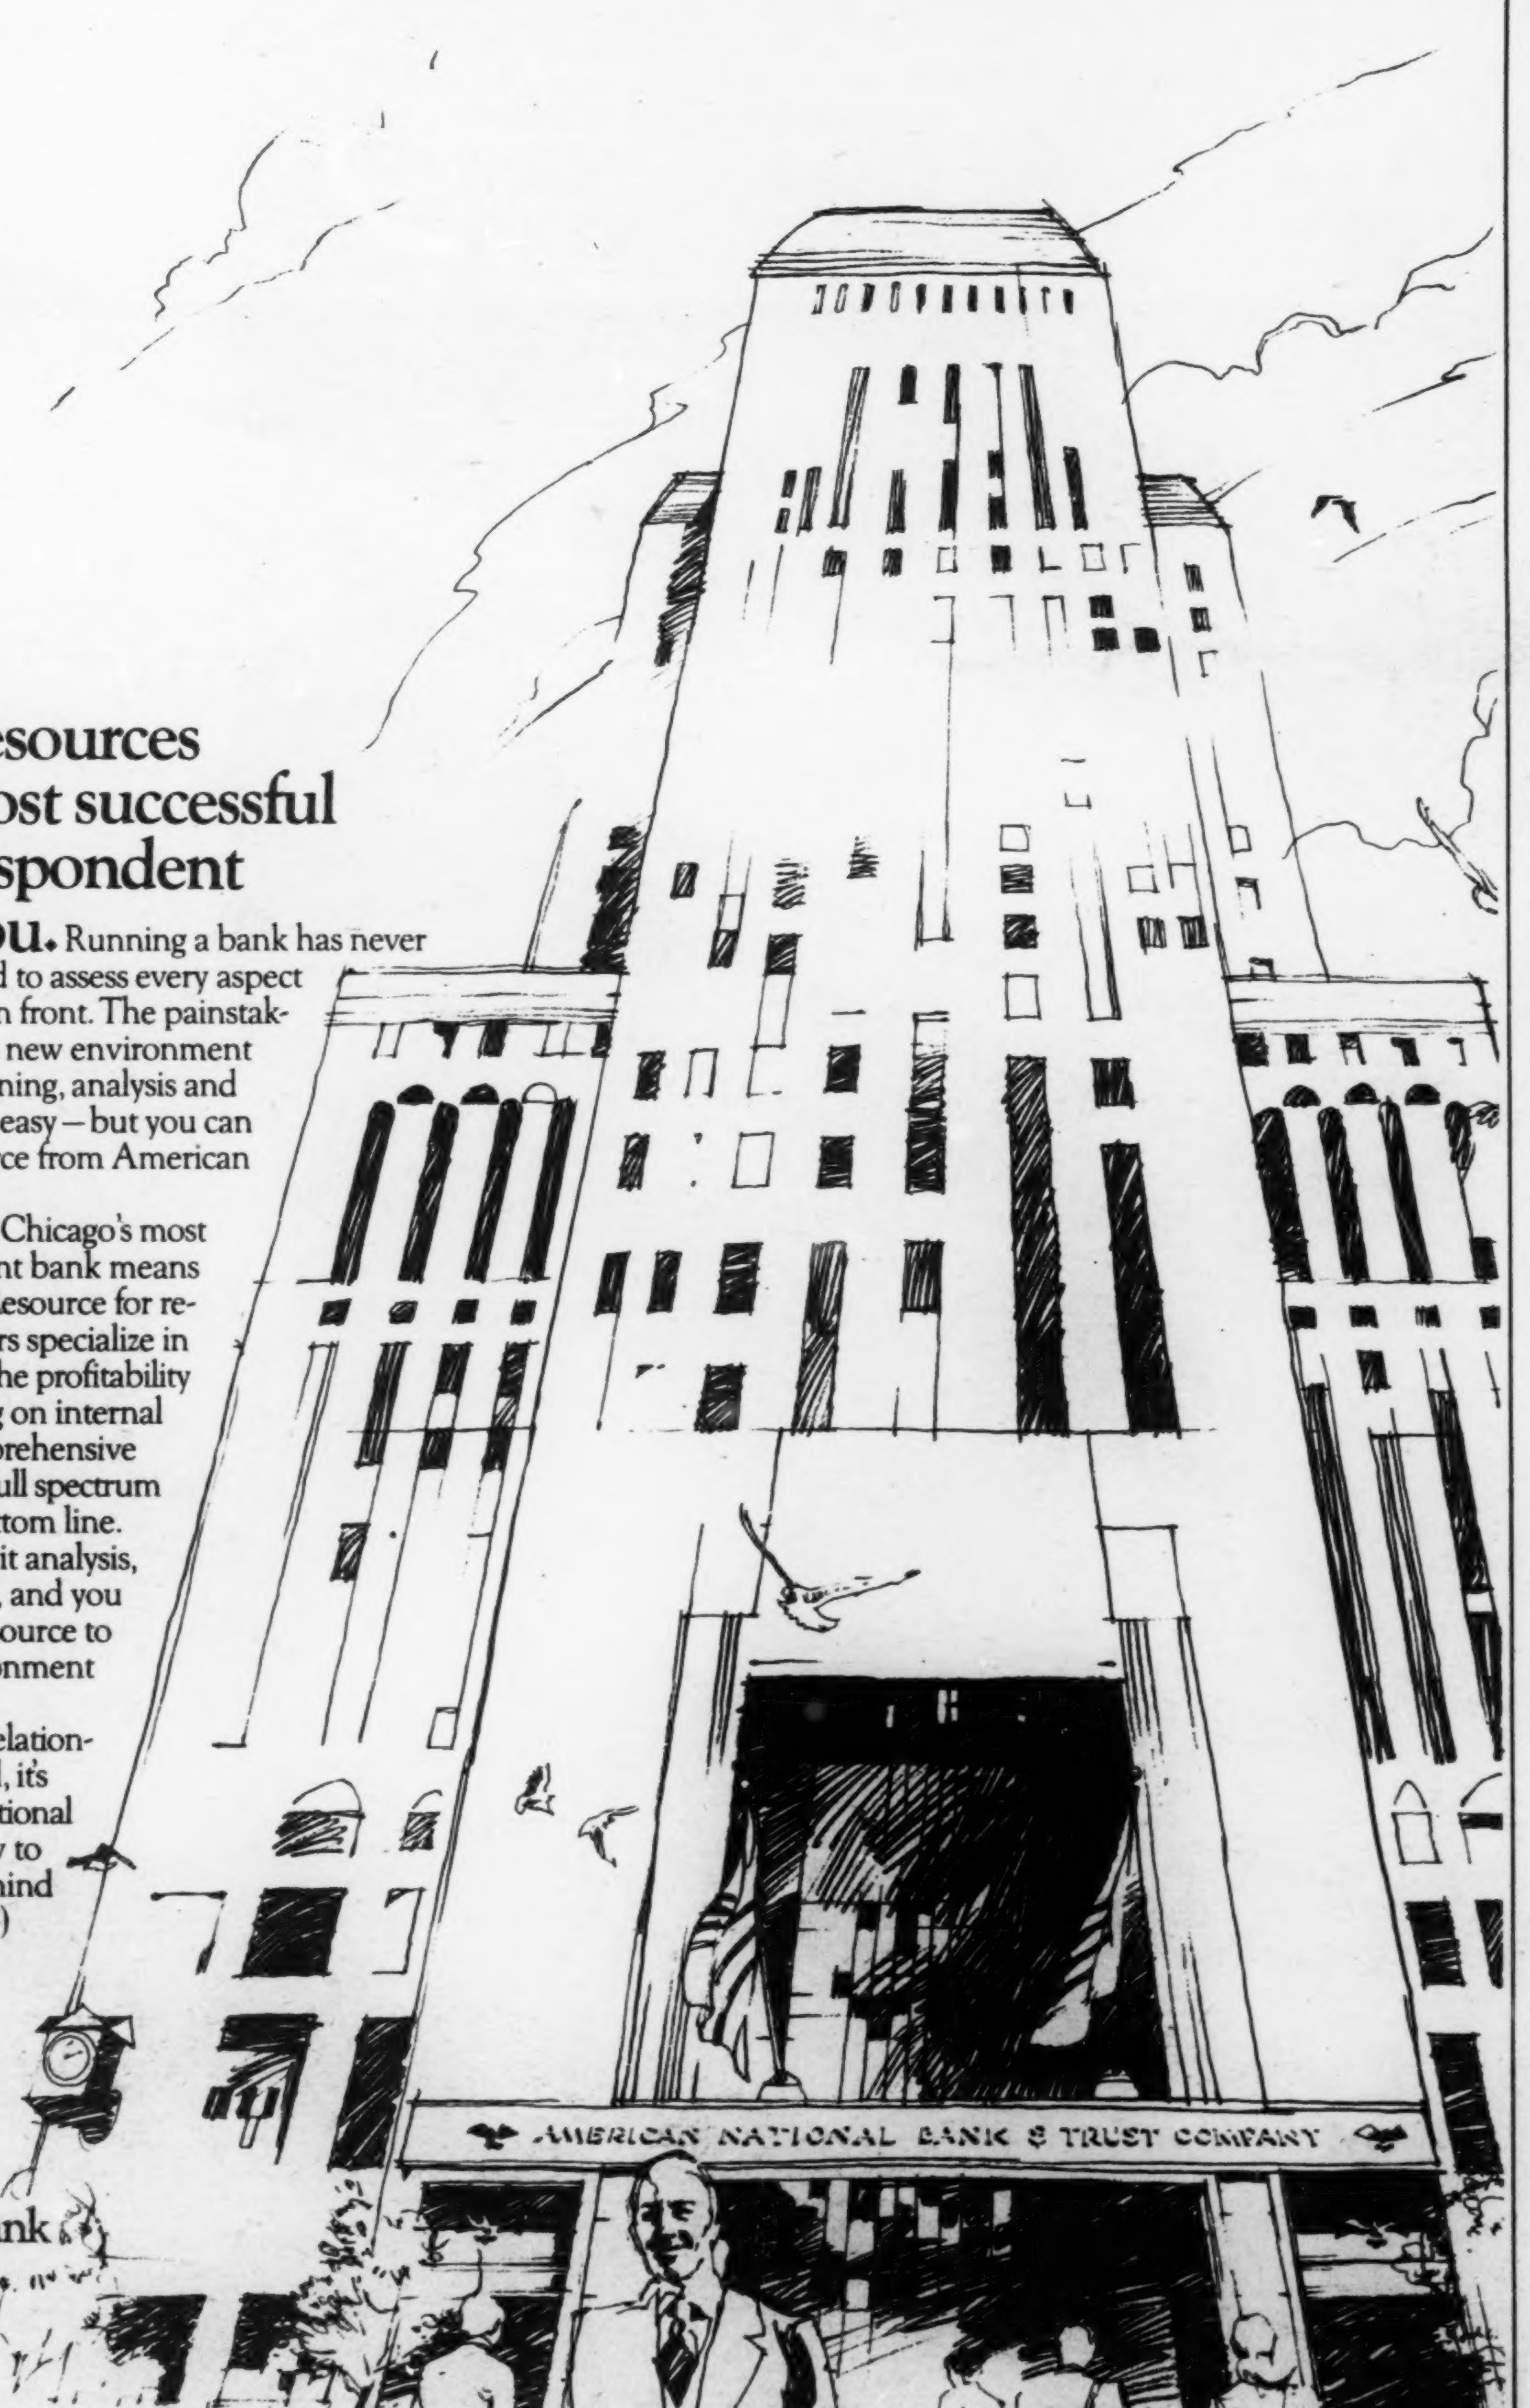
NEW YORK — Reuters has announced that three brokers will sell it options to buy another 900,000 new shares of Instinet, putting it in a position to acquire up to 25.7% of the common stock of that institutional trading network.

On Oct. 28, the two announced an agreement under negotiation since June that enables Reuters to acquire up to 16% of Instinet if all options are exercised.

In this week's deal, Reuters will spend $4.5 million to buy warrants for 600,000 shares from Merrill Lynch & Co., for 150,000 shares from Dean Witter Reynolds Inc., and for 150,000 shares from Shearson Lehman Brothers. The warrants are exercisable at $20 a share through April 30, 1987.

The announcement said the purchases will be consummated when the Oct. 28 agreement in principle between Reuters and Instinet is consummated.

The Instinet network enables banks, dealers, and other institutions to trade stocks among themselves without an active broker middleman. Reuters operates a worldwide news gathering service and supplies an array of price and financial information services to banks and other business subscribers. ■



AMERICAN NATIONAL BANK & TRUST COMPANY

Put the resources of Chicago's most successful major correspondent bank behind you. Running a bank has never been tougher. Today, you need to assess every aspect of your operation to stay out in front. The painstaking process of adapting to this new environment requires resources such as training, analysis and product development. It's not easy—but you can do it with the Chicago Resource from American National Bank.

Our proven track record as Chicago's most profitable major correspondent bank means you can rely on the Chicago Resource for results. Our experienced bankers specialize in showing you ways to improve the profitability of your bank. From consulting on internal funds management—to comprehensive training programs, we cover a full spectrum of issues which affect your bottom line. Today, we offer schools in credit analysis, loan review and sales training, and you can count on the Chicago Resource to expand as the banking environment continues to change.

The Chicago Resource. It's relationship banking at its finest. And, it's only available at American National Bank. For information on how to put the Chicago Resource behind you, call Dennis Reher at (312) 661-5265.

Total correspondent balances are the sum of demand deposits of commercial banks in the U.S.; demand deposits of other depository institutions in the U.S.; demand deposits of banks in foreign countries; and demand deposits of foreign governments and official institutions.

How Bankers' Balances Compare

By Federal Reserve District, 6/30/85 vs. 6/30/84

	Due to Banks (in '000s)		%	Number of Banks(d)	
	6/30/85	6/30/84(a)	Change(c)	6/30/85	6/30/84
District 1	1,697,551	1,666,269	1.88	19	19
District 2	6,681,772	6,565,108	1.78	29	30
District 3	1,165,784	1,064,762	9.49	11	13
District 4	992,139	912,870	8.68	13	15
District 5	1,235,635	931,681	32.62	20	22
District 6	2,423,950	2,293,530	5.69	39	44
District 7	4,061,214	3,578,773	13.48	45	44
District 8	1,612,609	1,715,205	-5.98	21	20
District 9	984,006	676,538	45.45	10	20
District 10	2,241,950	1,996,289	12.31	36	39
District 11	3,978,419	3,327,477	19.56	53	50
District 12	4,317,255	4,169,758	3.54	30	29
TOTALS	**31,392,284**	**28,898,260**	**8.63**	**326**	**341**

(a)—Data are for the 326 banks in this year's tabulation.
(c)—The percentage change in domestic correspondent balances from 6/30/84 to 6/30/85
(d)—The number of banks with $10 million or more in domestic correspondent balances.

In the table entitled "Deposits Due to Foreign Banks" on page 36, American Banker lists all U.S. commercial banks with $10 million or more in demand deposits due foreign banks as defined in the story beginning on page 1. This table shows the Edge Act banking component of this total for banks with Edge banks with such deposits. American Banker asked the banks to report combined data for all its domestic Edge bank offices. Some large banks with sizable clearing balances in their Edge bank subsidiaries failed to provide American Banker with Edge bank data. These banks are listed with an **(N.A)**. appearing in the 6/30/85 data fields. For banks owning more than one Edge, figures shown are the combined sum of balances in these Edges. Footnote **(e)** identifies these banks.

Credit Unions Win Bigger Share of Thrift Market

By L. MICHAEL CACACE

NEW YORK — Two years of superior growth at the nation's credit unions have enabled these institutions to pick up market share at the expense of savings banks and savings and loans. At midyear, credit unions had 10.4% of thrift industry assets and 11.5% of the industry's deposits. Just two years earlier, they held only 9.2% of the industry's assets and 9.9% of its deposits.

Over the 12-month period ended June 30, assets and deposits grew more than twice as fast at credit unions as at the S&Ls and savings banks combined. During the previous year that ended on June 30, 1984, assets grew 38% faster and deposits grew 72% faster at credit unions than at the other thrifts.

The main reason for the faster growth at credit unions this year is their ability to offer higher interest rates than savings banks and S&Ls on different types of deposits.

These are some of the findings of the *American Banker's* annual survey of the top 100 credit unions published today.

According to data from the Credit Union National Association, or CUNA, as it is known, at midyear the average rate on regular savings shares at credit unions was 7.30%, while the average weighted offering rate on certificates of deposit of various maturities was 9.20%. In contrast, the rate on regular savings accounts at other thrifts was 5.50%. And the av-

Effect of Tennessee Failures Far From Ruinous, Study Says

FDIC Economists Find No Deposit Loss and No Serious Impact on Loan Growth; State's Bankers Dispute Some Conclusions

By BART FRAUST

BANK FAILURE

NEW YORK — A state can withstand a relatively large number of bank failures without suffering a major outflow of deposits from its banking institutions or serious effects on statewide loan growth.

In fact, even the impact of bank failures on local communities is arguable.

These conclusions can be drawn from data included in a recent study published by the Federal Deposit Insurance Corp. entitled, "Tennessee's Bank Failures: The Aftereffects." The study was published in the Economic Outlook series offered by the agency's division of research and strategic planning.

Since 1982, when the national rate of bank failures began to climb, 30 Tennessee banks have failed, more than in any other state. In both 1983 and 1984, Tennessee led the nation in the number of bank failures. The failed banks represented about 7% of total Tennessee banking assets.

Sixteen of the failed banks were members of the Butcher brothers' chain of banks or failed in part because of loans purchased from Butcher-owned banks. The largest Tennessee bank to become insolvent was the $760 million-asset United American Bank of Knoxville, whose chief executive officer was Jake Butcher.

Of the $1.9 billion in deposits held by failed Tennessee banks through 1984, only about $1.7 million did not get 100% protection from the FDIC. Of the 30 Tennessee bank failures since 1982, the vast majority were handled through a purchase-and-assumption transaction, which has a minimal impact on depositors.

Despite the high failure rate, Tennessee banks saw both deposits and loans grow in 1982, 1983, and 1984, the period covered by the study.

The high failure rate was a major force behind changes in Tennessee banking law, including a bill permitting interstate banking, according to the report. Tennessee bankers and banking analysts interviewed for this article hotly disputed this contention.

"The move for an interstate banking bill in Tennessee, like the earlier move for liberalization of in-state merger laws, was sparked by the failure of United American Bank," the report argued. "Proponents alleged that deposit outflows from Tennessee had occurred following the UAB failure and that a crisis of confidence surrounded Tennessee banking. According to this view, allowing out-of-state companies

The listing excludes corporate central federal credit unions and state central credit unions. **Charter-Insurance Type:** 1= Federally-chartered credit union (FCU), which is NCUA-insured. 2= State-chartered NCUA-insured. 3=State-chartered state (agency) insured. **Member Savings:** Includes share capital, share drafts, deposits, and investment certificates. **Total Capital:** This is the sum of statutory reserves plus undivided earnings. **Ratio of Capital to Assets:** Total capital divided by total assets expressed as a percent. **N.A.**-Not available.

Credit Unions Gain Market Share at Expense of Other Thrifts

Continued from Page 1

erage weighted offering rate on certificates of deposits at FSLIC-insured institutions was 8.89%, according to data from the Federal Home Loan Bank Board.

One of the fastest growing deposit components at credit unions was individual retirement accounts, or IRAs. Over the 12-month period ended June 30, IRAs skyrocketed 63.5% at credit unions and totaled $12.6 billion at midyear.

The growth in IRA deposits accounted for 26% of total deposit growth at credit unions over the year, and they now comprise 10.5% of total deposits, compared with 7.6% a year earlier. According to CUNA, the average weighted offering rate on credit union IRAs was 9.80% on June 30.

There are two reasons why credit unions offer higher rates on deposits than savings banks and S&Ls.

- Credit union operating costs are lower than those of the other thrifts. Many credit unions use volunteer workers, for example. Also, credit union loan losses tend to be lower because of the "common bond" of membership.
- Credit unions are nonprofit organizations. As such, there are no retained earnings. All of their earnings are paid out as dividends to their members.

From June 30, 1984, to June 30, 1985, assets for the credit union industry were up 19.2% to $131.7 billion from $110.5 billion, and deposits were up 18.4% to $119.9 billion from $101.2 billion, according to data from CUNA.

Over the same period, the assets of S&Ls and savings banks combined rose 8.6% to $1,129 billion from $1,040 billion, and deposits rose 8.3% to $928 billion from $857 billion, according to data from the Federal Home Loan Bank Board and the National Council of Savings Institutions.

Today's survey results are presented in seven statistical listings. The main listing ranks the top 100 credit unions by total assets at midyear 1985 and midyear 1984. Also shown are total member savings, total capital, the number of regular accounts, and the capital-asset ratio for each institution, as of June 30. Six smaller tables summarize and highlight the data in the main listing. These tables are found on page 26.

Among other findings of the survey:

- The Navy Federal Credit Union, Washington, D.C., remains the top credit union in the nation in total assets, member savings, total capital, number of regular accounts, and in IRA deposits. At midyear, Navy Federal had $1.9 billion in assets, $1.7 billion in member savings, $117.2 million in capital (statutory reserves plus undivided earnings), and 684,094 regular share accounts. In addition, it had $307 million in IRA deposits, up 55% from $198 million a year earlier.

Navy Federal's $1.7 billion in deposits makes it the 90th largest among all thrift institutions — savings and loans, savings banks, and credit unions — at midyear. But its IRA deposits rank it among the top 20 in these deposits.

- The Orange County Teachers Credit Union, Santa Ana, Calif., which ranked 21st in assets, with $289 million, for the second consecutive year had the best capital-to-assets ratio among the top 100 credit unions — 16.5%. This was substantially higher than the second best ratio of 12.1% for Kern Schools Federal Credit Union, Bakersfield, Calif.
- The top 100 credit unions had combined assets of $27.3 billion on June 30, up 17.4% from $23.2 billion a year earlier. This amounted to 20.7% of the assets of the entire credit union industry, down from 21% the year before.
- The credit union with the largest gain in assets among the top 100 was the Philadelphia Police & Fire Credit Union. Its assets rose 40.2% to $196.6 million from $140.2 million, and it moved up 16 places to rank in the 55th position.
- The second largest gain was scored by Redstone Federal Credit Union, Huntsville, Ala. Its assets were up 39.8% to $287 million, ranking it 24th at midyear, up 14 places from the year before. The gain was attributable to

Dear Reader,
How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Top 100 Credit Unions** survey that appear in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

BANK NAME

Travelers Express has been in the mainstream of financial processing services for many years. In fact, we're the largest volume money order provider in the commercial marketplace…and that didn't happen overnight.

Teamwork and state-of-the art equipment put us at the head of the class for reliable and efficient processing of money orders and official checks.

Official Check and Money Order services from Travelers Express relieve your institution of paper inventory and storage costs, back office reconciliation, stop payments, photocopies and tracing. Our services also offer you an opportunity to earn income for your financial institution through increased balances.

Best of all, we stand behind your institution as well as our products. We're not a bank and don't compete for your customers' attention.

Omaha . . .

Continued from Page 3

farmers in Iowa, Nebraska, South Dakota, and Wyoming, areas hard hit by the agricultural slump.

The continued decline in agriculture has caused further deterioration of the health of the Omaha bank since the assistance package was announced in July. "Agriculture has continued to face problems over the last four to five months that would indicate that the amount of funds that Omaha would require is just as great, if not greater," than when the aid package was put together, said William Pettigrew, senior economist of the Federal Farm Credit Banks Funding Corp., the system's funding arm.

But he also said that "there are existing agreements in place that would prevent a default" on system bonds even if the assistance package for the Omaha bank falls apart.

According to bankers in the district, some farmers who voted to reject the aid package feared that they would lose local control of their PCAs and land banks under the proposed merger.

New York . . .

Continued from Page 8

Emigrant savings banks all would have negative net worths and theoretically would be insolvent if not for their net worth certificates. At Sept. 30, without the certificates, the Bowery's net worth would have been a negative $164.6 million, but the FDIC rescue on Oct. 1 would have changed that drastically.

Emigrant's net worth, without net worth certificates, would have been a negative $57.6 million, and Williamsburgh's would have been a negative $37 million.

Two other institutions, East River Savings Bank and the Dollar-Dry Dock Savings Bank, would have net worth levels below the regulatory minimum of 3% if not for net worth certificates. The Greater New York Savings Bank also has a low net worth. ■

Analysts

Continued from Page 3

One positive aspect of the mortgage banking subsidiary is a recent change in management at Imperial. Kenneth J. Thygerson resigned as president and chief executive officer of the Federal Home Loan Mortgage Corp. in September to take the same positions at Imperial. "The most positive thing about the company is the new management," Mr. Gray said. "Thygerson is the perfect guy to cure the problems at the mortgage company."

With the change in management, Mr. Gray said, Imperial could have a "breakout" in earnings over the next year.

Fewer Adjustable-Rate Mortgages

Imperial has other earnings problems besides its mortgage banking difficulties, Mr. Gray said. Imperial has only about 30% of its loans in adjustable-rate mortgages, compared with 40% to 60% at its competitors.

He said Imperial would not be able to reach the 40% to 60% level until late 1986 or early 1987, and with an expected interest rate peak of 11% to 13% in 1987 and 1988, Imperial will have a large decline in operating earnings.

Another problem with the company is that it has a high amount of long-term Federal Home Loan Bank debt at an average cost of 11%. With its yield on long-term fixed-rate loans also at 11%, it leaves a net spread of zero on 15% to 17% of Imperial's earning assets, Mr. Gray said.

In the third quarter of this year, Imperial reported a loss of $4.9 million, or 34 cents a share. Imperial attributed the loss mainly to two nonrecurring items, but Mr. Gray said operating earnings were also less than expected in the quarter. "Net interest income did not develop as their own numbers would suggest," he said.

He said monthly data from Imperial showed that the company would have a net interest spread of 1.78% for the quarter, but the quarterly data actually showed only a 1.27% spread.

Of the 51 basis point difference, 16 basis points were attributed to a loss taken on interest rate futures during the quarter, but there was "no plausible explanation" for the other 35 basis points, Mr. Gray said.

"The discrepancy in the company's statistics is quite serious," he said.

Mr. Gray is projecting earnings of 60 cents a share for the company for 1985, and $1.80 a share in 1986. Following the third-quarter loss, Imperial's earnings were only 2 cents a share for the first nine months of 1985.

Operating earnings, excluding the sale of assets, is expected to be 25 cents a share for this year and 75 cents in 1986, he said, "if they don't cure their mortgage banking problems." ■

Credit Unions . . .

Continued from Page 23

the institution's high offering rates. According to a spokesman, "We pay the highest dividends in town."

The top 100 credit unions consist of 61 federally chartered credit unions and 39 state-chartered credit unions. Of the 39 state-chartered institutions, 30 are insured by the National Credit Union Administration, and nine are state insured. A year earlier, the top 100 credit unions consisted of 58 federally chartered credit unions and 42 state-chartered credit unions. Of the 42 state- chartered institutions, 25 were NCUA-insured and 17 were state insured.

There were 18,176 credit unions operating at midyear, down 3.8% from 18,900 the year before and down 17% from the 21,922 credit unions in existence at yearend 1980. The sharpest declines in the number of credit unions occurred in 1982, when the industry shrank by almost 6%. That decline was attributable to high interest rates — many credit unions were paying more for deposits than they earned on long-term investments and loans. Many lost money, and some failed.

The decline in the industry has been more moderate over the last three years, averaging about 3.2% per year. The recent declines primarily reflect changes in credit union laws, which liberalized membership requirements and made it easier for credit unions to merge. ■

Random Thoughts

By SANFORD ROSE

A recent report of a highly respected bank analyst identified loan sales as the most "acute manifestation" of commercial banking's evolution into investment banking. It is clear that whole loan sales are currently a "hot topic" at money center banks. Indeed, sales may amount to as much as $30 plus billion. But it is not clear that the activity has quite as expansive a future as some foresee.

And even if it does, it is a mistake to identify the selling of loans with what might be called an investment banking mentality. Successful investment bankers must be good loan brokers, but good loan brokers are not necessarily top-drawer investment bankers.

Why are big banks so anxious to sell loans? As one money center banker puts it: "It is because we are having a helluva time funding a name company at a positive spread." In the past few years, the credit ratings of major banking companies have been downgraded. It used to be possible for large banks to fund even an AA industrial credit at a positive carry. Today this is far less possible.

Regulator Warns on Preferred Stock

Excessive Reliance on It Proves Fatal to Chicago Bank Holding Company Plan

By BART FRAUST

NEW YORK — Excessive reliance on preferred stock to meet minimum capital guidelines may be fatal to a bank's acquisition plans.

Croesus Partners I Inc., a nonoperating Chicago corporation, found this out the hard way recently when the Federal Reserve Board turned down its application to become a bank holding company by acquiring LaGrange Bank & Trust Co., LaGrange, Ill., and First Burlington Bank, Willowbrook, Ill.

The Fed, in a 3-to-1 decision, ruled on Friday that Croesus' "excessive reliance on preferred stock to meet minimum capital requirements, coupled with its marginal capital position and high leverage, indicate that applicant would not be capable of maintaining an adequate level of capital as required by sound banking practice and the International Lending Supervision Act and would not have sufficient financial flexibility to serve as a source of financial strength to its subsidiary banks in the future."

Fed Governor Martha Seger dissented from the majority view, while Fed Vice Chairman Preston Martin abstained.

"These are changing times in the banking industry, and it is my view that the board should permit bank holding companies a greater degree of flexibility in issuing capital instruments, including preferred stock, to meet their capital adequacy guidelines," Mrs. Seger said in her dissent.

Mrs. Seger also dissented from the majority view in another decision handed down by the Fed last week, a ruling allowing the Industrial Bank of Japan, Tokyo, to acquire J. Henry Schroder Bank & Trust Co., New York. Her dissent — as well as a statement by

Fed Staff Eyes Funding Unit Reserve Rules

Changes Would Affect 'Orphan' Finance Companies of Banks

By NINA EASTON

WASHINGTON — The Federal Reserve Board staff is considering ways to impose reserve requirements on off-balance-sheet transactions that banks use to move assets off their books, according to sources close to the agency.

The staff proposal, which could be presented to the board as early as Dec. 11, would amend Regulation D, which defines deposits and imposes uniform reserve requirements on depository institutions.

If adopted by the board, the changes would affect so-called "orphan" finance companies, which some banks have formed — but do not legally own — to purchase the banks' assets. These orphan companies then sell to investors commercial paper collateralized by those assets.

Experts say the changes also could reduce the economic attraction of "securitizing" assets — when banks, for example, package automobile loans as securities that are sold to investors.

"Potentially, these changes could make it more difficult and expensive" for banks that want to do these kinds of deals, said Robert Houghton, an associate with First Boston Corp. in New York.

Gilbert T. Schwartz, a Washington attorney and former associate general counsel for the Fed, predicted that the changes could kill a number of deals already in place or on the drawing board.

Depository institutions generally are required to maintain noninterest-bearing reserves equal to a portion of their deposits. Under the Fed staff's plan, sources said, the agency would broad-

New Andersen Survey Predicts More Nonbank Competition

By LAURA GROSS

NEW YORK — In the 1990s, commercial bankers will still be their own toughest competition, according to a survey of chief executive officers of the 150 largest banks in the nation, released on Tuesday.

But thrifts, which bankers today judge to be their chief nonbank competitors, will lose some of their ferocity by the 1990s, dropping to second place behind the large financial services companies such as American Express Co. and Merrill Lynch & Co. — the kinds of firms bankers say will provide the coming decade's most extensive nonbank competition.

Next, after the second-place thrifts, come merchandise retailers, a strong third, and then securities firms and insurance companies.

The results of the survey — commissioned by the Association of Reserve City Bankers and carried out by the consulting firm of Arthur Andersen & Co. — are important because the perceptions of these opinion leaders underlie their strategic plans. Reflected in the results are the opinions of chief executives at institutions that represent 70% of the nation's banking assets. The Association of Reserve City Bankers is a trade group comprised of the nation's 150 largest banks in terms of assets. .

"As the chief executive of the Marine Corp. [the $3.2 billion-asset Milwaukee bank holding company], it is vital to me to be able to predict the future of the banking industry. This confirms a lot of things we are already doing," explained George R. Slater, who is also chairman of Marine and of the Association of Reserve City Bankers' Banking Research Trust Fund.

Mr. Slater, who said it took him a whole day to answer Andersen's original, 60-page questionnaire, was commenting during a press briefing on Tuesday when results of the survey — Strategic Issues in Banking — were made public. Mr. Slater noted that the response rate for the survey was 83% which, he added, insures a high degree of reliability.

Andersen executives at the briefing also pointed out that understanding the chief executives' perceptions is vital to

FDIC Expected To Postpone Disclosure Rule

By ROBERT TRIGAUX

WASHINGTON — The Federal Deposit Insurance Corp. is expected on Monday to postpone for six months a rule that would reveal to the public enforcement actions that the agency takes against banks or bankers.

Industry sources say the decision may mean the agency has no intention of implementing the rule, currently scheduled to take effect in January. However, FDIC Chairman William Seidman might adopt parts of a broad disclosure proposal by the Office of the Comptroller of the Currency that would require banks to make public enforcement actions against them. The Comptroller's proposal is out for public comment until Jan. 28.

Seidman Acknowledges a Mistake, Page 15

The FDIC plan to publicize through agency press releases the names of banks and bankers involved in final cease-and-desist orders stirred considerable opposition from the banking industry. Its original intent was to use adverse publicity to increase pressure against banks and bankers abusing the financial system.

On Monday, the rule will be reviewed at an FDIC board meeting.

In late October, the American Bankers Association protested the agency plan and formally petitioned the FDIC to reconsider its cease-and-desist disclosure plans.

Last week, officials of the Independent Bankers Association of America, which represents community banks, met with Mr. Seidman to discuss the inequities and potential risks of small banks in small towns being required to disclose enforcement actions. Mr. Seidman said the agency would reconsider the rule, according to the Inde-

The inside story.

Applying advanced technology and the most experience in the business, Docutel/Olivetti created the cost-effective ETS 5100 System. And applying our success with the proven ETS 5100, we created a through-the-wall ATM, the ETS 5200 System.

Naturally, it has all the features you'd expect from the innovative leader in banking automation, both inside and out.

Here's the inside story. The ETS 5200 has all the extraordinary features found in our ETS 5100 interior system. Its software architecture lets you modify the ATM's features by simply sending messages down-line from the host computer. Plus, the ETS 5200 has the reliability that all Docutel/Olivetti systems are famous for.

To get the whole story on the ETS 5200 System, call your Docutel/Olivetti representative today.

Survey . . .

Continued from Page 1

analyzing the ways in which they will allocate resources and direct the development of their financial institutions over the next 10 to 15 years.

A product-oriented strategy that promotes one-stop convenience is the strategy that the CEOs say can beat the nonbanks, according to the survey. Yet more than 80% of the respondents say they think that nonbanks could profitably offer lease financing, deposit taking, installment lending, and savings accounts; 48% said they think that insurance companies and pension funds will increase their share of the credit market by 1990 at the expense of banks and thrifts.

The Andersen survey, consisting of a 60-page questionnaire sent to the chief executives of the nation's 150 largest banks in the winter of 1984, and a shorter, 15-page questionnaire sent in the spring of 1985, also questioned chief executives about industry structure, target markets, and profitability. The report is available from Andersen for $96; the cost of the survey was "in the six figures," one Andersen executive said.

A separate telephone component queried 100 representatives of the two markets identified as most profitable by all sizes of banks included in the study. These markets are consumer households earning $35,000 or more annually and middle-market corporations with $50 million-$100,000 million annually in sales.

Big Discrepancies

In addition to showing that the nation's largest banks are all concentrating on the same two market segments, the survey turned up some interesting discrepancies between what bankers think these customers want from their banks and what the customers are actually looking for. For example, after the price of a loan, consumers are most concerned about loan maturity and availability of unsecured credit; but bankers think they are interested in the speed of loan approval and the qualification requirements.

Also, respondents chose the same criteria — speed of loan approval and qualification requirements, after price — as most important to middle market customers. But, in fact, what these corporate customers want, after price, is loan maturity and availability of supporting products, neither of which were included in the five top-ranked criteria by bankers.

Findings about deposit criteria are even more shocking: convenience was a write-in third choice for affluent consumers, coming after service charges, which was first, and rates, which were second. But bankers chose rates as first, service charges second, and variety of products was third. For middle-market respondents, convenience was a write-in first choice that tied with rates and was way ahead of cash management services, which is what bankers say they think these customers want.

"Throughout the survey is a theme that bankers need to get closer to their customers," explained Nigel A.L. Brooks, partner, Arthur Andersen & Co., New York. And James S. Labick, partner in charge of the financial services consulting practice in New York, added, "The results indicate that bankers must make substantial investments in market research and marketing information systems in order to better understand customers' preferences."

Where They Think the Profit Lies

Over 40% of the respondents believe that banks have an obligation to offer services to all consumers, including state and local governments. But only 11% believe they should be required to do so.

Mr. Brooks noted that bankers say they will increase expenditures in the three areas they think can provide the greatest opportunity for profit improvement — asset/liability management, marketing, and human resources management. Employee training is another area that respondents ranked No. 1 in terms of its ability to influence their profitability in a positive manner.

Asked what they must do to succeed in the next decade, bankers said choose the right market niche, deliver products and services to that niche efficiently and profitably, and implement profit-improvement techniques that enhance revenue and reduce costs, said Mr. Labick.

Andersen executives and Mr. Slater made much of the finding that showed these bankers predicting less of a decline in the number of banks than has been predicted in the past by smaller banks and by academics. Respondents to this survey see a drop of only 22% in the number of banks — to 11,500 from 14,750. This compares with a drop of about 33% in an earlier survey that included smaller banks which Andersen did in conjunction with the Bank Administration Institute.

Mr. Slater noted that this finding firms up his own sense that offering services to other banks will be a good business in the future: if there were few other banks it would be a lousy business, he said.

Grouped in Three Catagories

The banks included in the present survey were grouped in three categories: under $5 billion in assets, $5 billion to $20 billion, and over $20 billion. They were also grouped according to function: money center banks, regional money center banks, regional banks, and state/metropolitan banks.

Mr. Slater's point is that people are always worried about large banks eating up the smaller, rural banks, but this survey, he says, shows that they won't do that — evidently they'll eat or be eaten by other large banks.

"Community banks don't have to fear money center and regional banks gobbling them up — and for those community banks that are dressing up their balance sheets hoping to be acquired, most of them can forget it — the major banks are not interested," Mr. Labick said.

At least one finding in this comprehensive and complex report would tend to contradict this idea: 75% of state/metropolitan banks which responded said they'd be interested in buying community banks; but 85% of them — with multiple answers permitted — said they'd buy another state/metro bank. Mr. Labick explained the discrepancy by saying the banks would spend their money on other large banks first because they are interested most in depth of management talent and geographic location and want to get the most for their money.

Mr. Brooks noted a "tiering effect" in bank acquisitions, with banks of each size saying they'd buy the next smallest size. Also banks of each size say they expect to grow into the next largest size by the 1990s. Banks will tend to buy similar institutions. After other banks, investment banks, mortgage banks, and insurance companies would be the most likely acquisition candidates, assuming there were no restric-

bondholders first. Because American Savings Bank's bonds are not among the lowest-yielding in the pool, 41% of the trust's bonds would have to be put back before American saw its first bond returned.

American also did similar deals with its tax-exempt mortgages and virtually all its preferred stock. The thrift also sold the tax benefits of its bonds to shareholders by adding a "multiple put option" of three, five, or seven years to the securities.

With this structure, instead of a long-term investment, the new holder of the bonds had a three-year-maturity investment. At the end of three, five, or seven years, the bondholder can return the debt to American.

Mr. Reilly is proud of American's role as an innovator in devising novel financing techniques. For example, American was the first thrift institution to take part in a unit trust for its preferred stock.

"Our practice is not to wait until a couple of people have done a certain thing," he says. "I would rather give up that tax-exempt income and go after higher income and then use the additional income to help get rid of some of these underwater assets" that have dogged American's operations, he says.

Another type of "underwater asset" that hindered American's performance was old Federal Housing Adminiatration and Veteran Administration mortgages that were yielding about 8% to 8½%.

American transferred a total of $250 million of these mortgages to a Nevada subsidiary, ASB Capital Corp. That unit issued $100 million in Adjustable Tender Preferred Stock earlier this year. The subsidiary was necessary because, at the time, American was a mutually owned institution. American switched to stock ownership through a subscription offer this fall and a public stock offering that took place in November.

The mortgages were useful in the Nevada subsidiary because, as a limited purpose finance subsidiary, it was required to have assets with a market value to cover the value of any stock it issued. The mortgages themselves had a market value of substantially less than their face value but were enough to cover the $100 million preferred issue.

The stock issued through the subsidiary is now bearing a 6.53% interest rate. Its structure is similar to recent money market preferred or dutch auction rate preferred shares in that they are repriced every seven weeks.

However, in another novel twist pioneered by the thrift, the stock's dividends are not set through a blind auction. With ASB's preferred, Smith Barney & Co. canvases the market on the day before each new auction and sets a new rate based on what investors are willing to pay. Mr. Reilly says this technique has helped the shares bear an interest rate that is about 10 basis points lower, on average, than issues with blind auctions.

American is presently the only financial firm that has preferred stock outstanding using this repricing scheme.

The structure of using the Nevada unit works especially well for American because the thrift has substantial tax-loss carryforwards — a benefit of recent tough years — which it can use to shelter the income of the subsidiary.

Mr. Reilly further improved the spread available on the preferred stock through $50 million in interest rate swaps. In return for the payment stream equal to the dividends paid on half the total preferred stock, American now receives a floating-rate payment stream based on the commercial paper rate.

The swap helps decrease the cost of the swapped preferred stock to the tune of about 150 basis pints, said Mr. Reilly, because the commercial paper rate is about 8%.

"What really makes the swap work is the difference between the commercial paper rate and the preferred stock rate because the preferred is a tax-sheltered instrument," he says. The use of an interest rate swap gives the preferred stock a total cost that the treasurer says is below the rate on Treasury securities.

Another innovative financing technique used by American is a system that uses repurchase agreements and matches the maturities of high-yielding and deep-discount bonds.

This technique starts by selling deep-discount Government National Mortgage Association bonds to bond dealers under a repurchase agreement. The agreement specifies that American will reacquire the bonds at the same price on a specific date.

Mr. Reilly said the thrift recently sold $92 million of these, each of which bore an average rate of about 6%.

The money American receives from this repurchase agreement was invested in higher-yielding bonds, which were bought under a repurchase agreement with exactly the same maturity as the first one. The latest manuever involved a repurchase agreement of higher coupon bonds that yielded 8.71%.

The difference between the two yields is the spread the thrift receives on the financing. In this case, the spread was about 230 basis points.

Also, as in all the previous maneuvers, there was no ultimate sale of assets, so the thrift did not have to take a loss.

Mr. Reilly said a key to making these techniques work for American was the fact that previous management of the bank "had the foresight to concentrate on investments that had cash flow" such as mortgages, and not mortgage securities.

The three banks were involved in the 1981 voluntary merger that formed American Savings Bank were primarily mortgage lenders, he said, so they had "lots of cash flow which is being converted to current rates."

This is opposed to the tack that many other thrifts took in getting into the mortgage securities market in a big way. Those institutions faced major problems when interest rates spiked upward because they received only interest payments and could not expect to get principal repaid until the securities matured. ■

Survey . . .

Continued from Page 7

tions. The majority of those surveyed said it was very likely they'd buy another bank by 1990. Location is the most important criterion for choosing a candidate, they said.

The survey predicts that 12% — compared to 10% in the BAI-Andersen survey of 1983 — of consumers will use home banking by the 1990s; and 57% of consumers will be using automated teller machines

It also predicts that fee income, now comprising about 31% of net income of banks with assets over $20 billion, will rise to 45% by the 1990s. For all sizes of banks, fee income will comprise an increasing share of profits, mostly from advisory fees to existing bank customers, but also from combined transaction account packages or asset management accounts as they are called, trust services, loan commitments and originations, trading, and item processing.

While Mr. Slater identified services to other financial institutions as a niche in which his institution is interested, overall, respondents ranked advisory fees from this market segment low on the totem poll.

Interestingly, about a third of all bankers responding say they will develop and service products for nonbanks by 1990.

Mr. Labick said that most CEOs "told us that they do plan to specialize in particular products and industries, then expand these niches geographically, particularly within their own region."

Successful expansion, they said, will be based on depth of management talent and capital available. Pay scales, Mr. Slater noted, will be based upon prevailing rates offered by competitors regardless of industry. And incentive programs will be more widespread, Mr. Brooks added.

He noted that the impetus to move away from full-service banking is probably one of the most important survey findings. ■

Bank Board Proposes Easing Interstate Rules In Regional Pacts and for Buyers of Failed S&Ls

**By NINA EASTON
and MARK BASCH**

In a move that could give financial institutions a broader reach outside their home states, the Federal Home Loan Bank Board on Friday proposed giving any buyer of a failed thrift the right to expand into as many as four states.

Thrifts

The board also proposed giving interstate branching rights to federal thrifts in those states where interstate banking compacts are in place, as long as those compacts also apply to state thrifts.

Under current Bank Board policy, banks, thrifts, or other institutions can buy a failed thrift and obtain branching rights within that thrift's home state. The proposal could give buyers entry into a region rather than one state. They could expand into as many as three states in addition to the state in which the failed thrift is located.

"Now they're saying you can get four states for the price of one," said William S. Eckland, an attorney with McKenna, Conner & Cuneo.

Thrift acquisitions by bank holding companies are subject to approval by the Federal Reserve Board. It was unclear how the Fed would react to the Bank Board's proposal. Generally, the Fed only approves interstate acquisitions of healthy institutions when the state gives specific approval.

The proposal also states that any entity that purchases a thrift within a regional compact might be granted branching rights into more than four states.

While the proposal says that the board would prefer to grant branching rights in contiguous states, it adds that this would not be a requirement.

The proposal is already prompting strong opposition from community bankers. "This is a total and complete perversion of the fundamental doctrine that states should have the right to determine their own financial structure," said Kenneth Guenther, executive di-

Congress Pressed for Bank Legislation

Public Confidence Ebbs as Volcker Calls for Interstate Measure

By BARTLETT NAYLOR

WASHINGTON — "We have a circus going on here," declared Federal Reserve Board Chairman Paul A. Volcker this year. And that's not appropriate for banking, Mr. Volcker believes, which should be as boring as skim milk.

Thrift crises in Ohio and Maryland, a record number of bank failures, and a fragile Federal Savings and Loan Insurance Corp. fund have shaken confidence in the entire banking industry. On top of this, revolution continues in the industry. Banks are crossing borders in dozens of states and into several hitherto forbidden industries.

To restabilize the industry, and to set the rules for the financial services revolution, Mr. Volcker puts the responsibility on Congress.

Collectively, however, Congress has failed to rise to the challenge. If congressional bill writing is like marriage, then Senate and House banking leaders haven't even begun to date.

In 1984, the Senate passed a major bill, but the House Banking Committee did not reciprocate with corresponding legislation. This year, the House Banking Committee approved a handful of bills, but the Senate Banking Committee didn't even do its counterpart the honor of considering any legislation at all. Extension of two measures to aid ailing thrifts was the sum total of the year's accomplishments in

Fed's Securities Writ Under Fire In Administration

Special to the American Banker

WASHINGTON — Reagan administration officials, angered by the Federal Reserve Board's recent move to limit junk bond-financed corporate takeovers, are debating whether to propose legislation that would repeal the Fed's underlying authority over securities, according to several administration sources.

The administration is expected to fire off a letter today that "jumps all over" the Fed's proposal to extend its 50% margin requirement to the high-yield securities, one source said. The letter to the Fed — written by the Justice Department's antitrust chief Douglas Ginsburg with concurrence from the Treasury Department and the

IRA Shift to Equities Expected

Banks' Share May Shrink as Investors Seek Better Return

By PHILIP T. SUDO

NEW YORK — Countdown to April 15: 112 days.

Yes, it's nearing tax time, which means it's nearing IRA time as well. Nearly all growth in the individual retirement account market occurs in these next 112 days, and considering that it piles up in $2,000 increments, that growth is astounding. This past year, IRAs gained $40 billion in the first five months, up 30%, to $172 billion, according to the Investment Company Institute, a mutual fund trade group.

'85 preview '86

A Series of Articles Looking Back and Ahead At Issues Facing the Financial Services Industry

The group's figures show this breakdown of the IRA market as of May 31, 1985 (April 30 for credit unions; dollar figures are in billions):

	Market Share	IRA assets
Commercial Banks	28.9%	$49.6
Savings and Loans	22.5	$38.8
Mutual Funds	14.0	$24.0
Stock Brokers	11.6	$20.0
Insurance Companies	9.5	$16.3
Credit Unions	7.5	$12.9
Savings Banks	6.0	$10.3

The coming year is likely to see the market share of mutual funds and brokers increase. IRA suppliers have traditionally viewed retirement money as stable, long-term dollars, but the betting is that a sizable chunk of 1986 IRA money will head into equities, primarily through mutual funds and self-directed accounts.

Rates on certificates of deposit are down from past levels, and many IRAs

Fed Approves Interstate Sale Of Sound Thrift

Rhode Island Savings Bank Will Switch Charter and Insurer

By BART FRAUST

NEW YORK — The Federal Reserve Board for the first time has allowed a bank holding company to expand out of state through acquiring a healthy, federally chartered savings bank.

Interstate Banking

As part of the transaction, though, the thrift will convert to a national bank and switch to the Federal Deposit Insurance Corp. from the Federal Savings and Loan Insurance Corp.

Under the decision, the Bank of New England Corp., Boston, was permitted to acquire Old Colony Bank, a federally chartered savings bank based in Providence, R.I.

Other Mergers Reported on Page 3

Old Colony has received clearance from the Federal Home Loan Bank Board to convert from mutual to stock form and is awaiting word from the Office of the Comptroller of the Currency on its application to convert to a national bank with FDIC insurance.

Because Old Colony is in the process of converting to a national bank, the Fed treated the acquisition as a routine purchase of a bank by a bank holding company.

The Hartford National Corp. in Connecticut also is seeking to acquire a federally chartered savings bank, the Provident Institution for Savings in Boston.

And another proposed deal involves

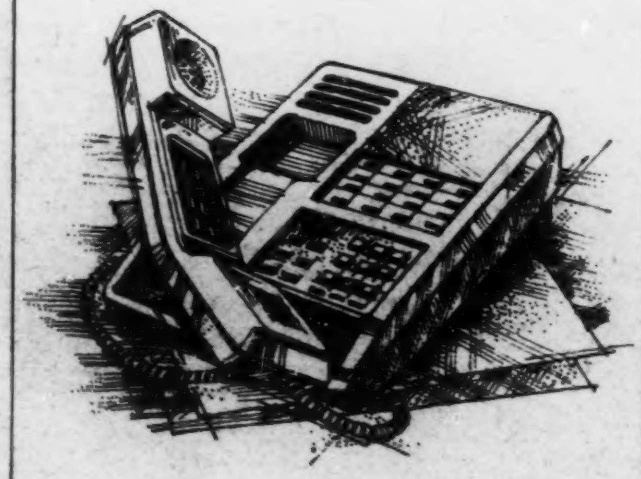
Madison Financial Corporation



Delaware . . .

Continued from Back Page

in New Jersey.

Among banks handling wholesale-oriented tasks at Delaware facilities, Chemical Bank (Delaware), Manufacturers Hanover Bank (Delaware), and Marine Midland Bank (Delaware), all subsidiaries of New York holding companies, are performing some international transactions. Those facilities, however, were formally authorized by the 1981 Financial Center Development Act, not by the International Banking Development Act, which followed in 1983.

The international act essentially extends an invitation to any bank that performs international transactions. It exempts such operations from interest rate ceilings, taxes, and reserve requirements. This makes room for internationally-oriented Edge Act banks and international banking facilities.

In targeting international banking facilities, Delaware competes for attention with money centers and gateway cities such as Miami. Miami did an especially brisk business attracting international banking facilities after they were authorized by the Federal Reserve Board in 1981. Mr. Windley relishes the chance to compare Delaware's advantages.

British Bank Enters

Delaware recently attracted its first foreign-owned bank — Barclays Bank of Delaware NA. It is owned by the Barclays American Corp. of Charlotte, N.C., a $3 billion-asset subsidiary of Barclays Bank of London. The new bank manages a nationwide Visa card portfolio and a private-label credit service for White Consolidated Industries, an appliance manufacturer.

Barclays Bank of Delaware, however, was established under the Financial Center Development Act, not the International Banking Development Act.

Although the International Banking Development Act is the centerpiece of the state's current marketing campaign, the development office also brings to foreign bankers' attention the Financial Center Development Act and other deregulatory statutes of the 1980s. They also permit non-Delaware corporations to open limited-purpose trust companies, form consumer-lending subsidiaries, organize captive finance companies, and invest in export trading companies.

"No single aspect is unique to Delaware," Mr. Windley conceded. "But when we look at the total picture and combine it with our location close to key regional markets, we are sure that Delaware will be a superior choice for a good number of foreign-owned banks."

The state's international development efforts are coordinated by the governor's International Trade Council. Its chairman is state Sen. Andrew G. Knox, and its membership includes Paul Shipley, a vice president at Wilmington Trust Co.

Two of Delaware's new breed of out-of-state bankers sit on the trade council's international banking subcommittee — Lance Cunha, vice president at Manufacturers Hanover Bank (Delaware), and Robert Hastings, vice president at Marine Midland Bank (Delaware).

The international banking subcommittee, with the help of an advertising firm, Lyons Studios, prepared a colorful brochure designed to interest foreign-owned banks in coming to Delaware. Production went smoothly, Mr. Windley claimed, without the bickering and delays that attend typical committee functions.

"You can see that all factions of our banking community, including the newcomers, are behind this project 100%," Mr. Windley said.

The good feeling may be related to the conditions imposed on out-of-state banks taking advantage of the Financial Center Development Act. To make the desired impact on the state's economy, newcomers must build up to at least $25 million in capital and employ 100 people within one year of setting up shop. They are not allowed to compete in local banking markets. ■

Old Colony . . .

Continued from Page 1

the reverse transaction: The Citizens Financial Group Inc., a thrift holding company based in Providence, R.I., is seeking to acquire Capitol Bancorp., a Boston bank holding company.

Traditionally, the Fed has discouraged the acquisition of thrifts by bank holding companies in order to maintain the housing-oriented industry as a separate business and to prevent the acquisition of thrifts as an end run around laws restricting interstate banking.

In addition, Congress has never specifically authorized the Fed to permit bank holding companies to acquire thrifts, except in cases where the thrift is insolvent. Legislators and regulators have felt that allowing banks to buy healthy thrifts would reduce the incentive for them to take over insolvent institutions — a pressing need for the FSLIC.

The Bank of New England ruling is one sign that this position is changing. An earlier signal came in July 1984 when the Fed allowed the Frankford Corp., a Philadelphia bank holding company, to buy Colonial Savings Bank, a state-chartered savings bank also based in Philadelphia.

In the Frankford decision and subsequent rulings, the Fed maintained that state-chartered savings banks that are stock-owned and insured by the FDIC are equivalent to commercial banks.

Meanwhile, another regulatory agency is also taking an easier stance toward bank holding company acquisitions of thrifts.

In a proposal announced last week, the Federal Home Loan Bank Board said it was prepared not only to expand the interstate acquisition and branching powers of thrifts but also to broaden the ways that bank holding companies can use thrift purchases to expand out of state.

As the regulatory stance eases, more bank-thrift deals are expected, particularly as the number of attractive bank holding companies dwindles in states

As IRA Time Nears, Do You Know Where the Money's Going?

Continued from Page 1

will top $10,000 next year, leading taxpayers to look for both diversification and better returns.

A recent study showed, predictably, that IRAs increase in volatility as balances rise. The study, commissioned by the North American Communications Group, found that 32% of IRA households with balances in excess of $10,000 have moved all or part of their IRA at some point. (Households with IRA balances higher than $10,000 accounted for 30% of the 600 households surveyed.)

By contrast, only 8% of those with balances less than $10,000 moved their money, the study showed.

"The strategy and assumption that a lot of banks make is that 'If we can get them to open [accounts] with us, we've got 'em,' " said Donald Ross, national marketing director for NACG, a Richmond, Va.-based direct mail and telemarketing firm. "These statistics show that that strategy doesn't hold water anymore."

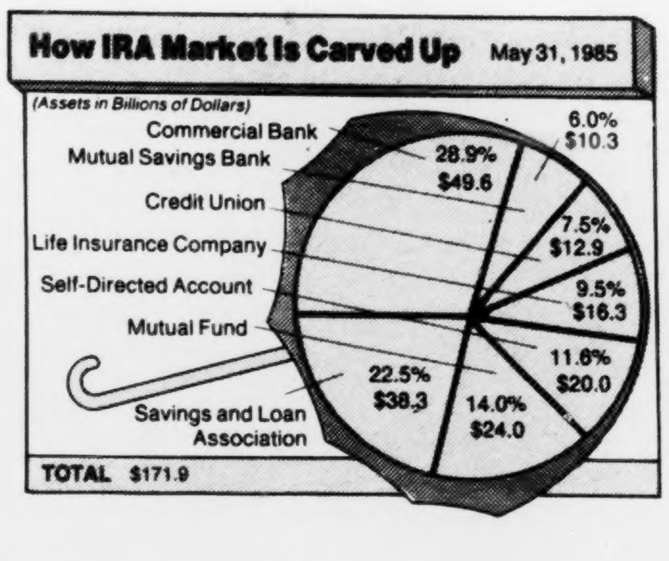
Mr. Ross said he doubted banks would be able to hold their market share in 1986. Although many banks have added self-directed accounts of their own, often those accounts do not include mutual funds and zero-coupon bonds, both of which are becoming more popular with IRA investors.

For example, a recent study by the Trans Data Corp., a research firm based in Salisbury, Md., showed that 48% of the 300 major banks and thrifts surveyed offered self-directed accounts. But only 17% of those surveyed had mutual funds, and only 9% had zero-coupon bonds.

"The fact that people want to diversify [when their balances get higher] is no surprise," he said. "The surprise is that people are willing to change institutions for it. It's not enough that they can move their money around within the bank. They're looking for institutions that can provide them with the full range of products and services."

As a result, he said, he expects brokerage houses and mutual funds to pick up much of what banks lose. "The big gainers last year were the brokerage houses," he said. "They're starting to make some headway. They'll always have fewer accounts, but their account balances will be substantially higher. They'll just skim the cream off the top."

Banks have always amassed a large number of accounts through sheer convenience, maximizing the advantage of their familiarity and accessibility by keeping branches open late as the deadline nears. But competing financial industries and personal-finance columnists have ballyhooed the advantage of opening an IRA in advance of the April 15 deadline, and to the detriment of banks, the advice is sinking in.



The North American study showed that among customers who make annual and semiannual IRA deposits, January is now a close second to April as the preferred month in which to make the IRA contribution, 23.4% compared with 27.9%.

"I think the banking industry has done an excellent job of educating the marketplace," Mr. Ross said. "Now, knowing what the research is saying, they have to do one of two things: Offensively, they can go after those competitors who don't have as many products to offer customers. Defensively, they have to expand their product line."

Is there time to implement such a strategy, at least for those who need to do so? Maybe, said Mr. Ross. Though major banks have their IRA programs in high gear now, as many as "half to three-quarters of the industry have not put their IRA programs to bed yet."

Only 112 days to go. The hour is getting late. ■

Old National Fraud Leads to Indictment

Special to the American Banker

SEATTLE — A federal grand jury here last week handed up a 16-count indictment accusing a former mortgage company president of defrauding the Old National Bank, Spokane.

Thomas E. White, the former president of T.E.W. Corp. and of Charter First Mortgage of Washington Inc., was accused of conspiracy in connection with false and fictitious loans made by the bank. He was also charged with depositing several large checks drawn on accounts that had been closed or that had insufficient funds.

An assistant United States attorney here said Mr. White now works for a mortgage company in San Deigo. Mr. White could not be reached for comment.

T.E.W. Corp. and Charter First Mortgage of Washington have been dissolved.

The indictment does not say how much the alleged fraud cost Old National, and the bank declined to comment. But the indictment does list some checks for as much as $1.1 million.

Margaret D. Alexander, a former Old National branch manager, and Joyce M. Oldenburg, a former assistant manager, cooperated in the grand jury investigation. Both pleaded guilty on Thursday to a single count of issuing a cashier's check without authorization. They will be sentenced in February.

The indictment says the conspiracy involving Mr. White and bank employees began in 1979 and continued into 1981 and involved false entries on bank records and the misapplication of bank funds with the intent to defraud the bank and the Federal Deposit Insurance Corp. ■

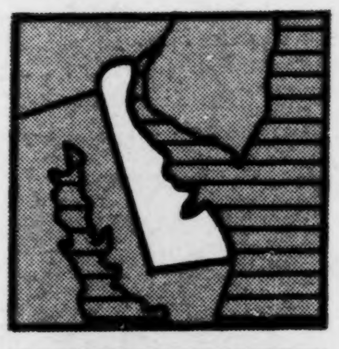
What's Happening in Delaware: State Beckons to Foreign Banks

By JEFFREY KUTLER

WILMINGTON, Del. — Delaware, which has touted its deregulated tax haven for banks as "America's Luxembourg," is bidding to join the real Luxembourg's league by adding foreign-owned banks to the 25 domestic institutions from other states already operating there.



DELAWARE

In the latest phase of Delaware's pro-business master plan, which is especially favorable to financial institutions, Gov. Michael N. Castle is spearheading the drive to lure major international banks into the state.

Implicit in the campaign is a challenge to New York and other commercial centers that may have overlooked the small but aggressive Diamond State as a rival for foreign bank offices and the jobs they bring.

According to the Delaware Development Office, letters went out in mid-December to foreign institutions selected for initial contacts. They will be followed up by personal visits from Gov. Castle, a Republican whose boosterism enjoys bipartisan political support. Delaware's growing banking community, which includes eight New York money center banks as well as leading mid-Atlantic and other regional banks, also backs the initiative.

Larry Windley, the state development agency's international trade specialist, would not disclose the target banks' names but said they already have operations in this country.

Future marketing efforts will be aimed also at international banks not yet represented in the United States. They may turn out to be more fruitful because relocation will not be a factor in those banks' decisions, Mr. Windley said.

"There is no reason any bank, foreign or domestic, can't handle its international operations out of Delaware," Mr. Windley added in an interview. He argued that locating in New York City is no longer imperative, and if a foreign bank examines alternative locations, Delaware and its business climate will stand out.

"We're unique because we're a 1½-hour train ride from either New York or Washington, D.C., and you can set up an operation in Delaware at much lower cost," he said.

Already a Business Center

Before this multinational banking focus, Delaware had been quietly adding an international flavor to its pro-business reputation, which it earned as the formal site of incorporation for most major U.S. corporations. The visible prosperity of E.I. Du Pont de Nemours & Co., the chemical and oil conglomerate that dominates the state's corporate landscape, helped lure U.S. units of multinationals such as Hoechst of Germany, Imperial Chemical Industries of Britain, and CIBA-Geigy of Switzerland.

Louis H. Papineau Jr., a retired vice president of Du Pont who is director of the Delaware Development Office, said the state now seeks a "balance in attracting both foreign and domestic capital" to the once capital-poor state. Its population of 610,000, mostly clustered in the north around Wilmington, enjoys an unemployment rate of about 5%, two full points below the national average.

Mr. Papineau and the governor often point out that Dover, the state capital, is an hour from downtown Wilmington. They say, "Within an hour we can gather around one table all the key people" from the administration, legislature, and private sector who can smooth the way for new business development.

Along with many other states, Delaware made a losing bid to woo General Motors' Saturn plant, which went to Tennessee. Delaware may not have the labor force to support such a massive industrial undertaking, but it seems to meet the needs of the service sector quite satisfactorily.

State officials claim to have created 25,000 "meaningful jobs" as a result of fiscal reforms and development efforts dating from the late 1970s. Four thousand of those jobs are in the financial services field.

Location Factors

"Business used to want to be close to New York's financial and currency markets and the port, but foreign investment and international activity have spread out in recent years," Mr. Windley said. "The region that we are in the middle of — Pennsylvania, Delaware, Maryland, New Jersey, Virginia, West Virginia, and Washington — accounts for 13% of all direct foreign investment in the U.S. And the three port systems — Philadelphia, Hampton Roads, and Baltimore — handle 17% of total U.S. trade activity.

"Add to that the fact that Delaware is a day's drive from 30% of all U.S. consumers, and you have a market. Add to that the pro-business climate, the low taxes and operating costs, and the fact that we already are a banking center, and you understand how we might become a significant international banking center."

Selling points — centering on Delaware's strategic location and what is arguably the most pro-business regulatory and tax structures of any state — are essentially the same ones used since Gov. Castle's predecessor, Pierre S. du Pont 4th, signed the Financial Center Development Act in early 1981.

At the time, the bank credit card industry was reeling from high interest rates and credit controls that virtually wiped out profitability. Money center and regional banking companies with active credit card programs, unable to raise interest rates under their home states' laws, were attracted by Delaware's lack of interest rate ceilings. A regressive system of taxation — marginal tax rates fall as bank profits rise, and rates are far below those prevailing in established money centers — was an added incentive.

Other banks brought wholesale and commercial operations to Delaware. For them as for the credit card issuers, the Delaware move made sense because of the low operating expenses, reasonable living costs, and general quality of life that allowed them to train and retain an educated, dependable work force.

Educational Resources

Delaware officials are especially keen on their educational infrastructure, particularly in readiness for a potential influx of foreign bankers. The University of Delaware is strengthening its international business and foreign language curricula. It is also the new home of the Stonier Graduate School of Banking, an American Bankers Association-sponsored program previously based at Rutgers University

AN AMERICAN BANKER SPECIAL REPORT

Auto Makers Veer into Financial Services Traffic

The Big Three Funnel Wealth Into Acquisitions in an Effort To Avoid Replay of Early '80s

By ROBERT M. GARSSON

First in a Series

DETROIT — In the grim, early years of the 1980s, it seemed that the U.S. auto industry had all it could do to survive. Amid the plant closings and the layoffs and the gushing streams of red ink, America's once proud auto makers were reduced to pleading with Washington for protection against Japan.

Shifting Gears

Detroit Moves into Financial Services

Those days are gone but not forgotten. Today, America's Big Three auto makers — General Motors Corp., Ford Motor Co., and Chrysler Corp. — are richer and more powerful than ever, and they are lavishing their new-found wealth on acquisitions in a determined effort to maintain their global preeminence through good times and bad.

Prominent among their targets is financial services, and they are buying their way in with all of the gusto of an industry that has long been accustomed, as one analyst puts it, to "eating money for breakfast."

Already, the Big Three have have spent about $1.5 billion on financial services companies, picking up a consumer finance business, an equipment leasing firm, two mortgage servicing operations, and even a savings and loan. Still more will be spent to start some financial businesses from scratch.

And Detroit's buying spree has a few more miles to run.

"The sky is the limit," said Scott Merlis, an auto analyst for Morgan, Stanley & Co. "Chrysler has $3.7 billion available, Ford has $5 billion, and GM has $5 billion. That's cold, hard cash."

For banks and other lenders, the entry of Motor City into financial services is a cold, hard fact of life that promises to change the way U.S. consumers and businesses borrow, save, and manage their money.

General Motors Acceptance Corp., for example, already has bought two large mortgage-servicing companies, and its president, Robert F. Murphy, promises that the company will continue to expand in financial services through additional acquisitions, startups, and an expansion of some products that GMAC already offers.

From his office in the imposing GM headquarters building on West Grand Boulevard here, Mr. Murphy talked about the possibility of expanding the distribution of GMAC's money market fund. It is being offered to GM's 800,000 employees, and Mr. Murphy, who is scheduled to become chairman of GMAC on Jan. 1, said he sees no reason why it cannot be offered to the 6.5 million customers of GMAC as well.

"It would be a money market fund with draft and checking privileges, and we could do direct deposit of payroll," he said. Effectively, then, it could be a checking account offered nationwide.

"And if we can offer a money fund," added Mr. Murphy, "then we can offer a mortgage. Our insurance company can offer life insurance, homeowner insurance, and I think we will look at the mortgage insurance market."

GMAC is even testing a credit card, though Mr. Murphy admits to harboring doubts that consumers need or want another piece of plastic in their wallets.

But he said he has no uncertainties about GMAC's ability to lend to the corporate middle market.

"If we can grant loans to a medium-

"There is nothing sinister in so arranging one's affairs to keep taxes as low as possible. Everybody does so, rich and poor; and all do right, for nobody owes any public duty to pay more than the law demands: taxes are enforced exactions, not voluntary contributions. To demand more in the name of morals is mere cant."

Hancock Unit to Acquire Sutro Group in California

Special to the American Banker

BOSTON — The John Hancock Mutual Life Insurance Co.'s securities brokerage subsidiary, Tucker Anthony & R.L. Day Inc., has reached an agreement in principal to acquire the Sutro Group and it's subsidiary Sutro & Co., the oldest independent brokerage firm on the West Coast.

The deal is subject to approval by the board of directors of Boston-based John Hancock and stockholders of San Francisco-based Sutro. The life insurance company acquired New York-based Tucker Anthony, a regional brokerage firm in the Northeast, in 1982. Since that time, the brokerage firm has been on the expansion path and has opened offices in Chicago, Dallas, Minneapolis, Boca Raton, and Tuscon. The firm now has 36 offices and 12,000 employees.

W. Ward Carey, chairman and chief executive officer of Tucker Anthony, said, the acquisition of Sutro fits in with the company's coast-to-coast expansion plans. "It mirrors Tucker Anthony on the West Coast and provides John Hancock with excellent representation in both areas."

Ross Cobb, chairman of the Sutro Group, said there will be no changes in the Sutro operation over the near-term and both firms will remain independent. However, he said, as time passes research, trading, and corporate finance services may be shared by both firms. ■

Washington Networks Announce Merger Plan

Special to the American Banker

SEATTLE — Automated teller machine cards issued by almost every bank in Washington eventually will be able to access virtually every ATM in the state under an agreement announced here last week.

Members of the Northwest Electronic Network, or NEN, and of the Exchange System have approved an agreement which will merge the two entities over a three-year period.

NEN was formed by the First Interstate Bank of Washington, Old National Bank, Peoples National Bank, Rainier National Bank, and Seattle-First National Bank to develop a shared ATM and point-of-sale network. The Exchange operates an ATM system throughout the Pacific Northwest for many other financial institutions.

"This merger puts the Northwest in the forefront of regions developing similar shared systems," said Thomas M. Bass, president of the Exchange. "This unified approach gives all financial institutions an opportunity to offer cost-effective ATM and point-of-sale services to their customers."

Initially, both the Exchange and NEN will continue to operate separate networks. But the switch-processing capabilities of the Exchange will be transferred to a new entity, Northwest Switching System, which will jointly service both NEN and the Exchange. ■

Three New Directors For Union Planters

Special to the American Banker

MEMPHIS — Union Planters Corp. and Union Planters National Bank have three new directors, and the bank has a new general counsel.

R. Brad Martin and Robert F. Fogelman, both of Memphis, and Hanford "Hank" Farrell Jr. of Fort Smith Arkansas are the new board members.

Mr. Martin is president of R.B.M. Venture Co., a real estate investment firm. He also is a former five-term member of the Tennessee House of Representatives.

Mr. Fogelman is president of the Fogelman Investment Co. of Memphis.

Mr. Farrel is chairman of Farrell-Cooper Mining Co., a firm that produces coal in Oklahoma and Texas. ■

Fed . . .

Continued from Page 3

In the lengthy Justice Department letter, written on behalf of the departments of Treasury, Commerce, and Labor, the Council of Economic Advisers, and the Office of Management and Budget, Mr. Ginsburg said the administration has "serious legal and policy reservations" about the Fed proposal.

Mr. Ginsburg's legal reservation concerns the short comment period allowed for the rule, and observers say that would be a thin foundation for a lawsuit.

About 80 comments were received in the abbreviated comment period. While that is a substantial number, some Fed proposals have prompted more than 1,000 replies. ■

AN AMERICAN BANKER SPECIAL REPORT

Financial Services Ventures to Cause Auto Makers to Adjust Their Sights

Continued from Page 1

size business like an auto dealership, we can do it in other areas," he said. GMAC also is mulling the possibility of offering cash management services to its dealers and other businesses.

Whatever fields GMAC chooses to enter, it has the cash to go in style, as it demonstrated with its purchase of Norwest Corp.'s Norwest Mortgages and Corestates Financial Corp.'s Colonial group of mortgage servicing companies. Those two acquisitions, for an estimated $400 million, brought GMAC from ground zero to number two in the industry in less than a month.

Chrysler Financial Corp., the lending arm of Chrysler Corp., has also begun a rapid-fire expansion of its financial services business. Free at last from the shackles of government oversight that were part of its 1980 bailout, it purchased E.F. Hutton Credit Co. for $125 million on Aug. 31. On Nov. 22, it plunked down $450 million for BankAmerica Corp.'s FinanceAmerica units.

Not to be left out, Ford Motor Co. agreed to pay $493 million for First Nationwide Financial Corp., the nation's ninth largest savings and loan holding company. That deal was completed Dec. 16.

Expanding into Areas of Expertise

In their expansion, the three say they believe that they are capitalizing on two existing areas of expertise: consumer lending and middle-market corporate lending.

Through their finance subsidiaries, each has sizable retail lending portfolios, ranging from $8.7 billion at Chrysler to $54 billion at GMAC, as of Sept. 30. Wholesale loans run from a low of $2.6 billion at Chrysler to $14 billion at GMAC.

And the nature of auto lending itself, they say, gives rise to opportunities in other fields, chief among them the huge mortgage market.

"There's an affinity between auto finance and the finance of housing," said James W. Ford, chairman of Ford Motor Credit Co., "so we saw that as a natural extension."

The affinity Mr. Ford has in mind relates primarily to the size of the loan being made. "It's natural for us because of the larger balances," he said. "You qualify people on almost the same basis."

"A car and a house are the two major consumer purchases," added Robert Baker, vice chairman of Chrysler Financial Corp. "You pay for each a month at a time."

The opportunities in mortgage lending are huge, bigger even than those of the auto industry.

"It's the biggest market on the globe, a $2.5 trillion market worldwide," said an enthusiastic Jonathan Gray, thrift analyst for Sanford C. Bernstein & Co.

What drives the auto industry in its race down the acquisition trail is part opportunity — they have more cash than they can spend — and part strategy: They are determined not to be caught defenseless the next time the economy changes direction.

"Even with all the capital spending plans they have in the hopper, they can't spend all that cash," said Joseph Phillippi, E.F. Hutton Group Inc.'s auto industry analyst.

But more important, he added, "they want to balance out their portfolio."

Dealing with Maturity

Auto manufacturing has grown into a mature industry, Mr. Phillipi noted, and the established American companies are likely to begin losing domestic market share as competition intensifies from Korea, Yugoslavia, and elsewhere. Many of those countries will be low-cost producers, and the U.S. companies may well be forced to sacrifice margins to maintain volume.

For example, Howard Leonard, an auto industry analyst for PNC Financial Corp., projects that GM's worldwide auto sales will fall 17.8% by 1988.

"Both the more competitive nature of the market in 1988 and GM's higher fixed costs should cause the company's operating margin to nearly vanish," he warned.

As a result, Mr. Merlis said he expects the three to continue to direct a significant portion of their diversification efforts toward the financial services industry.

"They want to acquire finance companies, because they are less vulnerable to foreign competition," he explained.

The three are also intent on escaping the boom-or-bust environment of the auto industry. Financial services is an area in which they have long years of experience, and which remains profitable even during the downswings of the business cycle, when assembly lines begin to shut down.

For the nation's financial services providers, especially for the heavily regulated banks and savings institutions, the advance of the Big Three into new markets could foretell difficult times ahead.

"They are strong, powerful and tough," said Gary Wendt, executive vice president of General Electric Credit Corp., perhaps the best respected of the nation's wholesale finance companies. "They will be fierce competitors."

G.E. Credit probably will continue to prosper, but Kenneth Guenther, executive director of the Independent Bankers Association of America, is not so sure that his members will fare as well.

Once GMAC is fully armed with a

➧➧ Auto Makers: Page 12

2 Miami Banking Companies Agree in Principle to Merge

MIAMI — Two Miami bank holding companies announced last week that they have agreed in principle to merge their companies.

Popular Bancshares Corp., a $351 million-asset holding company for the 11-office Bank of Miami, and Intercontinental Bank Holding Co., which operates the 13-office Intercontinental Bank, said they plan to combine operations. Intercontinental has $606 million in assets.

Popular senior vice president Joanne Brown said the talks are "very preliminary" and added that no specifics, such as exchange ratios, have been resolved.

However, she did say she would expect Popular to be the "surviving company."

Ms. Brown said she could not comment on the reasons for the proposed merger, but industry officials indicated it would form a nearly $1 billion Miami-based corporation. That, they said, could make it an attractive takeover target for out-of-state bank holding companies seeking a South Florida presence. ■

AN AMERICAN BANKER SPECIAL REPORT

Financial Services Industry Is Magnet for Auto Makers' Cash

Continued from Page 11

complete package of financial services, "It will be difficult for any bank to compete," said Mr. Guenther, whose trade group represents many of the nation's small banks.

Among the nation's big banks, all of which have their own ambitious plans for expansion and diversification, a different attitude emerges.

"Obviously, we don't hope for any more competition," said Anthony P. Terracciano, vice chairman and global banking executive of Chase Manhattan Bank. "But I don't stay awake at night worrying about it."

In the long run, he added, "There's enough business out there for all of us."

Mr. Wendt of G.E. Credit disagreed.

"The world is overbanked at this point," he argues. "There are more suppliers of funds than there is demand."

If the auto companies' diversification plans mean stiff competition for all financial services companies, it also promises especially difficult times for the nation's banks, which are forced to maneuver in a regulated environment.

Shifting Gears

Detroit Moves into Financial Services

"Yes, it means banks will have tougher competition," said Robert Albertson, who follows the banking industry for Smith, Barney, Harris, Upham & Co. It also will be unfair competition, he added.

"A lot of it will take place by acquisition, and once again banks will suffer because they have to sit and wait for 90 days for federal approvals, as opposed to car makers that can move overnight," he contended.

But the auto makers and their financial subsidiaries may find some bumpy roads ahead of them in financial services.

"The jury is still out on whether they will be successful," said Mr. Albertson of Smith Barney.

"One temptation of a financial company that has been operating as a captive finance subsidiary is to assume that the business can be directed powerfully by coercing the company's distribution system," he said.

"When you go out of captive system, it may prove to be difficult," he continues, adding that the finance units could easily find themselves in a world they do not understand.

Culture Modification

Just as important, each of the three must modify their own internal culture if they are to move from the clearly defined and well-bounded world of auto lending into less familiar territories.

"That's not easy to do," admits Mr. Murphy of GMAC. "We were risk-averse before, and today we are telling people to be market-driven."

One way of dealing with the culture problem is to locate new ventures as far from Detroit as possible, as Ford Motor Credit Co. did in starting up Ford Equipment Leasing Co. in Newport Beach, Calif.

An outsider, Donald Rennie, former president of Avco Financial Services Leasing Co., was hired to run the new business, and Ford Credit's chairman, Mr. Ford, said the California location was chosen to insulate the leasing business from Ford's sometimes stifling bureaucracy.

"We think we can do it [run a leasing company] economically on a separate vehicle basis, whereas we couldn't do it within Ford," said Mr. Ford. "The economics are different. Here, you are sort of bundled into an organization with some inertia. Rennie hires commission people, and we don't have that in our structure."

How the Auto Finance Companies Grew

	FORD			GMAC			CHRYSLER	
	Assets (Billions)	Income (Millions)		Assets (Billions)	Income (Millions)		Assets (Billions)	Income (Millions)
'84	24.0	310	'84	54.4	784.8	'84	7.2	83.1
'83	19.1	292	'83	51.4	1,002.0	'83	4.3	47.4
'82	16.2	229	'82	44.4	688	'82	3.8	52.2
'81	17.7	186	'81	41.9	365.2	'81	3.8	62.6
'80	16.7	159	'80	33.1	231	'80	4.1	57.0

In its effort to adapt, GMAC is running executives through strategic planning courses and is giving thought to hiring more people from the outside, Mr. Murphy noted.

But he added: "You can't change people overnight. It's like trying to turn the Queen Mary, and we're only halfway there."

For all their resources, the auto companies are also coming to the financial services industry somewhat late, following in the wake not only of banks, thrifts and investment banks, but of such other corporate powerhouses as Sears, Roebuck and Co., General Electric Co., and American Express Co.

And in some of the businesses in which the three are expanding, the rules of the game are on the verge of change, with serious adverse consequences for all participants.

Both Chrysler and, to a lesser extent, Ford, already have spent heavily on equipment leasing, a business that will become much more difficult if Congress repeals the investment tax credit and lengthens depreciation schedules, as it is considering doing.

Earnings Power Is Uncertain

And even if the Big Three are successful in their new ventures, it is by no means certain that the ventures will add measurably to their earning power.

For example, First Nationwide, the Ford acquisition, is one of the nation's largest and best-managed thrifts but earned only $31 million last year, and that was a record year for the thrift. Ford Credit rang up 10 times that amount, or $310 million, and Ford Motor Co. earned almost 100 times as much, or $2.9 billion.

Even if First Nationwide boosts its earnings to $1 for each $100 of assets — an ambitious target, though one that some thrift analysts believe is within its reach — the thrift would be contributing no more than $110 million to Ford at current levels, about 3% of 1984 profits.

"No matter what they do, it will take a long time to balance out the swings you get in the auto business," said Mr. Phillippi, the Hutton analyst.

"Hughes [Hughes Electronics Corp., a new GM subsidiary] will be a $5 billion company, combined with the Delco division of GM, but GM will do $90 billion of car and truck sales," he said. "So it will take awhile to balance out that kind of volume."

Arvid Jouppi, a veteran auto analyst who now follows the industry for Rooney, Pace & Co., said the acquisitions, though small by the auto industry's outsized standards, are useful developments nonetheless.

"For one thing, auto finance itself has become rather routine," he said. "They need to challenge their finance people with a broader range of challenges."

First Nationwide, for example, may never pull down the same kind of profit margins as Ford Credit, he said, but the auto finance companies "will get a bigger bang for the employee buck.

"The same kind of brainpower that goes into financial subsidiaries," he added, also "goes into consumer finance."

The finance subsidiaries operated by the three auto manufacturers are big enterprises in and of themselves. GMAC, for example, had assets of $70 billion at the end of the third quarter, more than all but five banks. It earned $784 million in 1984 — more than any banking concern, save giant Citicorp — and it is ahead of that pace this year.

Big Parental Role

Earnings comparisons with commercial banks, however, are difficult to interpret because of the role played by the finance unit's parents. Each receives equity contributions from the parent when needed, and each is the beneficiary of the incentive programs offered from time to time.

When incentive financing is offered by GMAC, Ford Credit, or Chrysler Financial, the parent company pays the difference between the incentive rate and market rates. In effect, the parent is buying them a market share.

Still, the three auto finance companies are regarded as stellar performers by securities analysts, and the market soon may have a chance to offer its judgment as well.

GM has said that it is considering spinning off its finance unit, making some portion of the stock available to the public, and it is thought that Ford and Chrysler are deliberating over similar plans.

"I wouldn't be too surprised to see it," said Charles Brady, an auto analyst for Sanford C. Bernstein & Co. "From the companies' perspective, their stock is undervalued, and one reason is that everything in the company is clumped in together."

Separating out the component parts, he added, "is a way of calling attention to the true gems they have within the company."

If shares of GMAC are offered to the public, Mr. Brady added, they will represent only a minority interest in the company. The first mission of the finance units is to move cars and neither GM, nor Ford, nor Chrysler is likely to do anything that would jeopardize their ability to direct the activities of the three subsidiaries in auto lending.

Meanwhile, the three are spending money on their offspring in ways that are not always obvious. GM's acquisition of Electronic Data Systems Inc., for example, has a great deal to do with the company's vision of a manufacturing future that is heavily reliant on automation.

But EDS brings to GMAC a sophisticated data processing capability that will enable it to offer financial services, such as mortgage servicing, profitably and efficiently. Electronic delivery of financial services is becoming so important, in fact, that a recent Salomon Brothers analysis concluded that only banks for which technology is a priority will be successful in the future.

The auto companies also help out their subsidiaries by pumping in capital, not only to finance the expansion of their auto lending business but also to help with acquisitions. Chrysler's $405 million purchase of FinanceAmerica, for example, was accompanied by a $405 million capital infusion from parent Chrysler Corp.

Undoubtedly, deep pockets will smooth out some bumps in the road, as the Big Three move beyond the world of smokestacks and assembly lines, but they are no guarantee of success in financial services or any other sector. It is a fact that all three appreciate.

"Anyone who is in one business successfully thinks they can automatically be successful in another," said Mr. Murphy of GMAC.

And that, he adds, just ain't necessarily so. ■

Regional Deals, Once Impossible, To Be Norm in '86

By BART FRAUST

'85 preview '86
A Series of Articles Looking Back and Ahead At Issues Facing the Financial Services Industry

NEW YORK — Last month, it took the Federal Reserve Board a scant seven pages to approve one of the largest mergers in banking history — the $16 billion combination of Wachovia Corp. in Winston-Salem, N.C., and First Atlanta Corp. in Atlanta.

For an in-state deal involving large institutions, the Fed might need three or four times that number of pages.

On the one hand, the brevity of the Wachovia-First Atlanta decision reflects the limited means available to banking regulators for analyzing the competitive effects of interstate mergers. The Fed's traditional way of gauging the competitive effect of a merger is to look at how the deal will affect competition in markets where the merging banks both operate. In an interstate deal, the merging banks do not operate in the same local markets.

An Overview of Interstate Banking, Page 3

In addition, the Wachovia-First Atlanta ruling shows just how routine regional interstate mergers have become only seven months after the U.S. Supreme Court affirmed their constitutionality.

On June 10, the Supreme Court ruled, in connection with lawsuits filed by Citicorp and Northeast Bancorp Inc., New Haven, that states could enact laws permitting regional interstate banking.

At present, 24 states and the District of Columbia have enacted regional interstate banking laws, and on the books of another five are laws permitting en-

Ford Looks for S&L Synergy

Auto Company Envisions First Nationwide as Reliable Earner

By ROBERT M. GARSSON

Third of a Six-Part Series

DEARBORN, Mich. — The chairman of Ford Motor Credit Co. began to smile and then broke into laughter as he recalled how he told reporters that Ford Motor Co.'s acquisition of a big California thrift could lead to the sale of financial services through kiosks in dealer showrooms.

Shifting Gears

Detroit Moves into Financial Services

"The people at First Nationwide thought that was the dumbest thing they ever heard of," added James W. Ford, the lean, 63-year-old chairman of the auto finance company. Mr. Ford then conceded with one of his quick, almost impish grins, that he too suspects that the idea is unworkable.

"I don't think dealers want to be involved in financial services," he said.

Mr. Ford had offered the kiosk comment shortly after his parent company announced it had agreed to purchase First Nationwide Financial Corp., owner of First Nationwide Savings, the nation's ninth largest thrift. He had been asked, as was probably inevitable, about synergies between the auto and thrift industries, and he had meant to say only that ki-

IN THE NEWS

Bank Drops Card Rate

CHICAGO — Merchants National Bank and Trust Co. of Indianapolis is lowering the interest rate it charges on its MasterCard credit cards to 17.8% from 19.8%. It will also advance customers the necessary funds to pay off existing balances on other credit cards which may be charging a higher rate. The cash advance will then bear interest at 17.8%. The bank said it is reducing its finance charges because of its lower cost of funds.

New Fed Bank Director

NEW YORK — Richard L. Gelb, chairman and chief executive officer of Bristol-Myers Co., New York, was elected a director of the Federal Reserve Bank of New York. Mr. Gelb will join the board for a three-year term on Jan. 1, 1986, as one of the board's six public representatives. He replaces William S. Cook, president of Union Pacific Corp.

Cigna Sells Name Rights

PHILADELPHIA — Cigna Corp. said it sold its rights to the Aetna trade name to Aetna Life & Casualty Co. to more closely identify the Cigna name with the Cigna Property-Casualty Group. The Aetna name had been used by subsidiaries of Connecticut General Corp. since 1962 when Connecticut General acquired the Aetna Insurance Co. and by Cigna's Property-Casualty Group since 1982 when Connecticut General and INA merged to form Cigna.

Dissident Shareholder Suit

HARRISBURG, Pa. — Commonwealth National Financial Corp., which has reached a tentative agreement to merge with Mellon Bank Corp., said a dissident shareholder filed suit in Federal District Court in Pennsylvania seeking to delay the Dec. 30 meeting at which shareholders are scheduled to vote on the merger. Commonwealth said the suit seeks damages and other relief in connection with the proposed merger and related agreements. Commonwealth did not identify the shareholder. A spokesman said the suit is without merit.

MasterCard Record

NEW YORK — MasterCard International Inc. said purchases with its credit cards hit $503.5 million on Christmas Eve, a record Christmas Eve for the company. During the season between Thanksgiving and Christmas, total credit card transactions for MasterCard ranged from $300-$400 million daily, topping the $400 million mark on some days and the $500 million mark twice.

Cost of Funds Eases

WASHINGTON — The Federal Home Loan Bank Board today reported that the annualized average cost of funds for institutions insured by the Federal Savings and Loan Insurance Corp. declined 31 basis points to 9.04% during the third quarter of 1985.

More Regional Deals Seen for '86

'85 preview '86

Continued from Page 1

try to banks from anywhere in the nation.

And the nation is now divided into four general banking regions: the New England states, the Southeast, the Midwest, and the West. Subregions also are developing, with the fastest growing being the District of Columbia-Virginia-Maryland market in the Southeast.

Another subregion is expected to emerge next year among the Middle Atlantic States of New Jersey, Pennsylvania, and Delaware. This subregion would extend into the Midwest and Southeast regions.

Generally included in the New England region are Massachusetts, Connecticut, Rhode Island, Maine, Vermont, and New Hampshire, although the last two haven't yet passed interstate banking laws. In the Southeast are Florida, Georgia, North Carolina, South Carolina, Virginia, Maryland, the District of Columbia, and Tennessee. States to be included in the southeastern region that have not yet passed interstate banking laws are Alabama, Arkansas, Louisiana, Mississippi, and West Virginia.

In the Midwest are Indiana, Ohio, Illinois, Michigan, and Kentucky. Eventually, Wisconsin, Missouri, Kansas, Minnesota, Iowa, Nebraska, South Dakota, North Dakota, and Oklahoma are expected to join up.

The western region is generally thought of as including Utah, Arizona, Alaska, Hawaii, Oregon, Washington, Nevada, and Idaho and may eventually extend to Colorado, Montana, and New Mexico. Arizona and Washington have passed laws permitting nationwide entry.

Left regionless are New York, California, and Texas, though California is viewed by some states as part of the western banking region.

A total of 54 regional deals are now pending or completed, including 11 in New England, 24 in the Southeast. 16 in the Midwest, and three in the West.

And the deal-makers are unlikely to rest in 1986. The following is a region-by-region breakdown of what is likely to occur next year:

- Middle Atlantic States: The market clearly expects this area, particularly New Jersey, to be hot next year. For example, stock prices of the 12 largest New Jersey banks have risen over 50% this year, according to a recent research report by Keefe, Bruyette & Woods Inc. In contrast, stock prices of the money center and the larger regional banks have risen 24% this year.

The New Jersey Legislature is expected to pass a bill next year allowing the acquisition of its banks initially by companies in Pennsylvania, Ohio, and Kentucky.

"Though it's unlikely that the Kentucky banks will be acquirers in New Jersey, there's every reason to believe that banks in Pennsylvania and Ohio will be," the Keefe report stated. "For those headquartered in Philadelphia with operations in the eastern part of the state, New Jersey represents a natural extension of their franchise.

"A number of these banks' lending officers already call on New Jersey firms," the report continued. "For those banks in Ohio and western Pennsylvania, New Jersey's healthy economy provides an opportunity for growth beyond that available in their existing markets."

- New England: In this, the oldest of the regions, many of the attractive companies have already been taken. For example, all of the large bank holding companies in Maine have either been acquired or have accepted takeover offers from out-of-state companies.

New England bank analysts expect more deals involving thrifts, such as Hartford National Corp.'s proposed acquisition of the Provident Institution for Savings in Boston. The Federal Reserve Board has permitted bank holding companies to buy savings banks. Most recently, the Fed allowed Bank of New England Corp. to acquire Old Colony Bank, a federally chartered savings bank based in Providence, R.I.

- The Southeast: Florida, the most attractive state, has few remaining takeover candidates, and the same can be said of South Carolina, North Carolina, and Georgia. In Florida, the largest prospects are Southeast Banking Corp. in Miami and Florida National Banks of Florida Inc., Jacksonville, both of which present problems to potential buyers.

Southeast management has twice rejected merger offers, once from First Union Corp., Charlotte, N.C., and most recently from Barnett Banks of Florida Inc., Jacksonville, in both cases saying that the companies could not agree on an exchange ratio. Any potential buyer of Florida National would have to buy out Chemical New York Corp., which owns a large block of the Jacksonville company's preferred stock.

Managements of the large southeastern regional banks are saying that they expect 1986 to be a year of consolidation, but analysts expect moves into Tennessee and perhaps the District of Columbia-Virginia-Maryland area.

- The Midwest: The deals announced in this region have been relatively small, mostly with Ohio bank holding companies buying relatively small banks in Indiana and Kentucky. The largest announced so far is the proposed acquisition of Midwest Commerce Corp. in Elkhart, Ind., by NBD Bancorp Inc., Detroit.

The deals will undoubtedly become larger next year, especially now that Michigan and Illinois have enacted regional statutes.

- The West: This is the least developed region, with only a handful of regional deals. Most of the action has taken place in Arizona, a state that permits nationwide entry.

The state's second and third largest bank holding companies, Arizona BancWest Corp. and United Bancorp of Arizona, already are spoken for — the former by Security Pacific Corp., and the latter by Union Bancorp Inc., both of Los Angeles. Citicorp and Chase Manhattan Corp. also have announced acquisitions in the state.

Valley National Corp., Arizona's largest bank holding company, is still available, but at current prices for Arizona banks, generally 2.5 to 3.0 times book value, the $8.7 billion-asset Valley may have a billion-dollar price tag.

Banking analysts expect deals next year in Washington State, whose national interstate banking law takes effect in 1987. ■

Independent Banks Prosper Alongside the Giants in Florida

Special to the American Banker

TAMPA, Fla. — The headlong charge by banks into huge interstate regional combines was supposed to make the independent bank extinct.

When the U.S. Supreme Court upheld mergers within multistate regions last June, many industry officials thought it sounded the death knell for the small banks that for decades had been the mainstay of rural America.

Community Banking

Regional giants such as NCNB, Wachovia, and First Union would overtake the markets in which many of the tiny banks had prospered for years, the experts contended. There would be no need for the independents, they said. The regional powers would offer customers more offices and more banking services.

But some analysts disagreed, saying there would be a greater need for the independents as consumers seek an alternative to the impersonal service and bureaucratic rigidity of the large banks.

In the Tampa Bay area of Hillsborough and Pinellas counties, independent banking is booming.

Why the resurgence of independents? Officers say their banks can still offer personal service to customers and have strong ties to their communities.

In the past, the small, locally owned bank represented the collective strength of the community. The local bank president was known to everyone in town. Often, loans were closed with little more than a handshake. There were few papers to fill out then, unlike today, when borrowers are handed a thick packet of forms to complete before waiting nervously for an answer from the loan committee.

But the independents declined as statewide banks grew, setting up shop in almost every community.

Now, some analysts contend, there is a reverse trend because the regional banks with their rigid operating rules and vast operations can't be as responsive as small banks to the needs of individual customers. The independents can stake out an area and serve it well, the analysts say.

In the Tampa Bay area, more than half a dozen independent banks have sprung up in the past 18 months, and a similar number await approval from the regulators.

Local bank analysts give a simple reason for the resurgence of the independents — personal service. Many presidents of Tampa independent banks say customers can almost always get a quick audience with a senior officer.

"Big banks can't respond to customer needs, regardless of what they tell you," said Marc Perkins, president of PRV Investments in Tampa. "People ask what happened to the banker who could make a loan decision right away. That guy still exists in small independent banks."

Size of Big Banks Limits Flexibility

Mr. Perkins said the mere size of large banks makes them clumsy and forces them to have strict rules that remove any flexibility in dealing with customers. The analyst called that approach "following the manual."

"When they [larger banks] buy out smaller banks, occasionally the personal service remains for about a year because the oldtime employees refuse to give in to the manual," the analyst said. "But eventually, it loses that touch. There is no bureaucracy in a small bank."

The case of a borrower having to fill out a second financial statement only days after submitting the first one is an oft-repeated one with large banks, Mr. Perkins said.

Mr. Perkins said small banks do best with the upper-middle class, "the guy who earns $60,000 to $100,000 a year." When someone at that level needs a loan, he wants to be able to pick up the telephone, call his local banker and know he has it right away.

Mr. Perkins said small Florida banks have consistently outperformed their larger competitors on return on assets.

"Look around the state for the real high-earning banks," he said. "They are always the independents."

But Jim Chandler, a vice president with NCNB National Bank of North Carolina, Charlotte, said small banks traditionally post better return-on-asset figures than do large banks. Furthermore, he said, "I have a difficult time understanding how people think the small banks can provide any better service than a well-run large bank."

Mr. Chandler told of a bank manager at NCNB's office in Barton, a small Florida town east of Tampa, who "knows everybody in town and can approve a loan on the spot."

He conceded that sometimes his bank's red tape gets in the way, but "it is not supposed to be that way."

"I'm not saying it always works perfectly at the larger banks, but I also don't think people always get better service from small banks."

Independents Spring Up All Over

Regardless, the independents are springing up all over the Tampa area. Local analyst Perkins said he expects to see several more pop up in east Tampa which has been growing rapidly in the past two years.

Already open are Bay Federal Savings Bank in downtown Tampa, Gulf/Bay Bank in West Shore, Regency Bank of Tampa and Village Bank of Carrollwood in northwest Tampa, and Commerce Bank of Tampa and Bank of Tampa in west Tampa.

Scheduled to open are City Bank of Tampa in the West Shore area and Partners Savings Bank in south Tampa.

Gerald Archibald, president of Village Bank of Carrollwood, said the nation is in "the phase of a new generation of independent banks. There is a whole surge in the marketplace."

He said more independent banks may sprout up if interest rates drop again, making it even more attractive for investors.

"When they cannot earn decent returns on their money, they look at banks and other business ventures," Mr. Archibald said.

Most of the Tampa independent banks are locally owned, and several are totally funded with local money, officials said. ■

Amortization of Loan Losses Possible, Clarke Says

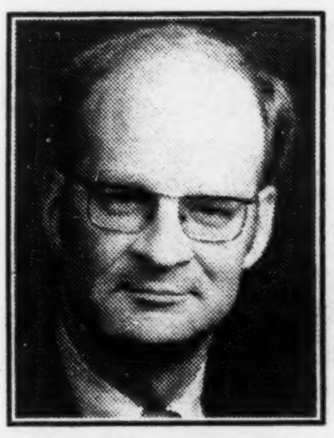
By NINA EASTON
and BARTLETT NAYLOR

WASHINGTON — A plan that would permit banks to write off loans over a period of years is among the remedies federal regulators are considering to help troubled banks, according to Comptroller of the Currency Robert L. Clarke.

While lawmakers in Congress already are discussing a similar plan for farm banks, Mr. Clarke indicated in an interview on Tuesday that federal regulators may seek to extend that option to a broader array of troubled banks. However, he said, banks that exploit an amortization schedule — enabling them to write off loans over a period of years — should have to make "onerous" concessions, such as eliminating dividends for their stockholders or salary increases for their officers.

In the interview, Mr. Clarke also:

- Expanded on a proposal, which he had revealed last month, to provide government aid to troubled banks. Mr. Clarke said that this open bank assistance program, if adopted by the regulators, would probably include the involvement of private investors, as well as the Federal Deposit Insurance Corp. As comptroller, Mr. Clarke is one of two FDIC directors who help guide policy with the FDIC chairman.



ROBERT L. CLARKE

- Expressed skepticism about industry proposals to create a "junk warehouse" to purchase bad assets from ailing farm banks. "I have trouble with creating a new regulatory level," Mr. Clarke said. "I think a bank's problems should be kept right at the bank."
- Predicted that the Treasury Department will introduce a banking bill in 1986. Mr. Clarke, who favors increased powers for banks so that they may compete on a par with nonbanking financial institutions such as Sears, Roe-

Keeping the Steel Moving Is Job One

Automakers' Finance Companies May Diversify, but Car Loans Are Still the Key

By ROBERT M. GARSSON

Fifth of a Six-Part Series

DETROIT — John Russell, vice president for marketing at the Banc-One Corp. of Columbus, Ohio, quickly brushes aside comparisons between banks and the captive auto finance companies.

Shifting Gears

Detroit Moves into Financial Services

"You have to look at the purpose of GMAC," he says, referring to the General Motors Acceptance Corp., the largest of the three captives. "Its job is to move steel."

Outsiders may forget that lesson, but the auto finance companies almost certainly have not. For all their dramatic forays into new financial service businesses, the primary mission of GMAC, Ford Motor Credit Co., and Chrysler Financial Corp. remains what it has always been: ensuring a steady, reliable flow of cash to finance the steel and chrome products that roll off the industry's assembly lines.

That business may sound a bit dull compared to, say, lending to less developed countries. But it is, by all accounts, a highly profitable business and one that is becoming fiercely competitive as banks, the auto captives, consumer finance companies, thrifts, and credit unions all fight for the right to make what by now ranks among the most basic of consumer credits: the auto loan.

Few lending products reach deeper into American life. Consumers may rent housing, forgo checking accounts, and live without a plastic card in their wallets, but almost everyone, from the poorest to the wealthiest, sooner or later seeks financing to buy or lease a car.

And for a variety of reasons, ranging from the symbolic role of the automobile in American culture to the practi-

IRS Inquiry Finds Reporting Rules Widely Violated

By BARTLETT NAYLOR

WASHINGTON — A year-old investigation of 400 Florida banks has found widespread violations of regulations designed to combat money laundering, according to Internal Revenue Service officials.

Specifically, the IRS criminal investigations division examined 10,000 exemptions from currency transaction reports granted by the banks surveyed and found that about 20% were illegitimate. A bank can be fined $10,000 for each business improperly exempted, which means the Florida banks could face up to $20 million in penalties.

Results of the study have not yet been released.

The IRS has been attempting to beef up its fight against money laundering and the associated $90 billion-a-year drug trade. Officials are

Captive Finance Companies Know Their Job Is to Move Steel

Continued from Page 1

cal need for mobility, auto finance is about the closest thing to a risk-free loan that exists this side of the U.S. Treasury.

Thus, despite its attractiveness to the automakers and the muscle they can flex when needed, auto lending continues to be dominated by the nation's banks, a fact that the auto finance companies accept and even appreciate.

"We say that what makes for a strong auto market is when the banks are aggressive in buying retail paper," said Robert Baker, vice chairman of Chrysler Financial.

"When they pull in their horns, car sales go down."

Muscle Men of Auto Finance

Though banks have traditionally dominated auto lending, when the auto captives get serious about moving steel, the muscle they bring to bear can be truly awesome.

In the third quarter, for example, the big three virtually took over the market for car financing, say bankers and other auto lenders. Faced with huge inventories of vehicles — the result of a long strike by new-car haulers — and the usual pressures that come at the end of a model year, all three finance subsidiaries offered incentive financing at 7.7%.

"There was no opportunity to compete," said Robert Monteith, president of the Security Pacific Acceptance Corp., a subsidiary of Security Pacific National Bank, Los Angeles. "The good side, if there is one, is that it is a short-term thing."

ROBERT MONTEITH

The cost of the incentives is paid for by the parent company, and, all told, the Big Three paid almost $1 billion to move steel, estimated Joseph Phillippi, E.F. Hutton's auto analyst.

"It goes out of one pocket and into the other, but it's better than shutting down or slowing down the production line," Mr. Phillippi said. "That gets very expensive. You, have the unemployment costs, the higher unit costs, and so forth."

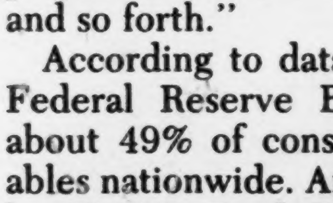
According to data compiled by the Federal Reserve Board, banks own about 49% of consumer auto receivables nationwide. Another 31% is held by GMAC, Ford Credit, Chrysler Financial, and other finance companies, such as General Electric Credit Co.'s Auto Financial Services Operation. The remainder is held by credit unions.

Those proportions have varied over the years with the ups and downs of the economy, but 1985's numbers are not strikingly different from 1980's.

'Fair-Weather' Friends

Generally, said Mr. Baker, banks have pulled back in periods of high or rising interest rates, when state usury ceilings made it difficult, if not impossible, to price a car loan profitably.

"The small bank," said GMAC chairman Robert F. Murphy, is "a fair-weather friend to the dealer. The dealer has a problem in tight-money situations because banks cut them off."



WILLIAM E. ODOM

But when banks jump back into auto lending, they can take back market share quickly, Mr. Murphy added. "When the banks offer low rates, that entices dealers back."

"Over cycles of interest rates, banks are competitive," said William E. Odom, executive vice president in charge of North American auto financing operations at Ford Motor Credit. Lately, he added, banks have been very competitive.

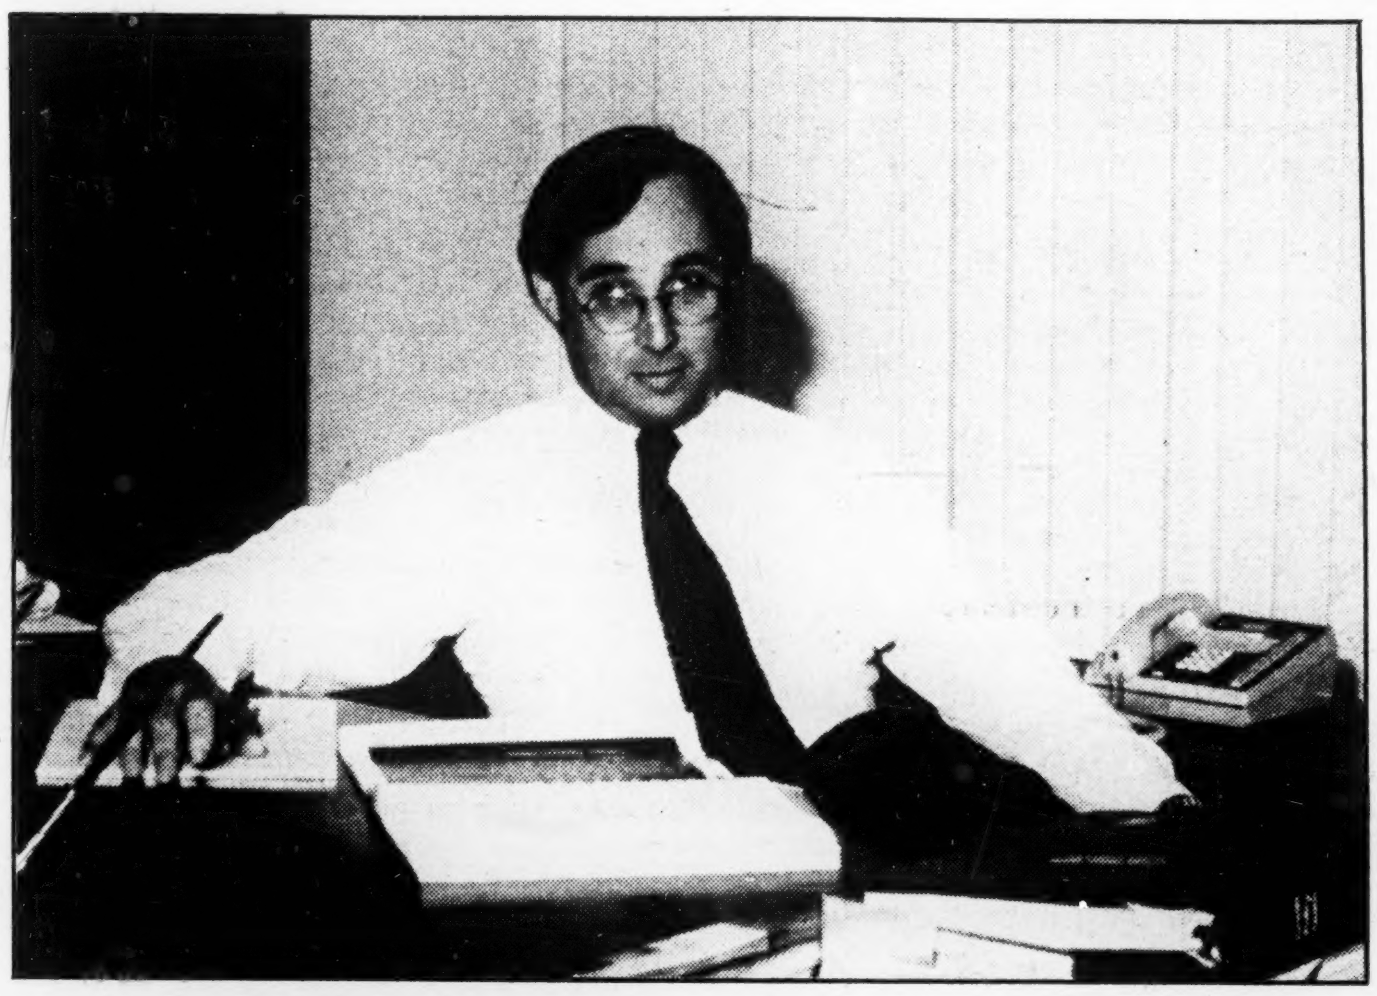
"There is a lot of money in the banking system looking for a home," he said. "Big chunks of money that would have gone to the Third World or to agriculture aren't going there anymore, so banks seem to want to go back to consumer banking."

In the competition for lending rights to consumers and dealers, banks have established relationships with both that help. Both consumers and dealers look to banks for transaction accounts, and some banks are bundling together services into a one-stop shopping package they think dealers will find especially attractive.

"We have one person to handle floor plan [inventory finance], retail paper [consumer loans] DDA [checking accounts] for the dealer, and even a credit line for acquisitions," said Robert Reich, the group executive in charge of Marine Midland Bank's auto-financing activities.

Mr. Reich said Marine and other banks have another advantage in seeking out relationships with dealers: "The domestic dealer doesn't want all his eggs in one basket."

Marine Midland is emerging as one of the largest factors in U.S. auto lending, with a network of 1,370 dealers. Within New York State, it has signed on 900 of the state's 1,370 dealerships. About 45% of that total are import dealers; the rest are domestic.



MARINE MIDLAND'S ROBERT REICH: 'We like to touch the cars.'

Among Marine's recent coups is the signing of a contract to provide a package of financial services to the 80-dealer Subaru of New England network. Among the services Marine will offer are inventory financing and consumer loans and leases.

Diversified Relationships

However, the fact that a dealership establishes a relationship with a Marine Midland or a Chrysler Financial does not mean automatically that the finance unit will get all of the dealer's business.

In almost every case, dealers will offer their loans, known in the business as retail paper, to a number of lending institutions. Which lender is able to buy the paper depends in large part upon what kind of deal they offer the dealer.

Dealers maintain a primary relationship with at least one lending institution and secondary relationships with one or more other lenders.

"One of the reasons they require more than a primary relationship is that there are times when a consumer goes in and just doesn't want to deal with

➧ **Auto Loans: Page 15**

Citicorp Moves in Where Captives Refuse to Tread

DETROIT — The Chrysler Financial Corp. is not in business to help sell Chevrolets, and it most definitely is not in business to help move Toyotas from Japan. And therein lay Citicorp's opportunity.

"In the early 1980s, the captives refused to do financing of foreign autos, and that was really where we got in," said Milton Riseman, president of the Citicorp Acceptance Co., a St. Louis-based subsidiary.

As a result, he said, "Probably about 75% of our business is foreign."

The business the captive auto finance companies spurned proved both profitable and fast-growing for Citibank.

Mr. Riseman declined to discuss Citicorp Acceptance's size or profitability, but during a presentation to security analysts in New York two years ago, his predecessor, O.B. Kinney, said the unit had about $3 billion in receivables in 1983.

It earned about $25 million after taxes that year, Mr. Kinney said. In 1982, the year Citicorp Acceptance began making auto loans, it broke even, and the year before, when its business was limited to financing recreational vehicles, it lost money.

Mr. Kinney said in his 1983 presentation that he expected the subsidiary to earn in the neighborhood of $20 for each $100 of equity.

If the captive auto finance companies' refusal to finance imports gave banking firms such as Citicorp their opportunity, it was the banking industry's hesitance to make auto loans earlier in the century that prompted the automakers to enter the field in the first place.

"The banks were reluctant to get into the business," said Arvid Jouppi, an auto analyst for Rooney, Pace & Co.

"Auto finance was a high-risk business then, and banks were working with their depositors' money, so it was legitimate for them to stay out," he said.

Antitrust Suits Stalled Ford, Chrysler

The first of the three to start business was the General Motors Acceptance Corp. in 1919. Ford and Chrysler tried to follow, but the government pressed antitrust suits against all three, and in the 1930s Ford and Chrysler both entered consent agreements in which they promised to stay out of auto finance.

General Motors fought the action, however, and prevailed in the late 1950s. Following the court decision, Ford formed its finance subsidiary in 1959 and Chrysler followed in 1964.

Ford and Chrysler paid a price for their late start, however.

"We finance about two-thirds of Ford and Mercury dealers," said William E. Odom, executive vice president in charge of North American auto financing operations at Ford Motor Credit. "The others were in business before Ford Credit was started. They have relationships with banks, they like them, and they elected not to change."

On the retail side, banks offered lower rates than the auto captives, and thus have traditionally been the lender of choice for most consumers, said Joseph Phillippi, an auto analyst for the E.F. Hutton Group.

"If you couldn't get a bank loan, you went to the auto dealer and paid 50 basis points more," he added. "They were the lender of last resort and almost no one was turned down."

As interest rates shot skyward in the late 1970s, piercing through most state-imposed usury ceilings, banks began to pull back from the markets and the auto companies introduced the first of the incentive programs.

Thus, while banks charged an average of 52 basis points less than finance companies in 1980, according to Federal Reserve Board data, the finance companies were cheaper in 1981, the first year of the incentives, and the next two years as well.

In 1984, banks underpriced the finance companies, but they have failed to keep pace with the lower rates offered by the captives for most of this year.

High rates or low, consumers may be finding the dealer showroom a more congenial place to arrange a loan than the bank lobby. Dealerships are open nights and weekends, the hours when working Americans are likely to shop for cars.

"It's more convenient to go to the dealer for financing than to try to get to the bank between one and three," said Robert Monteith, president of the Security Pacific Credit Corp.

— Robert M. Garsson

AN AMERICAN BANKER SPECIAL REPORT

Competition Heats Up in Profitable World of Auto Finance

Continued from Page 14

GMAC," for example, said Mr. Monteith of Security Pacific Credit.

Security Pacific Credit has about $2 billion in assets and virtually all of that amount — about $1.85 billion — is retail, rather than floor plan financing. Imports account for about 60% of the total, Mr. Monteith said.

"In a primary relationship, I like to think I have the first opportunity to buy the majority of the retail paper," he said. "I'd like to have 100%, of course, but the fact is I would be happy with 50% or more."

To understand the dealer's relationship with lenders, it is necessary first to understand that finance and insurance earnings, or F&I income, can be a significant source of dealer profits, especially in hard times.

"Typically, the dealer adds on 50 to 100 basis points," said Mr. Reich. They also make money on the credit life insurance sold to car buyers and, in some cases, receive direct commissions from lenders in addition to their cut of the annual percentage rate, or APR. Of commissions, Mr. Reich added quickly, "We don't go for that."

So when a dealer tells a customer he can provide financing at 12% per year, he already knows he can sell the paper to a financial institution at a price that would yield the buyer 11% to 11½% on the loan. Having a stable of lenders in line to bid on the paper provides a number of alternatives.

Also helpful is the ability to bid quickly. GMAC, for one, is rigging together an electronic system that eventually will make it possible to tell dealers whether it will buy a retail contract while the customer is still on the showroom floor, a feature Mr. Murphy said he believes will give dealers one more tool to use in closing a sale.

That kind of system requires a quick, automated check of the buyer's credit history and an automatic, electronic evaluation of a customer's creditworthiness through a process known as credit scoring.

"I can see that the GMAC system would be a real marketing tool," said Milton Riseman, president of Citicorp Acceptance Co., a St. Louis-based subsidiary of the big New York banking firm.

"But the the question is, do you make a decision on the basis of the credit scoring, or do you want a human to look at it afterward and add his judgment?"

Mr. Riseman, while acknowledging that Citicorp Acceptance is considering a similar type of system, added that he believes the final decision on granting credit should be made by a credit officer, rather than a computer.

Marine Midland's Mr. Reich agreed, saying his bank does not use credit scoring at all.

"We are dealing with a $15,000 to $20,000 balance, and you want someone with seasoned judgment to look at it," he said.

GMAC's chairman, however, noted that credit losses tend to run low in auto lending, almost irrespective of the borrower's ability to pay.

"There has always been a feeling among a certain layer of people that the car is a status symbol, even among people of moderate income," said Mr. Murphy.

"People will forget other things to make their monthly car payments. We have situations where people buy cars equal to their annual income and still pay it off."

The Loan Loss Experience

Moffit Cecil

At the subsidiaries of the big three auto companies, losses run surprisingly low. When Chrysler Financial's Mr. Baker was asked about delinquencies on a recent day, for example, he responded not only with figures on chargeoffs, but on the number of customers who were delinquent that week: 208, precisely, out of almost half a million total.

Chargeoffs at all three companies run at well below one-half of one percent of receivables, and all three companies follow conservative policies in providing for future loan losses, almost invariably increasing the reserve by amounts well in excess of actual losses.

Still, the finance companies have to stay on their toes to keep credit losses in check, said Wayland Blood, who is responsible for finance at Ford Credit.

"It's unusual to have a loss, but when a dealer goes belly-up we lose a million or two," Mr. Blood said.

By monitoring financial statements, Ford can stay reasonably well-apprised of a dealer's financial health, Mr. Blood said, but it is still necessary to pay a few visits a year to each dealer.

"We go in and actually touch the cars, see for ourselves that they are there," he said.

Depending upon the dealership and its track record, surprise audits are scheduled "several times a year," Mr. Blood said.

Others say they count as often as once every several weeks.

"How often we check depends upon, first, our experience with the dealer," said Marine's Robert Reich. "If the cars were there the last several times, we check less often."

A second factor is the size of the dealer and how often it turns over inventory. Third is the health of the financial statements.

But in any case, Mr. Reich said, Marine likes to "touch the cars anywhere from once a week to once a month," to assure itself that the steel it has financed is where it is supposed to be. ■

Continued from Page 2

breach of trust" regarding the placement of union-controlled pension funds into noninterest-bearing accounts at the bank. In 1980, the year the Comptroller and the bank entered into the supervisory agreement, the bank was the subject of investigations by federal grand juries and the Securities and Exchange Commission in connection with loans to directors associated with the Mine Workers.

Besides the problems related to the bank's involvement with the union, National Bank of Washington also was plagued by a portfolio full of low-yielding mortgages and municipal bonds.

Generally, earnings have been on the upswing in the last few years — from $2.6 million in 1981 to $3 million in 1982, $6.1 million in 1983, and $8.2 million in 1984. However, earnings have slipped this year.

In the first nine months of 1985, the bank earned $7 million, down from $7.9 million in the corresponding period in 1984. And the company's profitability also is down, to 80 cents for every $100 of average assets in the first three quarters of 1985 from $1 in 1984.

The decline in profits and profitability was attributed in part to a $5.5 million increase in the provision for loan losses. Late last year, the Comptroller ordered the bank to bolster its reserve to reflect two deteriorating credits, one to a construction firm and the other to a computer firm. ■

Texas . . .

Continued from Page 9

new Delaware bank. The bank also plans to add new services to its standard MasterCard and Visa cards, and to begin offering premium MasterCard and Visa cards, said Paul A. Clinkscales, senior vice president at Texas American Bank Fort Worth, the company's lead bank.

He declined to say what the bank will charge for its Delaware-issued cards.

Mr. Clinkscales said the new rate will be somewhere between Texas American's existing rate, about 14.4%, and 19.8%, a common rate in the industry.

Also, Texas American will begin charging an undisclosed annual fee, he said.

There are no limits on credit card interest rates or annual fees imposed by Delaware law, which attracted Texas American to the state. "It offers one of the more favorable consumer credit laws," Mr. Clinkscales said.

Delaware's liberal credit laws, initially passed in 1981, already have attracted the credit card operations of about a dozen out-of-state banking companies, including two from Dallas — RepublicBank Corp. and MCorp.

A Dallas-based credit card processor, Southwestern States Bankcard Association, also is starting a Delaware operation.

Texas American has issued credit cards primarily to Texans, but Mr. Clinkscales said the banking company may expand its marketing efforts outside Texas. Many banks have promoted and issued credit cards around the country. ■

Allied Irish Banks Inc. of Dublin, Ireland, has increased its stake in the **First Maryland Bancorp** in Baltimore to 47% by acquiring an additional 639,084 shares for a total of $14.6 million.

The transaction was the fourth of a series of six share purchases by Allied Irish scheduled as part of a March 1983 agreement under which Allied Irish will become the majority shareholder by the end of 1987.

With $4.2 billion in assets, First Maryland is the state's second largest bank holding company.

■

The Conifer Group, a bank holding company based in Worcester, Mass., has agreed to acquire the **Hampshire National Bank** in South Hadley, Mass., for $17 million in stock.

Under terms of the transaction, each share in Hampshire will be exchanged for 4.4 shares of Conifer.

Happy Holidays at Credit Unions

Payout Gain of 15.8% in '85 Far Outpaces Other Institutions

By THERESIA TREPEL
and L. MICHAEL CACACE

NEW YORK — Holiday club payouts at credit unions were up 15.8% in 1985, while payouts at commercial banks rose by only 1%, and payouts at savings institutions fell by 2.4%.

It was the fifth consecutive year for substantially higher growth in club payouts at credit unions than at other institutions. In 1984, credit union club payouts were up 8.3%, while those at commercial banks were up by only 0.5%, and savings institutions were up 5.5%.

These are some of the findings of the *American Banker's* annual survey of holiday club accounts at commercial banks and thrift institutions.

Three main reasons for the larger growth at credit unions were:

- Most credit unions offered higher rates on club accounts.
- Most credit unions used the more efficient electronic transfer accounts.
- Most banks and savings institutions continued to streamline their club programs to increase their profitability.

Last year, more than 80% of the credit unions surveyed paid rates ranging from 6% to 8%. And almost 75% of the credit unions surveyed had automatic or electronic transfer of funds into club accounts — mostly through payroll deduction plans. These accounts are more efficient to maintain and virtually guarantee that participants complete their club payments.

Christmas Club with Plush Payoff, Page 24

In comparison to credit unions, most commercial banks, savings banks, and savings and loan associations were offering 5.5% or less on club accounts. And more than 80% of the commercial banks and savings institutions surveyed used coupon books and passbook accounts, which are less cost-effective than electronic transfer accounts.

As a group, banks and savings institutions continued to streamline, cut back, or repackage their holiday club programs last year, because many of these programs have been marginally

Metropolitan Life Insurance Agrees To Set Up Shop in Little Rock Thrift

By LYNN BRENNER

NEW YORK — Metropolitan Life Insurance Co. announced Wednesday it has agreed to develop a program to distribute a full range of personal insurance products to the customers of First Federal Savings of Arkansas.

The company plans to open seven insurance centers at First Federal offices in Little Rock, Ark., and the surrounding area at the end of February.

Based in Little Rock, First Federal is the state's largest savings and loan association in terms of deposits. It has 44 offices statewide and serves more than 100,000 households. At the end of the third quarter last year, the thrift had $1.7 billion in assets and $1.4 billion in deposits.

This is Met Life's second such arrangement. The company presently operates 18 insurance centers for Mercantile Bancorp., a regional bank holding company headquartered in St. Louis. The insurer pays Mercantile a flat rental for the use of its premises.

A Metropolitan executive said the year-old Mercantile program "is meeting expectations and absolutely on schedule in terms of expansion," but declined to elaborate.

Like the Mercantile program, the agreement with First Federal is a space leasing arrangement. The thrift will receive no separate compensation for the use of its customer lists.

Salaried Met Life sales representatives will offer a complete portfolio of personal insurance products, including life, automobile, and home owners insurance to the thrift's customers. Life products offered will include whole life, universal life, and term insurance.

The offerings will be supported by a computer system and toll-free telephone services, a Met Life spokesperson said.

In announcing the program, both M.R. Godwin, First Federal's president and chief executive, and Charles E. Lavezzoli, Metropolitan's executive vice president in charge of personal insurance operations, expressed optimism about its potential.

"From both companies' perspectives, the goal of this program is to better serve the customer," said Mr. Godwin.

"As the leading savings and loan association in Arkansas," Mr. Lavezzoli

Fed Votes 3-2 To Limit Use Of Junk Bonds

Volcker Stresses Narrowness Of Anti-Hostile-Takeover Rule

By BARTLETT NAYLOR
and NINA EASTON

WASHINGTON — Defying pressure from the Reagan administration and the securities industry, the Federal Reserve Board voted 3-2 Wednesday to limit debt — commonly junk bonds — used in corporate takeovers.

The rule, which took effect immediately, is viewed as an attempt to stem the "merger mania" that has sapped billions of dollars from the economy. It restricts to 50% the amount of debt a company can use through a shell corporation to finance a hostile takeover.

While the Fed said the rule became effective Wednesday, securities lawyer George Katz of the New York firm of Wachtell, Lipton, Rosen & Katz said there was still a question about deals that had already been "committed, contracted, or circulating."

He said, however, that he was unaware of any firms "caught in the crunch."

The largest current hostile takeover attempt — GAF Corp.'s bid for Union Carbide Corp. — fell through earlier on Wednesday. Executives at Drexel Burnham Lambert Inc., Wall Street's largest underwriter of junk bonds, said they were considering a lawsuit against the Fed. "We have to study this," Drexel vice chairman James Balog said after the Fed vote. "There are so many internal inconsistencies in the board's decision."

"This ruling will cause disruption in the capital markets for corporate control because a substantial number of transactions will be subject to uncertainty relating to whether margin rules

Indianapolis: Sharing with Today's Youth.

Indianapolis is a youthful city offering many activities, programs and facilities for children. Heading the list is the $6.8 million Children's Museum, the largest of its kind in the world, sponsoring plays, field trips and workshops. The Indianapolis Zoo, the Museum of Art, and the renowned Indianapolis Symphony Orchestra educate children about nature and the fine arts. American Fletcher, Indiana's largest bank, proudly supports youth programs of Indianapolis and realizes that a child's discovery today leads to tomorrow's breakthroughs.

American Banker surveyed the top 500 commercial banks; the top 400 savings institutions (savings banks and savings and loans); an additional 200 commercial banks and savings institutions known to have club programs; and the top 150 Credit Unions.

Total payout—Includes both principal plus interest paid by the institution and all its branches on all Christmas clubs, holiday clubs, and all similar club accounts. **Average payout**—The total payout divided by the total number of active club accounts, rounded to the nearest dollar. **Rate offered**—The most common offering rate on club accounts. **Type of Account**—Respondents were asked to identify one club type representing the majority of club accounts. **C**- Coupon book; **E**- Electronic (Automatic) Funds Transfer; **P**- Passbook account; **O**- Other (such as payroll deduction).

(S)—Savings institution. Identifies those institutions whose name does not clearly identify it as a savings institution. **(f)**— One bonus payment is given on the completion of the club (the 50th or 51st payment). This is equivalent to an offering rate of approximately 4%. **(g)**—Formerly Savings Bank of Ansonia. **(N.A.)**—Not available.

American Banker surveyed the top 500 commercial banks; the top 400 savings institutions (savings banks and savings and loans); an additional 200 commercial banks and savings institutions known to have club programs; and the top 150 credit unions.

Total payout—Includes both principal plus interest paid by the institution and all its branches on all Christmas clubs, holiday clubs, and all similar club accounts. **Average payout**—The total payout divided by the total number of active club accounts, rounded to the nearest dollar. **Rate offered**—The most common offering rate on club accounts. **Type of Account**—Respondents were asked to identify one club type representing the majority of club accounts. **C**- Coupon book; **E**- Electronic (Automatic) Funds Transfer; **P**- Passbook account; **O**- Other (such as payroll deduction).

(S)—Savings institution. Identifies those institutions whose name does not clearly identify it as a savings institution. **(f)**— One bonus payment is given on the completion of the club (the 50th or 51st payment). This is equivalent to an offering rate of approximately 4%. **(N.A.)**— Not available.

American Banker surveyed the top 500 commercial banks; the top 400 savings institutions (savings banks and savings and loans); an additional 200 commercial banks and savings institutions known to have club programs; and the top 150 credit unions.

Total payout—Includes both principal plus interest paid by the institution and all its branches on all Christmas clubs, holiday clubs, and all similar club accounts. **Average payout**—The total payout divided by the total number of active club accounts, rounded to the nearest dollar. **Rate offered**—The most common offering rate on club accounts. **Type of Account**—Respondents were asked to identify one club type representing the majority of club accounts. **C**- Coupon book; **E**- Electronic (Automatic) Funds Transfer; **P**- Passbook account; **O**- Other (such as payroll deduction).

(S)—Savings institution. Identifies those institutions whose name does not clearly identify it as a savings institution. **(f)**— One bonus payment is given on the completion of the club (the 50th or 51st payment). This is equivalent to an offering rate of approximately 4%. **(g)**—The offering rates shown are for EFT club accounts only. **(h)**—Formerly Woonsocket Savings & Trust **(N.A.)**— Not available.

Debt . . .

Continued from Page 2

of gross domestic product increasing from 67% in 1985 to 77% in 1986. The debt service ratio — debt requirements compared to export earnings — will rise to 50% on average, for the next two years, said Data Resources. Borrowing needs will push foreign debt to the the $100 billion market.

Venezuela: Also an oil-exporting country, Venezuela is better prepared economically than most such nations to weather the expected slump in oil prices in 1986. Meanwhile, formal signing is expected early this year on its $21.1 billion debt rescheduling agreement.

Venezuela, which has foreign debt of $31.5 million, nearly all of it owed to private lenders, recently has been stressing diversification of its export economy. Nevertheless, oil accounts for 90% of merchandise exports, and the nation's economy is not expected to stage a full recovery until 1988, when world oil prices are expected to rebound, according to Data Resources.

Venezuela's inflation rate is the lowest in Latin America, at 10% annually. But the economy is at a static level, and pressures to alleviate unemployment by stimulating the economy are increasing. Despite the clouded outlook, however, Venezuela is expected to be the only Latin country to reduce its foreign debt obligations. They are likely to fall $4 billion or more by 1990.

Peru: Among the smaller debtor nations, Peru is in the most difficult straits and has assumed the most vocal and radical position of all debtor nations. The country's new president, Alan Garcia, has said that Peru will not negotiate an economic austerity plan with the IMF and will limit payments to creditors this year to the equivalent of 10% of its export earnings.

The announcement has left bankers and the IMF anxious about whether or not Peru will set a precedent leading to future problems with other debtor countries.

On New Year's Day, the African nation of Nigeria confirmed some of those fears by saying it would cap payments on its debt to the equivalent of 30% of its export earnings.

Data Resources noted that continued sluggish economic activity and currency devaluation in Peru will exceed 100% in 1986 as a proportion of gross domestic product.

But while talking tough to his creditors, Mr. Garcia also has impressed them by launching a rigorous austerity program of his own for Peru, emphasizing economic development, pursuing corruption, and firing a third of the officers of state-owned companies. Under his "moralization campaign," he has renewed the fight against narcotics-related activities and even reduced his own salary.

Colombia: Late last year, Colombia, a Latin nation with a strong credit rating, joined with banks to formally sign a $1 billion loan agreement to boost export trade. It was the first Latin country since 1982 to gain a financing agreement with banks without an IMF agreement. The signing was a sweet moment for Colombian officials, who feel that their country has been marked unfairly as a troubled debtor because of its location in Latin America and in spite of its good record.

Ecuador: Another Latin country with a generally good credit rating and reputation that recently signed a multiyear rescheduling package. Ecuador, an oil exporting country, has followed an austerity program to adjust its economy and now expects moderate growth in 1986. Foreign debt will total $7.7 billion in 1986, a high 65% of gross domestic product, but Data Resources noted that debt service this year will amount to a manageable 28.6% of exports.

Bolivia: With severe austerity accompanied by serious labor strife, Bolivia has sharply reduced its legendary inflation rate — 14,000% annually at one point — under President Victor Paz Estenssoro. Talks aimed at an economic program are under way with the IMF. But Bolivia's economy has been plagued by uncertainty since October when commodities trading in tin, a major Bolivian export, was suspended indefinitely in London. Bolivia owes foreign banks $1 billion.

Chile: While falling tin prices have hampered Bolivia, a parallel fall in copper prices has caused uncertainty for Chile, which has $20.8 billion of foreign debt, most of it owed to private lenders. The country obtained new debt agreements in 1985 from the IMF and the nation's banks. The military government of General Augusto Pinochet recently relaxed monetary policy after nearly a year of austerity. Moderate recovery of the currently static economy is expected. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **American Banker Ranks the Top Holiday Clubs** survey that appear in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

Holiday Clubs . . .

Continued from Page 1

profitable at best. As a result of these changes, the number of club accounts fell by 16% at banks and 10.2% at savings institutions in 1985, after falling 6.1% and 7.4%, respectively, in 1984.

Other Survey Findings

The *American Banker* surveyed about 600 commercial banks, 500 savings institutions, and 160 credit unions. About 22%, or 277 institutions, responded to the survey — 142 commercial banks, 95 savings institutions, and 40 credit unions. Listed below are some of the more interesting survey findings.

Kinds of Holiday Clubs

	Number
Coupon	142
Passbook	71
Electronic	43
Other	21
Total	277

- Most institutions that did not grow substantially through a merger yet showed substantial gains in club payouts last year attributed the gains to increased marketing and promotional efforts.

For example, Key Bank, Albany, N.Y., which had a 27% gain in club payouts last year, attributed the increase to its successful premium offer and an effective public relations campaign. The Northeastern Bank of Pennsylvania, Scranton, had a 25.3% gain and attributed it to a new promotion campaign that offered three different types of stuffed animals. Teachers Federal Credit Union, Farmingville, N.Y., had a 20.5% gain in payouts, which it attributed to its promotion of its new premium offer — a coupon for a free dinner with the purchase of one dinner.

- Despite a drop from last year, the Bank of America, San Francisco, maintained its position as top institution in holiday club payouts last year — a spot it has held since the survey was started more than 10 years ago. It paid out $96 million to its holiday club members, a decline of 19.3% from the previous year. The bank stated that the decline

Cuomo's Housing Plan Includes 1% State Loans

Special to the American Banker

ALBANY, N.Y. — A blend of state loans at 1% interest and market-rate bank loans is a key part of a five-year, $2.5 billion program proposed by Gov. Mario M. Cuomo to expand housing in New York State.

"A new participation loan program will provide state loans at 1% interest to be blended with an equal amount of market-rate bank money, permitting the rehabilitation of aging multiple dwellings at a cost that does not push rents beyond affordability for the tenants in place," the governor said in his annual message to the state legislature on Wednesday.

Calling for a program to produce 50,000 housing units across the state in five years, Mr. Cuomo said he would submit legislation to provide the State of New York Mortgage Agency — known by the acronym Sonyma — with $1 billion to finance mortgage loans over the next few years.

Gov. Cumo said he also will submit legislation to permit the Housing Finance Agency to issue taxable bonds to finance middle income cooperative and rental housing projects.

In addition to the new participation loan program for rehabilitation of aging multiple dwellings, Sonyma's mortgage insurance program would be used when credit enhancement is necessary to make a project viable, he said.

The governor also asked legislators to provide an additional $20 million for a cooperative public-private program to build housing for 2,000 homeless families. ■

HOW CONSUMER AMERICA VIEWS THE CHANGING FINANCIAL SYSTEM

The *American Banker* is selling a 16-page reprint of its recently published series examining how American consumers view the great changes in the financial system.

Based on its second annual survey of 1,000 households conducted with help from Reichman Research Inc., a New York opinion research firm, the *American Banker* reprint examines a wide array of issues: how consumers view the health of the banking system, the integrity of bankers, and the performance of financial regulators.

Americans were asked, too, what they think about and expect from interstate banking; how they view banking by mail, telephone, and computer; and whether they favor the expansion of powers for financial institutions.

The survey reprint also reports on what kinds of financial institutions most satisfy people, and whether Americans like new electronic banking services such as automated teller machines, direct deposit programs, and banking by home computer. And what does the public think about the thrift industry's problems?

Copies of the *American Banker* reprint can be obtained by sending a check for $15 for each copy to: *American Banker*, Att: Gina Caputo, One State Street Plaza, New York 10004 (212-943-8677).

In addition, Reichman Research is making available the survey data in a variety of other formats, including a hard copy report, magnetic tape, and a diskette package. Additional information, including a copy of the questionnaire, can be obtained from David Reichman, president, Reichman Research Inc., 3 East 44th St., New York 10017 (212-986-7709).

This is the second *American Banker* consumer attitudes survey. Copies of the previous survey, published in 1984, are available for $10 each.

Offering Stuffed Animals Instead of Interest Ends Dog Days for Commonwealth Savings Holiday Club

Special to the American Banker

When their holiday club began going to the dogs back in 1983, the management at Commonwealth Savings and Loan Association, Norristown, Pa., decided to eliminate interest payments and give club members stuffed animals instead. Dumb move, huh?

Not exactly. Baxter the Bashful Basset, the creation of Russ Berrie Inc., New York, actually helped the thrift increase account deposits and pocket about $70,000 in interest savings. There were some account defections that year and in 1984. But aggressive cross-selling of the holiday club to checking customers in 1985, and the introduction of a plush pooch, Samuel Spaniel, enabled the thrift to increase club participation by more than 26% over 1984.

Incredible!

"Yes, it is," agreed Tom Yaegel, the former Commonwealth Savings marketing vice president who dreamed up the brazen plan. It was all the result of old-fashioned, nuts-and-bolts marketing, added Mr. Yaegel, who now runs a consulting business from the office of a swim club that he owns in Richboro, Pa., a suburb of Philadelphia.

Mr. Yaegel, who also teaches marketing at Montgomery County (Pa.) Community College, said he had noticed back in 1983 that the thrift was suffering from what he calls "bottom of the bag" syndrome. As Commonwealth adopted newer financial products for its customers, it tended to ignore its older offerings — put them at the bottom of its bag, so to speak.

"I decided we should evaluate the older products and either improve them or get rid of them altogether," he said.

Mr. Yaegel said that an examination of the thrift's estimated 8,000 holiday club accounts determined that adding the 6% interest that it was paying customers to the operating costs totaled 12% for the thrift.

"We were putting money out at 10½% to 11% back then, so we were losing money on the thing."

'We decided to replace the interest with an item of emotional appeal.'

— Tom Yaegel, the former Commonwealth Savings and Loan marketing vice president who dreamed up the plan to give away stuffed animals instead of interest on Christmas club accounts.

Mr. Yaegel said that holiday club accounts are labor intensive, and thus he saw no possibility of cutting back on personnel to trim costs. Any savings would have to come from the interest rate side, he concluded.

"We conducted a telephone and lobby poll about this time to discover why people opened these accounts in the first place. We found it was because they liked a systematic way to save funds for the holidays. Interest was way down on the list."

Mr. Yaegel also discovered that 70% to 80% of the accounts were opened by women and that it was an impulsive decision.

"So we decided to replace the interest with an item of emotional appeal," he said. Kimberly Roth, marketing director for Russ Berrie, said that Mr. Yaegel first came to them requesting several thousand teddy bears, but he was won over by Baxter, who resembles Tonka's very popular "Pound Puppy" toy. The animals cost the thrift about $30,000.

The dogs were manufactured in several sizes, the larger dogs going to the people who opened the biggest accounts. People can deposit between $5 and $40 per week for 50 weeks to get a dog. The club drive for this year began on Oct. 14. If customers fail to complete the club, the cost of the dog is deducted from their balance.

In 1983, the thrift opened 7,000 holiday clubs, off about 10% from the previous year. But they saved $68,000 in interest. In 1984, they opened 6,200 accounts, and about $2.2 million in deposits matured at the conclusion of the 50-week deposit period. The thrift saved about $64,000 in interest, according to Donna Sullivan, Commonwealth's senior marketing vice president.

"We didn't push it in 1984," she said.

For 1986, Commonwealth marketed the account to its 22,000 checking customers and opened a total of 8,600 accounts, according to Ms. Sullivan. "We expect the participants to deposit $4 million," she said.

"We had very few complaints when we took away the interest," said Mr. Yaegel. "You're talking maybe $15 a year in interest. It's not what the people were buying." ■

Credit Unions Lead in Club Payout Gain

Continued from Page 22

was attributable to the loss of some customers when the bank phased out its coupon book club programs. Customers were asked to switch to a program that automatically transfers funds from one account into the club account.

- For the second consecutive year PSFS, Philadelphia, was the top thrift institution — savings institutions plus credit unions — in holiday club payouts. PSFS had $17.6 million in club payouts, down 4% from $18.4 million in 1984.
- For the second consecutive year, Bethpage Federal Credit Union, Bethpage, N.Y., was the largest credit union in holiday club payouts with $5.8 million, up 9.2% from 1984.
- The institution with the highest average payout per account in 1985 was the United Nations Federal Credit Union, New York City, with $1,031 per account — up 28.4% from 1984 when the payout per account was $803.
- The highest offering rate on club accounts last year was 8%, offered by two credit unions: Pennsylvania State Employees Credit Union, Harrisburg, and Fort Monmouth Federal Credit Union, West Long Branch, N.J.
- Kanawha Banking & Trust Co., Charleston, W.Va., had the highest offering rate on club accounts for a commercial bank — 7.3%. It was also the second highest rate reported by any institution in the survey.
- Among savings banks and savings and loans, Honolulu Federal Savings & Loan Association had the highest offering rate — 7%.
- For the fifth consecutive year, credit unions had the largest average payout per account, $469; and they also had the largest increase in the number of holiday clubs, 9%.
- The most popular account was the coupon book, used by 142 institutions, or 51.2%, of the 277 institutions responding to the survey. Passbook accounts were used by 71 institutions, or 25.6%; electronic transfer accounts by 43 institutions, or 15.5%; and 21 institutions, or 7.7%, used other accounts, such as statement savings.

A master list of all respondents to the survey begins on page 11. Institutions are listed geographically. Within each state, the institutions are listed alphabetically within the city in which they are located.

In addition to this master list, five summary tables appear on page 10. These tables identify the top 25 institutions among banks and thrifts in club payouts in 1985; the top 25 banks; the top 25 thrifts; and the top 10 credit unions. The other summary table identifies the top 10 institutions in average payout per account. ■

Big Banks to Feel Brunt of Risk-Based Capital Plan

Fed Would Apply Capital Rules to Off-Balance-Sheet Activities

By NINA EASTON

WASHINGTON — Large banks are going to find off-balance-sheet activities less attractive and liquid assets more alluring. Smaller banks are simply going to breathe a sigh of relief.

That's the preliminary view of experts who have examined the Federal Reserve Board's risk-based capital proposal, which the Fed governors unanimously decided to issue for public comment Wednesday.

In a related development, two other banking agencies — the Comptroller of the Currency and the Federal Deposit Insurance Corp. — said Wednesday that they intend to solicit public comment on their own risk-based capital plans.

The principal effect of the Fed's proposal would be to bring certain off-balance-sheet operations — particularly standby letters of credit — under the capital requirements. Because off-balance-sheet activities are currently not counted as assets, they are not taken into account when calculating a bank's required capital ratio.

Questions in Assessing Risk, Page 9

The issuance of letters of credit, which are a bank's guarantee that a customer will complete a transaction, is booming at the nation's largest banks. If the Fed goes ahead with its

➸ Proposal: Page 9

At a Glance

Fed Capital Rule

The Federal Reserve Board's new proposals would:

- Place bank assets into four categories of risk, with cash and U.S. Treasury securities being lowest and loans and commercial paper highest.
- Assign a weight to each category to determine how much capital should be maintained against it.
- Force banks to add capital to back off-balance sheet liabilities, such as letters of credit.
- Divide banks with more than $1 billion in assets into three "zones" depending on portfolio risk to determine whether they should be placed under regulatory probation.

Fed Urges Banks to Keep Their Overdraft Caps a Secret; Disclosure Seen as Damaging to Risk-Reduction Program

By TOM FERRIS

NEW YORK — The Federal Reserve System and four other regulators are "strongly" urging banks not to disclose the overdraft limits they set for themselves under an impending Fed program to reduce operating and credit risk in the nation's payment system.

Some banks have been publicizing their high overdraft caps as a marketing tool to capture additional wire transfer business and bolster their image. The Fed called such actions "inappropriate" and contrary to the intent of its program.

"The Federal Reserve strongly urges depository institutions not to disclose the size of their 'sender net-debit caps' either to customers or to the public," the Fed's district banks wrote in letters sent over the last two weeks to member institutions.

The Fed said its position was endorsed by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corp., the Federal Home Loan Bank Board, and the National Credit Union Administration.

The advisory is likely to offer comfort to banks that give themselves relatively low overdraft limits. Such institutions now have an official reason for not revealing those caps to inquisitive corporate customers, rating agencies, insurance companies, and institutional investors.

The Fed and other supervisory agencies have been worried that some banks, concerned that their caps might become public, will be pressured into giving themselves higher-than-deserved ratings, sabotaging the effectiveness of the risk-reduction effort. Government officials are hoping their plea for secrecy will stop disclosures and keep competitive factors from entering the picture.

However, the advisory is not binding, and some observers question whether it will be effective, especially in the money centers, where the competition for wire transfer business is fierce.

"When an important relationship is up for grabs, allusions will be made," said David C. Cates, a bank analyst. "Banks will find ways to send messages" about the size of their caps and their amount of excess capacity, he

➸ Overdraft Cap: Page 8

The Troubles of Bert Lance Continue

By ROBERT TRIGAUX

WASHINGTON — A federal judge has refused to halt the Comptroller of the Currency's attempt to force Georgia banker Bert Lance out of the banking industry, despite Mr. Lance's objection that the proceeding is aimed at making him divulge information for a criminal investigation.

U.S. District Judge Harold Murphy in Atlanta denied on Tuesday Mr. Lance's request to halt an administrative removal hearing being held in that city.

But Judge Murphy also turned down a government motion that he dismiss a new lawsuit filed by Mr. Lance on Monday against the Office of the Comptroller of the Currency asking for a halt to the agency's administrative proceedings aimed at removing Mr. Lance from banking.

The Comptroller seeks to ban Mr. Lance from the banking industry. An enforcement action against Mr. Lance by the Comptroller alleges he was involved in illegal banking activity, including check kiting and insider activities. Mr. Lance is also under a consent agreement signed in 1978 with the Comptroller and the Securities and Exchange Commission for alleged insider lending practices.

According to reports, Judge Murphy told Mr. Lance's lawyers on Tuesday they need stronger evidence to support allegations that the Comptroller's office officials exceeded its authority and that Mr. Lance will be irreparably harmed by the closed-door hearing.

Mr. Lance, a former director of the U.S. Office of Management and Budget under President Carter and former chairman of the Georgia Democratic Party, announced earlier this month plans to retire on Jan. 20 as chairman of the Calhoun First National Bank. He had been reelected to the post only days earlier.

On Monday, the bank announced

Fed's Risk-Based Capital Plan Would Affect Mostly Big Banks

Continued from Page 1

plan, bank holding companies such as Citicorp, BankAmerica Corp., Chase Manhattan Corp., Manufacturers Hanover Corp., and other large money center institutions heavily involved in letters of credit will see their regulatory capital levels drop.

The Fed plan would not affect an existing requirement that banks maintain capital equaling at least 6% of their assets.

The proposal divides assets into four risk categories — each with a different capital requirement. For most assets, however, the Fed proposal would not require banks to add any capital. Banks won't be "penalized" for risky loans, experts say.

How Standby Letters Affect Capital Ratios

	Without Standby Letters	With Standby Letters
Citicorp	5.86%	5.36%
BankAmerica	5.84	5.34
Chase Manhattan	6.37	5.87
Manufacturers Hanover	5.72	5.01
J.P. Morgan	7.02	6.30
Chemical New York	6.26	5.44
Security Pacific	5.85	5.39
First Interstate	6.13	5.90
Bankers Trust	6.23	5.35
First Chicago	6.08	5.47

Source: Keefe, Bruyette & Woods Inc. Data are as of yearend 1984.

"How close you can run to that minimum depends on your risk profile," William Taylor, the Fed's director of bank supervision and regulation, said in a telephone interview. While the plan won't force banks to raise more capital to cover assets already on the balance sheet, he said, it will encourage them to "do more high-liquid, high-quality business." Under the current standard, he said, "no one wants the liquidity — it reduces their margin."

Bank analyst David Cates, of Cates Consulting Analysts Inc. in New York, predicted that the largest 200 banks could be affected by the proposed guidelines. Mr. Cates criticized the proposal for failing to include a fifth category for "substandard" assets.

Others predict that even fewer banks would feel the effects of the proposal. "I suspect it will really affect no more than a handful of major banks — though there may be any number of troubled institutions doing foolish things that might get caught by it," said Washington attorney William J. Sweet, who represents a number of large banks.

"It should not greatly affect our banks," said Diane Casey, regulatory liaison for the Independent Bankers Association of America, which represents community bankers. "The Fed proposal looks like it is targeted at large banks that have a great deal of off-balance-sheet activities."

The Independent Bankers Association, Ms. Casey said, was pleased that the Fed proposal did not distinguish between types of loans by assigning more risk to, say, an agricultural loan than to a commercial loan.

Officials at the American Bankers Association said the plan is worth studying but expressed concerns about its effects. "We are concerned that the proposal may reduce banks' flexibility to lend to certain types of business due to their assessed risk by regulators," Donald G. Ogilvie, ABA executive vice president, said in a prepared statement. "The banking industry has significantly increased its capital in recent years, and there is no demonstrated need for further increases."

Recent data compiled by the Federal Deposit Insurance Corp. show that the 25 largest U.S. bank holding companies have more than $929 billion outstanding in off-balance-sheet assets. If those activities were factored into the capital requirements, capital levels at these institutions would fall an average of 20%, the agency estimates.

Under the Fed proposal, banks still would be required to meet the current 6% minimum standard. The proposal also would not affect ongoing efforts by bank examiners to force individual banks to increase their capital.

"This is not a substitute for all these other supervisory tools," said Fed Chairman Paul A. Volcker. "It is simply another tool to deal with the shortcomings of our existing tools."

While it was the Fed that first forwarded a risk-based capital plan, Mr. Volcker made clear at the agency's open meeting Wednesday that the other banking agencies were "sympathet-

➞ **Proposal: Page 11**

Risk Categories and Weights Under Fed's Capital Proposal

CASH AND EQUIVALENTS Weight: 0%

- United States currency and coin and due from Federal Reserve banks.
- Cash items in process of collection and transaction accounts due from U.S. depositor institutions.
- Short-term U.S. Treasury securities in investment account.
- Foreign currency and balances due from central banks in immediately available funds.

MONEY MARKET RISK Weight: 30%

- Long-term U.S. Treasury securities held in investment account.
- U.S. government agency securities held in investment account.
- Portions of loans fully guaranteed by U.S. government.
- Short-term claims on U.S. depository institutions.
- Acceptance of other U.S. banks.
- Fed funds sold.
- Loans to broker-dealers collateralized by U.S. Treasury and agency securities and securities purchased under agreement to resell (RPs).
- Assets held in trading account.
- Legally binding loan commitments (including note issuance facilities)

MODERATE RISK Weight: 60%

- All state, county, and municipal securities in investment account (excluding industrial development bonds).
- All other claims on U.S. depository institutions.
- All claims on governments and banks of industrial countries.
- Acceptances of banks in industrial countries.
- Local currency claims on governments and banks of non-industrial countries. (Note: To the extent funded by local currency liabilities. If not funded by local currency liabilities, such local currency claims are included in the standard risk category.)
- Loans to broker-dealers collateralized by other marketable securities.
- Commercial letter of credit.
- Standby letters of credit backing state, county, and municipal securities (excluding those backing industrial development bonds), supporting broker-dealers on secured basis or performance-related.

STANDARD RISK Weight: 100%

- All assets found in a typical bank loan portfolio, including:
  All commercial and industrial loans and leases
  Residential real estate and individual loans
  Loans to nondepository financial institutions
- All other claims on foreign obligors.
- Corporate securities and commercial paper, and industrial development bonds.
- Customers' acceptance liabilities. (Note: Include customers' liabilities associated with acceptance participations purchased. Participations sold are included in money market risk category if the purchaser is a U.S. depository institution, moderate risk if the purchaser is a bank in an industrial country, and standard risk for all other purchasers.)
- All assets not included elsewhere.
- All other standby letters of credit (net), including those backing industrial development bonds.
- Loans sold without recourse. (Note: Loans sold with recourse by banks are not removed from the balance sheet under call report instructions. Bank holding companies should report loans sold with recourse in this category even if, under generally accepted accounting principles, they may be removed from the balance sheet.)

Robert Morris Associates Offers Policy Guidelines for Off-Balance-Sheet Items

By LISABETH WEINER

CHICAGO — The Federal Reserve Board's proposal requiring banks to allocate capital based on the levels of risk accompanying different types of off-balance-sheet activities sounds great in theory but may be difficult to implement.

"Risk is very difficult to assess," said Edward Williams, president of Robert Morris Associates and treasurer of Brown Brothers Harriman & Co. "How do you calculate the risk?"

Mr. Williams pointed out that risk is different when it covers a standby letter of credit, a commercial letter of credit, or a loan commitment. "It will probably take some work to find a way of standardizing the evaluation process," he said. Also, because banks may have to raise more capital to meet the new requirements, the whole affair can become expensive.

Off-balance-sheet items have boomed recently as banks in search of fee income have developed new and unusual corporate finance tools. No one really knows how large the total off-balance-sheet exposure is. Some estimate hundreds of billions of dollars, others just say it is very large and growing very quickly. Standby letters of credit alone grew 25% in 1984 to $132 billion, according to an *American Banker* survey.

A standby letter of credit, Mr. Williams said, is just one example of the type of product that concerns the Fed. A standby is a bank's guarantee that the customer will perform as expected. And that is fine if everything goes as planned. But if the customer fails, the standby becomes a loan. That is one of the problems with them, Mr. Williams said. "The bank is committed to make a loan at the worse possible time, when the other side of the agreement is defaulting."

Much of a bank's involvement in off-balance-sheet type activity has to do with how much appetite it has for risk. "For instance, one institution may be willing to issue a standby letter of credit to back up the commercial paper program at AT&T, but it won't issue a standby for the marginal producer of oil drilling bits," Mr. Williams said. But another bank may be willing to carry the riskier credit because it stands to gain a higher return.

To help banks that have not looked at these issues thoroughly, Robert Morris Associates, the national association of bank loan and credit officers, has come up with a set of policy guidelines concerning off-balance-sheet activities.

One of the most important things from the risk management aspect is to know your counterparty, the trade group said. The account party should be well known to the bank, should represent sufficient substance, and should be a party from whom the bank may reasonably expect any required reimbursement over the term of the facility.

The association also urges that the risk analysis, credit approval, and grading processes employed should be the same as those used in other credit requests. The bank's senior credit policy officer should recommend the levels of credit risks to be undertaken. Policies and procedures should be in place to deal with any issues that might arise.

The Journal of Commercial Bank Lending, a Robert Morris Associates publication, polled 10 bankers on how they feel off-balance-sheet items should be handled. Although some were uncertain about the need for stronger capital requirements, most agreed that the Fed had some authority in this area.

But Thomas Golonski, senior vice president of First Seneca Bank, Oil City, Pa., plainly disagreed. "I don't think the Fed is moving in the right direction, and I am opposed to the Fed requiring additional capital for off-balance-sheet items. The majority of those items are unfunded, although that doesn't mean I don't think there is any risk involved. Also, I think increased capital requirements would diminish our market potential." ■

Proposal . . .

Continued from Page 9

ic" to the broad outlines of the proposal.

The plan, which would apply to state-chartered banks that are members of the Federal Reserve and bank holding companies, lays out four categories for assets. The "cash and equivalents" category, including vault cash and short-term U.S. treasury securities, would be given a weight of 0%. Assets in this category, therefore, will be disregarded when calculating a bank's required capital level.

Assets in the "money market risk" category — such as long-term U.S. Treasury securities, federal agency securities, and fed funds sold — would be given a 30% weight. The "moderate risk" category would include local government bonds, claims on governments and banks in industrial countries, commercial letters of credit, and certain standby letters of credit. That category would be accorded a 60% weight.

The bulk of a bank's portfolio — loans, commercial paper, standby letters of credit backing industrial development bonds, and so forth — would be included in the "standard risk" category. That category would be weighted at 100% of the current requirement.

Some off-balance-sheet activities, such as futures, options, and interest rate swaps, are not included in the plan.

Many industry officials applauded the Fed's decision to keep the categories broad, rather than becoming embroiled in the administrative nightmare of distinguishing between the quality of individual assets within those categories.

However, even this approach already is raising a host of questions and disagreements. As William J. Bosies, the ABA's director of federal agency relations, put it: "How can they put gilt-edged commercial paper and loans to Brazil in the same category?"

Side Effects of 6% Rule

Experts don't expect to see many banks rushing to the capital markets in anticipation of a new risk-based capital plan. Mr. Sweet said the guidelines "are not so much intended to force an increase in capital. I think the Fed is reacting to the artificial incentives created by the other rule." Mr. Sweet was referring to the 6% across-the-board requirement adopted by the regulators early last year.

After that requirement was adopted, federal regulators complained that banks were selling off their most liquid assets in an effort to lower the amount of capital they had to have on hand. "We've seen a lot of the troubled institutions attempting to meet that standard by lowering their levels of liquid assets just at a time when they couldn't afford to," Mr. Sweet said.

In addition, regulators also have blamed that standard, in part, for increasing the attractiveness of off-balance-sheet activities to keep their capital requirements to a minimum. But banks are also flocking to these activities, seeking new fee income and responding to the demand for new services by customers.

Mr. Cates faulted the Fed plan for being forwarded as a supplement to existing requirements. "The government is not relaxing the 6% capital-to-assets ratio," he said. "It is creating a hybrid. You have to meet the old as well as the new — that's unfair. Banks ought to get more credit for a riskless balance sheet along with being charged" for risky activities.

Mr. Cates is particularly critical of the plan because it focuses on the risk associated with specific assets but does not take into account how well the bank is managing those risks. "The intrinsic risk differences in any product is less a factor than the management risk of those products," he said.

That problem could be remedied, Mr. Cates argued, if the Fed gave bank managers some authority over deciding which assets should be placed in each category of risk.

Mr. Volcker said that, in issuing the risk-based plan for public comment, the Fed was saying that "the general thrust of this is moving in the right direction." However, he acknowledged that the proposal leaves open a number of questions and "a lot of work needs to be done in terms of refining it."

Bankers and other interested individuals will have 90 days to comment on the proposal. ■

How a Risk-Based Capital Ratio Calculation Works

(Amounts in Dollars)

Risk Category Assets	Assets in category		Risk weights		Weighted risk
Cash and equivalent	$5,000	X	0	=	0
Money market risk	$35,000	X	.30	=	$10,500
Moderate risk	$30,000	X	.60	=	$18,000
Standard risk	$80,000	X	1.00	=	$80,000
Total risk assets (including $50,000 in off-balance sheet items)	**$150,000**				**$108,500**

Primary capital: $7,000
Primary capital to total assets ratio: $7,000 ÷ $100,000 = 7%

Risk-based capital ratio: $7,000 ÷ $108,500 = 6.5%

Strategic Dates

July 1, 1987

WASHINGTON INTERSTATE BANKING: A law which permits out-of-state banks to acquire Washington financial institutions that are at least three-years old, as long as the acquirer's home state has similar legislation, becomes effective.

Jefferies . . .

Continued from Page 3

ings performance. Jefferies is due to report its fourth-quarter earnings within two weeks, and Brenda Davis McCoy, a brokerage industry analyst for Mabon, Nugent & Co., estimates that it earned about 30 cents a share during the last three months of the year.

That would put its 1985 profits at about 85 cents share, she said, down dramatically from the $1.50 a share in 1984, when the entire industry suffered from depressed markets. To make matters worse, Jefferies was considered highly vulnerable to downward pressure on institutional commission rates since its bread-and-butter business is trading for institutional customers.

Last March, Ms. McCoy recommended that her clients sell their holdings in Jefferies because of the combination of difficulties facing the 23-year-old firm. This month, however, she issued a "buy" recommendation, contending that within the $15 range, Jefferies' stock "does not have much downside potential."

Others may also be leaning toward that conclusion. A. Michael Lipper, president of Lipper Analytical Securities Corp., said he viewed Jefferies as a firm with upward potential, partly because of its poor performance last year. He described it as "a very bright firm that was effectively dead in the water" in 1985.

A recent decision to shy away from the generally risky business of principal trading could help the firm steam ahead, according to Ms. McCoy. That decision reportedly coincided with the resignation of Ronald A. Alghini as president and chief operating officer of Jefferies Group Inc., the parent firm.

Jefferies, the 36th largest securities firm in the nation, was able to build its reputation as a market maker by efficiently matching buyers and sellers of a particular stock. And when necessary, the firm would build an inventory by purchasing shares for its own account, or trading as principal.

Analysts said that under Mr. Alghini's leadership, the firm had substantially increased its principal trading activities, with limited success. Jefferies boosted its inventories of government and corporate securities to $245 million at the end of September from the $115 million at the end of 1984.

While accumulating that inventory, the firm watched its principal trading profits decline from a high of $10.9 million in the first quarter of 1985, to $4.0 million in the second period, to a loss of $5.3 million in the third quarter, Ms. McCoy said. As a result of the third-quarter trading shortfall, Jefferies reported a loss of 29 cents a share for that period.

Ms. McCoy added that the firm's situation was aggravated by the fact that much of the inventories were financed by short-term borrowings, or call loans from commercial banks, which resulted in high interest expenses.

Boyd L. Jefferies, chairman and chief executive officer of the firm, said in a December announcement that Mr. Alghini was quitting "to pursue other business interests." According to one source, he is interested in setting up his own arbitrage operation, possibly in Chicago.

Such a prospect, according to Ms. McCoy, represents a potential threat to Jefferies. If Mr. Alghini does decide to open his own firm in Chicago, Ms. McCoy said she anticipates that he will hire professionals from Jefferies' Chicago office. But she said she did not expect "a mass exodus."

Mr. Jefferies declined to comment. Mr. Alghini could not be reached for comment.

Based on the recent reorganization, Ms. McCoy estimated that Jefferies would earn between $1.40 and $1.60 a share next year. She said future earnings would be supplemented by "the increasing presence and profitability of the firm's London office."

Her bullishness was also based on the fact that the institutional rate war of last year had subsided and that Jefferies would consider entering new businesses, such as convertible bond trading.

She and others are also encouraged by the Jefferies board deciding last month to purchase, from time to time, up to one million of the eight million outstanding common shares, or the equivalent amount of its 8.5% convertible debentures. That, she said, "should help to limit the downside risk in the stock."

Among those attracted to Jefferies' stock is American Can Co., which recently agreed to increase its stake in the brokerage firm to 20%, from a 9.8% share. But Gerald Tsai Jr., chairman of American Can, told the *American Banker* last month that his company had no intention of increasing its Jefferies holdings beyond 20%.

Money Market Mutual Funds

January 14, 1986

The table below presents certain statistics as of the date indicated for money market mutual funds whose shares are held largely in trust accounts. The information includes the full size in millions of dollars, average portfolio maturity, percent of portfolio due in seven days or less, and the rates of total return for the preceding seven and 30 days. The table is compiled by Irene Appelbaum.

MARKETING TODAY

The Monitor: Credit card players should be intrigued by a new study that finds the U.S. restaurant industry growing at a fast pace............... 6

NEWS ABOUT THRIFTS

Changes in Ansonia: A name change and a stock offering have reshaped what is now known as Great Country Bank in Ansonia, Conn........... 10

Shoreline Suit: Shoreline Savings Bank, Seattle, is eager to settle out of court a lawsuit against it resulting from the bankruptcy of a major customer, and it may look to its former officers to recover funds............. 11

Streak Ended: Coronado Federal Savings and Loan Association, Kansas City, Kan., ended a losing streak... 11

Super Bowl CD: For Skokie (Ill.) Federal Savings & Loan Association, the 36-point margin of victory for the Chicago Bears means that the thrift will pay "Super Bowl CD" account holders a rate of 8.61%.............. 33

CALIFORNIA: The state Legislature is considering two opposing interstate banking bills........................... 14

NEW YORK: Lawmakers are considering reimposing a credit card interest rate ceiling................................ 14

CONIFER ACQUISITION: Patriot Bancorp Inc., a bank holding company based in Boston, has accepted a takeover offer from the Conifer Group Inc. of Worcester, Mass... 32

Random Thoughts

By SANFORD ROSE

The nationwide growth in commercial and industrial loan volume was reasonably anemic in the second half of 1985. It will be even more disappointing in the first half of this year, suggests Chris Snyder, president of Loan Pricing Corp., a Manhattan-based financial publishing firm.

Aggregate commercial loan volume grew by 3.3% from July through December 1985. The consensus of lending officers is that volume will expand by a tad less than 3% from January through June of this year.

Money center banks did worse than the average, actually experiencing a 2% decline in commercial loan volume in the last half of 1985. They expect an even poorer performance (minus 2.3%) in the first half of this year. By contrast, small banks did better than the average. They saw growth increase by 5.6% in the relevant period last year. Growth is expected to continue above average in first-half 1986, but the rate is likely to taper off to only 5%.

➸ Random Thoughts: Page 4

Fed Says 11% of Banks Plan to Seek Maximum Daylight Overdraft Caps

By TOM FERRIS

NEW YORK — About 11% of participating commercial banks have indicated they plan to file for the maximum intraday overdraft cap permitted under an impending Federal Reserve Board program to reduce risk in the payment system, according to data released by the agency on Monday.

The Fed had hinted that if more than 10% to 15% of banks in each peer group sought the highest "daylight overdraft" limit, it would be a signal that the banking industry was not taking the voluntary risk-reduction effort seriously.

The implied threat has been that if banks could not police themselves, the Fed would step in and impose limits on the overdrafts institutions could run up while transferring funds during the day.

But while the aggregated data seemed to fall within the Fed's expectations, statistics on individual peer groups were not released. Of particular interest is what percentage of the largest banks — which dominate the wire-transfer business and run the biggest overdrafts — are seeking the highest overdraft cap. Federal Reserve officials could not be reached for comment.

Daylight Overdraft Caps at Top 50, Page 12

Banks must file their official caps by the end of February, and they are free to change their preliminary ratings, which were due last month. The Fed said "we have reason to believe that some of these caps will be lowered." The program takes effect on March 27.

Altogether, 2,210 financial insitutions have filed preliminary caps, according to a letter sent to the House Banking subcommittee on domestic monetary policy, which oversees the Federal Reserve. That represents 43% of all institutions that incurred "daylight overdrafts" during two weeks in

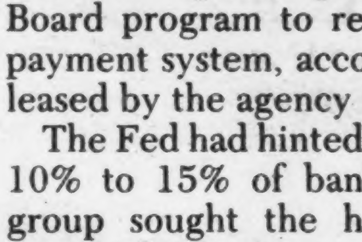
Citibank Opens for Business in Utah

By JAY ROSENSTEIN
and LAURA GROSS

New York's giant Citicorp, taking advantage of a new Utah law and the closing on Friday of a small Salt Lake City bank, has expanded its growing presence in the western region of the United States.



Interstate Banking

Citibank (Utah), a newly chartered subsidiary of Citicorp, opened for business on Monday after assuming the deposits and many of the assets of the failed $33.4 million-deposit Utah First Bank.

The New York holding company already has a presence in the state through Citicorp Person-to-Person Financial of Utah, the largest of six federally insured industrial loan corporations in the state. This unit had $175 million in deposits as of the end of September, but it is limited by rules to savings deposits and certificates from Utah customers. The new commercial bank subsidiary now enables Citicorp to offer transaction accounts and perform commercial services in the state.

Observers interviewed on Monday said the move is one more step in the direction of nationwide banking by Citicorp. The holding company's drive has already been exhibited through interstate acquisitions of problem thrift institutions in California, Florida, and Illinois.

"I think it's an indication of Citi's desire to be in every banking market it can" through whatever opportunities, said Brent B. Erensel, a senior banking analyst for New York's Dean Witter Reynolds Inc. That is especially true, he said, because many regional interstate compacts limit the presence of New York institutions. He pointed out that similar strategies can be found at

High Court Throws Out US Trust Ruling

Lower Court Is Overruled On Legality of Nonbanks

By BARTLETT NAYLOR

WASHINGTON — The Supreme Court on Monday threw out a lower-court decision in U.S. Trust v. the Federal Reserve Board that has stymied the progress of limited-service banks.

Industry executives were split, however, in assessing the immediate impact of the decision.

Said industry consultant Karen Shaw, "That's the ball game; the fat lady is now singing" in the long-fought contest over the limited-service facilities, frequently called nonbank banks.

But Julius Loeser, an attorney with First Interstate Bancorp, which is applying for 12 nonbank facilities, noted, "There are still a lot of clouds hanging over us."

Monday's decision in the U.S. Trust case affirms the legitimacy of nonbank banks, which have been described as "loophole" institutions that escape prohibitions that apply to traditional banks on interstate expansion and on ownership by nonbanking firms such as Sears, Roebuck and Co.

This means many of the nation's largest banks, and other giant firms such as Merrill Lynch & Co., are now one step closer to sprawling across state borders long closed to interstate banking. Nearly 280 applications by the nation's largest banks are awaiting final approval by the Office of the Comptroller of the Currency, the chartering agency for national banks.

"It is clear that the highest authorities believe there never was a loophole to begin with, as some have contended," said Frank Salinger, general counsel for the American Financial Services Association, a trade group involved in

11% of Banks to Seek Maximum Daylight Overdraft Caps

Continued from Page 1

December monitored by the agency. The remaining 2,937 institutions "are small and they either may be opting not to incur overdrafts when the policy becomes effective or simply may be been tardy in providing caps," the Fed said.

Of those institutions filing preliminary caps, 1,890 were commercial banks, 126 were savings and loans, 12 were Edge Act banks, 70 were agencies and branches of foreign banks, 23 were federal savings banks, 32 were mutual savings banks and 57 fell into other categories.

Among the commercial banks, 11% filed for the "high" cap, 30% for the "above average" cap, 39% for the "average" cap, and 20% for the lowest category — "no cap," which means no overdrafts can be incurred.

Program Prompted by Concern

The Fed's risk-reduction program was prompted by concern about the large overdrafts many banks run daily while transferring funds. Some big banks send out large payments — in a few cases adding up to billions of dollars — early in the day when they technically do not have the funds available to cover the transactions.

When these payments are made over the government's Fed Wire network, the result is an overdrawn reserve account. Such payments over a private system, like the New York Clearing House's CHIPS network, leave an institution in large net-debit positions with other banks.

The deficits stem largely from the pattern of wire-transfer traffic. For example, banks typically return federal fund borrowings early in the morning, overdrawing their Fed accounts. As anticipated incoming payments arrive and as overnight money is purchased again later in the day, the deficits are funded.

On an average day, about 1,700 banks routinely go into the red by the staggering total of $110 billion, and then just as routinely cover their positions by the close of business.

However, the Fed is worried about the potential ramifications of the sudden failure of a bank with a large net-debit position. That could leave the Fed with a huge liability or possibly spark the failure of other institutions that are expecting to receive funds from the failed bank when the day's transactions are settled. Such a chain reaction might disrupt the financial markets and the nation's economy.

Nevertheless, the overdrafts cannot simply be outlawed because they act as the grease that allows the high-dollar-value funds-transfer networks to operate smoothly. This flexibility enables these networks to efficiently process $650 billion in payments daily.

The central bank has tried to balance the need for operational efficiency with its desire to curb payment-system risk. The Fed initially had suggested that bank regulators impose overdraft limits — called "sender net-debit caps" — on individual institutions. But the banking industry balked at the idea, pushing instead for banks to be allowed to voluntarily set their own caps. The Fed relented, but warned that the "failure to take the [voluntary] guidelines and procedures seriously" could lead to "the adoption of regulations designed to impose explicit limits on daylight credit exposure."

Under the program the agency did adopt, banks are evaluating themselves according to the strength of their creditworthiness, operational controls, and credit policies.

The self-evaluation, based on detailed criteria supplied by the central bank, results in one of four ratings: high cap, above average cap, average cap, or no cap. The higher the rating, the higher the daylight overdraft an institution can run. The cap is measured as a multiple of adjusted primary capital.

While the program is voluntary, banks with any significant wire-transfer volume virtually have to comply, according to industry experts. Failure to conduct a self-assessment means an automatic rating of "no cap," which would bar an institution from running any overdrafts on Fed Wire, the nation's primary funds-transfer mechanism.

Experts say the new policy could have far-reaching implications, affecting transaction-processing operations, competitive positioning, corporate customers, and even bank credit

➤➤ Caps: Page 39

Overdraft Cap Table Explained

The Federal Reserve Board, concerned about the huge overdrafts banks run up during the day while transferring funds, will implement a program on March 27 designed to curb the practice. To comply, thousands of banks have to evaluate themselves to determine the level of "daylight overdrafts" they can incur.

The self-assessment is based on the strength of an institution's creditworthiness, operational controls, and credit policies. There are four possible ratings: high cap, above average cap, average cap, and no cap.

The table on page 12 shows possible overdraft levels for the 50 largest banks, based on capital levels as of last June 30.

A bank with a "high" cap can incur a daylight overdraft of up to three times its adjusted primary capital on any day. Over two weeks, its average daily maximum overdraft cannot exceed two times its capital.

A lower rating results in a lower permissible overdraft level. An institution with an "above average" limit can run a deficit of up to 2.5 times its capital on any day and 1.5 times capital over two weeks.

An "average" rating means overdrafts of up to 1.5 times capital are permissible on any day. Over two weeks, deficits cannot average more than the equivalent of a bank's capital.

If an institution has the lowest rating — "no cap" — it cannot run any overdrafts.

For example, if Mellon Bank were to have a "high cap," it could incur an overdraft of up to $4.47 billion on any single day or a daily average of $2.98 billion over two weeks. But if Mellon's cap were "average," its permissible overdraft level would be much smaller — $2.23 billion on one day or $1.49 billion over two weeks. With a "no cap" rating, any of the banks would be forbidden from running overdrafts.

Goldman Sachs offers money funds dedicated to banks and trust companies.

Goldman Sachs offers Institutional Liquid Assets (ILA) and Institutional Tax-Exempt Assets (ITA), designed for banks and trust companies, large and small. When appropriate, revenue opportunities are available for banks who participate in administering Goldman Sachs managed funds through Asset Management Portfolios (AMP) and Exempt Assets Portfolios (EAP).

ILA and ITA, together with AMP and EAP, provide a full range of money funds tailored to the needs of banks and trust companies. All of these funds are managed by and offered exclusively through Goldman Sachs.

Realtor, Banker Sentenced to Prison In Ohio Inflated Mortgage Scheme

Special to the American Banker

CINCINNATI — A local realtor has been sentenced to 10 years in prison for running a $1 million scheme in which he inflated the values of homes to get larger mortgages, then converted those funds to personal use. The former president of an Ohio thrift was sentenced to five years for participating in the scheme.

Robert W. Porter, president of the now-defunct M&M Realty of Sharonville, a Cincinnati suburb, pleaded guilty to charges of conspiracy, bank fraud, and mail fraud. He also faces trial in March for his alleged involvement in a fraudulent loan scheme that led to the collapse of the Sparta-Sanders Bank in Warsaw, Ky., where he was a vice president.

Thomas Finch, who had been president of Buckeye Savings & Loan Co. in Bellaire, Ohio, pleaded guilty to conspiracy, mail fraud, and taking kickbacks totaling $30,000 for approving mortgages in which the values of the homes had been inflated or other false information given.

Also receiving prison sentences in the case were Mr. Porter's wife, Judith, his sister, Elaine Oney, and four other employees of M&M or related companies. Two others received probation.

The original indictment listed 13 banks, thrifts, and mortgage lenders as victims of the scheme. They are: Buckeye Savings and Loan; State Savings Bank, Dublin, Ohio; Merchants & Mechanics Federal Savings & Loan Association, Springfield, Ohio; Security Savings Mortgage Corp., North Canton, Ohio; Freedom Federal Savings & Loan Association, Columbus; Cumberland Federal Savings & Loan Association, Louisville, Ky.; Lincoln Financial Corp., Clearwater, Fla.; Transohio Savings Bank, Cleveland; Tower Federal Savings & Loan Association, South Bend, Ind.; Standard Federal Savings & Loan Association, Gaithersburg, Md.; First Federal Savings & Loan Association, Cincinnati; St. Joseph Mortgage Co., South Bend, Ind.; and Goldome Realty Credit Corp., Rockville, Md.

Federal Judge S. Arthur Spiegel said Buckeye had lost $169,000 because of the scheme, and could lose $127,000 more.

Standard Federal has sued one title insurance company, American Realty Title Assurance Co., of Columbus, Ohio, to make good on claims. Judge Spiegel said American Realty has lost more than $500,000, and is pursuing an involuntary bankruptcy action against M&M.

Another title insurance company, American Title Insurance Co., Miami, Fla., expects losses of at least $483,170 in the case, and could lose as much as $750,000 including legal fees, Judge Spiegel said.

M&M is accused of running a number of schemes, and Judge Spiegel said the number of victims and actual losses may never be known.

The FBI and postal inspectors spent 18 months investigating the case before indictments were handed up in July. The indictments said Mr. Porter and others embezzled $1 million held in escrow for home buyers and sellers.

As the embezzlement continued, new escrow funds were used to repay funds taken from older escrow accounts. As more money was diverted into older escrow accounts for personal use, more new money was needed.

The indictments listed several methods of obtaining money. In one, "the defendants ... purchased numerous homes at sheriff's sales at distressed prices, they then recruited home buyers to buy the properties ... processed their loans and closed the transactions, thus coming into possession of escrow funds," according to the indictment.

In cases where buyers would not qualify for loans, M&M gave false information on loan applications. It also overstated property values to obtain larger mortgages, according to the indictment.

M&M also recruited "pinch hitters," as Assistant U.S. Attorney Patrick Hanley called them. These investors, for $1,000, unknowingly gave their names and credit to M&M to obtain inflated mortgages on houses bought at a sheriff's sale. M&M would then sell the houses with the inflated mortgages to the investors. A mortgage would be obtained for an amount greater than the house's market value, and M&M would keep the difference.

M&M promised to manage the properties, renting them out, paying the rent to the investor, and splitting the profits. But with M&M gone — it went out of business in February — the investors now find themselves responsible for the mortgages.

"They were all ignorant, in my opinion," said Jeff Bakst, an attorney for three parties suing M&M. "Some people had long relationships with M&M, and some were personal friends" of employees. "Some felt the practices were not kosher, but they were working with a reputable name." ■

Hawkeye's Sale of Mortgage Unit Is More Complicated Than it Looked

By LISABETH WEINER

CHICAGO — The sale by Hawkeye Bancorp., Des Moines, of its mortgage company has turned out to be a little more complicated than just a straight sale.

According to senior vice president Stephan L. Jones, the sale of Hawkeye Bancorporation Mortgage Co. to the division's own top management was for $9 million in interest-bearing notes rather the cash. Terms of the agreement call for payment of $4 million in cash due June 30, 1986, and the balance due over a 12-year period. Mr. Jones said the notes are bearing interest at market rates.

But that's not all.

Hawkeye, which lost $15 million in the first nine months of 1985 due to the teetering Iowa agricultural situation and has said it would lose another $15 million in the fourth quarter, has retained an option on the mortgage company to try to sell it to a third party in order to get cash now for the unit.

Mr. Jones said that under the option Hawkeye could "cause the buyer to sell the mortgage company to a third party prior to July 1, 1986, in which case Hawkeye would be entitled to receive up to $9 million, although it could be less."

Mr. Jones said it is possible that Hawkeye might have to settle for something less than $9 million in order to get hard cash. He added that Hawkeye is currently making efforts to try and find another buyer. If that is unsuccessful within the given time frame, it will go ahead with the sale of the mortgage company as planned.

Hawkeye has said in the past that it is suffering from something of a cash-flow squeeze. Thus getting its hands on cash now has a real priority. As it is, even the sale of the mortgage company for notes has freed up $15 million that Hawkeye was using to temporarily fund the mortgage company. That $15 million is being downstreamed to its banks in order to keep them well capitalized.

Hawkeye is currently negotiating with a group of its creditors for some type of relief on about $100 million in short-term and long-term debt. The debt is between the parent company and the lenders and does not involve the 36 individual banks in the Hawkeye system. The bank holding company has insisted that despite the overwhelming problems that it faces, the banks themselves have an average primary capital ratio of more than 8%. ■

South Africa Divestment Measure Passes Again In New York Assembly

Special to the American Banker

ALBANY, N.Y. — The New York State Assembly has passed for the third time a bill to force the state to divest itself of financial interest in companies that conduct business with South Africa.

The measure passed by a 102-to-34 vote last week and will be sent to the Senate, where it is expected to die. The bill has come before the Assembly during the regular session and in the special December session, passing both times.

The divestment program would require that funds of the Common Retirement Fund, the Teachers' Retirement Fund, and the State University of New York be removed from companies doing business in South Africa. It also requires that no new funds shall be invested in any of these corporations or in any bank or financial institution making loans or providing services to the South African government. In addition, the state would be precluded from obtaining goods having their origin in the Republic of South Africa or from any business providing goods to that government.

Charles Dumas, spokesman for Senate Majority Leader Warren Anderson, R-Binghamton, said: "Nothing has changed since the Assembly passed the bill last month.

"The state comptroller has not changed his position that this policy, if adopted, could be dangerous to the fiscal health of the pension fund and ultimately could cost the taxpayers millions of dollars. We continue to support the comptroller, who was elected to make this sort of decision." ■

Caps . . .

Continued from Page 13

ratings.

Institutions that measure up poorly to the Fed's evaluation criteria could have their processing flexibility limited and lose business. Some corporations are worried that they may not be able to wire out deposited funds if a bank has reached its cap.

On the other hand, banks that find themselves in favorable positions — perhaps because they are net sellers of federal funds, because they have a relatively large capital base, or simply because they are well-run institutions — may be tempted to publicize that fact to attract business, despite the fact that the Fed is urging all institutions to keep their caps a secret.

But the Fed has emphasized the initial overdraft limits have been made relatively lax initially to keep disruption of the payment system at a minimum. There had been fears that rigid limits would force institutions to delay making payments until incoming transactions arrived, setting up the possibility of a payment-system "gridlock."

A survey released last week by the Bank Administration Institute showed that the program should have only minimal impact on the processing operations of the nation's largest banks. Twenty-one of 30 surveyed banks said overdraft caps would limit their operations "never or almost never." Seven expected "occasional" problems, while two foresaw difficulties "all the time or almost all the time." The impact in all cases should be limited to short processing delays and not be perceptible to corporate customers, the trade group's survey found.

Banks examiners will review the self-determined ratings to insure that "the institution has seriously and diligently applied the guidelines, that the underlying analysis and methodology were reasonable, and that the resultant self-evaluation was generally not inconsistent" with the regular examination report, the Fed said.

But while changes in the rating can be urged, "it should be emphasized that the examiner cannot require a modification of the self-evaluation cap category unless the level of daylight credit used by the institution constitutes an unsafe or unsound banking practice," the central bank said. ■

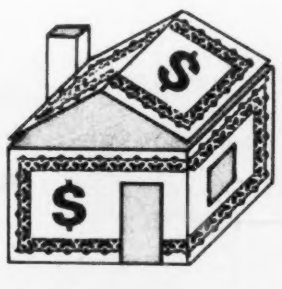
AN AMERICAN BANKER SPECIAL REPORT

Mortgage Securities Gaining at Banks, S&Ls

Some Banks Report Significant Holdings

By DAVID LaGESSE

NEW YORK — Commercial banks remain a relatively small player in the world of mortgage security investments, but a few banks have made significant investments in securities backed by home loans.



Mortgage Securities

Hibernia National Bank of New Orleans, for example, holds nearly 20% of its portfolio in mortgage-related securities, according to a statistical study prepared by *American Banker* from federal regulatory filings. The regulatory data include all mortgage-related securities — those insured by federally sponsored agencies, such as the Federal Home Loan Mortgage Corp., or Freddie Mac, as well privately insured mortgage securities.

Other banks with large percentages of assets in mortgage securities include Hibernia National Bank, San Francisco,

11.2% of Assets at Top 50 Thrift Institutions

By IRENE APPELBAUM

NEW YORK — Mortgage securities remained a popular investment with thrifts last year, and could become even more popular in the coming months, industry officials say.

Bank and Thrift Mortgage Security Holdings Tables, Page 22, 23

Holdings of mortgage-backed pass-through securities increased slightly as a percentage of assets at midyear 1985 over the year before among the top 50 thrift investors, according to a statistical survey prepared by the *American Banker*. The 50 thrifts had an overall ratio of mortgage-backed securities to assets of 11.2% as of June 30, 1985, compared with 10.1% for the previous year.

The holdings, as reported to the Federal Savings and Loan Insurance Corp., include government-insured and conventional mortgage securities.

Among the top 10 thrift investors in mortgage securities,

Fed's Idea of Limiting Clearing House Payments Draws Fire

By TOM FERRIS

NEW YORK — The banking industry is voicing strong opposition to a suggestion by the Federal Reserve Board to limit the size and types of payments eligible for the automated clearing house payment network.

While general acknowledgment was expressed on the need to identify and control the operational and credit risks inherent in the fledgling system, most of the 95 written comments filed last fall termed the proposal to limit payments premature and counterproductive.

Instead of reducing risk, transaction restrictions in most cases would result only in transferring exposure by driving large electronic payments back to the check-collection system, many of the respondents maintained.

"We oppose constraints or limits of any kind on the types or size of transactions that may be handled," said Bank of America, echoing the sentiments of most banks, associations, and corporations commenting on several risk-reduction ideas suggested by the agency.

Even though the number of large-dollar-value payments processed over the network is increasing, such transactions still represent a tiny amount of the clearing house's traffic, these respondents pointed out, arguing that the imposition of strict risk controls would stunt the growth of the maturing network and drive up transaction processing fees.

However, most said they shared the Fed's concern on the need to study clearing-house risk. The respondents also expressed widespread support for one Fed strategy, in which the network's credit and debit transactions are charged to an institution's reserve account at the start of business daily.

This approach brings these electronic payments under a Fed program to limit intraday bank overdrafts stemming from wire transfers. Last May, the Federal Reserve Board instructed banks to establish overdraft caps by the end of February. The program takes effect on March 27.

The policy was prompted by fear about the massive deficits — amounting to as much as $120 billion — that banks routinely run up during the day while transferring funds. Although the overdrafts are covered by the close of business, the Fed is worried about the potential ramifications of the sudden failure of a bank with a large net-debit position.

The policy is aimed at the large-dollar wire networks that move more than

Hawkeye Losses Exceed Expectations

By LISABETH WEINER

Fourth-Quarter Earnings

CHICAGO — Hawkeye Bancorp. on Wednesday reported a fourth-quarter loss of $21.9 million and a 1985 loss of $36.9 million — both greater than the company had projected even as recently as two and a half weeks ago.

The fourth-quarter loss, which equaled $3.51 a share, compared with a loss of $3 million, or 56 cents a share, in the comparable 1984 period. For all of 1984, Hawkeye reported a profit of $917,000. Hawkeye had projected a $15 million loss for the quarter and a $30 million loss for the year.

The Des Moines-based company, whose fortunes have deteriorated in tandem with the farm economy, attributed the deficit to an increase in its loan-loss provision. For the fourth quarter, the provision rose to $20.8 million from $6.8 million a year earlier. For all of 1985 the provision for loan losses charged to earnings was $55.4 million, compared with $20.7 million in 1984.

In addition, Hawkeye, which is trying to renegotiate about $100 million in short-and long-term debt, said it is not in compliance with the provisions of various debt agreements. And its auditors, Deloitte, Haskins & Sells, have advised the company that it will issue a qualified opinion on the 1985 financial statement "because of the uncertainties regarding, among other things, the restructuring of this debt and thus the ability of the company to continue as a going concern."

Hawkeye reported that the allowance for loan losses as a percentage of loans at the end of the year rose to 3.03%, or $29.8 million, from 1.41%, or $15.1 million, in 1984. Net charge-offs were $41 million, or 3.81% of average loans, in 1985, compared with $17 million in 1984. Of the $41 mil-

Neighborhood Group, Fidelity Bank Agree on Innovative Financing Plan

By A. JOSEPH NEWMAN JR.

PHILADELPHIA — Under an innovative agreement with a coalition of neighborhood groups, Fidelity Bank, a unit of the $6.8 billion-asset Fidelcor Inc., said it will consider "sweat equity" as part of the down payment for mortgage loans.

Under the plan, mortgage applicants would have to be certified by the group that they are qualified to do the specified work on the house, and submit an estimate of how much the work would add to the value of the house.

After the agreement was reached, the neighborhood group — ACORN, for Association of Community Organizations for Reform Now — dropped a plan to protest the proposed acquisition by Fidelcor of the $2.1 billion-asset IVB Financial Corp., parent of Industrial Valley Bank and Trust Co.

However, another coalition of community groups — Eastern North Philadelphia Initiative — said it will continue to challenge the acquisition, charging both banks with "dismal failure" to meet neighborhood credit needs under the Community Reinvestment Act. It has protested to the Federal Reserve.

As part of its agreement with ACORN, Fidelity also agreed to make mortgage loans, up to 80% of the value of the property, in blocks where more than 15% of the homes have been abandoned. ■

Thrifts Hold More Mortgage Securities

Continued from Page 1

however, six institutions had decreases in their proportional investment in mortgage-backed pass-through securities.

At two thrifts — Guardian Savings and Loan Association in Dallas and Franklin Savings Association in Ottawa, Kan. — mortgage-backed securities accounted for at least 85% of assets. At a third, Benj. Franklin Federal Savings & Loan Association in Portland, Ore., they accounted for 40%.

Not surprisingly, American Savings and Loan Association of Los Angeles, the nation's largest thrift in terms of total assets, heads the list of largest holders of mortgage-backed pass-through securities with $6.4 billion as of June 30, 1985.

American held more mortgage securities than the combined holdings of the second- and third-ranked thrifts — First Federal of Michigan in Detroit had $3.2 billion in mortgage-backed pass-through securities, and Home Savings of America in Los Angeles reported $2.4 billion.

American, though, also showed the largest decrease in holdings of mortgage-backed securities among the top 50 thrift investors — down $709 million from its June 30, 1984, figure of $7.1 billion. American also showed a $3.6 billion reduction in its total assets during this same period, down to $27.7 billion from $31.3 billion in 1984.

At nearly every other of the ranked thrifts, a reduction in their holdings of mortgage-backed securities was accompanied by an increase in the thrift's

Mortgage Bonds Are Big Holding For Some Banks

Continued from Page 1

with nearly 17% of its assets in mortgage securities — and the securities comprising more than 14% of the assets of First Pennsylvania Bank, Philadelphia, and First Union National Bank, Charlotte, N.C.

In whole dollars as of midyear 1985, Bank of America had more than $1 billion, nearly double the investment in mortgage securities of the second ranked bank, First Pennsylvania, with some $658 million of the securities.

A few banks showed a sprinkling of privately insured mortgage securities, led by First Peoples Bank of New Jersey, Haddon Township. First Peoples reported some $80 million in privately insured securities, compared with some $3.3 million in government-insured securities, at midyear 1985. Total mortgage security investments at First Peoples comprised about 7% of assets at that time.

Ironically, Bank of America reported no holdings of privately insured mortgage securities — though the bank suffered losses of nearly $100 million in late 1984 from a scandal that involved privately insured securities. The bank, however, had acted as trustee for those securities, and not as an investor.

Banks could increase their investments in mortgage securities if Wall Street and mortgage lenders were better able to structure short-term securities from the traditional 30-year mortgage. "Right now, mortgage securities are usually too long an investment for most bank portfolios," said David Andrukonis, an economist with Freddie Mac.

Some interest may be generated by the trend among consumers toward shorter-term mortgages, such as the 15-year loan that became very popular in 1985. "A lot of those have been put into securities and are selling quickly," said Judy Hustick, an analyst with Salomon Brothers Inc.

Mortgage securities that are backed by 15-year loans, though, have thus far proven most popular with life insurance companies, she added.

"It will be hard to get banks much more involved in mortgage investments — it's just the traditional strength of thrifts and others," said Mr. Andrukonis. ■

Strategic Dates

July 1, 1987

RHODE ISLAND TRIGGER: Rhode Island's General Assembly set the effective date for the state's nationwide interstate banking trigger for today.

Bank of North Dakota Reports Record Profits

Special to the American Banker

BISMARCK, N.D. — The Bank of North Dakota, the nation's only state-run bank, set a new profit record in 1985 by posting net operating earnings of over $12 million.

H.L. Thorndahl, the bank's president, said profit represented a 29% increase over 1984's earnings of $9.3 million.

He attributed the profits to declining interest rates, which means that "money does not cost as much."

He said that $7 million of the profits will be turned over to the state treasury in quarterly payments.

At yearend the total resources of the bank were at $987 million, and on Jan. 2 they went over $1 billion, Mr. Thorndahl said.

Loan losses in 1985 were $8.3 million, down from the previous year. Mr. Thorndahl said most of the losses were from agribusiness, and the bank expects substantial recoveries on these loans.

The bank also posted two other records: $58.8 million in capital accounts and $6.4 million in loan-loss reserves in 1985. Mr. Thorndahl said that deposits were $631.2 million, up over 1984's figure of $590 million.

He expects the bank will still be faced with "some problem loans" this year, but none so bad as during the last two years. ■

Thrifts Show Gains in Mortgage Securities

Continued from Page 22

total assets. American's experience can likely be attributed to its program of shrinking assets, which began in 1984 when the thrift suffered a deposit drain and failed to meet a yearend capital requirement of the Federal Home Loan Bank Board.

First Federal of Michigan, number two on the list, showed a slight decrease in holdings over the previous year. Instead of indicating the beginning of a trend away from long-term mortgage-backed securities, the decline in holdings indicates a leveling of aggressive asset growth during the previous five years, according to a spokesman for First Federal.

Part of a business program started five years ago, heavy investment in mortgage-backed securities was viewed as the only way to "let the old portfolio unwind itself" while still generating a profit for the company, said C. Gene Harling, First Federal's chief financial officer. "It's not just a matter of locking into a positive spread and increasing earnings per share."

During the last year, many thrifts were selling their mortgage investments because interest rates had fallen enough to make them profitable, said Judy Hustic, a research analyst with Salomon Brothers Inc.

Mortgage-backed securities could become an even more popular investment among thrifts if legislation introduced by Sen. Alan Cranston, D-Calif., and Sen. John Chaffee, R-R.I., becomes law.

The legislation would permit more flexibility in structuring the terms of mortgage securities, much as Wall Street has tried to do with the advent of collateralized mortgage obligations. The changes would enable lenders to sell shorter-term mortgage securities than are available under current laws, and make them more attractive investments for thrifts, among other institutions, said Peter Knight, director of mortgage finance for the the National Council of Savings Institutions.

But after a number of cases of alleged fraud surfaced in 1985, Gerald J. Levy, chairman of the U.S. League of Savings Institutions, said that thrifts must use more caution in buying and selling mortgage assets. Mr. Levy is president of Guaranty Savings & Loan Association, Milwaukee.

In terms of geographic representation among the 50 largest thrifts, California leads the country with 14, including six in the top 10. Texas had six of the top 50. As a group, Texas thrifts increased their total holdings of mortgage-backed pass-through securities by 85%, compared with almost no change among California thrifts. This is partly due to American Savings and Loan's large reduction in holdings. ■

Bankers Cautious on Fed Capital Guidelines

Money Center Banks, Likely to Be Most Affected, Raise Questions as to Timing and Methods

By JOHN P. FORDE

NEW YORK — The Federal Reserve Board's guidelines for risk-related capital may be a step in the right direction, say some in the banking industry, but many bankers are withholding judgment until the impact of the rules on their institutions is clearer.

Large money center banks, likely to be the hardest hit if the rules are adopted, have the greatest uncertainty about them.

John McGillicuddy, chairman of the Manufacturers Hanover Corp. here, said in a recent interview that the proposed guidelines come "at a time when the banking industry, and especially the major multinational banks, have made a dramatic turn on capital positions."

This increase in capital, he said, "came with pain for us," and it was done "at the expense of our shareholders." However, he complained, "all this gets lost in the translation when the guy on the street picks up his paper and sees the regulators are calling for more capital."

The Federal Reserve's capital plan places bank assets in four categories of risk, ranging from cash and U.S. securities at the lowest end to loans and commercial paper at the highest.

The Fed's plan was offered for comment on Jan. 15. Similar plans are to be proposed soon by the Comptroller of the Currency and the Federal Deposit Insurance Corp. The Fed's plan applies to state-chartered member banks and bank holding companies, and it is meant to be used in addition to the current capital plan, which mandates a 6% primary-capital-to-assets ratio for the nation's largest banking firms.

Text of Fed's Risk-Based Capital Guidelines Proposal, Page 10

An important factor is that this weight would be based on the type of asset, not on the quality. Therefore, said a Fed official, banks would not be penalized for risky loans.

Once the weighted figure of risk was computed, the regulator would divide banks with more than $1 billion in assets into three zones, depending on portfolio risk, to determine

Big Regionals Show Their Muscle in Market Capitalization

By BART FRAUST

NEW YORK — SunTrust Banks Inc. of Atlanta may rank 24th in terms of assets, but it ranks 10th in the hearts and minds of investors.

BankAmerica Corp. in San Francisco may be number two in assets, but to the market, it's just number five and dropping.

Citicorp, though, is largest either way you look at it.

The principal gauge of how investors feel about a company is its market capitalization, the number of common shares outstanding multiplied by the market price at a given time.

And there is no better indicator of the growing power of the "superregionals," large regional bank holding companies that have built extensive interstate banking systems within the last year, than market capitalization.

For example, at yearend just $17 million in market capitalization separated SunTrust, one of the new superregionals, from Manufacturers Hanover Corp., a money-center institution.

"To the institutional investor interested in taking sizable positions but concerned with maintaining liquidity, it is the most relevant measure of a company's size," said analyst David S. Berry in a recent research report for Keefe, Bruyette & Woods Inc., a New York investment banking firm.

Top 50 Market Capitalization Table, Page 46

Market capitalization also can ensure that a company can grow bigger. According to William Weaver, a vice president for First Boston Corp., market capitalization is a key element in determining a company's price/earnings ratio. And the higher the company's P-E ratio, the more able it will be to make acquisitions.

Also, as most bank acquisitions are done at slight premiums to the seller's market capitalization, a high market capitalization makes it more likely that a company will survive the current bank merger wave.

"In an environment of deregulation, the rich get richer — and richness is measured by market capitalization," said Bradford M. Johnson, senior vice president for Johnson Lane Space Smith & Co., an Atlanta-based investment banking firm. "Market capitalization is the single best indicator of raw economic power."

Mr. Johnson believes that money-center banking companies are in "a race against time" in which the superregionals may grow so fast in terms of market capitalizations that they will be beyond the reach of money center institutions.

Market Capitalization Gauge Heralds Rise of Superregionals

Continued from Page 1

"Once the market capitalizations become equal, it becomes impossible for one to acquire the other because the dilution in earnings per share becomes intolerable," he said. "SunTrust may someday have a larger market capitalization than Chase and, stretching this further, Chase might become an acquisition candidate for SunTrust."

Florida National Banks of Florida Inc., Jacksonville, provides another example of the importance of market capitalization, Mr. Johnson said.

The company is considered an attractive acquisition candidate, but a buyer would have to pay close to $1 billion. "There are not many acquirers willing to pay that much," he said.

Florida National has a market capitalization of about $500 million. And because the stock is trading at only about 1.3 times book value, a potential buyer most likely would have to exceed the market capitalization in order to lure Florida National, Mr. Johnson said.

> ***'SunTrust may someday have a larger market capitalization than Chase and, stretching this further, Chase might become an acquisition candidate for SunTrust.'***
>
> *— Bradford M. Johnson, senior vice president for Johnson Lane Space Smith & Co., an Atlanta-based investment banking firm*

An additional factor that would increase a potential bid for Florida National is the Jacksonville company's agreement with Chemical New York Corp.

Under that 1981 accord, Chemical agreed to buy Florida National if and when combinations of New York and Florida banks become permissible under federal interstate banking laws.

To buy out Chemical, which owns a chunk of Florida National's preferred stock, would cost a buyer about $90 million, Mr. Johnson said.

Superregionals Lead in Gains

According to the Keefe study, which ranked the nation's top 50 bank holding companies in terms of market capitalization at yearend 1985, the biggest gainers last year were large regional banking companies.

Bank of New England Corp., Boston, led the group with a 261.4% rise in market capitalization. The company, which resulted last June from the merger of Bank of New England with CBT Corp. of Hartford, Conn., ranked 22d among the 50 banking companies. It was not among the top 50 in 1984.

No one was even close to Bank of New England in terms of percentage gains. The nearest was First Union Corp. in Charlotte, N.C., whose market capitalization rose 150.6% between yearend 1984 and yearend 1985.

First Union has launched an ambitious in-state and interstate acquisition program since the June 10 decision by the U.S. Supreme Court allowing regional banking.

Others that showed sharp rises last year were:

- SunTrust Banks, which gained 146.6%. SunTrust is the result of the merger of Sun Banks Inc., Orlando, Fla., and Trust Company of Georgia, in Atlanta.
- Bank of Virginia Co., Richmond, which showed a rise of 127.3%. The company recently acquired Union Trust Bancorp in Baltimore and has announced an agreement to buy Security National Corp. in Washington, D.C.
- First Wachovia Corp., which rose 97.4%. The company is the result of the combination of Wachovia Corp. in Winston-Salem, N.C., and First Atlanta Corp.
- KeyCorp, whose market capitalization rose 96.8% last year. The Albany, N.Y., company has expanded into Maine, Alaska, and Oregon.

The biggest market capitalization decline last year was the 27.2% drop by Texas Commerce Bancshares. The Houston bank holding company recently reported a $28.8 million loss in the fourth quarter of 1985.

Plummeting oil and gas prices and related problems in the Texas real estate market caused the market capitalizations of two other large Texas banking companies to drop last year. MCorp in Dallas fell 1.8%, while Allied Bancshares in Houston dropped 1.7%.

BankAmerica's Decline

Another big decliner last year was BankAmerica. The company, which recently suspended its dividend on the heels of reporting a $337 million loss in 1985, showed a 13.2% decline in market capitalization.

As a group, the banks included in Keefe's list of the top 50 showed an average gain in market capitalization last year of 41.3%. Of the 50, Citicorp's $6.5 billion in market capitalization was the highest, and J.P. Morgan & Co.'s $5.5 billion was second highest.

To put banks' market capitalization in perspective, though, the combined $70.3 billion in market capitalization of the top 50 bank holding companies is still smaller than the $93 billion market value of International Business Machines Corp. alone.

But within the limited universe of banking, bank holding companies are getting larger, the Keefe data show. In 1984, 14 bank holding companies had at least $1 billion in market capitalization; last year, 24 bank holding companies had at least $1 billion in market capitalization.

"The increasing concentration of market capitalization can be expected to continue," Mr. Berry, the Keefe analyst, said.

"In the Southeast and New England, Sovran and Fleet Financial, ranked number 35 and 45 at the end of 1985, both have mergers pending which will catapult them into the $1 billion-plus market capitalization group; elsewhere, in the Mid-Atlantic and Midwest sectors, consolidation has hardly begun." ■

Network . . .

Continued from Page 2

lic affairs manager at Safeway Stores Inc.'s Washington, D.C., division.

In the last year or two, in-store ATMs have become the rage in electronic banking circles, with mixed results.

While Docutel's network struggled, another system of in-store machines around the nation's capital has flourished.

Giant Food Inc., a Landover, Md.-based supermarket chain, and Suburban Bank of Bethesda, Md., have been running ATMs in more than 100 Giant food stores.

While each machine in the Safeway network has been handling about 1,000 transactions a month, the machines in Giant stores have been doing about 3,000 transactions, said Terry Eikenbery, senior vice president at Suburban Bank.

He said he thinks the role of the supermarkets explains the differences between the networks.

"Giant has a proprietary interest in their system," Mr. Eikenbery said. The supermarket chain is co-owner of the company that runs the network.

"Giant looks at [the ATMs] as part of what they're selling in the supermarket," he said.

Suburban Bank also invested in the Safeway network. "Suburban has kind of written off that investment we made like a bad loan," Mr. Eikenbery said.

Also, the machines in Giant food stores are open to virtually all the debit cards in the Washington market. Until recently, the Safeway network had access to only about one-half the debit cards in the Washington market.

Mr. Freeman said he blames the network's problems on the stunted card base.

When Docutel's network was formed in late 1983, the merger of Washington's two competing ATM networks, Most and Network Exchange, was expected within six months.

"It has only been completed in the last month, roughly 14 months late," Mr. Freeman complained.

While the recently completed merger "gives new hope for the profitability of this enterprise," said Mr. Freeman, Docutel has abandoned the business of running ATM networks.

Other in-store networks have been the victims of electronic banking economics.

Since supermarkets see so many consumers pass through their doors, the potentially heavy use of in-store machines worries banks that must pay a transaction fee each time their customers use the ATMs.

So in some cases, especially in Florida, banks have passed on these fees to their customers, thus discouraging use of the machines.

Many Washington-area financial institutions assess such fees. Mr. Eikenbery concedes that they may reduce use of in-store machines, but not to the extent that the Safeway network suffered. ■

Quote

In financial terms, we come out virtually level over the five years of investments. In terms of our reputation, I can't say the events of the last two years have been great for Midland.

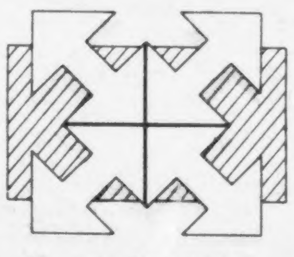
Ian Morrison, spokesman for Midland Bank, in announcing the sale of Crocker National Corp. [1]

Unquote

Wells Buys Crocker in Biggest US Bank Merger

By BART FRAUST

In the largest acquisition of a U.S. commercial banking organization ever in terms of assets, Wells Fargo & Co. will acquire Crocker National Corp. from Midland Bank Ltd. for about $1.08 billion.



Mergers, Acquisitions

The combination of the $29.4 billion-asset Wells and the $19.4 billion-asset Crocker will create the nation's 10th largest bank holding company. Wells, which along with Crocker is based in San Francisco, currently ranks 13th among bank holding companies. Crocker ranks 25th.

Just last year, the London-based Midland increased its share of Crocker to 100% from 57%. Midland first acquired a controlling interest in Crocker in 1981.

"Midland is acting like the FDIC with respect to Continental Illinois," said David Cates, a New York banking consultant. He was referring to the Federal Deposit Insurance Corp.'s 1984 rescue of the Chicago bank holding company, part of which included the agency's assumption of troubled assets. Some banking observers believe the FDIC hopes that Continental Illinois will one day be sold to another institution.

- Midland Returns Focus to Home, Page 30
- Steps on the Road to a Deal, Page 30
- Crocker-Midland Chronology, Page 32
- Top 25 Rankings After Merger, Page 35

Midland last year took over Crocker's $3 billion international portfolio, over half of which consisted of Latin American loans, and $450 million in nonperforming domestic real estate loans.

After showing a mammoth loss of $324.4 million in 1984, Crocker turned in a modest profit last year of $38 million. However, nonperforming loans — a key indicator of whether a bank will experience future problems in its loan portfolio — were down to about 2% of loans from 8.7% at year-end 1984.

Crocker is by far the largest U.S. banking organization ever acquired by

AN AMERICAN BANKER SPECIAL REPORT

Tuning in on Financial Services Video

10 Brokers Offer On-Line Order Entry, With an 11th on the Way, Survey Finds

NEW YORK — Ten securities brokers now offer 15 distinct on-line order entry services, an *American Banker* survey shows, and an 11th is slated for introduction next month.

On-Line Brokers

Their customers, whose numbers have grown over the last year, are mostly individual investors, traders, and investment managers who track portfolios closely. More casual individual investors also make use of the services, especially those with low sign-up fees and connect charges.

It is not possible to estimate the size of the on-line clientele of these brokers, since some of the firms will not say how many such customers they have. In the last survey, reported in the

BankWire to Cease All Operations Effective March 7

By TOM FERRIS

NEW YORK — After years of trying in vain to compete with the wire-transfer system run by the Federal Reserve, the BankWire organization has decided to throw in the towel and cease operations next month, it was announced Friday.

Facing a $1.3 million deficit this year and no prospect for a substantial increase in wire-transfer business soon, BankWire's board decided unanimously last Thursday to pull the plug on the bank-owned organization's services, according to Robert L. Kemper, BankWire's president.

Mr. Kemper estimated that the liquidation of the company, formally known as the Payment and Telecommunication Services Corp., would cost the member banks up to $10.5 million.

Credit Commercial Leads the Video Banking Parade in France

By JAMES KRAUS

PARIS — With less than one-fourth the population of the United States, France has more than twice as many video banking customers.

Consumer video banking accounts numbered about 150,000 at the end of 1985, and business accounts about 50,000. Credit Commercial de France had the biggest share, some 115,000 home users and 6,000 businesses.

This growth has come despite the absence of any bill-paying capability in French video banking services, a feature that video banking providers and customers in the U.S. consider essential.

The Paris-based Credit Commercial, a leader in banking technology, plans to rectify this lack. It will shortly introduce France's first interactive home banking program permitting customers to order payments to accounts outside the bank. And Joseph Perez, senior vice president in charge of marketing, says that within the next few months Credit Commercial will offer an additional specialized service which he believes will be "unique worldwide." He would not elaborate.

"Developments will permit us to suppress the problem of geographical distance," says Mr. Perez, "and set a new style in relations between banks and customers." Soon, he says, the bank will be visiting the customer and not the customer the bank.

Called Videocompte, the Credit Commercial home banking service currently provides on-line statements, details on account transactions over the previous 15 days, check book ordering, transfers between accounts, exchange rates, stock prices, and information on products and services offered by the bank.

The new interactive service, says Mr. Perez, will exclude such functions as loans, life insurance, or investments where the bank feels an adviser is necessary.

To assure the security of transactions under the new system, subscribers will provide the bank with a list of preauthorized payees for transfers and will use eight digit code numbers to access their accounts.

A second code number with a varying number of digits will permit subscribers to process the transfer. After more than three unsuccessful attempts using an incorrect code number, communications will be cut off automatically. After a further unspecified number of attempts, the client will be advised to change his code number.

Credit Commercial introduced Videocompte in December 1983. It says nearly one-third of its 350,000 clients now subscribe to the private home banking service and the goal is to sign up all its customers within three years. Another 6,000 companies have signed up for Videobanque, the bank's corporate cash management and financial information service.

Credit Commercial thus accounts for the biggest share of subscribers to home banking services offered by 161 depository institutions in France. Around 30 million francs ($4 million) has been invested by the bank in setting up its network and for the last three years, Credit Commercial's entire annual advertising budget has been turned over to promoting the merits of home banking.

Mr. Perez acknowledge that growth has been bolstered by the French postal authority's program to install Minitel terminals free of charge in households as a replacement for printed phone directories. Growth also was spurred by the bank's own need to cut expensive mailing charges for the account statements it provides customers automatically after each transaction.

A further factor, he adds, was the bank's policy against expanding its number of branches beyond the existing 226.

"The first risk we faced was that the innovation would be viewed as a gadget," he says. "The second was that the government would interrupt its program to install Minitel terminals."

More than 1.5 million Minitel terminals had been installed in French households by the end of 1985, though not all were in use. The number of installations is expected to exceed two million by the end of this year, giving Credit Commercial further room to maneuver.

Of the more than 1,000 videotex services accessible by the Minitel over the Transpac national packet switching system, home banking accounts for 10% to 12% and about 17% of individual usage is linked to bank services.

Perhaps the most important reason for the rapid growth of home banking at Credit Commercial is that it is one of only two banks to offer services free of charge. The other is Credit du Nord.

For banks which started later and imposed monthly subscription charges, growth has been slower.

"Big banks didn't have the same approach we did. Some frankly told us that, given the costs, they thought we were crazy," says Mr. Perez.

He refrains from commenting on profitability beyond saying that the bank already has succeeded in eliminating a large part of its formerly high postal charges.

Societe Generale Is No. 2

According to most estimates, the nearest competitor to Credit Commercial to emerge so far has been Societe Generale with 22,000 subscribers to its Logitel home banking system launched last May. Societe General chairman Jacques Mayoux says the bank is now in first place among those offering a paid system.

Societe Generale charges 25 francs ($3.30) for its monthly service which provides statements of account, information on Carte Bleue credit card transactions, intrabank account transfers, as well as 750 pages of videotex information, including two daily financial bulletins on stock exchange prices and foreign exchange rates.

The bank this year plans to introduce a message service as well as an individual listing of share prices held by customers. Beyond that, says a member of the bank's home banking task force, Societe Generale will take a wait-and-see position.

For security reasons, this officer says, the bank will not move into a wider range of cash transfers until the smart card gains wider usage.

Societe Generale also does not intend to provide services free of charge and profitability remains to be proven, he adds.

If within the next five or six years the number of home subscribers reaches only 10% of Society Generale's customers, the same official says home banking will be only another product offered by the bank. But if the number of subscribers reaches 30% to 40% of the total, "Banking will be revolutionized," he says.

Doubts that remain among other French banks fail to deter Credit Commercial. The bank now has more than a year's lead in developing and testing technology for home banking services, says Mr. Perez, and even if it is numerically surpassed by other banks in the number of subscribers, the bank will remain a leader in offering more sophisticated services.

Credit Commercial's lead position is paying off in another way. Mr. Perez says his bank now provides technical assistance on several projects for setting up home banking networks in North Africa and in northern European countries. Potentially lucrative contracts in other countries, including Spain, are under discussion. ■

Glossary of Terms Used in Video Banking

This is a glossary of technical terms used in video banking. In the definitions, italicized words appear elsewhere as separate entries and are further defined. Common acronyms are shown.

acoustic coupler: A device to connect a telephone earpiece and mouthpiece separately to a modem. See direct connect.

alphageometric: A videotex display technique that produces smoother and more elaborate graphics than alphamosaic. Geometric instructions are transmitted to the terminal or computer.

alphamosaic: A videotex display technique which divides the screen into an invisible grid and accepts signals instructing how each square is filled in, as if creating a mosaic.

ASCII: American Standard Code for Information Interchange. The protocol used by most small computers. It assigns a one-byte value to 96 printable characters and 32 control characters which are not printable.

audiotex: Interactive communication between a user's telephone, terminal, or computer on one side and a host computer on the other, with telephone tones sent up the system and voice sent back. See *videotex* and *teletext*.

baud: A unit for expressing data transmission speed. The rate in bits per second that data flows between computer devices. Named for the J.M. Emile Baudot, a French inventor who pioneered print telegraphy. Generally, 300 baud is a transmission speed of 30 bits a second and 1,200 baud is 120 bits a second.

beta test: The first public test of a new program, system, or hardware, under controlled conditions with selected users.

bit: The smallest piece of data a computer can work with, expressed only by the values 0 or 1. Eight or 16 bits make up a byte. Their arrangement forms the character or number. The term is a contraction of "binary digit."

byte: A single unit of information, such as a letter, number, or other character. A byte is formed by eight or 16 bits. Through arrangement of the bits' 0 and 1 values, the byte may express any of 256 characters. In addition, there may be a start bit, to indicate the beginning of transmissions, and a stop bit, consisting of 1, 1½ or 2 bits, to indicate the end of a word.

CompuServe: An on-line information service based in Columbus and owned by H&R Block Inc.

CP/M: A microcomputer operating system developed by Digital Research Inc. It stands for Control Program for Microcomputers but the acronym itself suffices in copy.

CPS: Characters per second.

data base: A collection of records stored electronically.

decoder: The videotex unit that transcribes incoming protocol signals onto a screen.

Delphi: An on-line information service operated by General Videotex Corp., Cambridge, Mass.

direct connect modem: A modem that connects directly to the phone system with a jack, as opposed to an acoustic coupler. Users may transmit at either 300 or 1,200 baud. Also, the signal quality is better with direct connection.

disk: A piece of equipment used to store data.

diskette: A floppy disk.

disk drive: A device, analogous to a record player, that enables the user to load programs and data from a diskette to a computer and to store them from computer to diskette. Different from a tape drive. The read/write head reads information from the disk and writes information to the disk.

DOS: Disk operating system.

double density: Capable of storing twice as much data as earlier disks.

double sided: Refers to a disk which stores information on both sides. Disks usually are either single side double density (SS-DD) or double sided double density (DD-DD).

Dow Jones News/Retrieval Service: An on-line data base and information service based in Princeton, N.J., and owned by Dow Jones & Co., New York.

download: Transmit a file or program from a mainframe computer to a terminal or satellite computer. Opposite is upload.

DSDD: Double sided double density, describing a disk.

DSQD: Double sided quad density, describing a disk.

dumb terminal: A terminal with no processing capability, unlike an intelligent terminal.

EFT: Electronic funds transfer.

electronic funds transfer: A paperless transfer initiated from a terminal, computer, telephone instrument, or magnetic tape. EFT.

electronic mail: A service allowing a computer user to send messages instantaneously to another user's directory, or "mailbox." It is a feature of such on-line data base systems as CompuServe and the Source." E-mail is a trade mark of CompuServe.

encryption: Scrambling. Encoding. It often is done automatically in the terminal or computer before data is transmitted.

fiber optics: A transmission technology using modulated infrared light sent through a glass fiber the thickness of a human hair. A cable with 44 fibers has a diameter of ⅞ of an inch. Each fiber can carry about 2,000 telephone circuits when light is transmitted at 405 million bits per second.

A Guide to On-Line Securities Brokers

Revised 1/6/86

Name of Broker	System	No. of On-Line Accts.	Commissions $30 Stock		Min.	Clear Through	Hours of Operation, Connect Charges	Software-Based or Open System?	Order Handling (Ticket written, msg. rekeyed, or switched?)
			100 Shares	1,000 Shares					
Max Ule Division, Ingham, Becker & Co., New York (May 1982)	Tickerscreen	1,100	43.12	199.96	$30	National Financial Services Inc.	5 p.m. to 9 a.m. weekdays, all day weekends, holidays. No connect charges direct, only via CompuServe.	Open	Rekeyed
North American Investment Corp., East Hartford, Conn. (Nov. 1983)	Own	800	37.19	185.00	$35	Pershing	Round the clock direct or via Delphi, at $16/hour 8 a.m. to 6 p.m. business days, $6/hour other times.	Open	Rekeyed

Conclusion of Tests Leads to Decline in Home Banking Operations

Continued from Page 1

the year-long nationwide test. Bank of Montreal remains in the Grassroots videotex system in Canada, but none of the other 13 is continuing any remote retail banking service at this time. Seven have dropped all plans for video banking at any time.

Since June, the number of financial institutions fully operational in video banking is up from 25 to 30. The number in pilot tests is down from 23 to eight. And the number that definitely plan to enter video banking eventually is up from 13 to 21.

The banks, thrifts, and credit unions are listed in the table on page 19. Several have more than one video banking operation under way, such as separate home and business services, or separate services on Viewtron and CompuServe.

Estimating the number of video banking customers is difficult because all the major bank providers decline to say how many they have. William S. Harris, president of VideoFinancial Services of America in Dallas, estimates 70,000. (See his article on page 20.) Charles S. Forbes, marketing head for Covidea, estimated the national total last month at 75,000. In June, the *American Banker* had estimated 58,000.

The institutions that do disclose have 5,941 customers, led by Madison National Bank, which has the Washington, D.C., market to itself with about 1,000 users of its Home Teller service. This is up from 750 in June.

Others show similar growth that is small in absolute numbers but steady. Louisiana National Bank in Baton Rouge has 522 customers in its Shuttle service, up from 336 in June. Toledo Trust Co. now has about 500 in its own VistaBank service and another 25 at its affiliated Trustcorp Inc. in Columbus, up from 372 and 16, respectively, since June.

Los Alamos Credit Union, which serves employees of the Los Alamos government laboratories in New Mexico, went live with a pilot test at the end of November. It started charging customers for the service Feb. 1 and lost 10% of them, but emerges with about 400. It uses the system developed by NCR Universal Credit Union of Dayton, Ohio.

Penn Security Bank & Trust Co. of Scranton, Pa., now has 388 customers banking on-line in its People Server program, another of the proprietary systems developed by medium-sized banks around the country. In June it had 215 users.

Still another is the system developed by Continental National Bank of Miami. It now has 360 on-line customers, up from 310 in June.

Viewtron's New Efforts

Southeast Bank, also of Miami, is the only other bank in Florida fully operational with a video banking service. It also is the only Viewtron bank left in that state, where Viewtron began in November 1983 amid projections of a glorious future for videotex based on the North American Presentation Level Protocol Syntax, or NAPLPS, a standard for communicating data and graphics. At one time, as many as nine Florida banks were signed up.

Viewtron is run by the Viewdata Corporation of America, a subsidiary of Knight-Ridder Newspapers Inc. of Miami Beach. Since Oct. 1, Viewdata has redirected its efforts, adding the American Standard Code for Information Interchange, or ASCII, protocol, for personal computers to the NAPLPS service for dedicated terminals. It also offers what it calls "NAPLPS Lite," a simplified version of that high resolution graphics protocol for Commodore microcomputers.

The Viewtron defections since June are Bank of Coral Gables, County National Bank of South Florida in North Miami Beach, Dadeland Bank in Miami, and Flagler National Bank and The Mall Bank, both of West Palm Beach. None has any plans for video banking.

They dropped out when VideoFinancial Services, recordkeeper and gateway for banking on several videotex networks, started charging the Florida banks for certain services that had been free.

Meantime, Viewtron has been meeting more success with its PC service than it did with the all-NAPLPS terminal service. Southeast Bank once had about 500 customers in the original Viewtron, based on AT&T's Sceptre terminal. They now number 336, but it has added 127 users to its new all-ASCII service over CompuServe.

NCNB National Bank in Charlotte, N.C., is offering video banking over both Viewtron and CompuServe. So is PSFS in Philadelphia. Both use VideoFinancial Services as the gateway.

Viewtron also has teamed up with Dollar Bank of Pittsburgh to develop a separate video banking service called DollarNet that is expected to go into operation within months. Dollar Bank, which will do the remittance processing, is testing the system internally and talking to other banks about adopting it. (Dollar Bank was inadvertently omitted from the table on page 19).

Pronto Attrition

Like Viewtron, Pronto has suffered attrition in recent months. The service developed by Chemical Bank has been folded into Covidea, the videotex partnership of Chemical, AT&T, and Time Inc. Bank of America also is a Covidea participant and will become a partner when and if the Comptroller of the Currency approves.

Crocker National Bank in San Francisco concluded a Pronto pilot test last May and dropped all plans for video banking. Worthen Bank & Trust Co. of Little Rock, Ark., ended its test July 31, but it does expect to offer video banking eventually. Manufacturers National Bank in Detroit concluded a test Nov. 30 and also plans an on-line service at some time.

At Bankers Trust Company of South Carolina in Columbia, the Pronto pilot test ended Dec. 31 and the bank has no plans to go into full operation. It was merged into NCNB National Bank on Jan. 2 and expects the NCNB Viewtron/CompuServe service to be offered in South Carolina, too.

American Security Bank in Washington also is a Pronto licensee, but its plans to go live with video banking have faded.

Meantime, however, Union Trust Co. of New Haven, Conn., and Florida National Bank of Jacksonville say they have added customers to both their Pronto Personal and Pronto Business Banker services.

And Covidea in December signed on First Tennessee Bank as its first new participant. The Memphis-based institution will offer the Pronto service sometime this year.

The Future of NAPLPS

Another test will come to an end March 14 when Empire of America FSB in Buffalo, N.Y., closes down its year-long pilot program. It is sending out letters to the 100 or so participants.

But Empire has not given up all plans for video banking by any means. Its pilot used NAPLPS at a time when that protocol was going out of fashion because of the lackluster results of the Viewtron, Gateway, and Keycom efforts. But Empire of America expects to come back live with a fully operational NAPLPS system, maybe before the year is out.

"We feel strongly that what is available in NAPLPS is far better than what you can get with ASCII," Macrotel president Leonard R. Graziplene said in a telephone interview.

Macrotel is an Empire of America subsidiary that conducts research and development in electronic technology.

Mr. Graziplene believes NAPLPS will replace ASCII eventually, a view apparently shared by Trintex, the videotex partnership of the IBM Corp., Sears, Roebuck and Co., and CBS Inc. Trintex sprang a surprise last month by disclosing that its nationwide videotex service, whenever it is rolled out, will be based on NAPLPS.

"Even in the home it's very easy to adapt the PC with a NAPLPS card that costs less than $100," Mr. Graziplene said.

"You just have to realize there's so much more you can do with NAPLPS than you can do with ASCII. Four or five years ago it was hard to get NAPLPS into a PC. Now we've had it in the Commodore 64 for several years. In coming months the cost will be even less. So there isn't any kind of a formal barrier to using NAPLPS."

A major advantage of NAPLPS, in Mr. Graziplene's view, is that it works in parallel fashion, not serial as ASCII does. It paints a full screen, instead of starting at the top left and printing out a pageful of characters.

"You don't have the cursor gunning across the screen," he said. "If you can paint across the whole screen effortlessly and quickly, it relieves the user of a lot of burden." ■

Videobanking Dropouts

The following banks, bank holding comapnies, and other financial insitutions have run pilot tests or operational systems of videobanking and have dropped the services with no plans to resume.

ARIZONA	Western Savings & Loan Assn., Phoenix. HBI test.
CALIFORNIA	Crocker National Bank, San Francisco. Pronto test. First Interstate Bank of Calif., Los Angeles. Own test.
CONNECTICUT	Colonial Bank, Waterbury. HBI test.
FLORIDA	Bank of Coral Gables. Viewtron. County Natl. Bank of South Fla., North Miami Beach. Viewtron. Dadeland Bank, Miami. Viewtron. Flagler National Bank, West Palm Beach. Viewtron. The Mall Bank, West Palm Beach. Viewtron.
ILLINOIS	Continental Illinois NB&T Co., Chicago. HBI test. Farmers State Bank & Trust Co., Jacksonville. Own test.
MINNESOTA	First Bank System, Minneapolis. FirstHand test.
NEW JERSEY	Citizens First National Bank, Glen Rock. Ridgwood test. Fidelity Union Trust Co., Newark. Ridgewood test. Horizon Bancorp., Morristown. Own test. Independence Bank, Allendale. Ridgewood test.
NEW YORK	Marine Midland Bank, New York. HBI test.
NORTH CAROLINA	First Union National Bank, Charlotte. HBI test.
OHIO	Third National Bank, Dayton. HBI test.
TENNESSEE	Central Trade Bank, Knoxville. Bank-at-Home test.
WISCONSIN	First Wisconsin National Bank, Milwaukee. HBI test.

Error in Table

Dollar Bank, Pittsburgh, was omitted inadvertently from the Who's Who in Video Banking Nationwide table on page 19. The savings bank is joining with Viewtron to develop a video banking service which is now being tested internally and is expected to be introduced within months. ■

Comment . . .

Continued from Page 21

sonal computers is very low justifiably feel no urgency. Even so, they should stay closely in tune for the emergence of low-priced appliances that will give everyone ready access to videotex services. At that point, of course, all banks will enter the picture if only for defensive purposes.

If banks offered only checking, savings, and lending services, remote banking would not have much of a market potential. But the product mix today includes an array of CD accounts, NOW accounts, access to mutual funds, brokerage, and insurance services. There will be more, as banks vie with nonindustry competitors in the race to become financial supermarkets.

In turn, consumers are faced with the complex challenge of keeping their money at work most productively, as economic conditions change. Video banking gives them the ability to monitor the performance of their investments, as well as shift funds among various accounts.

One of the key advantages for banks is that they can provide these services irrespective of geography. With the availability of ATM networks for cash withdrawals, and automated clearing house systems for payroll deposits, they can offer national banking services without physical branch facilities. This could be particularly important in holding onto the approximately 15% of customers banks lose each year as a result of their moving out of the bank's marketing area.

Currently, about 10% of households have personal computers, which means there are some eight million potential consumers for video banking. There are also approximately 800,000 current users of data base services through personal computers with modems. This, plus the significant number of small business prospects, makes video banking a viable product in today's marketplace. The only caveat is that banks need to be totally committed to the concept and willing to make a concerted marketing effort if they expect to achieve a permanent position in the field. ■

BankWire . . .

Continued from Page 1

That liability, to be assessed according to volume share, could be lowered if operating pieces of the company can be sold, he said.

The organization's main services are the CashWire funds-transfer system, the BankWire message network, and a notification service for dishonored checks. Those operations will cease on March 7, Mr. Kemper said.

While BankWire has 120 member institutions, the organization was kept alive in recent years largely by a few money center banks determined to keep the Federal Reserve from having a virtual monopoly on the domestic money-transfer business. These banks considered private-sector competition to the Fed crucial so the banking industry would have an alternative in shaping money-transfer developments. Competition would also force the Fed to keep its processing fees low, they believed.

However, while these banks voiced strong support for BankWire and financed it, they did not provide the wire-transfer volume it needed to survive because the Fed's service, quite simply, was more attractive, bankers admit.

Even the development of the CashWire net settlement system in 1982, which gave the organization the capability of actually transferring funds rather than just issuing funds-transfer instructions, was not enough to put it on an equal footing with the central bank's Fed Wire system.

Fed Wire payments are settled immediately and considered final, but CashWire transactions are not settled until the end of the day. Therefore, CashWire transactions have been considered more risky because of the possibility that a bank might fail before the end-of-the-day settlement, leaving its trading partners liable. While such a possibility might be considered remote, it is not taken lightly by the players involved in a network designed to handle multimillion-dollar payments.

"It was just something that we couldn't compete with," Mr. Kemper said in an interview Friday.

The Last Straw

The last straw came when the 10 largest member banks indicated they would not back up a promise to guarantee a total daily volume of 12,500 wire transfers on CashWire starting this July. BankWire was counting on that traffic plus projections of an additional 6,000 wires from other members to cover its expenses, Mr. Kemper said in a letter sent to member banks last Friday.

While the 10 banks did say they would provide about half of the expected volume and pay BankWire the appropriate amount for the unfulfilled volume, Mr. Kemper felt that the projected volumes of the other members would have to be lowered also.

"These new projections would produce a shortfall in CashWire revenue of about $800,000 for the year," Mr. Kemper wrote. "Along with other budget adjustments, BankWire now projects total cash-flow shortfall of $1.3 million for 1986" — some $1.1 million over the company's approved borrowing capacity.

"Therefore," he continued, "BankWire would no longer break even by December 1986 and would require substantial additional traffic in 1987 to reach break-even at that time. Obviously, this would put off for some time BankWire's ability to repay its senior debt obligation. These facts raise fundamental questions about the financial viability of BankWire.

"Accordingly, at its meeting [last Thursday], your board of directors reluctantly concluded that it was in the best interest of the member banks to stop the continued cash flow deficit, discontinue BankWire operations, and put the company in liquidation."

Mr. Kemper said that a complex Federal Reserve program to curb intraday overdrafts, which takes effect next month, was cited by member banks as part of the reason why they were not ready to commit more volume to CashWire now.

The estimated liquidation cost of $10.5 million included $3.5 million to pay off loans, $3.3 million for equipment leases, and $1.5 million for office leases. The actual amount could be lower if BankWire is able to sell off some of its operating areas. The cost of the liquidation to members will be determined by their volume amounts, he said.

Fashioned as a private-sector alternative to the Fed Wire for the transfer of large-dollar-value corporate transactions, BankWire never really caught on. At its peak in 1970, the organization had 230 member banks that sent 27,000 payment instructions and administrative messages a day.

Since then, BankWire has lagged while the Fed Wire and the New York-based CHIPS system, which primarily handles international payments, have experienced explosive growth.

The most important enhancement of the BankWire organization's funds-transfer product was the introduction of CashWire in 1982. That enabled the company to actually transfer funds. Previously, BankWire, using its network by the same name, could send only payment instructions, which were carried out by adjustments to correspondent accounts — an antiquated procedure compared to the immediate transfer and settlement service offered by the Fed Wire.

But CashWire, too, never caught hold. While thousands of banks use the Fed Wire daily to transmit 180,000 wire transfers valued at more than $350 billion, only a few thousand funds transfers were being made daily by a couple of dozen banks over CashWire. ■

NY Senator Aims to Help First-Time Home Buyers With Tax-Free Account

Special to the American Banker

ALBANY, N.Y. — A first-time home buyer's tax-free account, similar to an IRA, has been proposed by Sen. Owen H. Johnson, RC-Suffolk, in legislation introduced in the New York State Senate.

The bill would allow those who have never owned a home, regardless of age, to establish an account for the purchase of a home, using a deduction from personal income of up to $2,000 each year. Interest earned on the proposed account would not be subject to state income tax, and a husband and wife would be entitled to a total deduction of $2,000, divided in any manner they desire for tax purposes.

In the event deposits and accrued interest were used for purposes other than the purchase of a home, they would be subject to income tax for the year the withdrawal was made. The same penalty would apply if the funds were used to purchase or build a first home that was not used as the "primary residence" within two years.

Sen. Johnson said that nationwide approximately 37% of home purchases are made by persons who did not previously own their homes, and there is every reason to believe that the percentage holds here. "This legislation will breathe new life into the state's home-building industry and encourage savings by those who have not yet purchased their own homes but plan to do so in the future." ■

AMERICAN BANKER CAN BE READ DAILY VIA ONLINE SERVICES

American Banker stories and commentaries can be read through several electronic sources. These sources can provide early-morning access to the news, the ability to search for stories on chosen subjects in past editions, and clipping services, in which stories on preselected topics are delivered automatically to the reader. Telephone and terminal equipment are needed to use these services. A brief description follows.

BRS INFORMATION TECHNOLOGIES — Contains today's news stories in financial services, a financial services news summary, daily executive job changes, a daily calendar of events in Washington, and more. Available beginning 6:00 a.m. Eastern Time. Call (800) 223-3009. In New York State, call (212) 943-9893.

DIALOG — News Search (Dialog file 211), daily indexing but not the text. Trade & Industry Index (Dialog File 148), back indexing with full text, no search. Trade & Industry ASAP (Dialog File 648), index and full text search. Call (800) 227-8431.

NEWSNET — Major stories and articles. Full text search and retrieval available at 6:30 a.m. Eastern Time. Call (800) 345-1301. In Pennsylvania, call (215) 527-8030.

NEXIS® — Provides the full text of all American Banker features and news coverage since Jan. 2, 1979, through a wide variety of personal computers and terminals. Issues are available approximately 48 hours after print publication date. Electronic clipping service available for convenient, automatic updates on any topic of your choice. Call (800) 227-4908.

For further information, please call Brad Henderson, director of product development, the American Banker. Collect (212) 943-4846.

10 Brokers Offer On-Line Orders

Continued from Page 1

issue of Jan. 17, 1985, the *American Banker* estimated 6,500 customers. The brokers who do disclose their numbers show a total now of more than 11,400.

Two brokers have introduced an on-line service since the survey last year. They are Charles Schwab & Co. of San Francisco, the largest of the discounters, and Eastern Capital Securities Inc. of Boston.

Another has been merged; C.D. Anderson & Co. of San Francisco now operates as a division of Security Pacific Brokers Inc. of Pasadena, Calif.

The 10 are listed in a table on page 18. All are either discounters or full-service brokers who give discounts to on-line customers.

Three of the brokers can be accessed both directly and from video banking services — Security Pacific Brokers, Quick & Reilly Inc., and Schwab. The on-line service of Rose & Co. Investment Brokers Inc. can be accessed only by video banking customers of its parent, the Chase Manhattan Bank.

Others are accessible from videotex services. CompuServe, for example, gateways into the Max Ule division of Ingham, Becker & Co. of New York and Quick & Reilly. Dow Jones News/Retrieval since October has afforded access to Fidelity Brokerage Services of Boston.

Delphi, a smaller videotex service based in Boston, offers access to the North American Investment Corp. of East Hartford, Conn. Subscribers to the Source enjoy on-line brokerage through Spear Securities Inc. of Los Angeles. And subscribers to Western Union's EasyLink since last March have been able to enter orders for Eastern Capital Securities.

A new brokerage firm — Wescom Securities — is about to make an introduction, according to its promoters. It is the American subsidiary of "a major foreign bank," said Harold Bolling, national sales manager for the Wescom Corp. of Jericho, N.Y.

Wescom has set March 1 as the date to launch the on-line service through Wescom's Direct Shop function on the FYI segment of EasyLink. "It will be 5% below the lowest discount broker," Mr. Bolling said. "We hope to make it up in volume."

Among the 10 on-line brokers, the lowest commissions are charged by the Unified Management Corp. of Indianapolis. For a representative $30 stock, customers in its Unisave accounts pay $30 for a trade of 100 shares and $100 for 1,000 shares.

For the same $30 stock, the highest commissions among the 10 on-liners are the $56.90 charged by Fidelity Brokerage Services of Boston for 100 shares and $199.96 charged by Max Ule for 1,000 shares.

Foreign Banks Hungry for US Commercial Loans

They Gobble Up Participations In Credits from Lenders Here, Gaining Record Market Share

By L. MICHAEL CACACE

NEW YORK — Foreign banks acting through their U.S. banking offices were major purchasers of business loan participations sold by domestically owned banks last year, indicating that fundamental changes are under way in domestic commercial lending.

These loan participation sales were the main reason why business loans grew more than two and a-half times faster at foreign bank-owned U.S. banking offices than at domestically owned U.S. banks last year.

These are some of the findings of *American Banker's* annual study of the U.S. banking operations of foreign banks. *American Banker* looks at the commercial and industrial loans, or business loans; deposits; and total assets booked by foreign banks through their U.S. offices over the year ending June 30, 1985.

Statistical Survey

This special section includes tables listing cities with most foreign banking offices, US branches of foreign banks, and commercial and industrial loans at US units of foreign banks... Page 1A

The U.S. banking offices of foreign banks include branches, agencies, commercial bank subsidiaries, Edge Act banks, and New York State investment companies. U.S. finance companies owned by foreign banks were not included.

At midyear 1985, business loans at the U.S. banking offices of foreign banks totaled $105.7 billion, up 13.8% from $92.9 billion on June 30, 1984. Over the same period, the business loans of domestically owned U.S. banks rose by only 5% to $377.9 billion from

LOCATION OF FOREIGN BANKS' U.S. OFFICES

Number of Foreign Bank Offices Increases for Fifth Year in Row

By THERESIA TREPEL

NEW YORK — The number of U.S. banking offices of foreign banks increased for the fifth year in a row in 1985.

Last year, foreign banking offices totaled 940, up 3.8% from 906 offices in 1984. In 1984, the number of foreign banking offices increased 4.7%.

New York again had the most foreign offices, with 405, or 43.1% of the total. Los Angeles was second with 111, or 11.8%, and Chicago was third with 79, or 8.4%.

New York also had the largest net gain — openings less closings — in foreign banking offices last year, with 22. This total comprised 16 representative offices, four branch offices, and two agency offices.

These are some of the findings of the *American Banker's* annual survey of the U.S. banking offices of foreign banks.

Banking offices of foreign banks in the United States are defined in the survey to include agencies, branches, commercial bank subsidiaries, Edge Act banks, investment companies, finance companies, and representative offices.

Last year, foreign banks had 181 agencies operating in the United States, compared with 178 in 1984. Foreign bank branches totaled 309, down from 310. Commercial bank subsidiaries experienced a net gain of seven, to 75.

Representative offices posted the highest net gain in offices, and Edge banks had the largest net decline. Rep-

Australian Dollar-Denominated Deals Begin Complex Maneuver for 5 Firms

By JOHN P. FORDE

NEW YORK — Financial firms went far and wide in their search for capital in the opening weeks of 1986, as several offered debt denominated in Australian dollars as the first round of a complicated capital raising technique.

Capital Actions

Financial companies issued five Australian dollar-denominated deals in January, including:

- A $125 million (U.S.) floating-rate note issue by Security Pacific Corp., equal to 175 million Australian dollars.
- A $71 million Student Loan Marketing Association note issue, equivalent to 100 million Australian dollars.
- A $74 million Bankers Trust New York Corp. floating-rate debenture offer, equal to 100 million Australian dollars.
- A $111 million Commonwealth Bank of Australia note issue equal to 150 million Australian dollars.
- A $111 million J.P. Morgan & Co. note offer, also for 150 million Australian dollars.

The Security Pacific issue was the first Australian dollar floating-rate note ever publicly issued in the United States. They were issued under a debt shelf registration statement that Security had already filed with the Securities and Exchange Commission.

Capital Offerings Tables, Pages 8,9

The major underwriter for three of these deals — Security Pacific's, Sallie Mae's, and Bankers Trust New York Corp.'s — was Salomon Brothers Inc. Jeff Hanna, a managing director at Salomon Brothers, said that the Australian dollar-denominated issues are simply the latest part of a trend toward de-

*—Average deposits and assets for June 1985 and June 1984 were used for branches and agencies; and balances as of June 30, 1985, were used for U.S. commercial bank subsidiaries, New York State investment companies, and Edge banks. Also, total loans as of 6/30/85 , and not C&I loans, were used for Edge banks. For finance companies, data as of Dec. 31, 1984, and Dec. 31, 1983, were used. Acquistions made, and offices opened, after June 30, 1985, are not included here.

(a)—Annual growth in commercial and industrial loans over the year ended 6/30/85 and 6/30/84, respectively. **(b)**—Also has an interest, along with five other banks, in European American Bank, New York. **(c)**—Acquired Harris Bankcorp, Inc., Chicago, in September 1984. Data for June 30, 1984 do not include this acquisition. **(d)**—The group consists of six European banks: (1)-Amsterdam-Rotterdam Bank, Amsterdam, Netherlands; (2)-Creditanstalt-Bankverein, Vienna, Austria; (3)-Deutsche Bank, Frankfurt; (4)-Midland Bank Plc., London; (5)-Societe Generale de Banque, Brussels; and (6)-Societe General, Paris. **(e)**—June 30, 1985 data for its four Puerto Rican branches were not available.

(a)—Average deposits and assets for June 1985 and June 1984 were used for branches and agencies. **(b)**—C&I loan data were available for 71 of the 73 banks.Commercial bank number count includes bank head offices only and does not include the branches of these banks. **(c)**—Edge bank number count includes branches. To avoid double counting, data for Edge banks, which are subsidiaries of foreign bank-owned U.S. commercial banks, are excluded from the totals for C&I loans, deposits, and assets. The 1985 loan figures for Edge Act banks are total loans. **(d)**—Yearend 1984 and yearend 1983 data were used for finance companies. **(e)**—For 6/30/85, data for three of the four companies were available. **(f)**—The source of the aggregate C&I loan, deposit, and asset data is the **Federal Reserve Bulletin.** **(g)**—The ratio is all U.S. offices of foreign banks to all U.S. banking offices. In computing the ratios, finance company data were subtracted out from the U.S. offices of foreign banks totals for comparability with Federal Reserve aggregate data. **([1])**—All U.S. banks include domestically-chartered, FDIC-insured commercial banks, plus the U.S. branches and agencies of foreign banks, plus Edge Act banks and New York State investment companies.

* Compiled from data taken from the Federal Reserve Board's report of assets and liabilities of U.S. branches and agencies of foreign banks for June 30, 1985. C&I loans are commercial and industrial loans as of 6/30/85. Assets and deposits are average balances for the 30-day period ended June 30, 1985. **(a)**—Executive office and computer processing center for the bank in California located here. **(o)**—Established new agency office over the year ended 6/30/85. (x)—Has a international banking facility (IBF) office. **(H)**—Office is located in the bank's "home state."

* Compiled from data taken from the Federal Reserve Board's report of assets and liabilities of U.S. branches and agencies of foreign banks for June 30, 1985. C&I loans are commercial and industrial loans as of 6/30/85. Assets and deposits are average balances for the 30-day period ended June 30, 1985. **(g)**—Closed office between June and Sept. 1985. **(j)**—Under New York State banking law, some agencies have been granted power to issue large denomination deposits to both foreign and domestic residents. For that reason, the Federal Reserve considers these agencies as branches. American Banker also classifies these agencies as branches. In the listing of New York branches, these special agencies are identified with a footnote "m". **(m)**—Parent bank, Mercantile Bank of Canada, Montreal, was acquired by National Bank of Canada, Montreal, 11/85. This office was closed 1/86. **(o)**—Established new agency office over the year ended 6/30/85. (x)—Has a international banking facility (IBF) office. **(H)**—Office is located in the bank's "home state."

* —Under New York State banking law, an investment company is similar to a state-chartered commercial bank. However there are three major differences: (1) an investment company is not subject to the 10% lending limitation, while a commercial bank cannot lend to any one person an amount greater than 10% of its capital stock, surplus, and undivided profits; (2) an investment company has no restriction on investing in stocks of corporations, while banks cannot acquire the stock of any corporation; and (3) an investment company cannot accept deposits, but can only maintain credit balances incidental to the conduct of its lawful business.

(a)—Data for 6/30/84 were not available, therefore data for 12/31/83 were used.

(b)—In 1923 the original J. Henry Schroder Banking Corp was established. It was merged into J. Henry Schroder Bank & Trust Co., New York in 1978.

(c)—Venam Holding Co., New York is owned: 15% by Banco la Guaira Int'l, Cacacas; 35% by individuals; and 50% by Venezuelan Industrial Cos.

N.A.—Not available.

Countries are listed alphabetically. Within a country, parents banks are listed alphabetically. Average assets and deposits for June are used for branches & agencies, while June 30 data are used for commercial banks, Edge banks and investment companies. Total loans were used for Edge banks on 6/30/85 and not C&I loans. Yearend 1984 (and 1983) data are used for finance companies.

(a)—Assets shown are for 12/31/84, or nearest fiscal yearend, for banks providing data for American Banker's annual survey of the world's largest banks, published in July, 1985. For other banks, latest available data was used. **(b)**—Ratio represents the June assets of the bank's U.S. office(s) to the bank's total worldwide assets the previous yearend. **(c)**—Office types are: B=Branch; C=Commercial Bank; E=Edge bank; EB=Branch of Edge bank; F=Finance company; and I=Investment company. Abbreviations for locations are:Chi=Chicago; DC= Washington, D.C.; LA=Los Angeles; NY=New York City; and SF=San Francisco. **(d)**—Closed Houston Edge bank 6/85. **(e)**—In Sept. 1984, Bank of Montreal acquired Harris Bankcorp Inc., Chicago, which owns Harris Bank and Trust Co., Chicago, and Harris Bank International Corp., New York, and six other commercial banks in Illinois. **(f)**—Parent bank collapsed on 9/3/85. **(g)**—The Beaverton branch and one Portland branch were absorbed by Oregon First Bank, Portland, 7/27/85. Also moved head office of its San Francisco bank to Los Angeles 10/15/85. **(h)**—Bank merged into National Bank of Canada, Montreal, 11/85. New York office closed 1/86. **(i)**—Edge bank merged into Pacific National Bank, Miami, 7/22/85. **(j)**— Atlanta agency, which operates as a representative office, is not included in the office count. **(k)**—Also known as Union Bank of Bavaria. **(l)**—According to the Far Eastern Economic Review, this troubled bank may be acquired through capital injection by the Peking-owned China International Trust and Investment Corp. **(m)**—Rescued from insolvency by the Hong Kong Government in 6/85. **(n)**—Allied Irish Banks also owns 45% of First Maryland Bancorp., Baltimore. **(o)**—Also owns 48% of New Mexico Banquest Investors Corp., Santa Fe., which is second tier holding company for New Mexico Banquest Corp. The latter company is a multibank holding company for: Banquest First National Bank, Santa Fe; Banquest First State Bank, Taos; and Banquest National Bank, Albuquerque. **(p)**—Bank is also known as Swiss Credit Bank. New York branch is listed as Swiss Credit Bank.**(q)**—The bank—UBAF Arab American Bank, New York— is part of the Al UBAF Banking Group, Neuilly, France. The bank has 20 shareholders. For the list of these shareholders see footnote (k) of the Commercial Bank Subsidiaries Listing. **(s)**—One of the six European banks that own European American Bank **(#)**—Its commercial bank subsidiary owns an Edge bank. To avoid double counting, the Edge bank is omitted from the totals. **(*)**—Office is in the foreign bank's "Home State". **(†)**—Data not available for this office. **(††)**—Office opened, or acquired, after 6/30/85, but is included in the office count. **N.A.**—Not Available

Source of branch, agency, Edge bank, and investment company data is the Federal Reserve Board's reports of assets and liabilities for these respective banking offices as of June 30, 1985.

Most of the commercial bank data were provided to American Banker directly from the banks. However, in some cases, June 30, 1985, data were provided by ADP Data Services Division, New York, from their data base derived from Federal Reserve Board call report computer tapes. Finance company and were obtained by American Banker directly from the companies.

Definitions and Data Sources Used in Statistical Listings of Foreign Banks

The *American Banker's* study of foreign banking in the United States provides data on commercial and industrial loans, deposits, and assets of the U.S. banking offices of foreign banks as of June 30, 1985.

The data are presented in 18 tables. Sources of the data are given here as well as in the table footnotes. Definitions of the various terms used in the study appear below.

Full-scale banking offices of foreign banks include commercial bank subsidiaries, branches, agencies, Edge Act banks, New York State investment companies, and finance company subsidiaries.

Agency: According to the International Banking Act of 1978, an agency is "any office or any place of business of a foreign bank located in any state of the United States or District of Columbia at which credit balances are maintained, checks are paid, or money is lent, but deposits may not be accepted from a citizen or resident of the United States."

Branch: A branch is defined as "any office or any place of business of a foreign bank located in any state of the United States or the District of Columbia that may accept domestic deposits that are incidental to, or for the purpose of, carrying out transactions in foreign countries."

In New York State, a large number of agencies of foreign banks have been granted powers by the state to accept large-denomination deposits from both domestic and foreign residents. For that reason, the *American Banker* follows the Federal Reserve Board's policy of classifying these agencies as branches. These agencies appear in the branch listing and are identified by footnote "m" after their name.

The source of the branch and agency data is the "Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks." These institutions are required to submit this report on a quarterly basis to the Federal Reserve Board.

According to the Fed's instructions, each branch and agency is required to file a separate report, unless there is more than one such office in a particular city. If a foreign bank has more than one branch or agency office in a city, one consolidated report may be filed.

Edge Banks: An Edge Act banking corporation is a nationally chartered organization set up to engage in international banking and investment under the rules established in the 1919 Edge Act. The International Banking Act of 1978 permitted foreign banks to establish Edge banking offices.

An Edge bank can make loans, accept deposits, and provide a wide range of banking services, but all of these must be directly related to foreign or international transactions.

The source of the Edge bank data is a Federal Reserve computer printout, based on the Fed's Report of Condition for Edge Act and Agreement Corporations. These are unconsolidated data for the Edge and for each domestic branch of the Edge. To obtain total loans, deposits, and assets for each Edge, the head office and branch reports were combined.

Investment Firms: An investment company, under New York State banking law, is similar to a state-chartered commercial bank, with three major differences:

- An investment company is not subject to the 10% lending limitation. A commercial bank cannot lend to any one person an amount greater than 10% of its capital stock, surplus, and undivided profits.
- An investment company has no restriction on investing in stocks of corporations, while banks cannot acquire the stock of any corporation.
- An investment company cannot accept deposits, but can only maintain credit balances incidental to the conduct of its lawful business.

Only investment companies that are more than 50% owned by foreign banks are included in the listings.

The source of the 1985 investment company data was the Federal Reserve Board. The source of the 1984 investment company data was an *American Banker* questionnaire.

Most of the data for commercial banks were provided to *American Banker* by the banks and was taken from their federal regulatory "report of condition," or "call report."

Commercial and Industrial Loans: These are defined as loans for commercial and industrial purposes to business enterprises (proprietorships, partnerships, and corporations), whether secured or unsecured, single payment or installment. They may take the form of direct or purchased loans, such as commercial paper or bankers acceptances.

For branches and agencies, data are for C&I loans booked "domestically." For commercial banks, data are consolidated, including these banks' domestic and foreign branches and their Edge bank subsidiaries.

For all U.S. banking offices of foreign banks — branches, agencies, commercial banks, and investment companies — the C&I data are as of June 30, 1985. The data for finance companies and for one investment company are as of Dec. 31, 1984. The finance company data are taken from the *American Banker* survey of U.S. finance companies.

The deposit and asset data for branches and agencies are averages for the month of June 1985. For commercial banks, Edge banks, and investment companies the data are as of June 30, 1985.

'Domestic' Defined: The *American Banker* has modified the Federal Reserve Board's definition of "domestic" as it pertains to branches, agencies, and commercial bank subsidiaries of foreign banks. The *American Banker* includes foreign banks' banking offices in Puerto Rico, Guam, and the Virgin Islands, while the Federal Reserve Board does not.

In addition, the *American Banker* excludes the U.S. mainland offices of the Puerto Rican banks that are not owned by foreign banks. The Fed includes these branches in their data. For these reasons, the aggregate data for foreign banks' branches and agencies published by the Fed in its *Bulletin* will differ from the *American Banker's* aggregate totals.

The *American Banker* follows the Federal Reserve Board's definition of "domestic" as it pertains to domestically booked C&I loans. This definition of domestic includes loans booked in any of the 50 states, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

— L. Michael Cacace

Foreign Institutions Gain Record Share of US Banking Market

Continued from Page 1

$360 billion.

In addition, total deposits at the U.S. banking offices of foreign banks were up 13.8% and total assets were up 11.3%, to $259.5 billion and $423.8 billion, respectively. In comparison, domestically owned U.S. banks had a 7.1% gain in deposits to $1.4 trillion on June 30, and assets were up 8.3% to $1.9 trillion.

The superior growth rates for the U.S. banking offices of foreign banks boosted their share of the U.S. business lending market to a record high 21.9% at midyear 1985. The previous record high was 21.7% at midyear 1982. Their share was 20.5% at midyear 1984. Record shares for deposits and assets were also established. The U.S. banking offices of foreign banks now hold 15.7% of the $1.66 trillion in total deposits held by all U.S. commercial banks, up from the previous high of 14.9% in 1984. Foreign banks also had 18.4% of the $2.3 trillion in assets of all U.S. banks, up from the record 17.7% set a year earlier.

Why are domestically owned banks selling their assets, and why are foreign banks major buyers?

There are two reasons for the sales by domestically owned banks. First, within the last 19 months, federal regulators imposed new capital adequacy requirements on U.S. commercial banks, which have caused them to scale back asset growth. In July 1984, the Federal Reserve Board proposed that both regional and multinational state member banks and all bank holding companies raise their minimum primary capital-to-assets ratio and their total capital-to-assets ratio one-half a percentage point each to 5.5% and 6%, respectively. And in February 1985, the Federal Deposit Insurance Corp. approved a final rule requiring all banks to increase the minimum primary capital and total capital ratios to the 5.5% and 6% levels, respectively.

Second, loan participation sales produce revenues for the bank without increasing loan risk. This is especially important to large banks that have experienced problems with their foreign and energy-related loan portfolios.

Foreign banks are buying for a number of reasons. First, they have been more willing to accept the thinner spreads available through loan participation sales than domestically owned banks, because the alternative lending opportunities for most foreign banks in the U.S. are limited. Most domestically owned banks have established customer relationships that foreign banks find difficult to break. As one foreign banker put it, "If you're in the U.S. pond, you have to swim in it."

Another reason for the purchases is that the size of the loan is a constraint for many foreign banks in the U.S. market. They could not provide a borrower with the entire amount. Thus, a loan participation is better than no loan at all.

And third, foreign banks' U.S. branches and agencies are not subject to the capital adequacy constraints imposed on domestically chartered U.S. banks.

These sales may indicate that fundamental changes are taking place in the U.S. commercial lending market. One foreign banker said: "The securitization of the U.S. commercial lending market has begun. This securitization will affect the fundamental relationship between the bank and the borrower. The bank has become a placement agent for the borrower."

Securitization is the sale of financial assets by an institution. The security purchaser invests in the pool and not the issuer. Securitization provides a bank with liquidity and allows it to shift market risk to investors.

These sales indicate that the investment banking function of the large domestically owned banking firms will grow in both importance and size. ■

Summary of Foreign Banking Survey Findings

The *American Banker* survey of foreign banking in the United States includes data from 251 banks from 54 countries with 616 foreign banking offices in the United States.

In the following highlights from those findings, the U.S. banking offices of foreign banks include branches, agencies, commercial bank subsidiaries, Edge Act banks, New York State investment companies, and U.S. finance companies owned by foreign banks.

- The Hongkong & Shanghai Banking Corp., Hong Kong, had $7.3 billion in business loans booked through its United States banking offices at midyear 1985, making it the largest foreign bank in the United States in commmercial and industrial loans for the fifth consecutive year.
- In addition, Hongkong & Shanghai surpassed Midland Bank PLC of London as the top foreign bank in total assets held by its U.S. offices, with $23.7 billion on June 30, down from $23.9 billion on June 30, 1984. In terms of offices, Hongkong & Shanghai has the largest presence, with 19 in the United States. These comprise 13 branches, two agencies, two Edge Act corporations, and two commercial bank subsidiaries.
- Midland Bank, which recently arranged to sell its major U.S. subsidiary — the Crocker National Corp. of San Francisco — to Wells Fargo and Co., also of San Francisco, was the top foreign bank in deposits generated by its U.S. offices, with $16.4 billion. In addition, Midland was the fourth largest foreign bank in business lending, with $4.5 billion, and it was second in assets with $22.7 billion, down from $28.1 billion the year before.
- Fuji Bank Ltd., Tokyo, which became the second largest foreign bank in commercial and industrial loans after acquiring Walter E. Heller & Co., a commercial and industrial finance company, in 1984, retained its No. 2 position, with $6.7 billion, jumping 17.5% from its midyear 1984 total of $5.7 billion.
- Bank of Tokyo, for the second year in a row, ranked third among foreign banks in business loans booked in the United States. With $5.7 billion in business loans, it was up 10.4% from $5.2 billion the previous year.
- Industrial Bank of Japan Ltd. ranked 12th at midyear with $2.5 billion in business loans booked through its U.S. offices. The Tokyo-based bank acquired 51% of the J. Henry Schroder Bank and Trust Co. of New York — formerly owned by a London-based holding company, Schroder's PLC — effective Dec. 31, 1985. If the acquisition had taken place before June 30, Industrial Bank of Japan would have ranked as the eighth largest foreign bank in the United States in business loans, with approximately $3 billion. The acquisition of a foreign bank's U.S. commercial bank subsidiary by another foreign bank in the United States was the first major one of its kind.
- The most dramatic increases in business loans outstanding at U.S. offices came from Banco di Napoli and Bank of Montreal. Banco di Napoli, which has one New York office, a branch, posted a 287% increase, from $326 million to $1.3 billion. Antonio Sussi, executive vice president and manager of the branch, attributed the rapid loan growth to the bank's "commitment to become a significant factor in the domestic market." He added that Italian banks generally have become more aggressive in the United States.

Bank of Montreal, whose business loans in the United States increased 147%, to $4.4 billion, jumped 13 places to become the fifth-ranked foreign bank in commercial and industrial loans outstanding. Bank of Montreal's tremendous increase was due to its September 1984 acquisition of the Harris Bankcorp, which had $8.8 billion in assets at yearend 1984.

- Forty-three percent of all the foreign banking offices in the United States are located in New York, which heads the list of the 10 cities with the most foreign banking offices. New York has 405 foreign banking offices — more than the combined totals of Los Angeles, San Francisco, Chicago, Houston, Miami, and Washington, D.C. New York's net increase of 22 foreign banking offices outnumbers the new offices at the other nine cities on the top 10 list taken together.
- Japan is again the leading foreign lender to businesses in the United States, with $39.7 billion in commercial and industrial loans by Japanese banks in the United States. Though this represents an increase of 8.8% over Japan's midyear 1984 total of $36.5 billion, Japan's share of the total foreign lending market in the United States decreased from 37.6% at midyear 1984 to 35.5% at midyear 1985.
- The United Kingdom is the second largest foreign business lender in the United States, with $16.8 billion, up 3.7% from last year's total of $16.2 billion. British banks together with Japanese banks account for more than half the business loans from foreign countries with banking offices in the United States. Like the Japanese banks, however, the British banks' share of the market decreased, from 16.7% at midyear 1984 to 15% at midyear 1985.
- Spurred by Bank of Montreal's acquisition of Harris Bankcorp, Canadian banks posted a 45% increase in business lending, making Canada the third largest and increasing its share of the market from 8.5% at midyear 1984 to 10.7% at midyear 1985.
- Foreign banks through their U.S. offices had a total of $111.8 billion in business loans at midyear 1985, up from $97.1 billion at midyear 1984, or an increase of 15.1%. The growth of business lending at U.S. offices of foreign banks was more than double the 6.8% business loan growth rate at all U.S. commercial banks last year.
- Italy had the largest percentage gain among the top 10 foreign countries booking business loans through their U.S. offices. Its commercial and industrial loans increased 54%, to $6.3 billion from $4.1 billion the year before.
- Forty-six percent of all business loans booked by foreign banks in the United States were booked through their branches. Branches make up more than half of the 616 U.S. offices of foreign banks. One-third of the loans were booked through the 73 commercial bank subsidiaries, and the 181 agency offices booked 14% of the loans.
- Dai-Ichi Kangyo Bank's loans at its New York branch climbed 32%, to $2.2 billion, to become the biggest foreign bank branch in terms of lending in the United States and the only foreign bank branch with loans totaling more than $2 billion.
- The location of the largest agency office in business loans moved this year to Atlanta from Los Angeles. Toronto Dominion Bank's Atlanta agency office had $917.7 million in business loans, surpassing Industrial Bank of Japan's Los Angeles agency office, which this year posted $917.4 million.
- Marine Midland Bank, the Buffalo-based subsidiary of the Hongkong & Shanghai Banking Corp., was the largest foreign-owned commercial bank subsidiary in the country in terms of commercial and industrial loans. Its portfolio totaled $6.7 billion, down from $6.8 billion the previous year.
- U.S. banking offices of foreign banks increased their share of the U.S. lending market to 21.9% at midyear 1985 from 20.5% on June 30, 1984.

— Irene Appelbaum

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **International Banking Annual** survey that appear in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

Number of Foreign Banking Offices in US Rises by 3.8% in 1985

Continued from Page 1

resentative offices increased 9.2%, to 322, compared with 295 in 1984. Edge banking offices totaled 37, down from 41 the year before.

The number of cities with foreign banking offices also increased, to 55 from 46. Eight of the cities are in Illinois. In September 1984, Bank of Montreal acquired the Harris Bankcorp, a Chicago multibank holding company that owned banks in the Illinois cities of Barrington, Glencoe, Hinsdale, Naperville, Roselle, Summit, Winnetka, and Wilmette. A representative office also was opened in Baltimore.

New York had the most branch offices with 195, the most commercial bank subsidiaries with 26, and the most representative offices with 129. Also, the 10 foreign-owned New York State investment companies, which are similar to state-chartered banks, are located in New York City.

Los Angeles had the most agency offices with 57, and Miami had the most Edge bank offices with 11.

Canadian banks increased their U.S. banking offices by 11, the most new offices opened by any country in 1985. All 11 offices belong to the Bank of Montreal, and all but one, a new Chicago branch, was attributable to the acquisition of Harris Bankcorp. The Harris acquisition gave Bank of Montreal nine commercial banks in Illinois, and gave the Harris Bank International Corp. of New York an Edge bank.

The Hongkong & Shanghai Banking Corp. of Hong Kong opened seven new offices. Six are New York branches acquired from Golden Pacific National Bank after it was closed by the Comptroller of the Currency. The other office is a new commercial bank subsidiary — Marine Midland Bank (Delaware), Wilmington.

The Edge banks that closed were: the Los Angeles branch of Marine Midland International Bank, Miami; European American Bank International, Los Angeles, which was sold; Commind International Banking Corp., Houston; and Banco del Pacifico International, Miami, which was merged into Pacific National Bank, Miami.

An Edge bank can make loans, accept deposits, and provide a wide range of banking services, but all of these must be directly related to foreign or international transactions. Foreign banks were permitted to open Edge offices for the first time in 1978.

Other offices that closed included: the New York branch of Banco Urquijo Union, Madrid; the New York branch of Banque de l'Union Europeenne, Paris, after Banque de l'Union merged with Credit Industriel et Commercial, Paris; and the New York office of Grindlays Bank Ltd., London, after Grindlays was acquired by the Australia and New Zealand Banking Group Ltd. of Melbourne.

Two of the Oregon branches of Canadian Imperial Bank of Commerce, Toronto, —one in Beaverton, the other in Portland — were absorbed by Oregon First Bank of Portland. ■

Maryland Thrift Plans Public Offering

Special to the American Banker

BALTIMORE — John Hanson Savings and Loan Inc. said it will make an initial public offering of its stock in hopes of raising about $20 million in capital.

The company said the funds would be used to increase its regulatory net worth and retire $11.25 million in State of Maryland bond anticipation notes it received last fall so it could meet the financial standards necessary for federal deposit insurance.

John Hanson was the second largest S&L in Maryland's privately insured thrift system when the system collapsed last May.

Although John Hanson had applied for federal deposit insurance before the collapse, it had not received approval from the Federal Savings and Loan Insurance Corp. by May.

As a result, the association was among the 100 S&Ls that had withdrawal restrictions. Maryland Gov. Harry R. Hughes placed withdrawal limits of $1,000 a month per account on all associations until they could receive federal deposit insurance or demonstrate they were financially sound.

In order to help S&Ls qualify for federal insurance, the state government offered capital infusions in the form of bond anticipation notes. In return, the state received an equity position in the S&Ls.

John Hanson received its bond anticipation notes on Sept. 19, and after the public offering of stock, it will be in a position to pay off the notes. ■

Pennsylvania . . .

Continued from Back Page

Analysts and bankers are skeptical, however.

No bankers are commenting officially, but one said unofficially, "Who needs First Pennsy's 65 offices in the Philadelphia area? We have plenty of bricks and mortar of our own."

First Pennsy's branch network could be attractive, of course, to an out-of-state or foreign institution seeking a Philadelphia presence, come regional or interstate banking. The state House is considering a Senate-passed bill that would enable Pennsylvania to participate in an interstate banking region with neighboring states. So far, however, one big player — New York State — is excluded, and the Senate has moved the national trigger back from three to five years. The issue is being fiercely debated in the House, and the Senate trigger could be changed.

Another plus is First Pennsy's strong consumer franchise. Customer loyalty helped pull the bank through troubled times before and during the bank-and-FDIC rescue of the early 1980s. Of the seven biggest commercial banks in Philadelphia, First Pennsy has 12.7% of retail deposits.

But bankers and analysts ask: Why would anyone want First Pennsy's $450 million in Latin American credits? Or the bank's high percentage (3.4%) of nonperforming loans?

Still, First Pennsy is recovering slowly, and $180 million in tax benefits lie waiting for anyone with the appetite to swallow them.

George A. Butler, chairman and chief executive officer of First Pennsy, said he has been hearing foreign-acquisition rumors ever since he took over as No. 1 in 1979. He acknowledges talking to upwards of 30 domestic banks in recent years about interstate banking — but in general, rather than specific, terms. And what banker hasn't discussed interstate banking in general terms?

Mr. Butler has repeatedly said the company will consider any and all options, including acquisition by another bank, continuing on alone as a major regional bank, or maybe — just maybe — even acquiring a smallish bank for itself. ■

Spotlight . . .

Continued from Back Page

Jersey banking company. In 1984, the Federal Reserve Board and the courts shot down Mellon's attempt to acquire Heritage Bancorp. in Jamesburg, N.J. Heritage was eventually acquired by Midlantic Banks Inc. in Edison, N.J.

United Jersey Banks Inc. in Princeton, the state's third largest banking company, showed the strongest rise in stock price — about a 72% gain — last year of any the large New Jersey banks. Other strong market performers have been Summit Bancorp. in Summit, which showed a 66% increase in price, and New Jersey National Corp. in Trenton, which advanced about 57%.

Among the larger Pennsylvania institutions, Pennbancorp, which is based in the western Pennsylvania city of Titusville, is the hottest takeover prospect. The stock price of the $3 billion-asset company more than doubled last year.

"Pennbancorp, like many other institutions, would undoubtedly prefer to remain independent, but there is no denying its attractiveness to large out-of-state banks seeking entry," said Victor D.M. Tom in a recent report for the Merrill Lynch Capital Markets Group.

The Titusville banking company is located near the Ohio border, and that is where the interest is likely to come from.

Other strong market performers from Pennsylvania include Keystone Financial Corp. in State College, whose stock price rose about 81% last year; and Continental Bancorp, Norristown, and Meridian Bancorp, Reading, whose stock prices rose about 52%.

David Lazar, a Philadelphia bank stock analyst for Ryan, Beck & Co., said First Valley Corp. in Lansford and Merchants Bancorp in Allentown are good interstate banking plays.

— Bart Fraust

State Roundup . . .

Continued from Back Page

pass in some form by March 31.

DELAWARE: No significant legislation is planned or pending. Francis Morris, executive vice president for the Delaware Bankers Association, said: "I suppose it would be accurate" to say state bankers are satisfied with the status quo.

John M. Mularkey, the state's banking commissioner, said: "I've told the bankers here that if New Jersey and Pennsylvania pass their bills, they're going to be an island. But there's just no push for regional interstate banking, because most of the Delaware institutions are afraid they'd be acquired, rather than do the acquiring."

Banks Cautiously Venture into Travel Business

By KRISTINE A. DEDRICK

SAN FRANCISCO — Ready to take that cruise you've always dreamed of? Or is it just another — yawn — business trip to visit company headquarters? Whatever your travel needs, just stop by your bank and make reservations.

Your bank?

The scenario may be premature, but it is not farfetched. Banks are cautiously eyeing the travel business, and the travel industry sees them coming. At a recent conference here on marketing travel services in banks, travel professionals outnumbered bankers two-to-one. The conference was sponsored by The Bankers Institute, an organization based in Corte Madera, Calif., that specializes in educational programs for financial institutions.

Why should a bank get into the travel business and will consumers view banks as legitimate providers of travel services? First, it's a big business. With $200 billion in annual sales, the travel industry is the nation's second largest industry, and it's projected to be the largest by the end of the decade, according to James M. Shelton, president of The Bankers Institute. The benefits of entering it range from being able to offer customers a new service and cross sell existing bank services to potential new fee income and commissions, depending on the extent of the bank's involvement.

A study done in July 1985 reported that 41% of airline travelers who make more than three airline trips per year definitely or probably would use a bank or financial institution instead of a travel agency. The survey was conducted by Opinion Research Corp., the research arm of Arthur D. Little Inc.

Based on the 41% figure, total travel sales per 10,000 customers were projected at $2 million. With standard commissions in the industry at about 10%, this could mean as much as $200,000 in commissions per 10,000 customers. These figures seemed to pique the interest of many of the bankers at the conference.

"When you come in as ABC Bank Travel you have a leg up," said James W.S. Dullum of Sontag Annis & As-

Biggest Energy Lenders Construct Damage Scenarios While Waiting for Volatile Market to Stabilize

By RICHARD RINGER

CHICAGO — When the computers at Allied Bancshares Inc., Houston, spit out the numbers showing the impact of lower oil prices on the company's energy portfolio, the results likely got a thorough review.

The sensitivity analysis showed that at $20 a barrel for oil, Allied would "be safe on interest and principal" on its outstanding $636 million in energy and energy-related loans, said Jay Crager Jr., the company's executive vice president and chief financial officer. If oil prices settle at $15 a barrel, Allied's energy and energy-related borrowers might not be able to stay current on their interest payments. Allied is "safe on principal" on those outstanding loans at the $15-per-barrel price, said Mr. Crager.

The big unknown for Allied and other banks with sizable energy and energy-related loan portfolios, of course, is at just what price per barrel oil will settle. And until bankers feel more confident at what prices crude will settle, energy companies may find it more difficult getting new loans. "Businessmen will take risks," said an economist at RepublicBank Corp., a big energy lending bank in Dallas. "But no one knows what the risk is" nowadays because of falling crude prices, he said.

The last six weeks or so, the spot and futures markets for crude have been active and volatile. No one reasonably can predict where crude prices will settle. The trend, unfortunately, is not a good one for energy lending banks.

On Feb. 4, crude oil prices plunged to new six-year lows of less than $16 a barrel on the spot and futures markets. The same day, spot prices for the U.S. benchmark West Texas Intermediate fell to $15.45, the lowest price since spot market prices for that crude became available in 1979. And at the New York Mercantile Exchange, crude for March delivery tumbled to $15.44 in active and volatile trading.

Last week, crude prices rebounded before easing again. The price of West Texas Intermediate closed at $16.50 a

December..	24	$573.7M	$400.6	$30.8M	1.4	18.6
November..	18	$532.7M	$229.3M	$36.0M	2.3	14.8

NEW YORK — Of the interstate acquisitions announced in January, midwestern banks were the cheapest and southern banks the most expensive in relation to the equity and the earnings of the acquired institutions.

- See Tables, Pages 37,38, and 40
- Sanwa to Buy Lloyds Unit, Page 3

Overall, interstate deals were pricier than in-state acquisitions, particularly in relation to the earnings of the acquired banks.

However, last month's three biggest deals in terms of total purchase price were all in-state transactions. In fact, the largest proposed acquisition of the month was not a deal at all, but rather a "hostile" tender offer by Great Western Savings of Beverly Hills, Calif., for Citadel Holding Co., a thrift holding company based in Glendale, Calif.

Of the 27 acquisitions proposed last month, 13 were interstate mergers. Financial terms were disclosed for 11 interstate acquisitions and 10 of the 14 in-state deals.

The 11 interstate deals were signed at prices representing an average multiple to equity of 1.9 and an average multiple to earnings of 13.2. In contrast, the 10 in-state transactions were proposed at prices representing an average 1.7 times equity and 9.1 times earnings.

These multiples are used by banking analysts to get an idea of how much a buyer is willing to pay to acquire the net worth and earnings of a company. In 1985, the average multiple to equity was about 1.9 and the average multiple to earnings was about 14, according to a recent survey by the Merrill Lynch Capital Markets Group. That survey was based on a sample of 120 acquisitions.

The Midwest was the busiest region last month in terms of acquisition activity. Nine deals were announced involving midwestern institutions, including five interstate mergers. The multiples, which were the lowest anywhere in the country, were virtually identical for both in-state and interstate mergers — about 1.6 times equity and 11.5 times

Energy Lenders in Texas, Oklahoma Assess Effect of Plummeting Oil Prices

Continued from Page 1

barrel on Thursday.

Some analysts say the long-term prospects for crude prices are not encouraging. Henry L. Woytyla, an energy analyst with Rosenkrantz Lyon & Ross, said that under current conditions and a 2% increase in oil consumption, it would take 10 years to absorb the oversupply of crude. Moreover, Mr. Woytyla said $15 a barrel for crude is near the long-term average price.

Contracts Offer Protection

The recent free-fall in crude prices has bankers on edge and their computers running to constantly monitor the impact of falling prices. Some energy lenders have managed to stay protected despite the recent oil price declines. Some of their loans are based on the contract price of oil the borrower agreed to before the precipitous drop in oil prices. If, for example, an oil producer agreed late last year to sell oil at $24 per barrel, the producer is getting a higher price and is thus better able to repay his debts.

But that situation is temporary. "There's no question that contract prices will follow the spot and futures prices," said Frank Anderson, a banking analyst with Dallas-based Weber, Hall, Sales & Associates Inc.

And there is another bugaboo. Some contracts allow prices to be adjusted to reflect market conditions. Contracts can be cut with a day's notice, and more companies are abrogating contracts, said J.P. Bryan, president of Schroder Torch Energy Advisors Inc., a Dallas-based firm that manages $400 million in oil and gas properties for institutions.

The latest round of price declines is unnerving to all types of energy lenders. For those banks with production and exploration loans secured by oil reserves, the collateral value of the reserves simply evaporates with each additional decline. "I wouldn't rush into a major Texas bank and ask for a loan based on reserves," said Mr. Bryan.

Last week, Comptroller of the Currency Robert L. Clarke said he might order more examinations of Texas banks if conditions worsen.

Loans with oil or gas reserves were long considered the safest energy lending that could be done, said Mr. Bryan. That is no longer the case. Banks "never thought that they would have to write off" reserve-based loans, he said. But now, they probably will.

Especially hard-hit are companies in the supply, service, and drilling sectors of the energy business. With no or little exploration and drilling work under way because of the lower crude prices, those companies cannot generate the cash flow needed to repay their bank loans.

Indeed, fewer oil rigs are operating as a result of weakening crude prices. Hughes Tool Co., which tracks the number of operating rigs, counted 1,496 active rigs last week. That is 98 fewer than the previous week, and 31% lower than the same time last year. The total last week was the lowest since May 1976.

In late January, Global Marine Inc., the Houston-based company that is one of the largest publicly held drilling firms, filed for Chapter 11 bankruptcy. It is estimated that $750 million of Global's $1.1 billion of long-term debt is secured primarily by the company's 35 oil rigs.

Global's action has sparked fears that other drilling firms also might seek protection from their creditors by filing for bankruptcy.

Finally, big, money center banks with outstanding loans to Mexico, a major oil-exporting country, face further problems. For energy banks that have loans to Mexico, their problems are compounded.

Mexico relies on oil exports to repay much of its staggering debt. As worldwide crude prices fall, Mexico says it is struggling to make $10 billion in interest payments on its $97 billion foreign debt. Mexico had intended to raise the $10 billion partially through oil exports.

Clearly, bankers have cause for worry. And they are nervous. As crude prices decline and bank balance sheets deteriorate, some banking companies are delaying the release of data pertaining to their energy portfolio. Some banks say data will not be released until their 1985 annual reports are distributed in March or April. Even some analysts grumble about the delay by some banks.

> ***I wouldn't rush into a major Texas bank and ask for a loan based on reserves.***
>
> *— J.P. Bryan, president of Schroder Torch Energy Advisors Inc.*

When crude prices do settle, analysts agree, banks almost certainly will end up with more energy loans written off or put on a nonaccural basis and will be stashing away a chunk of smaller earnings for possible loan losses. If prices settle at $20 a barrel for crude, energy banks would be able to reduce their level of nonperforming loans, said Georgia Head, bank analyst with Dallas-based Rauscher Pierce Refsnes Inc. But at $15 a barrel, she said, the recovery time for banks will be lengthened.

It all comes at a time when banks are struggling from previous losses and adjustments on their energy and energy-related portfolios. At yearend 1984, the last year for which complete data is available, seven Texas banks had an aggregate total of $2.31 billion in nonperforming assets. Of that amount, $1.3 billion were energy loans and energy-related credits. At yearend 1985, the same banks had an aggregate total of $3.44 billion in nonperforming assets. All but one of the banking companies, InterFirst Corp., had a higher level of nonperforming assets at the end of 1985 compared with 1984. And the four banks that categorized their nonperforming assets reported an aggregate total of $480.7 million in nonperforming energy credits.

The same seven Texas banks had an aggregate total of $723 million in loan chargeoffs in 1984, of which $239.5 million were energy loans or energy-related credits. In 1985, as the energy sector weakened, the banks wrote off an aggregate of $989.6 million in loans. Four of the banks that broke down their loan chargeoffs according to types of credits reported an aggregate total of $143.4 million in energy credit writeoffs.

Banks in Oklahoma May Be Hit Harder

Energy lending banks in Oklahoma eventually may be harder hit than the Texas banks, analysts believe. For example, the $2.2 billion-asset First Oklahoma Bancorp. in Oklahoma City last week reported its third consecutive annual loss. The banking company lost $42 million in 1985, or $4.31 a share. During the last three years, First Oklahoma lost a total of $106.2 million.

BancOklahoma Corp., the $3.07 billion-asset holding company in Tulsa, saw its earnings shrink by more than a third last year, to $6.15 million, from $20 million in 1984.

➧ Oil Prices: Page 29

Falling Oil Prices Aggravate Real Estate Headaches at Texas Banks

Continued from Page 28

To offset some of the problems, Texas and Oklahoma bank holding companies this year are likely to look for one-time gains to boost earnings, analysts believe. "We're likely to see a lot of that," said Ms. Head of Rauscher Pierce Refsnes Inc.

The sale of a banking company's headquarters building is used frequently as a way to boost income during lean times. Dallas-based InterFirst Corp. in September 1984 sold its interest in the InterFirst Two Building. The sale accounted for $70 million of the total net income of $117.9 million for the year.

Another Dallas banking company, BancTexas Group Inc., sold its Tyler, Tex., bank, which will result in a gain of approximately $3 million to first-quarter 1986 earnings. The sale of two other subsidiary banks is pending. BancTexas Group, which lost $35.3 million in 1985, said much of its problems are related to the worsening energy sector.

But banks can pare only so many assets to boost earnings. "At some point in time, you run out of asset-sale gains and can't continue without impairing the overall strength of the company," said Sandra Flannigan, an analyst at Paine Webber Inc. in Houston.

This year also will continue a pattern of cost containment and expense cutting already implemented by several big Texas banks, including InterFirst and Allied Bancshares Inc., Houston.

Even more drastic steps are under way to cope with slack energy-loan demand and increasing loan losses. BancTexas has hired the investment firm of Bear, Stearns & Co. to study ways of raising capital. Among the options are the sale of additional subsidiary banks, the sale of securities, and consideration of a merger partner for the company.

Dividend cuts are also possible for some banking companies. BancOklahoma cut its quarterly dividend to 10 cents from 22½ cents when the company announced its earnings last month.

When crude prices do settle, analysts agree, banks almost certainly will end up with more energy loans written off or put on a nonaccural basis and will be stashing away a chunk of smaller earnings for possible loan losses.

Regulators especially are keeping a close watch to make sure that dividend payments come from operating income.

Real Estate Loans Pose Threat

Energy loans are not the only worry for Texas banks. Falling crude and gas prices are exacerbating existing real estate problems, particularly in Houston. About one-third of Houston's economy is tied to the energy industry. During the boom days, oil companies expanded and new companies opened their doors. More office towers were constructed to accommodate them, and residential units were built to house the employees.

In both 1983 and 1984, Texas Commerce Bancshares Inc., Houston, had less than $1 million in net real estate loan losses. In 1985, real estate loan losses soared to about $29.7 million. Total net chargeoffs were $186 million for the year.

At the end of 1985, Texas Commerce's nonperforming real estate loans totaled $341 million, almost double the company's nonperforming energy credits of $176 million.

A considerable increase in the company's loan-loss provision caused Texas Commerce to post a $28.8 million loss in 1985's fourth quarter, the first quarterly loss in the company's history. At yearend 1985, Texas Commerce's loan-loss allowance was $281 million, up from $151 million at the end of 1984.

At Allied Bancshares, another Houston-based bank holding company, nonperforming real estate loans increased to $130 million at yearend 1985 from $50.4 million at the end of 1984. Allied, which wrote off a minuscule $301,000 in real estate loans in 1984, charged off $8.8 million in such loans in 1985.

Allied also charged off $33.7 million in energy loans in 1985, triple the $11.7 million charged off in 1984. Total loan chargeoffs for 1985 amounted to $89.3 million, up from $40.5 million the previous year.

Among the seven largest Texas banks in 1984, again the last year for which complete data is available, nonperforming real estate loans amounted to $488.7 million of the banks' aggregate total of $2.3 billion in nonperforming loans. The same banks wrote off $63.8 million in real estate loans in 1984.

Real Estate Research Corp., a Chicago real estate consulting firm, identifies Houston and Dallas as two of the most overbuilt real estate markets. Particularly overbuilt in those two cities, according to the consulting firm, is commercial real estate space. In June 1982, Houston had a downtown office vacancy rate of 2.3%. Three years later, in June 1985, the vacancy rate was 20.2%. For Dallas, the vacancy rate was 3.9% in June 1982 and 18.4% three years later.

"Real estate won't be the debacle that energy has been," said Mr. Anderson, the analyst at Weber, Hall, Sale & Associates Inc. Still, he and other analysts agree that real estate loan problems will force banks to take additional writeoffs and increases in provisions for potential real estate loan losses.

The continued problems in the energy sector are beginning to ripple throughout Texas and its economy. Loan growth at many banks is sluggish. Greg A. Oveland, president and chief executive officer at the $114 million-asset Kelly Field National Bank in San Antonio, said loans increased 32% last year. This year, Mr. Oveland said, he will be "lucky" if loans increase by 12%. Because of the slack loan demand, Mr. Oveland said he recently was asked by his board of directors to pare back the bank's budget. ■

H. Brent Beesley Named Head of Farm Credit Corp.

DENVER — H. Brent Beesley has been named president and chief executive officer of the Farm Credit Corporation of America, effective immediately.

Mr. Beesley, 40, succeeds Alton B. Cook, interim president of the corporation since its inception and chartering in July 1985. The corporation serves as the central policy-making and service organization for the $80 billion Farm Credit System.

Mr. Beesley served as director of the Federal Savings and Loan Insurance Corp. during the turbulent period of 1981-83. Most recently, he was chairman of First Charter Savings Bank in St. George, Utah.

"The appointment of Mr. Beesley as president and CEO is the culmination of a nationwide search that began almost eight months ago," said Grant T. Lucas, chairman of the corporation's board, following a special board meeting Thursday. "His training and experience in banking, government, law, economics, and agriculture make him uniquely qualified for this critical position in the Farm Credit System." ■

Tennessee Banking Firm Reorganizes Management

NASHVILLE, Tenn. — In a reorganization of the executive management at the First American Corp., Owen G. Shell Jr. has been named president and chief operating officer of the holding company and F.G. Cave Jr. moves up to vice chairman.

Andrew G. Higgins was elected president and chief executive officer of the holding company's principal subsidiary, the First American National Bank of Nashville, succeeding Mr. Shell.

Robert E. McNeilly Jr., a member of the corporate board, was elected board chairman of the Nashville bank, succeeding Kenneth L. Roberts, who remains chairman and chief executive officer of the parent corporation.

The First American Corp. has banks in all major cities in Tennessee

Banks Are Swimming in Loans

By SANFORD ROSE

How would most bankers react to the assertion that the loan-to-deposit ratio reached its highest point in a decade last year? Certainly, bankers in the money centers, as well as some in the Southwest and South Central parts of the country, would manifest a certain amount of surprise and skepticism. After all, loan demand in these areas is undeniably weak, if not entirely flat, and, besides, it is widely thought that bankers everywhere are becoming much choosier about whom they lend money to.

Nevertheless, the assertion may well be correct. At least it is correct if we extrapolate the results of the latest annual survey of a representative group of small and regional institutions conducted by Olson Research Associates of Greenbelt, Md.

These 100 banks, which account for 3.5% to 4% of the total assets of the banking industry, lent absolutely and relatively more in 1985 than in any year of the past decade. The loan-to-deposit ratio at such banks climbed to an astounding 75.9%, up early three percentage

International Loans of Japanese Banks Surge on Strength of Payments Surplus

By M.S. MENDELSOHN

LONDON — "The big difference between the oil exporters and ourselves is that they recycled their surpluses in the 1970s through other people's banks, and we are doing it through our own."

The speaker was a Japanese banker in London the other day, offering his explanation for the recent surge of Japanese banks to the top of the international lending league.

That worldwide phenomenon has been particularly pronounced here. In the past decade, Japanese banks have increased their share of foreign currency lending out of London from 14% to 32% of the total. Most of that increase in market share has been achieved in the past five years, and most of it at the expense of American banks, whose share of foreign currency lending out of London has fallen from almost 40% of the total to just above 15% in the past 10 years.

The sharp decline in market share experienced by American banks conducting international lending out of London is explained partly by the success of the international banking facilities, or IBFs, created in 1981. IBFs allow banks to conduct Eurobusiness from offices in the United States itself on the same favorable terms as Eurobusiness conducted from foreign centers.

In the past five years, the assets of IBFs have grown to about $200 billion, representing a massive repatriation of international banking business to the

Supreme Court Agrees to Hear Brokerage Case

Do Banks' Far-Flung Offices Violate Interstate Restrictions?

By BARTLETT NAYLOR and NINA EASTON

WASHINGTON — The Supreme Court Monday agreed to decide whether bank-owned discount brokerage operations that have interstate branches violate restrictions on interstate banking.

Discount Brokers

The court's ruling may guide the interstate expansion of bank services in general.

The immediate question in the case, Comptroller of the Currency vs. Securities Industry Association, is whether brokerage firms that are subsidiaries of a bank — as opposed to a bank holding company — are permitted to operate in branches divorced from the parent bank.

The case originally pitted the Securities Industry Association, a trade group representing Wall Street securities houses, against Security Pacific National Bank. The Los Angeles-based bank operates 20 brokerage offices, including 18 in nine states where it has no bank branches. In the most recent deci-

Funds, Brokerages Gain in IRA Assets, Trade Group Finds

By PHILIP T. SUDO

IRA WATCH

NEW YORK — Mutual funds and brokerage firms both doubled their IRA assets last year as they carved into the market share held by depository institutions, the Investment Company Institute said on Monday.

Figures released by ICI, a Washington-based mutual fund trade group, showed that individual retirement account assets in mutual funds rose to $31.6 billion at yearend 1985, from $16.5 billion at the same point in 1984. The brokerage industry (as measured by self-directed accounts) shot up to $29.4 billion, from $14.6 billion a year earlier.

In total, IRA assets increased to $199.8 billion, up 52.3% from $132.1 billion at Dec. 31, 1984.

Commercial banks and savings and loan associations still held the largest percentage of assets, though each lost market share. At yearend '85, banks held $51.5 billion (25.8% of the market), while savings and loan associations housed $44.5 billion (22.3%).

Those figures compare with $37.2 billion (28.2%) at yearend '84 for

Texas Bank Failure Is 16th in Nation in '86

Washington Bureau

WASHINGTON — The Comptroller of the Currency closed the First National Bank of Gorman, Gorman, Tex., last week and declared the Federal Deposit Insurance Corp. receiver.

The bank's deposit liabilities and certain of its assets were acquired by Citizens State Bank, a newly chartered subsidiary of Mid-Texas Bancshares Inc., Ft. Worth, and it reopened on Friday as Citizens State. Chartered in 1904, First National Bank of Gorman had deposits of about $13 million. The Comptroller said it had experienced substantial deterioration in the quality of its loan portfolio, which it was unable to remedy before the bank exhausted its capital.

The Gorman institution was the second FDIC-insured bank in Texas to fail this year and 16th in the nation. ■

nett said.

"Foreclosures are almost universally being met with bad faith lawsuits," he said, "and the trial lawyers are very good and very persuasive."

In addition, the term "bad faith" is not defined in the law. "What is bad faith?" Mr. Bennett asked. "Whatever the jury says it is."

Mr. Cadby said, "Some farmer will sue the bank because it advised him to sell his cattle. Afterwards the price goes up and he says he got bad advice. Some banks are being sued because they failed to live up to their line of credit. Some are being sued because they loaned entrepreneurs too much money. They argue that if they hadn't gotten that much money, they wouldn't have gotten into trouble."

The effect has been that "it is difficult now to get a loan," Mr. Cadby said. "Unless you can show that you have substantial collateral, you won't get a loan at all."

According to Mr. Bennett, more than six insurance companies have quit underwriting liability policies in the state, and he expects more to follow.

"We have a liability crisis in this country," he said, "but Montana has probably gone further than some states as far as banks are concerned. Recoveries are being made on theories that would have been rejected in the past, and the verdicts are probably larger and more frequent than elsewhere."

The need for a special session became apparent after a recent ruling by the state supreme court, which held that a state law setting a $300,000 liability limit on local government was "discriminatory and unconstitutional."

In order to institute a liability ceiling, the Legislature must have a two-thirds voter approval of a constitutional referendum that would grant the authority to set a cap. The language of the referendum will be developed during the state's special session.

Forrest H. Boles, president of the Montana State Chamber of Commerce, said the referendum will likely combine a limit on both local government and private sector liabilities.

Mr. Boles, who is also the acting chairman for the liability coalition, said the general business community has rallied around the issue and will press for "several significant pieces of legislation aimed toward reform."

Mr. Cadby predicted the referendum will pass when voted on in November. "The voters realize what damage these awards are doing to our economy," he said.

In the meantime, the Montana Bankers Association will form its own insurance agency in an effort to provide liability insurance for banks that cannot now get it. ■

banks, and $34.1 billion (25.8%) for savings and loans. In contrast, mutual funds increased their market share to 15.8% from 12.5%, and brokerage firms increased theirs to 14.7% from 11.1%.

The trend, which was not unexpected, is likely to continue through the 1986 IRA selling season. Many IRAs have now topped $10,000, leading taxpayers to view the account as an investment, rather than just a tax deduction. In addition, rates on certificates of deposit are down from past levels, which may lead investors to seek diversification and better returns elsewhere.

Alfred P. Johnson, ICI's chief economist, noted that "Americans are becoming good, conscientious consumers with their IRA money. They're shopping around for their IRAs as cautiously as they shop for microwave ovens or new cars. If CD rates aren't up to their expectations, they look elsewhere."

Regardless of where it's housed though, most IRA money is still invested conservatively. ICI data showed that 20.5% of mutual fund IRA assets were invested in money market funds. The next most popular funds, according to investment objectives, were growth (13.7%), growth and income (12.8%), aggressive growth (11.9%), corporate bonds (11.4%), and government income (10.8%).

■

Thousands of taxpayers are being told to prove they made IRA contributions claimed on their 1983 income tax returns — or send the Internal Revenue Service more money.

The IRS says 1983 deductions for IRAs are being disallowed in some cases because there is no proof that contributions to the accounts were ever made. The agency says its computers could not match the taxpayers' records with IRA records submitted by financial institutions.

In February, an IRS service center in Kansas City sent out 80,000 letters notifying taxpayers in Illinois, Missouri, Wisconsin, and Iowa of discrepancies. The notices ask taxpayers either to submit records backing up the contested figures or send more money to the IRS.

"We don't have a record of the IRA contributions and we are trying to learn why we don't," said Steve Mongeluzzo, a spokesman for the IRS in Chicago.

IRS officials said that the problem appears to be the result of a computer snafu but added that the source of the trouble is unclear. "I don't think it is fair to assume it is our problem," Mr. Mongeluzzo said.

As a result, taxpayers have been calling banks and other financial institutions, asking them to tell the IRS that the contributions really were made.

An official at the First National Bank of Chicago, for example, said the bank had received about 100 calls from customers in the past week.

"We've informed our customers and the IRS that First Chicago has complied with all IRA requirements, and we're continuing our efforts to clear the IRS' apparent confusion regarding 1983 reporting," the official said.

IRS computers are programmed to match figures on individual tax returns with corroborating documents submitted by financial institutions and employers. The program will pinpoint taxpayers who underreport taxable income by not listing dividend or interest income, or claim IRA contributions they never made.

But any error on the taxpayer's return or corroborating documents, such as an incorrect Social Security number, will prevent a match, thereby indicating the taxpayer has underreported income, the IRS said.

Ted Harris, a private attorney and accountant in New York, said he has heard several complaints about the mix-up from his clients.

"The problem is that we're supposed to verify the payments," he said. "It's a pain in the back, having to locate the receipt, photocopy it, and send it to the IRS."

He added that the cost incurred by the IRS in mailing and extra paperwork "adds up each time, and it ultimately costs us, the taxpayers." ■

Commercial . . .

Continued from Page 2

added to that.

"We feel it's fairly important that we pick up a billion dollars in retail deposits over the next 18 months."

Commercial Federal currently has about $1.6 billion in deposits.

Andrew V. Vindigni, an analyst with E.F. Hutton & Co., said Commercial Federal has several advantages in its interstate push, including excess computer capacity and strong management.

Commercial Federal is also in a strong financial position, Mr. Vindigni said. "If [interest] rates decline, there is tremendous upside potential," he said. And if rates increase, "they're fairly well matched on a one-year basis. They've positioned themselves well."

In addition, the company has "a lot of unrealized value," he said. "Substantial unrealized gains in the firm's mortgage-backed securities portfolio mean that stated book value is materially understated in the current interest rate environment."

Mr. Vindigni estimates Commercial Federal's "real" book value at about $35 a share, compared with its stated book value of about $22 and its current stock price of about $27. The company converted to stock ownership in December 1984 at an initial offering price of $8.50 a share.

Mr. Vindigni expects the company's expansion to include Iowa if and when it is permissible. "Expansion into Des Moines would be a natural extension of Commercial Federal's Omaha operation, and the thrift's recognition in Nebraska should allow it to penetrate that market."

Although Iowa is the kind of "heavy farm state" Mr. Fitzgerald said the company would avoid, Mr. Vindigni said that Des Moines and Omaha are very similar cities. ■

AMERICAN BANKER CAN BE READ DAILY VIA ONLINE SERVICES

American Banker stories and commentaries can be read through several electronic sources. These sources can provide early-morning access to the news, the ability to search for stories on chosen subjects in past editions, and clipping services, in which stories on preselected topics are delivered automatically to the reader. Telephone and terminal equipment are needed to use these services. A brief description follows.

BRS INFORMATION TECHNOLOGIES — Contains today's news stories in financial services, a financial services news summary, daily executive job changes, a daily calendar of events in Washington, and more. Thrifts Surge Ahead in Commercial Lending

Top 100 FSLIC-Insured Institutions Post 73% Growth Over One-Year Period; Industry as a Whole Is Up 60%

By L. MICHAEL CACACE

NEW YORK — Commercial lending increased 73% at the top 100 FSLIC-insured thrifts over the 12-month period ended Sept. 30, 1985, while commercial lending at all thrifts rose 60%.

The superior growth of the top 100 thrifts enabled them to increase their share of commercial lending by thrifts to 85.4% on Sept. 30, 1985, compared with an estimated 79.2% just 12 months earlier.

These are some of the findings of the *American Banker's* new survey of commercial lending by thrifts, published today.

The sizable growth in commercial lending by thrifts is attributable to two causes. First, most thrifts were not granted commercial lending powers until 1982, and thus growth rates are calculated from a very small base.

(The Garn-St Germain Depository Institutions Act of 1982 granted commercial lending powers to federal savings and loan institutions for the first

S&L Executives Enthusiastic About Corporate Business

BY LISABETH WEINER

CHICAGO — "It's fun to compete against banks," was the way Dennis Pearsall put it. "At a recent meeting of thrifts in commercial lending, everybody was upbeat and feeling good about what's going on," added the executive vice president and director of lending at Great Lakes Federal Savings and Loan Association in Ann Arbor, Mich.

What's going on is a jump in lending to the corporate sector by the nation's thrifts. Commercial loans grew 73% at the top 100 thrifts in 1985.

Federally chartered thrifts gained the power to extend loans to corporate customers in 1982, and New York State granted that power to its savings institutions in 1981. This became a way

All data are taken from the Quarterly Financial Report to the Federal Home Loan Bank Board for FSLIC-insured institutions. Data were provided to American Banker by **ADP Data Services**, New York, from their data base of FHLBB data.

According to the Federal Home Loan Bank Board's instructions to the Quarterly Financial Report, **commercial loans** are the sum of secured and unsecured loans. **Secured commercial loans** include "all loans on commercial properties having a security interest but not qualifying as a mortgage loan. Include also floor planning (wholesale) loans for automobiles or mobile homes. Retail auto loans should be reported here only if autos are for commercial use." **Unsecured commercial loans** "include all unsecured loans made for commercial purposes. Include unsecured construction loans to builders for the purpose of constructing new residential property. Also include overdrafts on commercial demand deposits." **Commercial loans** are the sum of FHLBB Quarterly Financial Report items A150 and A160.

Interest on Commercial Loans: "Report (gross) interest/dividends earned during the period on (commercial loan) assets. Include also amortization of premiums and discounts on these loans." It is FHLBB Quarterly Financial Report item D040.

Gross Operating Income: This is the sum of all interest and noninterest income earned during the period. It is FHLBB Quarterly Financial Report item D800 "Total Income".

Current Net Income is gross operating income (line item D800) minus total interest and noninterest expense during the period (line item E800). It is FHLBB Quarterly Financial Report item E810 "Current Net Income".

Commercial Loans/Total Assets (%): This is total commercial loans at the end of the period divided by total assets at the end of the period. It is expressed as a percent and rounded to the nearest whole percentage point.

Commercial Loan Interest/ Gross Operating Income (%): This is gross interest income earned on commercial loans during the period divided by gross operating income during the period. It is expressed as a percent and rounded to the nearest whole percentage point.

(a)— Converted from a commercial bank charter to a savings bank charter on Oct. 19, 1984. (b)— Data are for the Syosset Division only and does not include the Centereach division. (c)—On 12/31/85, First Federal Savings & Loan Association, Minneapolis, and Minnesota Federal Savings & Loan Association, St. Paul, merged to form a new institution, First Minnesota Savings Bank, St. Paul. (d)— The bank is a division of Long Island Savings Bank FSB, Syosset. Data are for the Centereach division only.

Tables Drawn from Several Sources

The *American Banker* listing of new financial institutions was compiled from several sources.

The commercial bank listings were drawn from data supplied by the Comptroller of the Currency, the Federal Reserve Board, state banking departments, and individual new banks.

The thrift listings were compiled from data supplied by the Federal Home Loan Banks, state savings and loan departments, and individual new thrifts.

The credit union listing was compiled from data published by the National Credit Union Administration.

The institutions are listed by name and city. The second line of the listing has the mailing address, followed by the zip code. The third line has the name of an officer of the institution, followed by the telephone number.

The *American Banker* will continue to publish listings of new financial institutions periodically. While every effort is made to compile as complete a list as possible from the sources listed above, some institutions may be missed.

Any new institutions that wish to be included in future listings, or institutions that were missed in this listing, should send the following information to the *American Banker*: name of the institution, address, phone number, date opened, initial capitalization, and the name of the president of the institution.

The information should be sent to Mark Basch, Staff Writer, *American Banker*, One State Street Plaza, New York, N.Y., 10004

American Security State Bank, Pensacola Box 17100, 32522-7100 Keith Golden, president, (904) 433-5551	Aug. 20	$1,450,000

**FIDELITY'S 12B-1 FUNDS:
FEE INCOME OPPORTUNITIES
FOR YOU.
INVESTMENT OPPORTUNITIES
FOR YOUR CORPORATE CUSTOMERS.**

Among Fidelity's institutional offerings, there are three funds designed to provide banks with exciting opportunities for generating fee income, enhancing their services to existing customers, and attracting new business.

I. Daily Money Fund

The fund invests in money market instruments to earn as high a level of current income as is consistent with the preservation of capital and liquidity. The Daily Money Fund offers two portfolios – the U.S. Treasury Portfolio and the Money Market Portfolio. For further flexibility, trades may be placed until 2:00 p.m. EST for same day investments.

II. Daily Tax-Exempt Money Fund

The fund seeks to obtain as high a current level of income, exempt from federal income taxes, as is consistent with a portfolio of high quality, short-term municipal obligations selected on the basis of liquidity and stability of principal.

**III. Fidelity Corporate Trust:
Adjustable-Rate Preferred Portfolio**

Composed of a portfolio of adjustable-rate preferred (ARP) stocks, the fund seeks to minimize principal fluctuation while enabling corporate investors to take full advantage of the 85% dividend received deduction.

For more complete information about these Fidelity funds, including 12b-1 plans, management fees, and expenses, please call 1-800-343-5409 for a free prospectus. Read it carefully before you invest or send money.

Lending . . .

Continued from Page 1

time, with commercial loans limited to 10% of assets.)

Second, thrifts have been attracted to commercial lending — especially secured loans on commercial properties — because the yields on these loans tend to be higher than loans on residential properties. Also, according to a thrift analyst, thrifts found commercial borrowers more receptive to adjustable-rate loans than residential borrowers.

Larger thrifts are growing faster than smaller thrifts in commercial lending because commercial loans usually are large loans and require a higher level of technical knowledge and expertise than residential loans. Thus, larger thrifts have an advantage over smaller thrifts.

Commercial loans are secured loans on commercial properties and unsecured loans for commercial purposes — including unsecured construction loans to builders for the purpose of constructing new residential property, as well as overdrafts on commercial demand deposits.

Data from Quarterly Reports

All data for this survey were taken from the quarterly financial reports submitted by FSLIC-insured institutions to the Federal Home Loan Bank Board. Data were provided to the *American Banker* by ADP Data Services, New York, from its computer tape of the Bank Board data base.

The top 100 FSLIC-insured thrifts had $10.98 billion in commercial loans outstanding on Sept. 30, 1985, or 85.4% of the $12.85 billion in commercial loans outstanding at all FSLIC-insured institutions on that date. For the 93 thrifts for which commercial loan data are available for both Sept. 30, 1985, and Sept. 30, 1984, commercial loans jumped 73%. Data from Sept. 30, 1985, are the latest available for individual institutions.

Commercial loans outstanding at all FSLIC-insured thrifts increased 60% — from $8.01 billion to $12.85 billion — over the 12-month period from Sept. 30, 1984 through Sept. 30, 1985.

Commercial lending surged in the fourth quarter of 1984. Commercial loans outstanding at all thrifts grew at an annual rate of 144% over that quarter to $10.9 billion on Dec. 31, 1984. For the full year 1985, commercial loans at all thrifts grew 33% to $14.5 billion on Dec. 31.

Old Stone Is No. 1

Old Stone Bank FSB in Providence, R.I., was the top FSLIC-insured savings institution in commercial loans outstanding as of Sept. 30, 1985, with $698.4 million. Old Stone converted from a commercial bank to a savings bank on Oct. 19, 1984, and commercial loans still comprised 30% of its assets as of Sept. 30, 1985. It has until 1989 to comply with the rule that limits commercial loans to 10% of assets.

Among the top 50 thrifts in commercial loans, the fastest growing was Atlantic Financial Federal, Bala-Cynwyd, Pa., which ranks 38th. Its commercial loans grew by more than 3,800%, increasing from $2.4 million on Sept. 30, 1984, to $92.4 million on Sept. 30, 1985.

A spokeswoman for Atlantic Financial provided a chronology of the thrift's growth in commercial lending. Atlantic Financial began its commercial lending operations in the summer of 1984. Commercial deposit accounts were set up in September, and its credit information system was put in place in November. In December its initial staffing was completed, and it opened a Northeast regional loan office. By year-end, commercial loans totaled $15.6 million.

The commercial loan portfolio grew to $37.9 million by March 1985, and in April of that year, Atlantic Financial opened its western regional loan office.

"Commercial lending rounds out our variable-rate loan program," the spokeswoman said.

Long Island Savings Bank FSB, Syosset, N.Y., posted the second-highest gain, 3,761%, from $2.4 million to $94.3 million. However, if the commercial lending operations of Long Island Savings' Syosset and Centereach divisions are combined, commercial lending increased more than 5,700%, to $140.2 million.

The Bank Board considers the Syosset and Centereach divisions separate institutions. For that reason, they are shown separately on the listing. The Syosset division of the bank ranks 36th, with $94.3 million in commercial loans, and the Centereach division ranks 76th, with $46.7 million. If the combined lending figure were used in the listing, the overall institution would rank 18th in lending.

A Long Island Savings spokesman said the bank's commercial loan portfolio shows substantial month-to-month movement. "Many of the loans are short-term participations in blue-chip firms," the spokesman said.

The table on the top 100 thrifts in

Comment . . .

Continued from Page 4

Some of the ideas — such as redefining nonperforming loans for call report purposes, encouraging states to liberalize branching laws in failing bank situations, and looking for ways to do more assisted open-bank mergers — have considerable merit. A number of others raise serious public policy concerns.

The most serious issue raised by the paper has to do with "cooking the books" in one fashion or another (e.g., loss deferral accounting) to enable failing institutions to remain in business longer, thereby exposing their competitors to potential cutthroat competition and the FDIC insurance fund to potentially staggering losses. Recent experiences in the S&L industry should have made obvious the dangers inherent in these approaches.

The FDIC and the Federal Home Loan Bank Board each faced tremendous pressures in 1981 to adopt "funny" accounting rules for savings banks and S&Ls and to relax capital standards. Both industries were very sick, and it was argued that they needed time to outgrow their problems. The Bank Board eased its requirements; the FDIC did not.

Today, many observers believe the S&L industry and the FSLIC fund are in worse shape than in 1981. There is no question that the mutual savings bank industry and the FDIC fund that covers it are in considerably better shape than in 1981. I believe the FDIC's maintenance of sound regulatory and accounting policies had more than a little bit to do with the difference in outcome.

If the problems among agricultural banks were of overwhelming proportions, the FDIC might be forced to turn to extraordinary measures to enable it to cope with the workload. But the FDIC paper projects roughly the same number of bank failures in 1986 and 1987 as occurred in 1985. The failure rate would have to at least double or triple before the FDIC would need to consider these types of policies, which it already has statutory authority to implement.

The paper suggests that perhaps the FDIC should take an equity position in the propped-up banks in order to compensate it for its increased exposure. Imagine how that will sit with the bank across the street — competing with an insolvent or nearly insolvent bank that is partially owned by the regulator!

Some might argue that we created the same situation at Continental Illinois National Bank and Trust Co., so we might as well do it elsewhere. That analogy has some serious flaws, but even if it didn't, one Continental Illinois transaction was distasteful enough from a public policy standpoint — we don't want or need a thousand more.

To be fair, it should be noted that the FDIC is not very enamored with these proposals and is simply trying to be responsive to pleas from industry trade groups and the Congress. I question whether the trade groups have thought through the long-range consequences of these policies.

Bankers, legislators, regulators, and others should take a good hard look at the myriad issue raised in these two papers. They present fundamental policy options that could affect the banking system for decades. The choices we make could well spell the difference between a strong free-enterprise banking system and one that is dominated, if not owned, by the government. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Top 100 Thrifts in Commercial Lending** table that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

Comptroller's Tough Policy Cited in Decline in Bank Openings

Continued from Page 1

91, but that was still a third less than the 1984 total of 136. California, which with 44 openings had the second highest number in 1984, had only 20 openings in 1985.

"It was not a slowdown," said John B. Sartain, a consultant to new banks. "It came to a screeching halt."

The real drop-off in new banks came near the end of the year, he said, after the Comptroller's office implemented a new policy regarding its approval of new bank applications. A proposed new bank must have a chief executive officer in place before its application is approved by the Comptroller under the policy that took effect on Sept. 23. Previously, the CEO did not have to be in place until after the application was approved.

Randall Miller, director of licensing, policy, and systems for the Comptroller, said the new policy was designed "to strengthen our ability to make a sound judgment on whether the bank has a reasonable opportunity for success." He said that the management, especially the CEO, is "a critical component of the charter application."

But people who start new banks say that they are finding it difficult to recruit good management before the bank is approved. "What CEO worth his salt is going to give his commitment [to an unknown new venture]?" asked Deborah Bateman, a new bank consultant in Phoenix.

Mr. Sartain said that about 90% of the new banks that are organized today hire a CEO after they have been approved. "The 10% that had a CEO were unique deals," he said.

He said that the new policy does not affect bank holding companies that open new banks, because they can move one of the holding company officers to the CEO position at a new bank. Independent banks "are going to have to get a 'rent-a-banker' " — a retired banker willing to take the CEO position while the bank is in organization, he said.

"It has closed the door for independent banks," he said.

The statistics show that the number of new national banks — banks chartered by the Comptroller — had a steeper drop than new state banks last year. The number of national bank openings fell from 249 in 1984 to 170 in 1985. State-chartered banks fell, but not as sharply, from 125 in 1984 to 109 last year.

In Texas, 16 new state-chartered banks opened in both 1984 and 1985. But the number of federally chartered banks fell from 120 in 1984 to 75 last year.

"We have shifted a bunch of our clients from national banks to state banks," said Mr. Sartain, who is based in Dallas.

Mr. Miller said that the Comptroller's policy may have discouraged some potential new banks, but that the overall decline in bank openings was little affected by it. "It was primarily affected by a change in market conditions," he said. "Investing in a new bank is just not the opportunity it was two or three years ago."

Mr. Sartain agreed that there were other factors contributing to the decline besides the Comptroller's policy. One of the reasons was that investors were not as willing to put up capital for new banks, because of "the perception that it might not be a good investment."

Another reason was that earlier in the year, the rate of denial of applications was higher than usual.

Ms. Bateman, the Phoenix consultant, said that another factor was the increasing difficulty of obtaining insurance for directors of banks. "That market has really tightened up a lot," she said.

She also feels that the lower number of bank openings in 1985 possibly reflects "what we would call a normal state" after three years of high growth.

While the number of new banks has declined after five straight years of increases, the number of bank failures has continued to rise. There were 120 Federal Deposit Insurance Corp.-insured institutions that failed in 1985. With 279 new bank openings, that means the ratio of new banks to failed banks dropped to 2.3 to one last year. The ratio was as high as 22 to one in 1981.

"I don't think that the charter authority has tightened up because they anticipate failure," said David Cates, a New York banking consultant. "Failures are coming out of old banks," not new banks, he said.

Ms. Bateman predicted that there will be a period of consolidation in the banking industry. "What may replace the de novo activity is the merger and acquisition activity," she said. "We will see the total number of banks decrease. Then the de novo trend will regenerate itself again."

For the near future, Mr. Sartain sees very little new bank activity, at least in Texas. "There might be a dozen [new banks] in 1986," he said.

While commercial bank openings declined in 1985, new thrift institutions increased. Seventy-seven thrifts opened their doors in 1985, compared with 64 in 1984.

Predictably, most of the new thrifts opened in three Sun Belt states — California, Florida, and Texas. There were 19 new thrifts in California, 18 in Florida, and 14 in Texas. ■

Memory Bank

Following are the answers to the Memory Bank Quiz on page 5.

1. Brazil's new currency, set at 13.8 per U.S. dollar. **March 3, page 2, column 3.**

2. The Fed approved Boatmen's merger with General Bancshares Corp., a St. Louis-based bank holding company that owns banks in Illinois and Tennessee through a grandfather clause in the Douglas Amendment. **March 3, 3:3.**

3. A promotion in which an automated teller machine will give out a $50 bill for a $20 withdrawal. **March 4, 24:1.**

4. A rash of "bad faith" lawsuits against Montana banks and a liability insurance crisis. **March 4, 8:1.**

5. Bankers Trust New York Corp. **March 5, 2:1.**

6. A stock market in Britain for trading units of major buildings, proposed by British commercial property dealers. **March 5, 2:1.**

7. Republic National Bank of New York. Deposits increased 123% in the last five years. **March 6, 1:2.**

8. $140,130. The theft was accomplished because a computer malfunctioned at a Richmond, Va., bank and failed to cut off the user of a stolen credit card. **March 6, 3:2.**

9. Underwrite and deal in commercial paper, municipal revenue bonds, mortgage-backed securities, and obligations tied to consumer receivables through a subsidiary not "engaged principally" in those activities. **March 7, 2:1.**

10. He is a cartoonist whose work appears in First Pennsylvania Bank publications. **March 7, 12:2.** ■

Collateral . . .

Continued from Page 2

Bankers Association's agriculture expert, says, "It's still too early to tell what will materialize in the states."

A form of central filing has actually been established in a number of states, including Connecticut, Delaware, the District of Columbia, Hawaii, Iowa, Kansas, Mississippi, Montana, Nebraska, Nevada, North Carolina, North Dakota, Oregon, Utah, Virginia (for grain only), Washington, and Wyoming.

To meet the requirements of the farm bill, though, each of these state filing systems would have to conform to as yet unpublished federal regulations. And that's not going to be an easy task, says Tom Olson, president of Lisco State Bank in Lisco, Neb.

With many specialty crops, particularly in California, the problem of buyer notification is resolved through "forward contracting," notes a farm expert with the American Bankers Association. Farmers may sell a crop well before it is grown, making it easy for the banker to keep guard over collateral.

"It's in the Midwest where producers wait until the last minute to find the best buyer," the ABA expert points out.

Congress was less than thorough in drafting provisions for a central filing system, says Mr. Phelps. "It's badly written," and even with the most sympathetic implementation will lead to an "administrative nightmare," he says.

James Maag, director of research at the Kansas Bankers Association, agrees, saying implementing a federal filing system will "create legal gridlock."

For example, simply assembling the information about the thousands of liens would take years. Kansas instituted a central filing system on its own 18 months ago and faces several more years of effort before it is fully instituted; yet the federal law mandates implementation this year.

Another "unworkable" requirement is that each listing include the farmer's social security number. That hasn't been done in the past, so administrators would have to review their thousands of existing liens and contact each farmer for his social security number.

In theory, buyers could telephone the state secretary about a lien and receive written confirmation one way or the other in 24 hours. But farm sales happen seasonally, with transactions totaling hundreds a day; buyers can't wait for confirmation, Mr. Phelps says.

Congressional Relief

The real answer is relief from Congress, says Mr. Yingling of the ABA. But Congress has proven itself stingy and lethargic on the details of law.

During last year's Capitol Hill contest, buyers complaining about "double jeopardy" won the day politically without citing figures of the damage.

So far, though the deadline looms in nine months, the pressure on Congress to change the law has been negligible. Rep. James Leach, R-Iowa, is usually swamped with letters about any farm problem, but to date, says an aide, he's only received two on the clear title question. "And they didn't ask Congress for a change," says the aide.

Notes one farm bank lobbyist, "I don't think groups such as the Independent Bankers will waste their chits on this one since they've got other problems." While Congress wants to wash its hands of farm legislation, there is pressure to amend other parts of the 1985 farm bill as well, so farm bankers may find a vehicle for their plight. But they'll be opposed by the same group that engineered the provisions.

And farmers are happy with the farm bill provisions.

Harold Dodd, a corn farmer and president of the Illinois Farmers Bureau, says the new law judiciously spreads the burden: Farmers have the burden of telling the lender whom they're going to sell to; lenders have the burden of telling the buyer; and buyers have the burden of getting the lender to sign off on all payments to the farmer.

"Farmers and buyers are satisfied. We don't think central filing is necessary," says Mr. Dodd. "And I don't hear much complaining from banks."

Mr. Phelps, however, thinks buyers will complain about direct notification. "They'll get inundated" with bank notices, creating clerical chaos.

Mr. Nunn, of Citizens Bank in New Mexico, adds that the real loser will be the federal government: Banks will shun questionable borrowers, who will be forced to seek government loans. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **New Bank Survey** that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to William Zimmerman, Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-5712.

Notes on Small Banks

By SANFORD ROSE

It used to be said that small banks both borrowed and lent cheaper than bigger institutions. In other words, these banks were beneficiaries of an unusually large depositor subsidy that was, in many cases, passed on to the borrower.

That characterization is no longer valid, if it ever was. Indeed, quite the reverse is true. In 1985, small banks both borrowed and lent at higher rates than larger institutions.

According to data just released by Olson Research Associates of Greenbelt, Md., a representative sample of banks with under $100 million in assets had a weighted-average asset yield of 12.36% in 1985. Their money cost was 7.93%. The comparable figures for a sample of banks with over a billion dollars in assets were 11.29% and 7.88%.

In a year of falling rates, community banks, benefiting from the comparative rate insensitivity of their commercial loan portfolios, saw their asset yield slide by only 71 basis points. Larger institutions, en-

Independent Bankers Plan to Reverse Stand and Oppose Risk-Based Premiums

By BARTLETT NAYLOR

LAS VEGAS — As banking regulators mull deposit-insurance reform, the Independent Bankers Association of America is preparing to oppose any move toward risk-based premiums, reversing its previous support for the concept.

The trade group's official policy must be ratified at today's general session of the association's annual convention.

Insiders working out the draft said the trade group's stand is the subject of fierce debate. Internal division over the issue is not likely to help the trade group's final position, whatever side is taken, given the banking industry's inability to sway Congress even with unambivalent stands.

At the same time, the association plans to call on Congress "to address the serious need for reform," according to a preliminary draft.

Foreign deposits and nondeposit liabilities should be assessed premiums, the group's policy makers advised in the draft written last weekend. Few community bankers have either foreign branches with deposits or nondeposit liabilities, such as standby letters of credit.

The association also plans to reiterate its support for limiting insurance for brokered deposits to $100,000 for each broker at each institution. Deposit brokers package deposits from a

Profits High At Top Fifty Independents

Lead Community Banks Show 2.5% to 4% Return on Assets

By IRENE APPELBAUM

NEW YORK — The nation's top 50 independent community banks are almost four times as profitable as the banking industry as a whole, a new *American Banker* survey finds.

Return on average assets at the 50 most profitable community banks ranged from 2.5% to more than 4% through the first three quarters of 1985. The return on assets for the entire industry was only 0.64% in 1984, according to the latest data available from the Federal Reserve Board. Little change is expected in the 1985 figures.

For survey purposes, a community bank was defined as an independently owned, federally insured commercial bank with assets between $35 million and $150 million. The top 50 banks are ranked according to return on average assets over the first nine months of 1985 (see table on page 27).

Senior officers at the top five community banks in the listing did not identify any single formula for success, but all agreed on the importance of understanding the customers and communities they serve. Having detailed knowledge of their customers and

Top 50 Community Banks Outpace All Banks in Profitability

Continued from Page 1

maintaining long-standing relationships enable them to price loans more effectively, they say, giving them a crucial advantage over big banks.

Most of the officers also cited control of noninterest expenses, particularly employee salaries, as important to their success.

Putnam County National Bank of Carmel, N.Y., with a 4.03% return on average assets for third-quarter 1985, heads the list of the top community banks. Putnam County National's net income for the first three quarters of 1985 was $1.7 million, compared with $1.3 million for all of 1984.

"One of the reasons for our success is the people who work for us," says bank president Marigrace Blanks. Turnover is very low, she says, and workers are highly motivated. The majority of the bank's employees are women, including 10 of the 13 officers, many of whom have worked their way up through the bank.

Mrs. Blanks cites "effective control on expenses" as another reason for the bank's extraordinary return on assets. On the investment side, Mrs. Blanks reports that the bank is mainly engaged in first mortgages because of the community it serves. Carmel, with a population of 28,000, is a bedroom community for New York City commuters.

Putnam County National's strategy, she says, is to "look for earnings and not for growth."

Indeed, five-year growth rates were only 34% in assets and 30% in deposits for the period ending Dec. 31, 1984, placing Putnam County National among the bottom five on the 50-bank list for asset and deposit growth. Thirty-seven banks on the list had five-year asset growth of at least 50%; 11 had asset growth of more than 100%. Sixteen had deposit growth of at least 50% for the same period.

Rancho Bank Takes a Different Tack

At Rancho Bank in San Dimas, Calif., No. 2 on the list with a return on assets of 3.95%, a very different strategy is at work. Asset and deposit growth from 1979 to 1984 — 520% in assets and nearly 800% in deposits — was far stronger than at any other bank among the top 50.

Rancho Bank does most of its business in commercial and construction loans, steering clear of first mortgages and other long-term loans, says president Gene Di Piano.

The bank keeps expenses and overhead down by paying employees higher salaries and having them do the jobs of three people, Mr. Di Piano says. He has no salesman at the bank other than himself, and he "goes out knocking on doors."

"You've got to care about your customers; most banks don't," says Mr. Di Piano, a self-described workaholic whose bank, he says, has 35% of the town's 24,000 people as its customers.

National Bank of Stamford in New York, the No. 3 bank, had a return on average assets of 3.94%. When asked whether control on expenses was an important reason for the bank's success, president Einar Eklund responded, "You have to spend money to make money." He attributes the bank's high return to a combination of good economic management of assets, people, and money. Finally, he cautions, "never get greedy" and "never be satisfied."

Brand Banking Co., No. 4 on the list of the top community banks, had a return on assets of 3.64%. Bartow Morgan 3d, president of the $97 million-asset bank in Lawrenceville, Ga., emphasized that the bank provides the gamut of services, including branches and ATMs.

Mr. Morgan cited geography as the main reason for the bank's success. According to Morgan, the bank's home county, Gwinnett, is the fastest growing in Georgia. He also says that knowledge of its customers gives the bank an advantage over larger banks. "Big branches can't make decisions; they don't know the customers," he says.

Pessimism in Montana

At Toole County State Bank in Shelby, Mont., vice president John Parker was less optimistic about the bank's No. 5 ranking, even with a hefty return on assets of 3.58% for the first three quarters of 1985. Citing agricultural loans and droughts, he cautioned that figures for the fourth quarter of 1985 and after would not be so impressive.

Competition from big banks is not much of a problem, he says. For one thing, the nearest one is 100 miles away. And given the problems banks in agricultural areas have had for the last few years, he does not think big banks were anxious to penetrate the area.

The listing also calculates an efficiency ratio for each of the 50 banks. The ratio is the net noninterest expense divided by the bank's net interest income. The measure tells how many cents it cost for each $1 of profit earned; the more efficient a bank is, the lower the efficiency coefficient will be.

American Banker defines a community bank as an independently-owned (not owned by a bank holding company) FDIC-insured bank (exclusive of non-deposit trust companies) with assets of $35 million to $150 million on Sept. 30, 1985. **Return on Average Assets** is calculated by annualizing net income for the first nine months of 1985 and dividing by average assets. Average assets were calculated by adding the total assets on Sept. 30, 1985, and Dec. 31, 1984 and dividing that sum by two. The **Efficiency Ratio** is net non-interest expense as a percentage of net interest income. It tells you how much it costs the bank— in cents— to generate $1 of net interest income. The **Growth Rates** show growth over the five-year period ended Dec. 31, 1984. **Net Income Per Employee** is net income (net income for the first 9 months of 1985 is annualized) divided by the number of employees at the end of the period.

Source of data: ADP Data Services, New York.

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Most Profitable Community Banks** survey that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

Community Banks

Continued from Page 27

Not surprisingly, virtually all the banks on the list showed good efficiency ratings. Thirty-one of the 50 banks had efficiency ratings of 25% or less, and eight had ratings of 15% or less. The top 20 community banks in return on assets accounted for six out of eight banks with the best efficiency ratios.

Toole County State Bank was the most efficient bank, according to the *American Banker* listing. Its efficiency rating was a mere 9%, indicating each dollar of interest income cost only nine cents to generate.

Since employee salaries are a major noninterest expense item, the bank's small staff (14 full-time employees) relative to its size ($46 million in assets) likely accounts for the high efficiency rating. The six other banks on the list with comparable assets, $45 million to $48 million, average 25 employees each.

National Bank of Stamford had the second-best efficiency rating with 10%. Citizens Bank in Delavan, Wis., was third with 11%, though it was 14th on the list in return on assets. The $48 million-asset bank has only 12 employees and has the highest net-income-per-employee ratio of any bank on the list, with $118,000 per full-time employee in the third quarter of 1985.

The top 50 community banks in return on assets represent 19 states, with eight in Texas, six in Kentucky, and five in Georgia. ■

estimates that 75% of Magnet's new business comes "from referrals from present-day customers and our staff."

Best Use of Marketing Dollars

Mr. Rowley — who observes that savings branches across the country are becoming retail, instead of operations, oriented — advised that marketing dollars can best be spent on advertising to generate loans and deposits. He likes media advertising with response devices, including direct-mail and telemarketing efforts.

A well-executed public relations campaign, he added, "beats paid advertising every time in results."

Mr. Rowley — who notes that a growing number of chief executives are rising from marketing ranks — considers marketing expense "a long-term investment in the future," particularly as institutions attempt to diversify and to boost volume and fee income as interest margins decline.

"Marketing has come a long way in the last 10 years," said Mr. Rowley, noting that many marketing departments used to devote all their energies to advertising and promotion.

"Good marketing managers have now been given more responsibility, like in pricing, product design, and distribution," he said.

At some institutions, marketing departments are even disappearing, said Mr. Rowley.

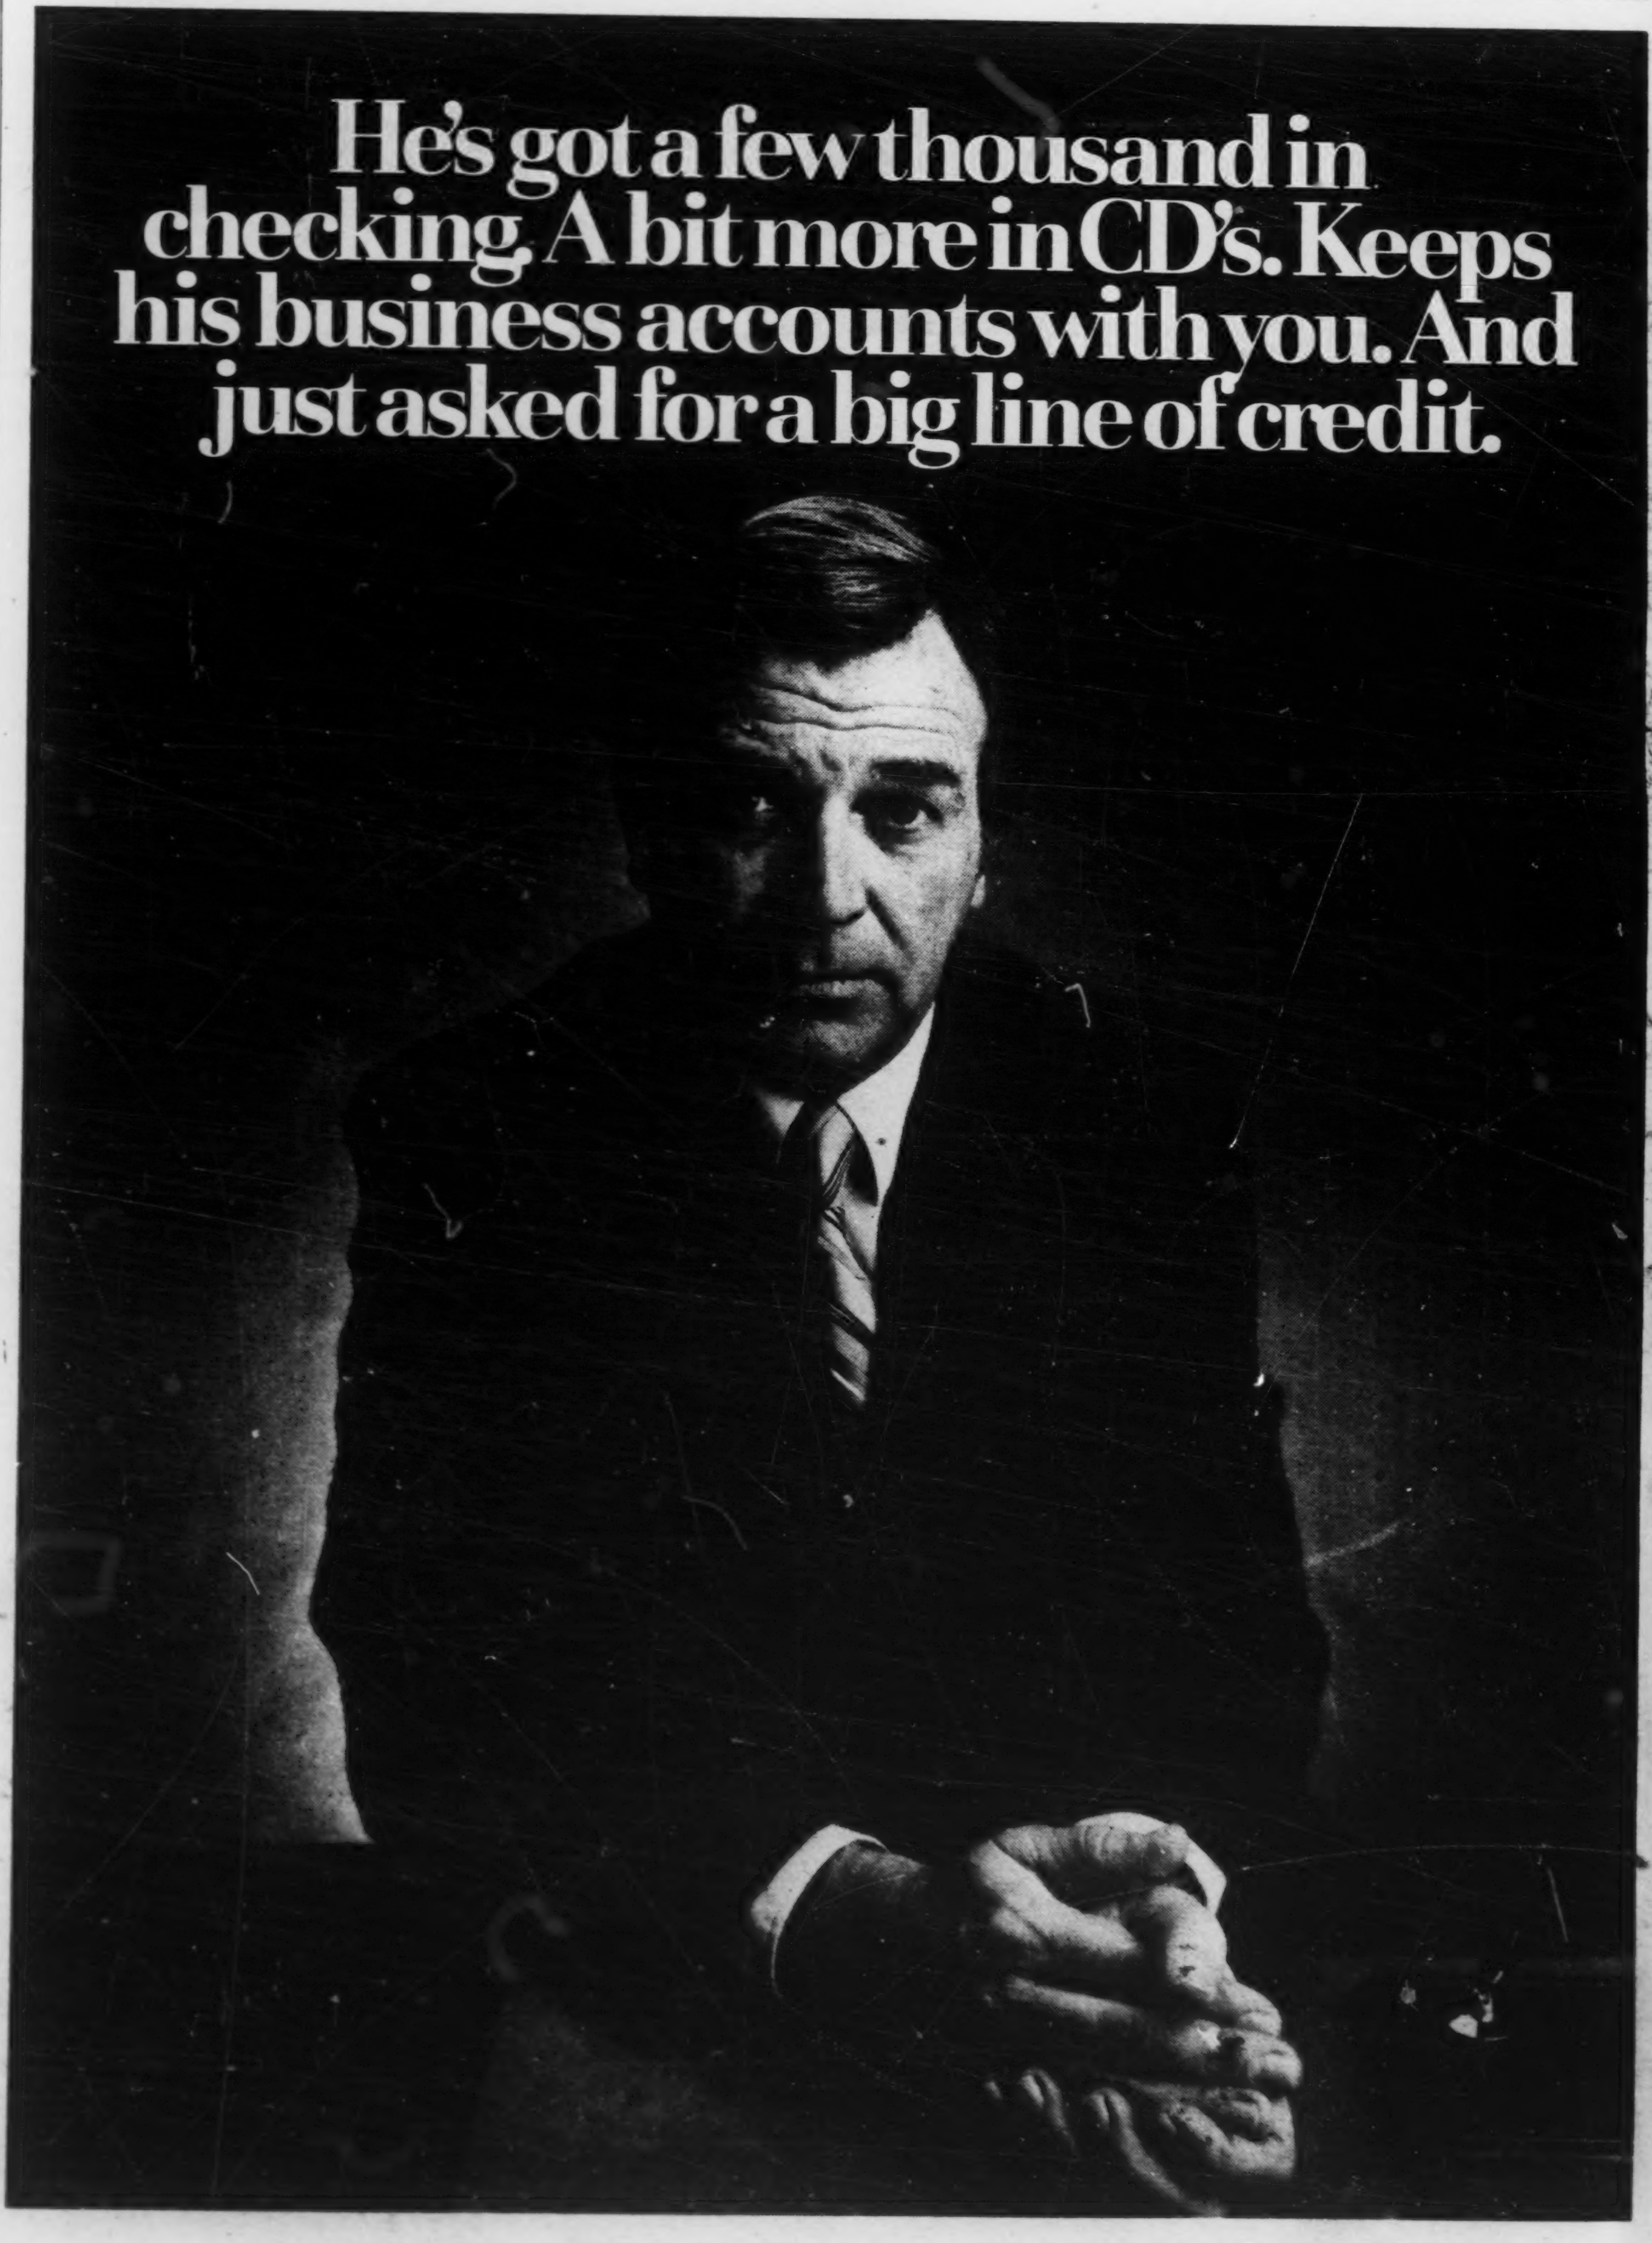
"Marketing has become a part of their operating philosophy," he explained.

That philosophy is to know the customer and offer what they want.

"Good marketing is so simple that I don't understand why everybody isn't doing it," Mr. Rowley said.

The association also elected Geldert S. Brown as chairman-elect and Roger W. Gramly as vice chairman. Mr. Brown is vice chairman of First Service Bank, Leominster, Mass.; and Mr. Gramly is executive vice president of Anchor Savings Association, Leawood, Kan.

Directors include Cheryl Bell, senior vice president, American Savings Bank, New York City; Mary M. Porter, senior vice president and corporate secretary, First Federal Savings of Central Indiana, Anderson, Ind.; William L. Owens, president, Virginia Beach Federal Savings, Virginia Beach, Va.; Jay A. Pfaender, senior vice president, Minnesota Federal Savings, St. Paul; Michael K. Rogers, senior vice president, Pacific First Federal Savings Bank, Tacoma, Wash.; David L. McClung, senior vice president, Far West Federal Bank, Portland, Ore., and John Marquis, senior vice president of marketing, Valley Federal Savings, Van Nuys, Calif. ■



He's got a few thousand in checking. A bit more in CD's. Keeps his business accounts with you. And just asked for a big line of credit.

When Do Stockholders Meet?... 63

Random Thoughts

By SANFORD ROSE

Banks never tire of pointing out how much information they are currently disclosing. And in some respects this is true and highly laudable. Yet the observer of banks may be pardoned for disputing the claim that disclosure is adequate.

In the '50s and '60s, the dearth of information made it difficult to analyze a bank. In the '70s and early '80s, information flowed more freely, rendering the task a bit easier. Now, in the mid-'80s, we retreat to a partial status quo ante. It's becoming almost as hard to analyze banks as it was 20 years ago.

The culprit is obviously the proliferation of off-balance-sheet transactions. For example, given the growth of swaps, it is virtually impossible to attempt, much less consummate, an analysis of the interest-sensitivity posture of a major bank.

This is especially true since some banks are said to be using swaps very aggressively to create net interest income without adding assets. A bank that is dissatisfied with its margin can routinely make a few

Chase Manhattan Asks Shareholders To Adopt Antitakeover Provisions

By MIKE CARROLL

NEW YORK — Moving to discourage unwanted suitors, Chase Manhattan Corp. has become the first of the nation's largest banking companies to ask its shareholders to adopt a raft of antitakeover provisions.

In proxy materials sent to shareholders in advance of the bank's April 15 annual meeting, Chase Manhattan is seeking approval to restructure its board of directors with staggered three-year terms of service and to adopt so-called "fair price provisions." These provisions, requiring the approval of 75% of shareholders for certain business combinations, are designed to prevent parties acquiring substantial positions in Chase stock from pursuing such takeover tactics as "two-tier" offers, in which some shareholders receive less for their shares than do others.

In addition, the bank requested a large increase in the amount of its authorized common and preferred shares, giving it the flexibility to employ more drastic defensive measures as well.

"They're really battening down the hatches. I'm surprised they would think themselves vulnerable," said one attorney active in takeover work.

"We're not aware of any takeover proposals or unusual accumulation of stock," a bank spokesman said. He emphasized that the proposals were not made in response to any acquisition offer.

Instead, the proxy materials indicate that the proposals were put forward to protect shareholder interests at a time of rising hostile takeover activities that "often present potentially disadvantageous consequences to shareholders."

In addition, management noted in the proxy that such moves would provide "continuity in the affairs and busi-

Special-Purpose Banks Post Top Deposit Gains

Loan Troubles Common Among Those with Largest Declines

By L. MICHAEL CACACE

NEW YORK — Special-purpose banks posted the largest nonmerger-related gains in deposits last year among the nation's top 300 commercial banks, according to the *American Banker's* annual survey, published today.

Most of the banks with large deposit declines last year, on the other hand, were those that have experienced difficulties with their loan portfolios.

A special-purpose bank, as defined for survey purposes, has a commercial bank charter but makes few or no commercial loans. In most cases they are used by bank holding companies to handle particular functions, such as credit card operations, and to take advantage of higher interest rate ceilings and tax breaks.

The two banks with the largest percentage gains in deposits were Chase Manhattan Bank (USA) NA, Wilmington, Del., a subsidiary of the Chase Manhattan Corp., and the Boston Safe Deposit and Trust Co., a unit of the Boston Company Inc., a Shearson Lehman/American Express company.

Chase's Delaware bank, which handles credit card operations for its parent, moved up 107 places in rank to No. 212 after an 82.5% deposit gain last year. Most of the increase — from $709 million on Dec. 31, 1984, to $1.29 billion on Dec. 31, 1985 — was attributable to growth in money market deposit accounts, which jumped 95.2% to $792.1 million, accounting for more than 54% of the total gain in deposits.

Consumer loans comprise almost 96% of the bank's $4.58 billion loan portfolio. Of this total, $3.3 billion, or 72%, were consumer credit card and related loans. The bank had only $35.7 million in commercial loans.

Chase's Delaware bank was established in February 1982 under that state's Financial Center Development Act of 1981. Since yearend 1982, deposits have grown almost six-fold, and assets have risen more than 13-fold.

The 1985 deposits may not be comparable to 1984 and 1983 deposits because some banks reported Federal regulatory deposits one year and deposits from public statements — based on general accounting principals — in the other year. In addition, some banks had sizable mergers or acquisitions. With respect to mergers, American Banker follows the bank of charter in determining the surviving bank.

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments.

(a)—Formerly Savings Bank of Baltimore. The bank converted from a savings bank to a commercial bank on 11/1/84. **(R)**—Revised since publication on 3/15/85. (r)—Rank is based on revised deposit data received after publication on 3/15/85.

Top 300 U.S. Commercial Banks in Deposits

In Order of Deposits December 31, 1985, Compared with December 31, 1984, and December 31, 1983
Compiled Annually Since 1921 by the American Banker in Cooperation with Polk's Bank Directory

The 1985 deposits may not be comparable to 1984 and 1983 deposits because some banks reported Federal regulatory deposits one year and deposits from public statements — based on general accounting principals — in the other year. In addition, some banks had sizable mergers or acquisitions. With respect to mergers, American Banker follows the bank of charter in determining the surviving bank.

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments.

(a)—Formerly Savings Bank of Baltimore. The bank converted from a savings bank to a commercial bank on 11/1/84. **(R)**—Revised since publication on 3/15/85. (r)—Rank is based on revised deposit data received after publication on 3/15/85.

Top 300 U.S. Commercial Banks in Deposits

In Order of Deposits December 31, 1985, Compared with December 31, 1984, and December 31, 1983
Compiled Annually Since 1921 by the American Banker in Cooperation with Polk's Bank Directory

Compiled by American Banker Copyright 1986

The 1985 deposits may not be comparable to 1984 and 1983 deposits because some banks reported Federal regulatory deposits one year and deposits from public statements — based on general accounting principals — in the other year. In addition, some banks had sizable mergers or acquisitions. With respect to mergers, American Banker follows the bank of charter in determining the surviving bank.

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments.
(a)—Formerly Savings Bank of Baltimore. The bank converted from a savings bank to a commercial bank on 11/1/84. **(R)**—Revised since publication on 3/15/85. (r)—Rank is based on revised deposit data received after publication on 3/15/85.

Deposit data for commercial banks compiled by American Banker in conjunction with R.L. Polk & Co. from bank statements and replies to questionnaire. Deposit data for savings banks are from National Council of Savings Institutions. (1)—Estimated by American Banker. (2)—The number of banks is the sum of commercial banks plus savings banks. The number of commercial banks was provided by the Federal Deposit Insurance Corporation and include all commercial banks, both insured and uninsured. The number of savings banks was provided by the National Council of Savings Institutions. (3)—The 1985 figure includes 15,282 commercial banks and 370 savings banks. (4)—The 1984 figure includes 15,101 commercial banks and 383 savings banks. (R)— Revised since publication on 3/15/85.

A Comparison of Equity Capital At the Top 300 U.S. Banks in Deposits

Dec. 31, 1985 Compared With Dec. 31, 1984

	Equity Capital 12/31/85	Equity Capital 12/31/84	% Change
Top 100 Banks	70,507,654,088	63,844,650,708	+10.4
Second 100 Banks	14,945,899,734	12,605,577,115	+18.6
Third 100 Banks	8,526,635,760	7,225,913,865	+18.0
Total for Top 300 Banks	93,980,189,582	83,676,141,688	+12.3

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments. The 1985 figures are for the top 300 banks in deposits on 12/31/85. The 1984 figures are for the top 300 banks in deposits on 12/31/84.

Source of Data: Data were compiled by American Banker, working in conjunction with R.L. Polk & Co., Nashville, Tenn.

Total Deposits at Deposit-Taking Institutions

Dec. 31, 1985 Compared With Dec. 31, 1984

(Dollar Amounts in Billions)

Type of Institution	Date	Number of Institutions	Total Deposits
Commercial Banks (a)	12/31/85 12/31/84	15,101 15,282 —181	$2,111.9 $1,944.9 + 8.6%
Savings and Loan Associations (b)	12/31/85 12/31/84	3,244 3,391 —147	$752.1 $724.3 + 3.8%
Savings Banks (c)	12/31/85 12/31/84	370 383 —13	$185.9 182.8 + 1.7%
Credit Unions (d)	12/31/85 12/31/84	17,877 18,515 —638	$126.6 $102.6 +23.4%
All Deposit-Taking Institutions	12/31/85 12/31/84	36,592 37,571 -979	$3,176.5 $2,954.6 + 7.5%

(a)—The number of commercial banks provided by the Federal Deposit Insurance Corp., Washington, D.C. The total deposits for all commercial banks for 12/31/85 are estimated by American Banker. The 12/31/84 deposit figures are from R.L. Polk & Co.'s calculation of total deposits of all commercial and savings banks. American Banker has subtracted out the savings bank component of that total. **(b)**—All savings and loan association data were taken from publically available data provided by the Federal Home Loan Bank Board, Washington, D.C. **(c)**— All savings bank data provided by the National Council of Savings Institutions, Washington, D.C. **(d)**—All credit union data provided by Credit Union National Association, Madison, Wisconsin.

Survey . . .

Continued from Page 1

Assets increased 131% in 1985, totaling $4.51 billion on Dec. 31, up from $1.96 billion a year earlier. The bank moved up 83 places in the asset rankings to No. 78.

The bank reported $39.9 million in net income last year, up 4.2% from $38.3 million in 1984. Its return on average assets was 1.42% in 1985.

Deposits Up 82% at Boston Safe

Boston Safe Deposit and Trust Co., which has been the fastest growing among the top 300 banks over the last five years, moved up 62 places in rank in 1985 to No. 88 as deposits increased to $3 billion, up 82%.

The bank's deposits increased more than 20-fold between yearend 1980 and yearend 1985, a sharp rise that coincides with the acquisition of the bank's parent, the Boston Company Inc., by Shearson/American Express in 1981. Deposits increased 166% to $377.6 million in 1981, moving Boston Safe up 547 places in rank to No. 416. A No. 400 ranking followed in 1982 as deposits increased 13.8% to $429.7 million. A 205% deposit gain in 1983, to $1.31 billion, gave Boston Safe the No. 163 ranking, and a 26.3% rise in 1984 pushed deposits up to $1.66 billion and the bank's ranking to No. 150.

The bank began offering money market deposit accounts for Shearson/American Express clients in 1983. In an interview with the *American Banker* in March of that year, James N. von Germeten, the bank's chairman and chief executive officer, said that corresponding with the increase in deposit-taking would be an expansion of high-net-worth personal loans, including mortgage loans, to the company's existing trust clients and potential customers in New England.

Over the 18-month period ending Dec. 31, 1985, total loans have increased 449%, to $1.48 billion from $269 million. At yearend, loans secured by real estate totaled $1.18 billion and consumer loans totaled $288.7 million.

Of the bank's $3 billion in deposits on Dec. 31, 1985, $1.2 billion, or 40%, were money market deposit accounts. Large-denomination certificates of deposit totaled $1.04 billion, or 34.5% of total deposits, and IRA deposits totaled $25.5 million, or 0.8% of total deposits.

Boston Safe was very profitable in 1985, reporting $52.8 million in net income and a return on average assets of 1.84%.

An Exception Among Deposit Losers

While most of the major deposit losers last year had experienced loan difficulties or problems in their local economies in recent years, there was one major exception. The bank that posted the largest decline, Citibank (South Dakota) NA, Sioux Falls, apparently had decided to seek alternative funding sources.

Deposits decreased 25.5% at Citibank (South Dakota), a Citicorp subsidiary that handles credit card operations, falling from $2.76 billion at yearend 1984 to $2.05 billion at yearend 1985. Its ranking dropped from No. 87 in deposits to No. 135.

Its assets, however, totaled $8.36 billion at yearend, up 26.2% from $6.62 billion a year earlier. The bank now ranks No. 37 in assets, up seven places from a year earlier.

The bank was established Feb. 19, 1981. It earned $155.2 million last year, up 0.8% from $153.9 million in 1984. The bank had a return on average assets of 2.06% last year.

The second largest decline in deposits was posted by First National Bank & Trust Co. of Oklahoma City. Its deposits fell 20% last year, to $1.34 billion from $1.68 billion, and the bank fell 26 places in rank to No. 199. The First Oklahoma Bancorp. subsidiary has had a steady decline in deposits since yearend 1982, when its deposits totaled $2.26 billion and it ranked 81st nationally. Over the last three years, deposits have declined 40.5%.

Hurt by problems with the energy-related Oklahoma economy, the bank lost $15.2 million in 1984 and $50.3 million last year.

European American Deposits Off 18.3%

The third largest decline was posted by European American Bank in New York. Its deposits were down $1.1 billion, or 18.3%, to $4.8 billion, and it fell 22 places in rank to No. 55. A spokesman for the bank said that $842 million of the total decline, about 85%, came from a decrease in the bank's foreign office deposits.

European American is a "consortium bank" owned by six European banking firms. It is shifting its major business emphasis from an international to a more regional market concentrated in the Long Island/New York City area. Foreign office deposits were not consistent with the new regional focus, the spokesman explained, adding that most of them were let go to EAB's shareholder institutions. The bank's holding company, European American Bancorp., last year earned $20.7 million in net income, compared with a loss of $132.8 million in 1984.

Equibank in Pittsburgh had the fourth largest deposit decline, falling 17.5% to $1.88 billion. The bank is a subsidiary of Equimark Corp., which lost $11 million in 1983 and $31.6 million in 1984. Equimark reported net income of $7.9 million last year, but that included an extraordinary income tax benefit of $2.5 million, a $23.5 million after-tax gain on the sale of 19 Equibank branches, and $5.7 million from the sale of its mortgage servicing operations.

Crocker National Bank, San Francisco, which experienced substantial problems in its real estate loan portfolio over the last few years, had the fifth largest deposit decline, dropping 16.35% to $15.1 billion.

The bank's holding company, Crocker National Corp., lost $10 million in 1983 and $324 million in 1984 before turning a profit of $38 million last year. Midland Bank PLC of London sold the Crocker National Corp. to Wells Fargo & Co., San Francisco, for $1.08 billion in February.

Other Survey Findings

American Banker, working in conjunction with R.L. Polk & Co., a Nashville-based publisher of banking directories, surveyed the nation's top 7,000 banks in deposits to rank the top 300 banks today. Listed below are some of the more important findings of this survey:

- Total deposits of the top 300 banks were up 8.56%, to $1,282 billion.
- The top 300 banks held 60.7% of all commercial bank deposits, down from 60.9% a year earlier.
- The share of the top 300 banks' deposits held by the 25 largest banks fell to 51% last year, down from 52.6% in 1984, and well below the record 61.3% in 1980. The 51% share is the smallest since 1960, when the top 25 held 50.3% of the total deposits of the top 300 banks. The growth of regional banks and problems experienced at several of the large banks over the last three years are the main reasons for the decline.
- Total equity capital of the top 300 banks in deposits was up 12.3% last year to $93.98 billion. The yearend equity-to-assets ratio for the top 300 banks in deposits was 5.33%, up 12 basis points from 5.21% at yearend 1984.
- The total assets of the top 300 banks in assets were up 9.78%, to $1.764 trillion. ■

Kentucky Firm Launches Investment Sales Unit

Special to the American Banker

LOUISVILLE, Ky. — Capital Holding Corp. has established an affiliate to sell guaranteed-interest contracts and other insurance and investment programs.

It also plans to test new markets with the firm, including the Far East. The affiliate, Capital Initiatives Corp., has about 20 employees.

Capital Initiatives was formed about three years ago as a group within Capital Holding developing special markets. As part of that effort, it began marketing indexed guaranteed-interest contracts, which are investments with a return tied to a long-term bond index and are sold primarily to pension funds through bank trust departments.

More than $600 million has been invested in Capital Holding's indexed guaranteed-interest contracts since late 1982. Other investments of that type are to be introduced later this year, Capital Initiatives said.

Martin H. Ruby, former vice president of market development for Capital Holding, has been named president and chief executive of Capital Initiatives. Other officers include John Lindholm, senior vice president, and Daniel O. Van Wormer, vice president and chief administrative officer. Both had been with Capital Holding.

Capital Holding, based in Louisville, has more than $6 billion in assets and $42.2 billion of life insurance in force. ■

Big Banks' Off-Balance-Sheet Items Top $904 Billion

By JOHN P. FORDE

NEW YORK — The nation's five largest bank holding companies had $909.3 billion in off-balance-sheet financing commitments — more than 1.5 times their combined total assets and 37 times their stockholders' equity — at yearend 1985, according to figures in their annual reports.

Based on yearend figures, Citicorp had the largest amount of off-balance-sheet financing of the top five banking firms, with $336.1 billion, compared with $180.8 billion at BankAmerica Corp., $137.9 billion at Chase Manhattan Corp., $118.5 billion at Manufacturers Hanover Corp., and $136 billion at J.P. Morgan & Co.

Off-balance-sheet risk has traditionally included commitments to extend credit for which banks receive fee income. Because the loans are not actually in effect until the commitments are

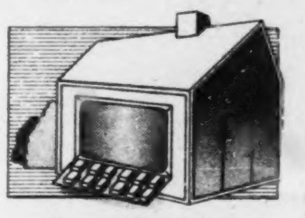
Despite Fledgling Industry's Casualties, Others Plow Ahead in Videotex Business

By MICHAEL WEINSTEIN

NEW YORK — The latest casualty of the videotex industry — the second one in less than a month — shows that the fledgling business still faces serious hurdles in its efforts to grow up.

But even after Knight-Ridder Newspapers Inc. announced earlier this week that it will shut down its Viewtron videotex operation, other industry participants vowed to forge ahead.



Home Banking

Supporters of videotex — a two-way communications system that provides an array of information and services to computer terminals in homes or offices — have touted the technology as the purveyor of a bold, new future. Videotex, so the argument goes, lets consumers read the news, order their groceries, balance their checkbooks, and buy theater tickets all from the comfort of their living room sofa.

But after several years of expensive experimentation, videotex remains largely a technology in search of a market. And this uncertainty poses questions for banks

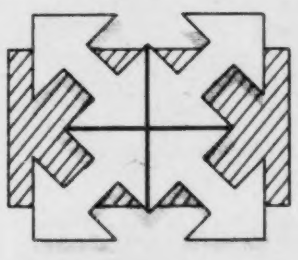
Deposit Gain Through Mergers Drops

By L. MICHAEL CACACE

NEW YORK — Acquisition of deposits through mergers dropped almost 25% last year at the top 300 commercial banks, although merger activity among their holding companies reached record proportions.



Mergers,Acquisitions

The apparent paradox is easily explained. In previous years, most mergers between holding companies were intrastate, with the lead bank of the surviving company usually acquiring the deposits of the banking affiliates of the merged company. Over the last six months of 1985, however, the most significant mergers were interstate deals. These mergers greatly changed the size of the holding companies, but the lead banks were unaffected. In addition, in several large intrastate mergers the lead bank of the survivor did not acquire the deposits of the merged company.

These are some of the findings of the *American Banker's* third annual survey, published today, of mergers, acquisitions, and title and location changes among the top 300 banks in the nation. Partial acquisitions, such as branch purchases, are included in the listing. In addition, the survey has been expanded this year to include holding company acquisitions in which the lead banks were not affected.

Among the top 300 commercial banks in 1985, 45 acquired a total of 137 other banks with combined deposits of $16.5 billion. Deposits acquired through mergers accounted for 17% of the $97.4 billion deposit gain posted by the top 300. In 1984, 68 banks in the top 300 acquired 150 other banks with $22.2 billion in deposits, accounting for 28.2% of the top 300's $72.4 billion deposit gain.

Eleven major mergers between

2 Possible Buyers Eye MH Mortgage

By MIKE CARROLL

NEW YORK — Fireman's Fund Insurance Cos. and Ford Motor Credit Co. have expressed interest in acquiring the Manufacturers Hanover Corp.'s mortgage banking subsidiary, according to knowledgeable sources. The unit, Manufacturers Hanover Mortgage Corp., based in Farmington Hills, Mich., is the third largest mortgage company — and the largest bank-owned mortgage company — in the country.

Officials at Fireman's Fund, Ford, and Manufacturers Hanover all declined to comment on the reports. But investment banking sources said they believed that so far Fireman's Fund appeared to have the inside

Deposit Gain Through Mergers Falls at Top Commercial Banks

Continued from Page 1

holding companies were completed in 1985 — seven interstate and four intrastate — in which the lead banks were not affected. The combined assets of the firms involved in these mergers totaled $55.3 billion.

The largest interstate deal completed between bank holding companies was the July 1 merger of Sun Banks Inc., Orlando, Fla., and Trust Company of Georgia, Atlanta, to form SunTrust Banks Inc., Atlanta. At yearend, SunTrust ranked 24th in assets with $19.4 billion. SunTrust is the parent of four of the nation's top 300 banks: the $3 billion-deposit Trust Company Bank, Atlanta, which ranked 87th in deposits on Dec. 31; the $2.6 billion-deposit Sun Bank NA, which ranked 103d; the $1.3 billion-deposit Sun Bank/Miami NA, which ranked 208th; and the $952 million-deposit Sun Bank/South Florida NA, Fort Lauderdale, which ranked 277th.

The second largest holding company merger occurred Dec. 1, when the Wachovia Corp. of Winston-Salem, N.C., and the First Atlanta Corp. merged to form the First Wachovia Corp., which ranked 29th in assets at yearend with $17.7 billion. First Wachovia is the parent of two of the top 300 banks: the 26th-ranked Wachovia Bank & Trust Co., Winston-Salem, which had $7.5 billion in deposits at yearend, and 50th-ranked First National Bank, Atlanta, which had $5 billion in deposits on Dec. 31.

The largest merger between banks ranked among the top 300 occurred Dec. 1, when the First Union Corp. of Charlotte, N.C., acquired the $2.8 billion-asset Northwestern Financial Corp., Greensboro, N.C. The $2.25 billion-deposit Northwestern Bank, North Wilkesboro, was merged into First Union National Bank, Charlotte, which helped First Union National move up 25 places to rank 32d in deposits. The merger, coupled with First Union's acquisition of the $3.7 billion-asset Atlantic Bancorp. of Jacksonville, Fla., moved the holding company up 18 places in asset rank to No. 32 with $16.6 billion.

First Alabama Bank, Montgomery, posted the second largest deposit gain through mergers last year. From March 22 to Dec. 13, it acquired 20 affiliated banks of its parent, First Alabama Bancshares Inc. These banks had combined deposits of $1.5 billion. The mergers enabled the bank, formerly known as First Alabama Bank, Birmingham, to move up 232 places in rank to 140th place with $2 billion in deposits.

Second-Half Surge in Merger Activity

More than 75% of the deposits gained through mergers in 1985 were acquired in the second half of the year. Six of the seven interstate holding company mergers also occurred in the last six months.

The major reason for the second-half surge was the U.S. Supreme Court's June 10 decision on the constitutionality of regional interstate banking compacts. The court unanimously ruled that states had the right to decide which other states would have access to their banking institutions. The ruling upheld a banking compact in New England challenged by Citicorp of New York and Northeast Bancorp. of New Haven, Conn.

The top states in mergers last year were Florida and Missouri. In Florida, five banks acquired 27 other banks with combined deposits of $2.6 billion. In Missouri, three banks acquired 24 other banks with combined deposits of $2.5 billion.

In Florida, which now permits statewide branching through mergers, four of the five mergers last year involved multibank holding companies that merged smaller affiliated banking units into their larger units, with the smaller units becoming branches.

Changes in Missouri banking law over the last three years with respect to "facilities" — the Missouri equivalent of branches — are the reason for the spate of mergers there in 1985. In 1983, banks were permitted to acquire facilities within the same county. In 1984, the law allowed banks that merged to keep their existing facilities and include the acquired bank as a facility as well. For example, Bank A with three facilities acquires Bank B with three facilities. Bank A now has seven facilities — its three, Bank B's three, and Bank B itself. In 1985, the law permitted the establishment of facilities in adjacent counties.

On June 30, Commerce Bancshares Inc. of Kansas City merged 11 of its affiliated banks into Commerce Bank of Kirkwood NA, which then changed its name and location to Commerce Bank St. Louis County NA, Clayton. The deposits acquired through these mergers totaled $920 million — the fifth largest amount of deposits acquired through mergers by a commercial bank in 1985.

The other two bank mergers involved subsidiary banks of Boatmen's Bancshares Inc. of St. Louis. Last year, Boatmen's Bancshares acquired the $2.9 billion-asset CharterCorp of Kansas City in January. The name of CharterCorp's lead bank, First National Bank, Kansas City, was immediately changed to Boatmen's First National Bank. Then, in April, two other Kansas City bank affiliates of Boatmen's Bancshares were merged into the bank. These two banks, Boatmen's Bank & Trust Co. and CharterBank Ward Parkway NA, had combined deposits of $444 million.

Similarly, in March and November 1985, 10 affiliated banks in the St. Louis area were merged into Boatmen's National Bank, St. Louis. These 10 banks had combined deposits of $1.1 billion — the fourth largest amount of deposits acquired through mergers by a commercial bank in 1985. ■

Franklin Bank Swindler Sindona Suffers Stroke

VOGHERA, Italy (UPI) — Sicilian bank swindler Michele Sindona was rushed from his prison cell to the Voghera City Hospital Thursday after suffering an apparent stroke, and a doctor said, "He has little chance of recovery."

Hospital sources said Mr. Sindona, who presided over what was at one time the largest bank failure in U.S. history, Franklin National Bank, was in an apparently irreversible coma.

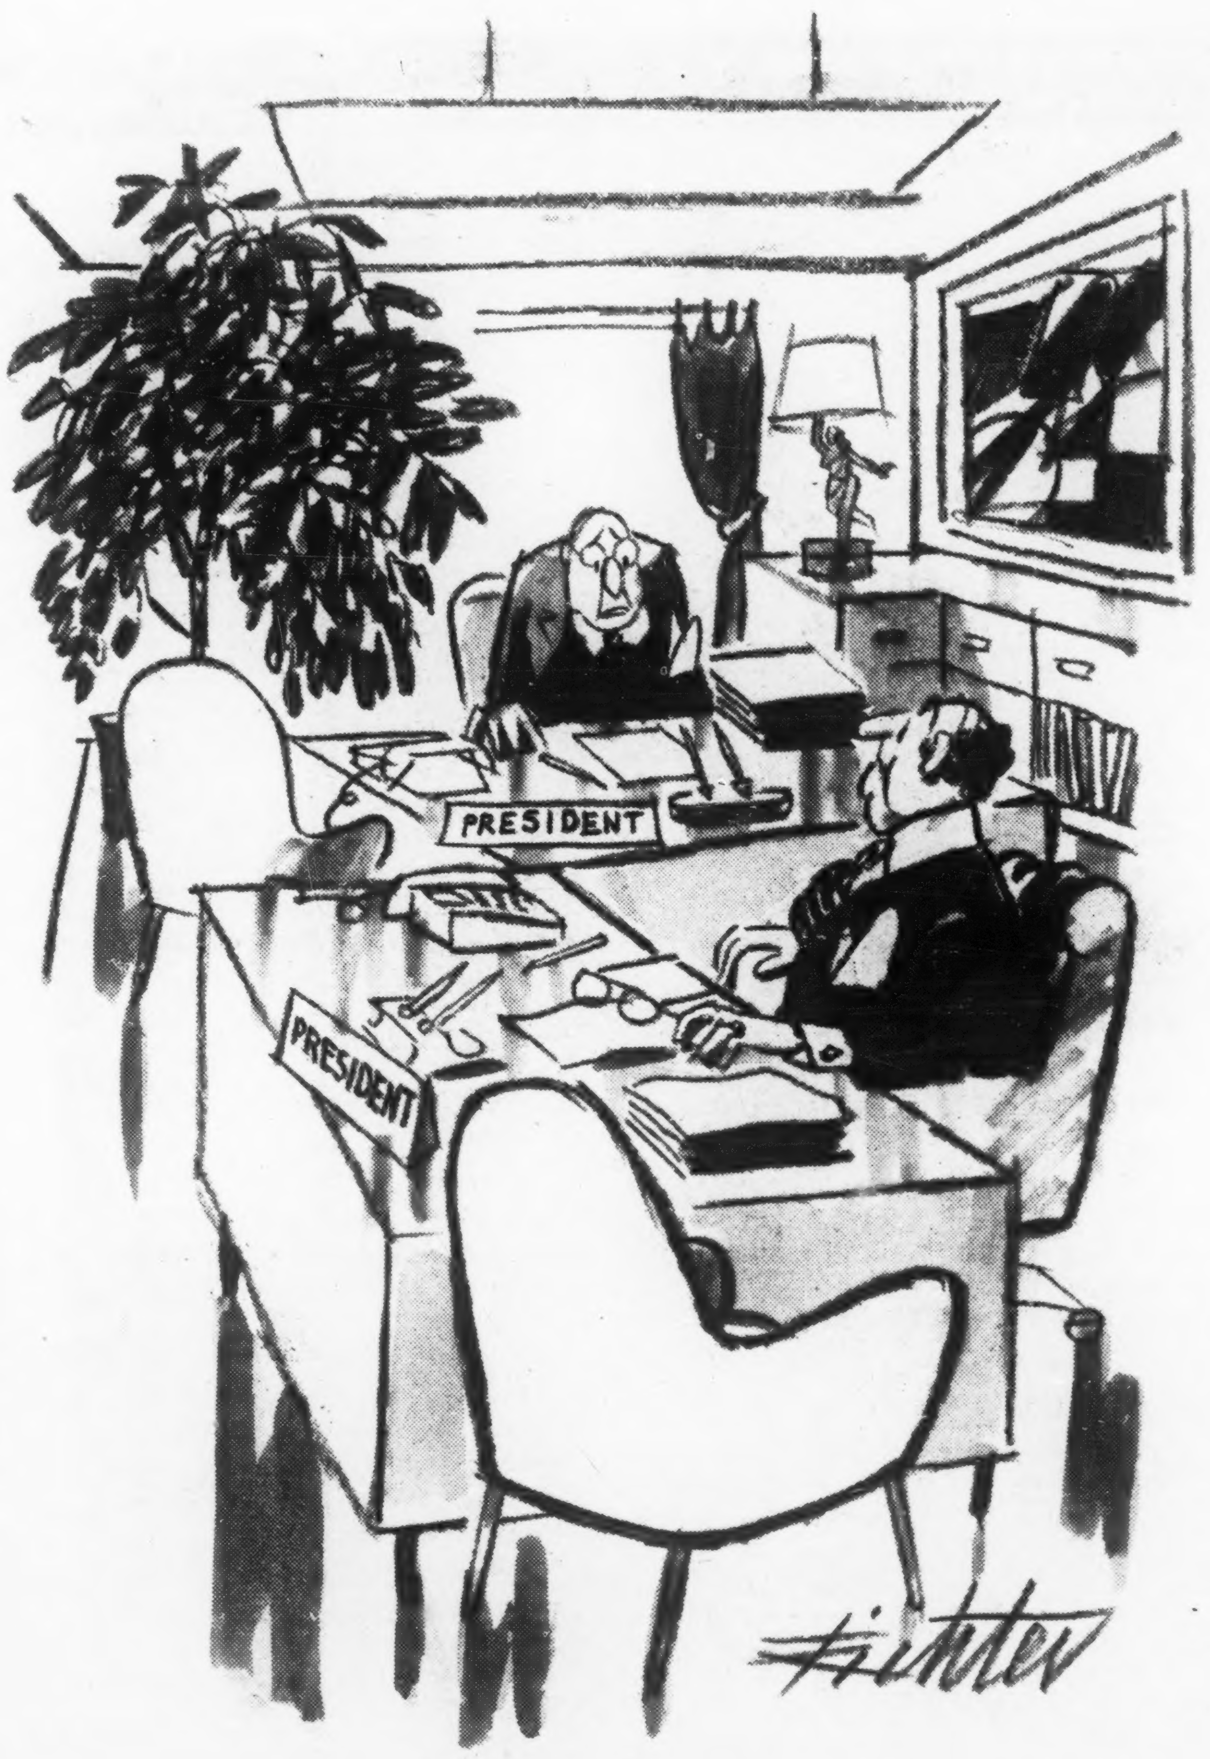
The 65-year-old financier collapsed during breakfast at the jail in Voghera, 35 miles south of Milan, where he has been held since being extradited to Italy from the United States in September 1984.

A Milan court Tuesday sentenced Mr. Sindona to life in prison for ordering the 1979 assassination of an Italian lawyer. The lawyer had been in charge of liquidating Mr. Sindona's Italian bank, which crashed in 1974.

Hospital sources said Mr. Sindona apparently had a cerebral hemorrhage while in the prison. He suffered a subsequent heart attack shortly after an ambulance brought him to the hospital around 9 a.m., they said.

"Sindona is in a serious coma. He has little chance of recovery," said one of the doctors treating Mr. Sindona in the hospital's intensive care section. The doctor, interviewed by the state-run television network, would not confirm any other details of his condition. ■

GOLEMBE OFF WALL STREET



"I don't care what the boys on Wall Street said. This merger was not such a great idea."

Sometimes it is hard to walk away from an offer. At Golembe Associates we are just as proud of the deals we have advised against as the ones we have closed. We work for you, not for the deal.

Find out about our unique blend of consulting and investment banking services. Next time you may not have to go to Wall Street.

A booklet containing answers to questions frequently asked us on investment banking and financial advisory services is available on request. For further information call Nevins Baxter, President, or any Principal of Golembe Associates at (202) 337-5550 (Washington) or (617) 350-7880 (Boston).

Locks That Don't Work

By SANFORD ROSE

Many banks and thrifts continue to feel that they can lock up an asset-liability spread by going to the interest rate swap market. It is possible to execute this tactic successfully, but not in the way it has usually been done. The traditional modus operandi does not guarantee a spread; it guarantees only a headache.

The traditional approach is to buy a long-term asset funded with, say, a 90-day rolling reverse repo. Then the duration of the repo is raised to match the hypothesized duration of the asset by swapping. In effect, a synthetic long-term liability is created. The institution doing the transaction becomes a fixed-rate payer and receives a 90-day floating rate that roughly corresponds to the cost of its 90-day repo obligation.

Since initial asset and liability durations are allegedly equal, the price sensitivity, or susceptibility to changes in interest rates, of the asset should correspond to that of the liability. Right? Not exactly.

Equalizing initial durations creates an average, as opposed to a liter-

Big Banks' Latin American Exposures Decline Noticeably but Remain Large

By GORDON MATTHEWS

NEW YORK — The relative exposure of major American banks to the troubled debtor nations of Latin America has declined noticeably in the past two years, although the banks seem certain to have a large financial involvement in the debt crisis for the foreseeable future.

A survey of 1985 annual reports of the nation's top banking companies shows only marginal growth in their loans outstanding to major Latin debtors since the third quarter of 1983. Meanwhile the banks' capital positions, against which such exposure can be measured, have improved substantially.

More importantly from the standpoint of earnings, the key statistic of nonperforming loans has dropped to the 4% level from 7% in 1983. This figure does not include loans to Peru, most of which are presumably on a cash basis at this point, but the banks' exposure to that country is comparatively small.

A perspective on the situation was offered by William R. Rhodes, senior vice president of Citibank. "Since the international debt crisis began in August 1982, we have seen gradual improvement in the situation year by year," he wrote in the bank's annual report, while noting "there are many potential problems as we move ahead."

The figures seem to confirm other findings during the past year that bank lending to Latin debtor countries has been at a virtual standstill since the

Overdraft Caps Could Create New Wrinkles

Hourly Loans Might Be Result After Fed Policy Takes Effect

By TOM FERRIS

NEW YORK — After months of warnings and preparations, bankers expect that a Federal Reserve policy to curb intraday overdrafts will cause little disruption to the nation's payment system when it takes effect on Thursday. But observers believe the program will spur basic changes in operating practices and ultimately might even lead to an unusual concept: hourly loans.

For years, banks have run huge overdrafts — in some cases amounting to billions of dollars — while transferring funds. These deficits, which last for a few hours, are, in effect, short-term loans provided by the Federal Reserve System or, sometimes, by large banks.

GE Reconsiders Clearing Plans, Page 32

However, there is no charge for these "loans" because interest is calculated once daily, after the close of business, regardless of how the money was used during the day. So although the "lender" assumes the risk that the overdraft might not be covered, it does not suffer an interest loss.

That view of overdrafting might change under the Fed's risk-reduction policy, which requires banks to set a limit on their intraday, or "daylight," overdrafts. The restrictions could turn the capability to overdraft into a commodity that will be priced as a service, some bankers predict.

Perhaps the most intriguing speculation has centered on the possible development of an intraday loan market, in which a bank nearing its overdraft

FDIC to Retain Money Market Account Limits

By JAY ROSENSTEIN

WASHINGTON — The Federal Deposit Insurance Corp. on Monday joined the Federal Reserve Board in retaining current restrictions on money market deposit account transfers.

The FDIC had previously said that it would consider easing the limits so that businesses could take more advantage of the interest-bearing accounts. Monday's decision, however, should put to rest for now the question of whether federal regulators will make these interest-bearing accounts more attractive to businesses, something that bankers do not want. Banks now generally attract corporate deposits without paying interest on them.

Money market deposit accounts are open to businesses as well as individuals but are limited to six third-party transfers per month, of which only three may be by check. These limits generally have been too restrictive for businesses to use the accounts.

The accounts would have expired on April 1 if the regulators had not acted to retain them. As part of the FDIC's work to maintain the accounts, it proposed one option in January that would have eliminated a rule issued by the interagency Depository Institutions Deregulation Committee that set a maximum of six transfers per month. The FDIC's earlier proposal said that to the extent authorized by law, corporations and other depositors could write an unlimited number of checks on the interest-bearing account.

The Federal Reserve Board earlier this month rejected that idea, and the FDIC on Monday agreed to keep its rules uniform with the Fed.

The Federal Home Loan Bank Board, which also has considered easing the restrictions on money market accounts, was scheduled to meet late Monday and was expected to side with the bank regulators. That would disappoint many thrift officials, who have hoped the Bank Board would help them break what they consider a near monopoly by commercial banks on corporate checking business.

Bankers oppose paying interest on checking accounts because they do not want to have to pay for funds they now generally use for free. They also do not want the added competition from thrifts for corporate account relationships.

In other actions at the FDIC's open meeting Monday, the agency issued a final rule giving the public advance notice of proposed changes in bank control. It also generally decided to keep existing rules for premium offers.

But the FDIC agreed that beginning April 1, it would impose no early withdrawal penalties under its rules. However, an FDIC staffer said the agency expects to examine early withdrawal penalties for safety and soundness purposes — such as asset-liability matching — in conjunction with the other agencies.

There still are certain early withdrawal penalties under Federal Reserve Board rules. ■

Reported Exposure	$10,100	$6,958	$6,670	$7,291	$3,836	$4,021	$1,110	$2,141	$1,718	$1,705	$45,550
Reported Nonperforming	$1,575	$510	$485	$199	$118	$137.2	$36	$34	$21	$76	$2,191
Exposure as % of Equity	130%	153%	175%	205%	87%	143%	45%	85%	82%	117%	122.1%
Stockholders' Equity	$7,765	$4,547	$3,795	$3,547	$4,392	$2,820	$2,439	$2,495	$2,090	$1,458	$

(A) The exposure to this country generally is less than 1% of total loans and other investments and is therefore not broken out in exact figures. In some cases, such as for Chile, banks have provided figures for comparative purposes, although the exposure is below the level required for full disclosure.

Big Banks' Latin American Exposures Decline

Continued from Page 1

debt crisis erupted in 1982. They also support the view of some bank analysts that Argentina remains a major problem for banks.

Among the four largest Latin debtors, Argentina, at a level of 11.5%, had by far the highest ratio of nonperforming loans to total loans outstanding from the leading U.S. banks. Next was Venezuela at 4.75%, down considerably from a 13% level in 1983 when it led the list. The two largest debtors, Brazil and Mexico, have levels of 1.1% and 2.6% respectively.

While those figures have an immediate impact on the banks' results, they do not necessarily reflect the longer-term outlook. Mexico, for instance, may not at the moment have many nonperforming loans from U.S. banks, but its economic prospects are ominously clouded by the fall in world prices for oil, its main export item.

The nation's three largest banking companies — Citicorp, BankAmerica Corp., and Chase Manhattan Corp. — had the the largest ratio of nonperforming loans to loans outstanding to major Latin debtors. BankAmerica was first at 7.35%, Chase was second at 7.25%, and Citicorp was third at 5.7%.

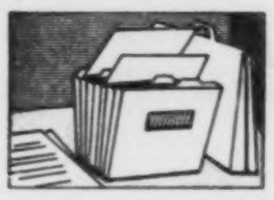
At Manufacturers Hanover Corp., the nation's fourth largest banking firm, the ratio of nonperformers to outstandings was 2.75%. That is down from 3% in 1983 and is the lowest of the leading banking companies except for Bankers Trust New York Corp. and First Chicago Corp., whose exposure levels are much lower.

Manufacturers Hanover has maintained that its relatively better situation is the result of a large portion of its Latin loans having been made to governments and to the most creditworthy level of corporate borrowers. At this point in the debt crisis, the bulk of the nonperforming loans are to private borrowers.

A clear trend revealed by the latest figures is the declining percentage of stockholders' equity and primary capital represented by the Latin outstandings, which have remained nearly static while the institutions' footings have been strengthened.

Manufacturers Hanover still leads the other banking organizations in the ratio of Latin exposure as an equivalent percentage of stockholders' equity. Its $7.3 billion of outstandings, topped only by the much larger Citicorp, is equal to 150% of primary capital and 205% of total stockholders' equity, down from over 250% of equity in 1983.

Citicorp's $10.1 billion of exposure is equivalent to 101% of its primary capital base and 130% of its shareholders' total equity, down from 179% of equity in 1983. Chase Manhattan's $6.6 billion of exposure was equal to 110% of primary capital and 175% of equity. ■



Counselor's Corner . . .

Continued from Page 5

reduce the consolidated capital of the company. But the Fed focuses on the primary capital of the bank, and not the consolidated capital of the company, if it has less than $150 million in assets.

b. Above $150 million in assets: If the holding company is over $150 million, the debt of the ESOP will usually be carried as a liability on the books of the company. However, the ESOP's debt may not be reflected on the balance sheet of the bank holding company if it does not guarantee the debt of the ESOP or have any guarantee arrangement for such debt.

If the ESOP debt is carried as a liability on the balance sheet of the holding company, then such debt will count in applying the usual criterion of 0.5-to-1 ratio of debt to equity. For this purpose, the equity can be supplied by the holding company and does not have to be supplied by the ESOP. In addition, the ESOP debt would reduce the consolidated capital of the company, and this would matter because the Fed wants to see primary capital of 5.5% of bank holding company assets on a consolidated basis if the company is over $150 million in assets.

4. Over 50% of the bank holding company: This was the situation in the Blue Island application denied by the Fed. If the ESOP owns over 50% of the holding company, the Fed will treat the ESOP as the parent of the holding company and consolidate the balance sheets of the ESOP and holding company. The accounting result is similar to the result when an ESOP owns over 25% of a holding company. However, there is one important difference — the ESOP debt will automatically be combined with the debt otherwise in the holding company, regardless of whether the company guaranteed the ESOP loan.

a. Below $150 million in assets: If the bank holding company is below $150 million in assets, the debt of the ESOP will come into play in determining whether the company meets the debt-to-purchase price ratio and whether the company can carry its debt. However, as explained above, the negative impact of the ESOP debt on the holding company's consolidated capital will not be important, because the Fed looks to the primary capital of the banks in holding companies with less than $150 million in assets.

b. Above $150 million in assets: If the holding company is above $150 million in assets, the debt of the ESOP will come into play in determining whether the debt-to-equity ratio would be met and whether the debt could be serviced. Moreover, the reduction in consolidated bank holding company capital because of the ESOP debt may adversely affect the application involving a holding company over $150 million, since the Fed looks at consolidated capital for companies of that size.

Because of their utility, ESOPs will become increasingly popular among holding companies. Although the tax reform bill may take away the recent 1984 round of special tax benefits for ESOPs, the basic tax benefits of ESOPs will remain and become more important if the tax reform bill increases the effective tax rate of holding companies.

Employee stock ownership plans with less than 25% of bank holding company stock can be effected with modest regulatory constraints. Employee stock ownership plans with over 25% of holding company stock are more complex, though they can pass regulatory muster if the holding company's equity position is sufficiently strong taking into account the debt of the ESOP. ■

AN AMERICAN BANKER SPECIAL REPORT

Venture Capital Is Game of Skill

97 Banking Firms Own Small Business Investment Companies

By LISABETH WEINER

CHICAGO — Venture capital is really a game of skill more than size. But it clearly has become a game large institutions are taking seriously.

Eight of the 10 largest banking companies in the United States, and 20 of the top 25, are investing in venture capital through small business investment companies, or SBICs. A total of 97 banking companies own SBICs of varying size.

Venture Capital
BANKING'S ROLE
THIRD OF A SERIES

NBD Bancorp., the nation's 28th largest bank holding company, owns Michigan Capital & Service Inc., a venture capital fund capitalized at $28 million. Michigan Capital, which was started in 1966 and acquired by NBD in 1980, is an example of a bank-owned SBIC that is on the brink of profitability.

"In 1980 we had just a modest portfolio," says Joseph Conway, president of Michigan Capital. "Now we have 42 companies. We should have a better 1986 [than 1985] and that will be the result of putting 35% of our money in seed or start-up ventures [four years ago] that are now maturing."

Mr. Conway describes 1985 as an average year for the SBIC. "It could have

Bank Regulators Relax Capital Rules For Troubled Farm, Energy Lenders

By BARTLETT NAYLOR

WASHINGTON — Federal banking regulators on Thursday formally extended an accounting relief package to troubled farm and energy lenders that relaxes enforcement of capital standards under certain circumstances.

The action comes in the midst of congressional efforts to pass legislation that would write into law many of the same relief provisions offered by the regulators. The legislation pending in the Senate also seeks a 90-day moratorium, effective April 15, on the establishment of nonbank banks, and a 90-day extension of a provision permitting interstate takeovers of failed financial institutions.

The Federal Deposit Insurance Corp. this week sent a new statement of its policy on farm and energy loans to the heads of the state banks that it oversees. The Federal Reserve Board and the Comptroller of the Currency, which regulate all other commercial banks, drafted similar letters on Thursday and will send them out when they are printed, according to agency representatives.

In the FDIC letter, agency Chairman L. William Seidman outlined a capital forbearance program that takes effect immediately and terminates on Jan. 1, 1993. "Forbearance means the FDIC will not take administrative action to enforce normal capital standards

Thrift Profits: Big Winners, Big Losers

By L. MICHAEL CACACE

NEW YORK — The old expression "the rich get richer and the poor get poorer" describes the earnings performances of the nation's large thrift institutions in 1985. The earnings of the top 100 of these institutions in net income more than doubled last year, while the combined losses at the 39 large thrift institutions that lost money in 1985 were up by more than 50%.

Thrifts

In general, lower interest rates helped most of the larger thrifts to boost their earnings substantially last year and "get richer." Poor asset quality was the main reason why some large thrifts "got poorer" and lost money, or continued to lose money, last year.

These are some of the findings of a new *American Banker* survey, which ranks the top 100 thrifts — savings banks and savings and loans — in net income for 1985, and identifies the major thrifts that reported losses last year. The data were taken from the *American Banker's* survey of the 400 largest thrifts in the industry.

The top 100 thrifts had $3.69 billion in net income last year. Seventy-seven of the top 100 thrifts reported net income for both 1985 and 1984, and the net income at these institutions rose 131%, from $1.32 billion in 1984 to $3.05 billion in 1985.

Thirty-nine large thrifts had net losses for 1985, and 37 voluntarily reported this information to the *American Banker*. These losses totaled $430.6 million. Income and loss data for both 1985 and 1984 are available for 26 of these 39 thrifts. The combined net losses at these 26 institutions increased 55.4% from $187.6 million in 1984 to $291.5 million in 1985.

Fed to Decide On Citicorp's Securities Bid

Court Case Appears Assured Whatever the Board's Action

By ANDREW ALBERT

NEW YORK — The Federal Reserve Board is scheduled today to decide on Citicorp's request to underwrite a broad range of securities — a decision that could all but demolish the legal wall separating commercial banks from investment banks.

A year ago, the nation's largest banking company asked the Fed for permission to underwrite and deal in municipal revenue bonds, private mortgage-backed securities, and securities backed by consumer receivables such as credit card accounts.

Attorneys familiar with Citicorp's application are divided on how the Fed board will rule during its closed-door session this morning. The Fed is not expected to disclose its decision until next week. The possibility also exists that the Fed might postpone any decision on the matter, as it has done before. Whatever it decides, the regulators are likely to be challenged in court by the losing corner.

The Securities Industry Association, which has resisted virtually every previous step the banks have taken into the securities business, already has said that it "would seriously consider going at the Fed" in a lawsuit if the regulators approved Citicorp's application.

The alternatives facing Citicorp are not as clear: If its application is denied, the bank could sue the Fed, or, as some speculate, it could force the issue into the courts by ignoring the denial and simply beginning the underwriting functions. It also could choose to take both steps at once.

"The problem now is politics, it has nothing to do with the law," said Dick

This table is based on thrifts responding to American Banker roll call questionnaire which asked for net income for calendar year 1985. However, some thrifts reported net income for their fiscal year ending during 1985. These thrifts are footnoted. Net income is total income (operating income plus nonoperating income) minus total expense (operating expense, nonoperating expense, and income taxes). ROA— is the return on assets. It is calculated by dividing net income for 1985 by total assets outstanding on 12/31/85. This ratio is expressed as a percentage. **(a)**— The net income figure for 1985 includes the gain on sale of assets, which on a pre-tax basis totaled $182,449,000. **(b)**— In the process of changing its corporate name to Meritor Financial Group. **(c)**— Net income is for fiscal year ended 6/30/85. **(d)**— Net income is for the nine months ened 12/31/85. **(e)**— Formerly First Federal Savings & Loan Assn. of Arizona. **(f)**— Formerly Midland/Western Federal Savings & Loan Assn. **(g)**— Net income is for the six months ended 12/31/85. **(h)**— Net income is for fiscal year ended 9/30/85. **(i)**— Net income is for fiscal year ended 10/30/85. **(j)**— FHLBB approved the acquisition of this institution by Great American First Savings Bank, San Diego, earlier this month. **(k)**— On 12/31/85, Hamburg Savings Bank, Brooklyn and Home Savings Bank, White Plains, N.Y. merged under the title of the latter and the charter of the former. Data are combined to reflect this merger. **(†)**— 1984 net income for Hamburg Savings only. **( )**— Indicates a loss. **N.A.**— Not available.

Lower Interest Rates Boost Earnings at Top 100 Thrifts in 1985

Continued from Page 1

Net income is total gross operating income plus gross nonoperating income minus total operating and nonoperating expenses and income taxes.

Reason for Surge

The main reason for the surge in net income at the top 100 earners last year was lower interest rates. Lower rates helped widen the net interest spread between the yield on assets and the cost of funds. In addition, as market rates fell below the rates earned on thrift assets — such as mortgages put on the books since 1982 — many of these assets were sold, adding additional revenue to the bottom line.

According to the Federal Home Loan Bank Board, institutions insured by the Federal Savings and Loan Insurance Corp. were net sellers of $42.2 billion in mortgage loans to the secondary market in 1985. In 1984, these institutions were net purchasers of $341 million in mortgage loans. In December 1985 alone, almost $10 billion of mortgage loans were sold by thrifts in the secondary market, or 23.7% of the net sales for all FSLIC-insured thrifts nationwide last year.

These sales were spurred by the decline in yields in the secondary mortgage market below the rates that had prevailed in the primary mortgage market over the past several years. For example, the average offering rate for Government National Mortgage Association securities declined 274 basis points from 13.13% in 1984 to 10.39% by December 1985, and the secondary offering rate on Federal Housing Administration mortgages fell 311 basis points from 13.81% in 1984 to 10.70% by December 1985, according to data from the Federal Reserve Board.

The main reason thrifts lost money last year was declining asset quality.According to one thrift analyst, these thrifts "took a more than average chance on loans, especially ADC loans." ADC loans are acquisition, development, and construction loans.

The Top Performers of 1985

Home Savings of America, Irwindale, Calif. — the nation's largest thrift in deposits, with $19.5 billion on Dec. 31 — was the top earner in the thrift industry last year with net income of $236.3 million, up 314% from $57 million in 1984. Home Savings is a subsidiary of H.F. Ahmanson & Co., Los Angeles. Richard H. Deihl, president and chief executive officer of Ahmanson, said in a news release: "The company's record earnings performance in 1985 was attributable to Home Savings of America's operations, and represented tangible results of the ambitious asset portfolio restructuring program begun in 1981. This restructuring process, coupled with 1985's moderate interest rate environment, translated into record loan volume, loan sales, and a substantial increase in net interest income."

Among the top 10 earners last year, the largest percentage gain in net income and the largest return on assets were posted by third-ranked Gibraltar Savings Association, Houston. Its net income rose 414% to $169.8 million in 1985 from $33.1 million in 1984.

Gibraltar's return on assets — calculated by dividing net income for 1985 by assets on Dec. 31 — was 3.35%. Gi-

Seattle Banks Get Takeover Nibbles

Special to the American Banker

SEATTLE — The subject of possible buyouts came up at the annual meetings, held here, of Washington State's two largest independent banking companies — Rainier Bancorp. and Peoples Bancorp. But shareholders went away without definite answers.

In the future, Rainier Bancorp. could become a "larger, stronger, better regional banking company" or become a "part of a larger whole," chairman G. Robert Truex Jr. told shareholders on Tuesday. Rainier is Washington's second largest banking company, with Seafirst, which is owned by BankAmerica Corp., in first place.

"I would be less than candid with you if I didn't tell you that people nibble around," Mr. Truex said. "Sooner or later someone is going to make a bid for us, I suppose."

Rainier, he said, has "no grand plan" but instead tries to "take advantage of things as we see them," including acquiring small banks in areas of Washington State "where we're not strong. We don't care to grow for growth's sake," he added. "We won't pay for size; we see ourselves as buying earnings."

As for a possible takeover, Mr. Truex said Rainier "has nothing on the fire" at the moment, but a takeover "could happen — we study these things constantly."

Partly because of intense takeover speculation, Rainier Bancorp. stock has risen to 170% of book value and currently has a market value over $800 million. Shareholders weren't given an earnings projection, but John Mangels, Rainier president, said the company anticipates another "challenging year." The company will emphasize new products in 1986, he said.

Meanwhile, Jay Green 3d, chairman of Peoples Bancorp., Seattle, was telling shareholders that Peoples is "keeping an open mind" about a possible takeover. Peoples is the state's fourth largest bank holding company, but second in size among companies that are still independent.

Mr. Green said Peoples has had "several expressions of mild interest" from potential suitors, including one from KeyCorp., the Albany, N.Y., holding company that in little more than a year has bought banks in Washington, Oregon, and Alaska. KeyCorp recently agreed to acquire Seattle Trust & Savings Bank at a price Mr. Green characterized as "astonishing" — reportedly about 1.8 times current book value.

Mr. Green said the price of Peoples stock, which has more than doubled in less than two years, is "difficult to justify on earnings alone." In fact, Peoples expects to report only "nominal" earnings for the first quarter because of the highest loan losses in its history, he said. Earnings, he added, are expected to recover in the second quarter and to be higher than year-ago levels in the third and fourth quarters. ■

LET'S TALK CARD PROCESSING AND MAILING EXPERT TO EXPERT

As the manager of your credit or debit card program, you know the needs of your institution and its all important cardholder base. You're an expert at what you do.

When you look for a card processing and mailing operation, you want one that handles the mass re-issues as efficiently as the weekly or monthly updates. One that's responsive, offering fast turnaround while providing the security you insist on to protect the integrity of your institution and its cardholders.

You've Met Your Match With Malco.

Most people know us as the world's largest producer of quality transaction cards, manufacturing pros that have served the industry for over 30 years. But look again and you'll also see a high volume card processing and mailing operation, designed by the same group of experts.

When you're experts, it shows. With data processing, card personalization and mailing handled in the same ultra-secure facility, Malco can turn around your customer updates in 48 hours. For mass reissues, we'll work hand-in-hand with you to meet those ominous deadlines, on time. And while we always stand ready to manufacture your cards, we'll be happy to personalize and mail cards that have been produced by another vendor.

So demand the best for your institution. Ask for Malco's Total Card Services…the ultimate in single-source convenience.

This table is based on thrifts responding to American Banker roll call questionnaire which asked for net income (loss) for calendar year 1985. However, some thrifts reported net loss for the fiscal year ended in 1985. These thrifts are footnoted. **Net income (loss)** is total income (operating income plus nonoperating income) minus total expense (operating expense, nonoperating expense, and income taxes). **ROA**— is the return on assets. It is calculated by dividing net loss for 1985 by total assets outstanding on 12/31/85. This ratio is expressed as a percentage.**(a)**— Net loss is for fiscal year ended 9/30/85. **(b)**— Net income data were not available for Broadview Savings, but were available for its parent, Broadview Financial Corp.. All data shown are for the parent holding company. **(c)**— Net loss is for the six-month period ended 12/31/85. **(d)**— On 12/31/85, First Federal Savings & Loan Association, Minneapolis, and Minnesota Federal Savings & Loan Association, St. Paul, merged to form a new institution, First Minnesota Savings Bank.**(e)**— A new institution. The loss is for 12/85 only. **(f)**— Federal regulatory data as of 9/30/85. **(g)**— Losses for the year 1985 were calculated by American Banker. Losses for the first nine months of 1985 of $44.3 million were added to net income of $5.9 million for the fourth quarter of 1985. **(†)**— Preliminary unaudited results for the year. **( )**— Indicates a loss. **N.A.**— Not available.

Top Thrifts Get Fat on Lower Interest Rates, but Losers Lose Big

Continued from Page 31

braltar, which ranked 41st in deposits with $3.1 billion at yearend, cited the sale of assets as the main reason for the gain. According to a spokesman for the thrift, the 1985 net income figure includes the gain on sale of assets, which on a pretax basis totaled $182.4 million.

The thrift with the largest percentage increase in net income was Northeast Savings FA, Hartford, Conn. Its earnings rose 1,888% to $31.5 million over the nine months ended Dec. 31, 1985, from $1.6 million for the full year 1984. A spokesman for the thrift said that net interest income had risen 64% over the last nine months of 1985 to $57.9 million, and loan receivables were up 24% for the entire year.

California had 23 thrifts ranked among the top 100, including eight of the top 10 earners. New York had 17 thrifts among the top 100, and Texas had nine.

A regional breakdown shows that the West, including California and Texas, was the home of 41 of the top 100 thrift earners last year. The Middle Atlantic States, including New York, had 24; the Midwest had 21 thrifts ranked among the top 100; New England had seven; the Southeast had six; and Puerto Rico had one.

The $1.2 billion-asset Central Savings & Loan Association, San Diego, Calif., lost $48.4 million last year, the largest full-year loss reported by a thrift to the *American Banker*. The institution is plagued by a large and poorly performing real estate loan portfolio, and it is currently being run by managers hired by the Federal Home Loan Bank Board.

The second largest loss for the year was posted by the $5.7 billion-asset Bowery Savings Bank, New York. Bowery lost $38.4 million last year, but returned to profitability in the fourth quarter. Over the first nine months of 1985, Bowery lost $44.3 million, but the savings bank reported income of $5.9 million for the last quarter of the year. Bowery's losses stem from its large portfolio of low-yielding, fixed-rate loans.

In October 1985, a $473 million rescue plan was put together by the Federal Deposit Insurance Corp. and a group of private investors headed by Richard Ravitch, former chairman of New York's Metropolitan Transportation Authority. The package included $373 million from the FDIC and $100 million from the private investors, along with the conversion of the thrift from a mutual to stock ownership.

The third largest loss reported last year was $33.2 million by the $2.7 billion-asset American Savings & Loan Association of Florida, Miami. American incurred substantial losses from reverse repurchase deals it entered into with E.S.M. Government Securities Inc., Fort Lauderdale, which collapsed in March of last year. According to American's annual report, it established a reserve for losses associated with the E.S.M. deals of $55.3 million after applicable tax benefits of $13.4 million.

The Dallas Federal Savings and Loan Association, a $2.2 billion-asset thrift, lost $29 million last year, the fourth largest loss. Most of the losses resulted from poor real estate development loans. Dallas Federal was acquired by Bright Banc Savings Association, Dallas, at yearend for approximately $105 million. Bright Banc is principally owned by H.R. "Bum" Bright.

Beverly Hills Savings lost $28.9 million over the first nine months of 1985, the fifth largest loss by a thrift last year. The loss data are from the Federal Home Loan Bank Board's report of income for the quarter ending Sept. 30, 1985. The institution was seized by the Bank Board in April of last year after incurring losses of approximately $100 million in 1984. The thrift had substantial losses in its real estate loans and investments, which included some joint ventures.

The three states with the most thrifts reporting losses last year were: California with seven, including four of the 10 largest losses; Ohio with five, including one of the 10 largest; and Florida with six, including three of the 10 largest.■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **100 Most Profitable Thrifts** survey that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

Credit Card Deal May Be Model for Securitization

By LYNN BRENNER

News Analysis

NEW YORK — A deal announced Thursday by Salomon Brothers Inc. and Bank One, Columbus, may provide the answer to a problem that bankers have been wrestling with for a year and a half — how a bank can make its receivables attractive to investors, without retaining liability for defaults on those receivables.

Many banks are eager to securitize and sell their receivables, in order to reduce their capital requirements, by getting assets off their balance sheets. But investors want some recourse in the event of default on the receivables. And bank regulators have refused to recognize as true sales those in which the bank offers recourse.

Salomon Brothers last week announced a private placement of $50 million of pass-through certificates based on a pool of Bank One, Columbus credit card receivables. The buyer has no recourse to the bank in the event of defaults. Instead, he could call on a reserve fund equal to at least twice the historical default level on the credit card receivables.

Last year Bank One's credit card net chargeoffs represented 5.37% of its average outstanding balances, while the industry average for 1985 was 2.96%, according to Visa U.S.A. Inc. A bank spokesman said the credit card chargeoffs will be lower this year.

The effective yield on the Bank One receivables packaged by Salomon Brothers is 19%. The securities, called

Congress Prepares 3-Month Extension Of Interstate Law

By BARTLETT NAYLOR

WASHINGTON — House debate is scheduled for today on the extension of emergency interstate takeovers of ailing banks and thrifts for another three months, with a vote slated for Tuesday, the day the current takeover provisions expire.

Meanwhile, Senate banking leaders have dropped efforts to place a moratorium on the chartering of limited service, or nonbank banks, as part of the extension legislation.

"We'll just deal with the bill the House sends us," said M. Danny Wall, chief aide to Sen. Jake Garn, R-Utah, chairman of the Senate Banking Committee.

The House bill, H.R. 4551, was introduced on April 10 by Rep. Fernand J. St Germain, D-R.I., chairman of the House Banking Committee. It simply extends until July 15 two provisions of the Garn-St Germain Act of 1982 that otherwise expire on Tuesday. One pro-

BofA President Puts the Squeeze On Hiring Policies

By MIKE CARROLL

NEW YORK — Thomas A. Cooper, Bank of America's new president, is wasting no time in making his presence felt. Just a few weeks after taking over the day-to-day reins at the nation's second largest bank, the chief operating officer has tightly restricted the hiring of new officers.

First Chicago Considers Restructuring
Page 54

The order, put into effect quietly at the end of March, would affect the hiring of even the most junior-level officers and is a new twist on the bank's campaign to reduce overhead by trimming away the fat from what many analysts see as a bloated corporate bureaucracy.

The restrictions will not eliminate new hirings, but they will make them more difficult. Approvals for new hires

A selected breakdown of deposit accounts for the top 300 commercial banks in total deposits on 12/31/85. The breakdown includes total deposits booked by the bank's foreign offices. Also included are the following three deposit accounts booked by the domestic offices of the bank: IRAs— Individual Retirement Accounts— plus Keogh Plan Accounts; Super NOWs-NOW accounts— introduced in January 1983; and MMDA's-Money Market Deposit Accounts— introduced in December 1982. In addition, net income for the full year 1985 is shown.

( )— Indicates a loss. N.A.-Not available.

Top Deposit-Takers Among Commercial Banks In Selected Deposit Categories as of December 31, 1985 (Net Income for 1985 Included)

A selected breakdown of deposit accounts for the top 300 commercial banks in total deposits on 12/31/85. The breakdown includes total deposits booked by the bank's foreign offices. Also included are the following three deposit accounts booked by the domestic offices of the bank: IRAs— Individual Retirement Accounts— plus Keogh Plan Accounts; Super NOWs-NOW accounts— introduced in January 1983; and MMDA's-Money Market Deposit Accounts— introduced in December 1982. In addition, net income for the full year 1985 is shown.

(a)— Formerly Fourth National Bank & Trust Co. Changed title on 3/31/86. (b)— Formerly Suburban Bank. Changed title when its parent, Suburban Bancorp., was acquired by Sovran Financial Corp., Norfolk, Va., earlier this month. ( )— Indicates a loss. N.A.-Not available.

Top Deposit-Takers Among Commercial Banks
In Selected Deposit Categories as of December 31, 1985
(Net Income for 1985 Included)

Survey . . .

Continued from Page 1

Chase Manhattan Bank in New York — the largest gain by a commercial bank. Empire of America FSB in Buffalo, N.Y., with a 158% increase in IRA deposits, posted the largest gain by a savings bank. First Nationwide Savings FS&LA in San Francisco, with a 214% increase in these deposits, had the largest gain by a savings and loan and by any institution among the top 25. And Home Savings of America FA in Irwindale, Calif., posted a 95% gain, the largest among the top 10 institutions in IRAs.

These four institutions accounted for more than a third of the gain in IRA deposits among the top 25 institutions.

These are some of the findings from the *American Banker's* third annual survey of the top commercial banks and thrifts. The survey, results of which appear today, is a followup to the top 100 thrifts survey — which included savings banks and savings and loan associations only — published on Feb. 28; the 100 most profitable thrifts survey, published March 28; and the top 300 commercial banks survey, published March 18.

Today's survey results are presented in six major tables. One table provides net income and a selected deposit breakdown for the top 300 banks. Another provides net income and a selected deposit breakdown for the top 100 thrifts.

From this group of 400 institutions, the *American Banker* ranks and lists the top 25 deposit-taking institutions, the top 25 banks in IRA deposits, the top 25 thrifts in IRA deposits, and the top 25 institutions in IRA deposits. This year, for the first time, credit unions are included in the IRA tables only, to determine the top 25 thrifts and top 25 institutions in these deposits.

No credit union ranked among the top 25 in IRAs. But the Navy Federal Credit Union in Washington, D.C. — the nation's largest credit union in deposits, with $1.7 billion — ranked 24th among thrifts in IRAs, with $306.8 million on June 30, 1985, the latest data available for the institution. Its IRA deposits rose 55% last year and accounted for almost 18% of its total deposits, the highest percentage among the top 25 thrifts.

The Top Four Gainers

The Chase Manhattan Bank had $595.8 million in IRA and Keogh deposits at yearend to rank 14th among the top 25 institutions in these accounts and sixth among commercial banks. A year earlier, Chase had $330 million in IRAs, ranking 21st among all institutions in IRA deposits and eighth among banks.

According to one IRA analyst, the gain at Chase "reflects the clout of the institution. The bank started from a very small base, and the growth related to that base will be substantial."

IRA deposits accounted for only 0.5% of Chase's total deposits at yearend 1984, the smallest percentage among the top 25 institutions. At yearend 1985, this percentage stood at 1%, again the lowest of any institution in the top 25.

Empire of America had $504 million in IRA deposits at yearend to rank 19th among all deposit-takers and 12th among thrifts. At yearend 1985, Empire had $195.4 million in IRA deposits, ranking 50th among all institutions and 35th among thrifts.

According to James Harris, vice president at Empire of America, the thrift began a multimedia campaign in January 1985 based on the slogan, "Throw the Book at Uncle Sam!"

The "book" was an informational booklet that discussed the benefits of IRA accounts and gave 25 tips on IRA savings. Mailed directly to customers in the market area, the booklet referred to Empire as an IRA "taxpert."

"This booklet helped position Empire as an information source and expert in IRAs in the marketplace," Mr. Harris said.

The campaign became price-oriented in the latter part of the IRA season, he said. Some of the more popular IRAs were the "dollar doubler" and "dollar tripler" accounts, which guaranteed that a $2,000 deposit would double in 5½ years and triple in nine years.

According to consolidated data provided to *American Banker* by First Nationwide Savings, it ranked 13th among all institutions and eighth among thrifts, with $623.7 million in IRA deposits on Dec. 31 (not $628.7 million as shown in the top 25 listing). A year earlier, First Nationwide reported an unconsolidated figure of $198.5 million for its California operations only to rank 48th among all deposit-takers and 32d and among thrifts.

For the second year in a row, Home Savings of America was the top thrift in IRA deposits, ranking second among all institutions. According to data provided by the thrift, Home Savings' yearend IRA deposits totaled $1.79 billion, up 95% from $917 million the year before.

An explanation for the sharp gain at Home Savings was not available at the time of this writing.

Other Survey Findings

- The top 25 institutions — banks and thrifts — held $19.15 billion in IRA and Keogh deposits at yearend 1985, up 37.7% from $13.91 billion the year before.
- IRA deposits at all institutions, including money market mutual funds, totaled $148.4 billion on Dec. 31, up 35.3% from the year before. The top 25 institutions, therefore, held 12.9% of all IRA deposits on Dec. 31, up from 12.68% at yearend 1984.
- For the second consecutive year, the Bank of America in San Francisco was the top institution in IRA deposits. It held $1.99 billion on Dec. 31, up 24% from $1.61 billion a year earlier.
- Citibank in New York is the nation's top deposit-taking institution, with $94.4 billion on Dec. 31, up from $79.6 billion a year earlier, when it ranked second to Bank of America. More than 60% of Citibank's deposits, about $57.4 billion, come from the bank's foreign offices.
- Based on domestically booked deposits, the Bank of America is the largest deposit-taker. Almost 65% of its $88.17 billion in total deposits, or $57.1 billion, come from the bank's domestic offices.
- The total deposits of the top 25 deposit-takers were $694.1 billion on Dec. 31, or 21.85% of the estimated $3.18 trillion held by all deposit-taking institutions. A year earlier, the top 25 deposit-takers held 22.6% of all of the nation's deposits; just five years ago, they held 26% of the nation's deposits.

The decline in share is attributable to several factors. The movement to same-day clearing for members of the Clearing House Interbank Payments System in October 1981 significantly reduced the amount of float reported in the deposit figures of New York banks. In addition, over the last three years, several large banks — such as Continental Illinois National Bank and Trust Co. in Chicago and Crocker National Bank in San Francisco — have experienced problems with their energy and real estate loan portfolios, which have reduced their ability to take deposits.

- The United States had 36,773 deposit-taking institutions at yearend 1985: 15,282 commercial banks, 3,244 savings and loan associations, 370 savings banks, and 17,877 credit unions.
- The commercial banks include 4,976 national banks; 8,425 state-chartered banks that are not members of the Federal Reserve System; 1,070 state-chartered, Federal Reserve-member banks; 764 non-FDIC-insured banks; and 47 "other" FDIC-insured banks primarily engaged in trust activity.
- Despite substantial growth in mergers in 1980-1985, the number of commercial banks rose 2.8% over the five-year period. The number of national banks rose 12.5%, while state member banks were up 7.3%. Non-FDIC-insured institutions, which include the U.S. branches and agencies of foreign banks, increased by 133%. The number of state-chartered nonmember banks fell 6.5%, and there was a 56% decline in the number of other FDIC-insured banks. ■

Auto . . .

Continued from Page 3

dealerships.

Ford said last week it plans to end its current financing incentive program on Wednesday. At present, it is offering 9.9% financing on some models and 7.7% on others. General Motors planned to end its 9.9% program this past Saturday.

"They need something more dramatic than 9.9%," said Hutton's Mr. Phillippi. "Right now, you can go out and get 10% from a credit union and almost as low a rate from a bank."

For General Motors, the motivation to start a new incentive program stems from its growing inventory of unsold cars.

As of April 1, the backlog was running at about 72 days, well above the 60 to 65 days the company likes to maintain, said Bernstein's Mr. Brady. Ford's inventory at about 58 days is near the company's target range, he added.

The last major round of incentive financing came during last year's third quarter when slow sales and a strike by workers who transport autos from the factory to dealerships had created large inventories. All three automakers offered 7.7% financing at that time.

During a period of about 45 days that began at the end of August, General Motors sold about 400,000 vehicles under 7.7% financing, a spokesman for GMAC said last Thursday, adding that the automaker regarded that program as "tremendously successful."

The spokesman declined to comment on whether a new round of financing incentives is in the offing.

Since General Motors announced price increases averaging 2.9%, the cost of the incentives may be offset by higher prices, Mr. Phillippi noted. Mr. Brady added that he expects dealers to pay for a high proportion of the incentives, perhaps as much as half.

When GMAC and its counterparts at Ford and Chrysler offer below-market financing, the subsidy is paid for by the parent company and its dealer network. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Top Deposit Takers** survey that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

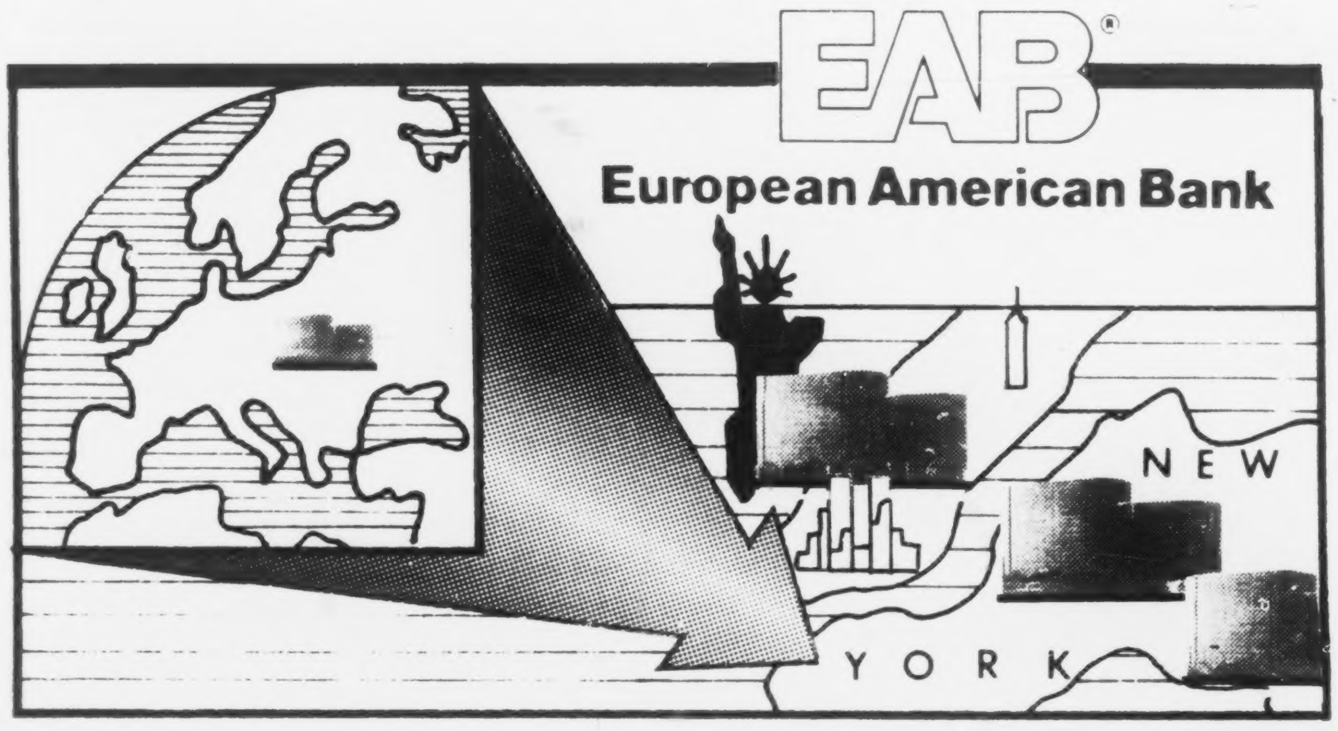
A Leaner, Wiser European American Bounces Back

Company Shifts Its Focus From National to Regional

By JOHN P. FORDE



NEW YORK — Until about two years ago, European American Bancorp. was fighting outside its weight class.

The holding company was trying to compete in the heavyweight division, vying with national and international institutions more than five times its size. And with $8.5 billion in assets — which makes it a relative lightweight in those circles — European American was losing most rounds.

The company's earnings were disappointing, with returns on assets lingering below 0.50% in 1980-1984. At the heart of this situation were nonperforming loans, which were taking an increasingly large bite out of net interest earnings.

An enviable Long Island franchise, which the company had acquired when it bought the failed Franklin National Bank in 1973, was withering — used only for collecting deposits, at a time when the middle market on Long Island was booming.

Also, European American was attempting to develop its own state-of-the-art computer system — with a $60 million investment capitalized over four years — that would fill its automation needs more efficiently than the

Capital Grows Twice as Fast as Assets Among Nation's Top Banks in 1985

By L. MICHAEL CACACE

NEW YORK — Primary capital increased 16% at the nation's top 10 banking companies in 1985, more than double their 7.5% asset growth last year. And the nation's top 100 banking companies, ranked by primary capital, reported a 19% increase in primary capital, compared with 11% growth in total assets.

The superior growth in capital is attributable to the new capital adequacy requirements adopted by the Federal Reserve Board last May. The Fed raised the minimum primary-capital-to-assets and total-capital-to-assets levels one-half percentage point — to 5.5% and 6%, respectively — for multinational and regional banking organizations.

These are some of the findings of the *American Banker's* annual bank holding company review published today. Today's review consists of five statistical listings: the top 100 bank holding companies in total assets on Dec. 31, 1985; a regional breakdown of the top 100 companies in assets; the top 100 banking companies in primary capital; the top 100 banks and bank holding companies in net income for 1985; and a listing of the nonrecurring income items included in the earnings of the top 100 firms in earnings.

The sizable growth in primary capital boosted the primary-capital-to-assets level of the top 10 firms to 6.63% on Dec. 31, 1985, compared with 6.14% the year before. For the top 100 firms, primary capital rose 44 basis points to 6.89% at yearend 1985 from 6.45% on Dec. 31, 1984.

The *American Banker* finds that all of the top 100 bank holding companies in primary capital had primary-capital-to-asset levels exceeding the 5.50% minimum established by the Federal Reserve Board. The levels ranged from a low of 5.61% for the 89th-ranked BayBanks Inc. of Boston to a high of 10.38% for 80th-ranked First Railroad & Banking Co. of Augusta, Ga.

The primary capital levels listed for

Breakdown Points Up Birth of Superregional

By IRENE APPELBAUM

NEW YORK — A new class of bank holding company, the superregional, has emerged in the wake of the U.S. Supreme Court's affirmation of the constitutionality of regional interstate mergers and acquisitions.

The appearance of the superregional is evident in the *American Banker's* first regional breakdown of the top 100 bank holding companies. In the breakdown, companies are listed in order of size within their region, along with their total assets at yearend 1985 and their national asset ranking.

The new listing will show which of these new powerhouses are becoming dominant forces in their regions.

The *American Banker* groups bank holding companies into five geographical regions — the Northeast, the Mid-Atlantic, the Southeast, the Midwest, and the West.

In general, a superregional bank

The American Banker groups bank holding companies into five geographical regions. The five regions are: the Northeast, the Mid-Atlantic, the Southeast, the Midwest, and West. The Northeast Region is comprised of the following states: Connecticut, Massachusetts, Maine, New Hampshire, New York, Puerto Rico, Rhode Island, and Vermont. The Mid-Atlantic Region is comprised of: Washington, D.C., Delaware, New Jersey, and Pennsylvania. The Southeast Region is comprised of: Alabama, Arkansas, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

The Midwest Region is comprised of: Iowa, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnescta, Missouri, North Dakota, Nebraska, Ohio, Oklahoma, South Dakota, and Wisconsin.

The Western Region is comprised of: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, New Mexico, Nevada, Oregon, Texas, Utah, Washington, Wyoming. Because of their impact on the rankings of the top 100 banking firms, New York City banking firms are shown separately from all other banks in the Northeast Region, and California and Texas banking firms are listed separately from all other banking firms in the Western Region.

Top 100 Bank Holding Companies in Primary Capital

As of December 31, 1985, Compared with December 31, 1984

Primary capital is the sum of total shareholders' equity; mandatory convertible debt; allowance for possible loan and lease losses; and minority interest in equity accounts of consolidated subsidiaries. Total capital is primary capital plus secondary capital. Secondary capital is limited-life preferred stock plus qualifying debt. The primary capital ratio is calculated by dividing primary capital on Dec. 31 by total assets on Dec. 31, expressed as a percentage. Note: The American Banker ratio is not calculated in the same manner as the Federal Reserve Board ratio. The American Banker does not add back the allowance for possible loan and lease losses to total assets, as the Fed does. Therefore, for each firm, the American Banker ratio will be from 5-to-10 basis points higher than the Fed ratio, depending on the size of the bank's allowance for possible loan and lease losses. (a)— The data are for National Westminster Bank USA, the bank subsidiary of Natwest Holdings Inc. (†)— Average regulatory ratio. See story beginning on page 1 for details. N.A.— Not available.

Net income is income after taxes and minority interest, but before preferred dividends, extraordinary items, and significant transactions. The 1984 net income as reported in 1985 and has not been restated. Adjusted net income is net income for certain non-recurring items such as: gains (losses) from sales of buildings, branches, subsidiaries, securities sold to settle loans or debt, proceeds from equity/debt swaps, and other nonrecurring items such as venture capital profits (losses). All nonrecurring items, which are subtracted from net income, are on an after-tax basis, wherever possible. Return on Assets is the return on average assets. Return on Equity is the return on average common shareholders' equity.

(a)— Excludes $95.8 million after tax gain from sale of the company's Colonial Mortgage subsidiaries during the second quarter. (b)—Excludes $38.4 million after tax gain from the sale of Alliance Mortgage Co. (c)— A multibank holding company. (d)— A one-bank holding company. (e)—Based on year end equity. (j)—A subsidiary of National Westminster Bank, Plc., London. (k)—Holding company figures not available. Data is for lead bank used for both 1985 and 1984. (m)—A subsidiary of Boston Co. Inc., which in turn, is a subsidiary of Shearson Lehman Brothers. (r)—Based on revised data received after publication of the top 25 earners on 1/28/86. (R)—Revised since publication of the top 25 earners on 1/26/86.

“Adjustments” to Net Income — 1985

Nonrecurring items exluded by American Banker to Obtain Adjusted Net Income

(In millions of dollars on an after-tax basis)

(a)—The $22.1 million is the net after-tax amount of two 1985 nonrecurring items, one a loss, the other a gain. The loss resulted from sale of the company's portfolio of reduced-rate loans. The gain resulted from recalculation of deferred tax liabilities related to investment in leveraged leases. (b)—NYS/NYC tax adjustment. (c)—Sale of investment. (d)—Dispositions and write-downs. (e)—Proceeds from equity/debt swaps. (f)—Reported on a before-tax basis. (g)—Sale of assets acquired on foreclosed debt. (h)—Loss From investment. (i)—Loss From sale of loans. (j)—Loss due to merger expenses. (k)—Loan servicing sales net of marketing. (l)—Sale of other real estate. (m)—After tax gain on sale of real estate.

Superregionals Surface in Geographic List

Continued from Page 1

holding company is a non-money center company with approximately $10 billion or more in assets that has merged across state lines within the last 12 months, or otherwise has a significant regional presence.

Based on these criteria, 12 superregionals have emerged — seven in the Southeast and five in the Northeast.

The largest superregional in the Southeast is NCNB Corp., Charlotte, N.C., ranked 23d in the nation with $19.8 billion in assets at yearend 1985.

In the Northeast, Bank of Boston Corp., another superregional, was ranked 14th in the nation and first in the region. It reported $28.3 billion in assets.

Six of the top 10 bank holding companies in the United States are located in New York City, three are in California, and one is in Chicago.

Citicorp, New York, heads the list of bank holding companies in the U.S. with $173.6 billion in assets at yearend. Second on the list is the San Francisco-based BankAmerica Corp., with $118.5 billion in assets. Los Angeles and San Francisco together account for six of the nation's 100 largest bank holding companies, compared with 12 in New York City.

The region with the greatest number of bank holding companies in the top 100 is the Midwest, with 26. The Northeast and the Southeast each accounted for 21 of the 100 largest bank holding companies. The West had 19 banking companies and the mid-Atlantic states had 13.

New York, Boston, and Chicago were the only cities that had five or more of the 100 largest banking companies, with 12 in New York and five each in Boston and Chicago.

The Northeast region comprises: Connecticut, Massachusetts, Maine, New Hampshire, New York, Puerto Rico, Rhode Island, and Vermont.

The Mid-Atlantic region comprises: the District of Columbia, Delaware, New Jersey, and Pennsylvania.

The Southeast region comprises: Alabama, Arkansas, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

The Midwest region comprises: Iowa, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, Missouri, North Dakota, Nebraska, Ohio, Oklahoma, South Dakota, and Wisconsin.

The West region comprises: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, New Mexico, Nevada, Oregon, Texas, Utah, Washington, and Wyoming.

Because of their impact on the rankings of the top 100 banking firms, New York City banking firms are shown separately from all other banks in the Northeast region, and California and Texas banking firms are listed separately from all other banking firms in the West region. ■

Ex-First Tennessee Bankers Form PR and Marketing Firm

Special to the American Banker

MEMPHIS — Two former officials of First Tennessee Bank have formed their own marketing communications firm, WestRogers. Becky J. West, former public relations manager of the bank, and Jayne H. Rogers, former vice president/product development manager, say WestRogers will serve financial institutions and other clients with planning, marketing, public relations, and advertising. ■

S&P Opens an Office in Tokyo

NEW YORK — Standard & Poor's Corp. has opened an office in Tokyo. The rating agency, which currently grades about 75 securities from Japanese companies — including 12 banks — said the opening of the representative office last week reflects the increasing importance of Tokyo as a major world financial center. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its statistical listings for the financial services industry meet your information needs. So would you spend a moment to give us some feedback on the **Top Bank Holding Companies** survey that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

(1.) How would you **change** the tabulation to make it more useful? What would you add?

(2.) What do you like **best** about this tabulation?

(3.) What do you like **least** about this tabulation?

(4.) **How** do you use this information in your work?

(5.) What **new** statistical survey would you like to see?

...affordable, comprehensive, *and* quarterly...

Depository Institutions Performance Directory
by Lyons, Zomback & Ostrowski, Inc.

This valuable directory, packed with vital data, analysis and commentary, helps you monitor the financial health of every FDIC- or FSLIC-insured depository institution in the country – including commercial banks, savings and loan associations, savings banks, and bank holding companies.

For every insured institution, the **Directory** gives you the latest quarterly figures from the Federal Reserve Board, *plus* the past three years' data on:

Profitability
- ☐ Return on Assets
- ☐ Earning Asset Yields and Net Interest Margins
- ☐ Non-Interest Income and Overhead Levels

Capital Adequacy
- ☐ Regulatory Capital Ratios
- ☐ Intangible Asset Levels

Commercial Bank Asset Quality
- ☐ Net Charge-Offs
- ☐ Sub-Quality Assets and Reserve Levels

Size and Growth
- ☐ Asset and Deposit Rankings and Growth Rates

Balance Sheet Structure
- ☐ Commercial, Real Estate, and Consumer Loan Levels
- ☐ Deposit Levels and Dependence on Large Denomination Deposits

Asset and Deposit Rankings

PRICE: $295.00 3 Volume Set

The thorough peer group coverage in the **Directory** allows you to evaluate your institution's performance by comparing it *directly* to that of competitive institutions. You discover firsthand what kinds of services the competition is offering... how well a particular management strategy worked last year... what types of deposits are being taken in... what kinds of loans are being offered... how many branches an institution has... and more. Best of all, this vital information is completely updated *every quarter.*

Successful bank strategies are what count. You can improve your bottom line, as long as you have all the available information. And it's all here in **Depository Institutions Performance Directory.**

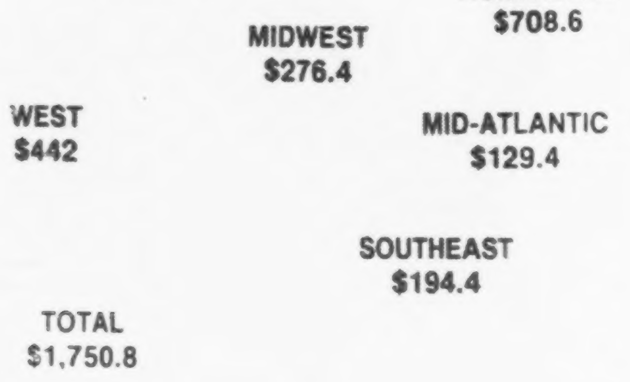
Capital Grows Twice as Fast as Assets Among Nation's Top Banks

Continued from Page 1

99 of the top 100 firms were calculated by *American Banker*. Yearend primary capital was divided by yearend assets and expressed as a percentage. For 82d-ranked State Street Boston Corp., however, the average regulatory level calculated by State Street was used. The yearend assets for State Street were substantially inflated by heavy transaction activity and cash movements by customers. As a result, yearend assets were about $1.2 billion higher than average assets.

Among the top 10 firms, the highest primary capital level was 8.05% for J.P. Morgan & Co., New York, and the lowest was 6.19% for BankAmerica Corp., San Francisco.

Regional Asset Totals for Top 100 Bank Holding Companies
(In millions of dollars)



Among the top 100 firms, two had levels between 5.50% and 6%; 17 were between 6.01% and 6.49%; 29 were between 6.50% and 6.99%; and 52 were over 7%.

On average, the *American Banker*-computed capital levels are larger than the Fed-computed levels by five to 10 basis points. The reason for the difference is that the *American Banker* does not add to total assets the allowance for possible loan and lease losses, as the Fed does.

Primary capital is the sum of total shareholders' equity capital (common stock, perpetual preferred stock, surplus, undivided profits, and contingency and other capital reserves), mandatory convertible instruments, allowance for possible loan and lease losses, and minority interest in equity accounts of consolidated subsidiaries.

Mandatory convertible instruments are subordinated debt that eventually is transformed into common or perpetual preferred stock within a specified time not to exceed 12 years. Mandatory convertible debt includes equity contract notes and equity commitment notes that were issued before May 15, 1985. The holder of an equity contract note must take common or perpetual preferred stock as payment for the note. Equity commitment notes are redeemable only with the proceeds from the sale of common or perpetual preferred stock.

Total capital is primary capital plus secondary capital. Secondary capital is the sum of limited-life preferred stock and subordinated notes and debentures and unsecured long-term debt with an original maturity of seven years.

According to the Fed, adequate capital "provides a buffer for individual banking organizations in times of poor performance, helps to maintain public confidence in particular banking organizations and in the banking system, promotes the safety of depositors' funds, and supports the reasonable growth of banking organizations. An evaluation of capital adequacy is one of the major purposes of a bank holding company examination."

For the top 10 firms, primary capital totaled $51.5 billion on Dec. 31, 1985, up 16% from $44.4 billion a year earlier. The total shareholders' equity component of primary capital rose to $37 billion, up 11% from $33.3 billion the year before. The allowance for loan losses was up 31%, to $7.7 billion from $5.9 billion; and mandatory convertible capital notes jumped 32%, to $6.7 billion from $5.1 billion.

For the top 10 firms, total shareholders' equity made up 72% of primary capital on Dec. 31, 1985, down from 75% the year before. The allowance for loan losses accounted for 15% of primary capital at yearend, compared with 13.3% a year earlier; and mandatory convertible capital notes made up 13% of primary capital, compared with 11.5% the year before.

For the top 100 firms, primary capital totaled $120.5 billion and total capital was $151.9 billion. Primary capital rose 18.8% among the 94 companies in the top 100 that reported primary capital for both 1984 and 1985. And total capital rose 29% at the 91 firms among the top 100 reporting total capital for both years. The total capital-to-assets level for these 91 firms was 8.79% at yearend 1985, up 111 basis points from 7.68% the year before. ■

Meetings . . .

Continued from Page 19

acquirer.

Holders of nearly 68% of the shares voted in favor of authorizing more Chase stock.

At Citicorp's meeting, shareholders of the nation's largest banking company approved a bonus plan allowing top executives to share in a pool of restricted stock worth nearly $20 million. Restrictive stock plans, often known as "golden handcuffs," are used at a growing number of large corporations to discourage top executives from jumping to competing companies.

Citicorp's plan allows executives to accumulate stock in the company but prohibits them from trading or selling the awarded shares for a period of up to 10 years. Employees leaving the company within that restricted period — except for retirement or disability — would be required to forfeit any stock they were awarded under the program. The length of the restriction period for each award would be determined by the compensation committee of Citicorp's board of directors.

The stock plan won overwhelming approval, with holders of 97.5% of the outstanding shares voting in favor of the measure.

Separately, Citicorp's voters defeated shareholder proposals to increase the bank's disclosure of Third World loans and to end all business operations in South Africa unless that nation abandoned its apartheid policy by the end of this year.

Citicorp's board, which opposed the proposal, said it also favors the dismantling of the apartheid system, but argued that a withdrawal would only reduce the bank's influence with the South African government and business community.

Meanwhile, Bankers Trust's newly adopted policy states that Bankers Trust will make no new loans to any sector of the South African economy, and will not voluntarily extend any existing agreements. ■

First City of Texas Pledges Assets to Back Credit Line

Breaking of Covenants Prompts Signing Of New Pact with Money Center Banks

By BARTLETT NAYLOR
and ROBERT TRIGAUX

WASHINGTON — First City Bancorporation of Texas Inc., Houston, which last week said it had increased provisions for loan losses to a record $275 million, has restructured its credit lines with major money center banks and pledged assets to back the lines.

First City's problems stem from rapidly falling oil prices and accompanying troubled economic conditions in Texas.

According to First City's filing Tuesday with the Securities and Exchange Commission, the bank holding company on April 16 amended its revolving credit and term loan agreement by the "pledging of certain assets to secure all borrowings" under the credit agreement.

The Houston banking group signed a new contract for its credit line because its heavy loan-loss provisions resulted in First City's breaking of existing loan covenants, according to a source at First City. The credit line amounts to approximately $210 million, the First City source said.

"It's standard operating procedure," and it is not the first time lately that Southwest banks have signed new contracts for credit lines, according to James McDermott, bank analyst with Keefe, Bruyette & Woods Inc. in New York. BancTexas, a Dallas-based banking organization, has restructured its credit line, as has a major Oklahoma bank, he said.

Under the new borrowing terms, First City secured its credit line by pledging assets consisting of all outstanding stock of its subsidiaries, excluding the common stock of its subsidiary bank, First City National Bank of

Equity Capital Levels Rise in '85 As Asset Growth Lags Far Behind

By L. MICHAEL CACACE

NEW YORK — Equity capital grew one and a half times faster than assets last year at the top 100 commercial banks ranked by total equity capital. As a result, equity capital as a percentage of assets for the top 100 rose 19 basis points, to 5.23% on Dec. 31, 1985, from 5.04% on Dec. 31, 1984.

Citibank, the nation's largest bank in both deposits and assets, also was at the top in total equity capital, with $7.04 billion on Dec. 31, 1985, up 11.4% from $6.32 billion a year earlier. Its equity capital equaled 5.08% of assets on Dec. 31, the fourth-best percentage among the top 10 banks in total equity. Citibank, based in New York, is the lead bank for Citicorp, the nation's largest banking firm.

These are some of the findings of the *American Banker*'s third annual survey of capital at the nation's top commercial banks. This is the first time banks have been ranked by equity capital.

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. It is the excess of the bank's assets over its liabilities. In general, a bank is considered to have adequate

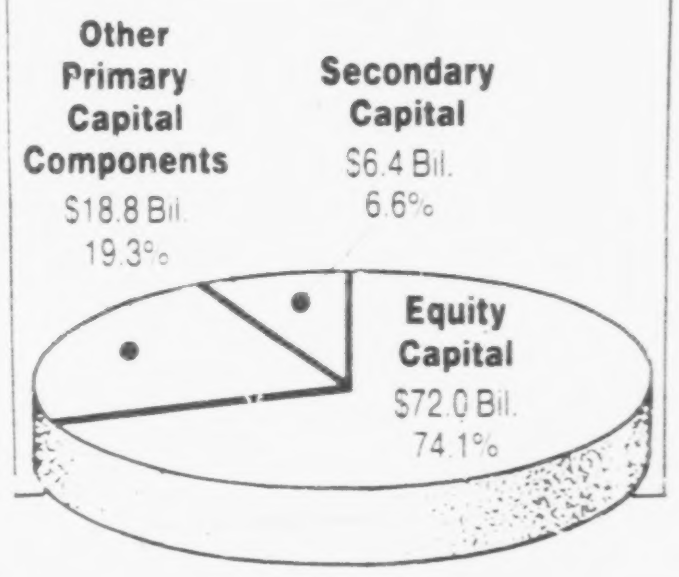
A Breakdown of 'Total Capital' at the Top 100 Banks in Equity Capital on 12/31/85



Bankers Uneasy Over Auto Incentives

By ROBERT GARSSON

DETROIT — While bankers believe that the General Motors Corp.'s current round of incentive financing has failed to produce the hoped-for boost in sales, the frequency with which the reduced-rate programs are being offered is creating a sense of unease among bank auto lenders.

The Mechanics Bank of Richmond, Calif., for example, has provided the floor plan, or inventory financing, for two area GM dealers for almost 30 years now, said Norman S. Jackson, the bank's vice president in charge of auto finance.

"But with the new incentive programs the retail paper programs from those two have all but dried up, and I just feel that we are going to lose the floor plan as well in the near future," he said. Retail paper refers to auto loans that dealers sell to banks and other lenders.

The Mechanics Bank counts auto finance among its most important products. Its $40 million in auto-related loans represents about 10% of the bank's total assets and fully half of its consumer loans, Mr. Jackson said. But with the incentives, which began appearing with some frequency last year, "we have lost about 26% of our volume," Mr. Jackson said.

Equity Capital Growth Speeds Past Rise in Assets in 1985

Continued from Page 1

capital when it equals 4% to 5% of assets.

In the two previous years, banks were ranked by total capital, which was defined as equity capital plus subordinated debt. Recent federal regulatory changes, however, have broadened the concept of total capital. To avoid confusion, the *American Banker* has decided to change its basis for ranking banks by capital.

Another Citicorp affiliate, Citibank (Delaware), New Castle, had the highest percentage of equity capital to assets at 89.88%. The bank, which is primarily engaged in cash management services and wholesale banking, ranked 20th in total equity capital, with $812.2 million on Dec. 31, 1985 — an increase of almost 16-fold from $52 million a year earlier. Over the same period, assets increased more than 700% to $903.6 million.

Among the nation's top 25 banks in deposits, Republic National Bank, New York, had the highest equity capital as a percentage of assets at 9.77%. Republic, which ranks 19th in deposits, ranks 11th in total equity capital, with $1.44 billion on Dec. 31, up 13% from $1.28 billion a year earlier.

'The Purest Form of Capital'

Bank analysts consider equity capital "the purest form of capital," because it does not include the allowance for loan losses and subordinated debt. Equity capital as a percentage of total assets is considered a very good measurement of a bank's ability to grow in the future and to withstand unanticipated losses. It also provides the user with a good way to compare capital adequacy among banks, and it is an easy capital measure for a bank to compute.

Other forms of capital — such as federal regulatory primary capital and total capital — are also important capital measures and are shown for the top 100 banks in equity capital. The *American Banker* ranked the top 100 bank holding companies by primary capital on April 17, and plans to rank banks by their June 30, 1986, primary capital next October.

But primary capital, which is the sum of equity capital, mandatory convertible instruments, the allowance for possible loan and lease losses, and minority interest in equity accounts of consolidated subsidiaries, can be a misleading measure of comparative capital adequacy.

For example, a bank with substantial loan losses will have a sizable allowance for loan losses, which will inflate its primary capital and its primary capital-to-assets level. The primary capital-to-assets level for this bank is not comparable to that of a bank with an average loan-loss experience.

The regulators are aware of this problem and are moving toward a risk-adjusted concept of primary capital. Adequate risk-adjusted primary capital will become a function of the asset composition of the ~~bank.~~ At present, federal regulators require primary capital equal to a minimum of 5.5% of average assets, regardless of asset composition.

Analysts also are disturbed by the inclusion of mandatory convertible instruments in primary capital. They refer to these instruments as "phantom capital," because they do not yet exist as capital. They commit the bank to convert the notes to equity capital in the future.

Mandatory convertible instruments are subordinated debt that eventually is transformed into common or perpetual preferred stock within a specified time not to exceed 12 years. Mandatory convertible debt includes equity contract notes and equity commitment notes that were issued before May 15, 1985. The holder of an equity contract note must take common or perpetual preferred stock as payment for the note. Equity commitment notes are redeemable only with the proceeds from the sale of common or perpetual preferred stock.

Federal regulatory total capital is primary capital plus secondary capital, secondary capital being the sum of limited-life preferred stock and subordinated notes and debentures and unse-

Brokerages . . .

Continued from Page 2

Discount broker Quick & Reilly Inc., whose performance is considered an accurate gauge of the market's retail participation, also turned in a record performance for its first quarter, which ended Feb. 28. "We've been busier than hell the last few months," said Thomas C. Quick, a vice president with the firm.

Here's why brokerage executives wish they could bronze the January-March quarter:

- Brokerage firms did fabulously well trading fixed-income securities for their own account. Not only did rates fall dramatically in the quarter, but they showed volatility — ideal conditions for traders, who generally thrive on sharp ups and downs (preferably downs) in bond yields. Yields on the 13-week Treasury bill dropped to 6.35% on March 31 — the last day of the quarter — from 7.04% on Jan. 1.
- Equity trading commissions continued to roll in at a healthy clip. Falling interest rates encouraged investors to continue their stampede through the stock market. The Dow Jones industrial average soared 271.9 points, or 17.1%, in the quarter, closing at 1818.61 on March 31. Lower rates and higher equity prices sent corporations running to raise money in the capital markets, which left firms such as Salomon Brothers awash in underwriting revenues.
- Individual investors finally began to feel at home in the stock market. Some retail-oriented firms reported that individual customers were buying more shares than they were selling — a characteristic that most firms have not seen in years. At one point in March, Quick & Reilly found that for every two of its customers selling, three were buying.

But the return of small-time investors, who are notorious for their bad timing, represents a frightening signal to some market observers. "That could spell the peak," said Brenda Davis, a securities analyst with Mabon, Nugent & Co.

The quarter appeared to peak in March. Largely because of procrastinators rushing to open individual retirement accounts before the April 15 deadline, cash rolled into mutual funds, money market funds, and unit trusts at an unusually brisk pace.

Larry Eckenfelder, analyst with Prudential-Bache Securities Inc., said the quarter's performance was so strong that it even fooled his computer models, which underestimated the earnings at the national wire houses. He said expenses tended to grow more slowly than revenues.

"Few analysts on the street expected earnings as high as they were," said Ms. Davis. ■

First City . . .

Continued from Page 1

Houston. First City National, at $6.8 billion in assets, represents about 45% of the holding company's $15.1 billion in assets.

In addition, the SEC filing indicates that First City Bancorporation of Texas agreed to revised restrictions on its dividends on common and preferred stock. The dividends are limited to a total of $5 million, according to the SEC filing. Preferred stock dividends are restricted to 50% of earnings from April 1 of this year. In the case of common stock, First City agreed to restrict a total of preferred and common dividends that does not exceed 30% of earnings from April 1, 1986, the filing stated.

First City said the collateralization of its bank credit line and restricted dividend were caused by a $275 million provision the banking organization took for possible loan losses. First City's net chargeoffs totaled $58.1 million for the first quarter. Its allowance for possible loan losses totaled $377.7 million, which represents 3.48% of total loans. This is considered to be among the highest percentages of major bank holding companies in the country.

In addition, First City said it holds $649 million in nonperforming assets, representing 5.91% of total loans. Primary capital of First City Bancorp., which includes loan-loss provisions, totaled $1.2 billion, or 7.8% of assets, as of March 31, 1986.

First City said its credit line is provided by such banks as Manufacturers Hanover Trust Co., New York, the syndicating agent; Mellon Bank, Pittsburgh; Chemical Bank, New York; Harris Trust and Savings Bank, Chicago; InterFirst Bank, Dallas; Crocker National Bank, San Francisco, and Security Pacific National Bank, Los Angeles. ■

Equity Capital . . .

Continued from Page 10

cured long-term debt with an original maturity of seven years. The federal regulators currently require total capital equaling a minimum of 6% of average assets.

Other Survey Findings

- For the top 100 banks, equity capital totaled $72 billion on Dec. 31, 1985, up 12% from $64.3 billion a year earlier. Over the same period, the assets of these banks grew by 7.9% to $1.38 trillion at yearend 1985.
- Primary capital totaled $90.8 billion and total capital was $97.2 billion for the top 100 banks in equity capital. Thus, for these banks, equity capital accounted for 79.3% of their primary capital and 74.1% of their total capital.
- As mentioned above, equity capital equaled 5.23% of assets for the top 100 banks. For the top 10 banks, the percentage was 4.81% at yearend 1985, up eight basis points from a year earlier. And for the top 25 banks, the percentage was 5.06%, up 22 basis points from yearend 1984.
- All but one of the top 100 banks had equity capital in excess of 4% of assets. Bank of America in San Francisco had 3.75% on Dec. 31, down 58 basis points from the year before. It ranked third in total equity capital, with $3.98 billion, down 11.8% from $4.51 billion the year before, when it was second in equity.
- A breakdown of the equity capital levels of the top 100 banks shows 27 banks in the 4%-5% range; 46 in the 5%-6% range; 15 in the 6%-7% range; and 11 at 7% or more. ■

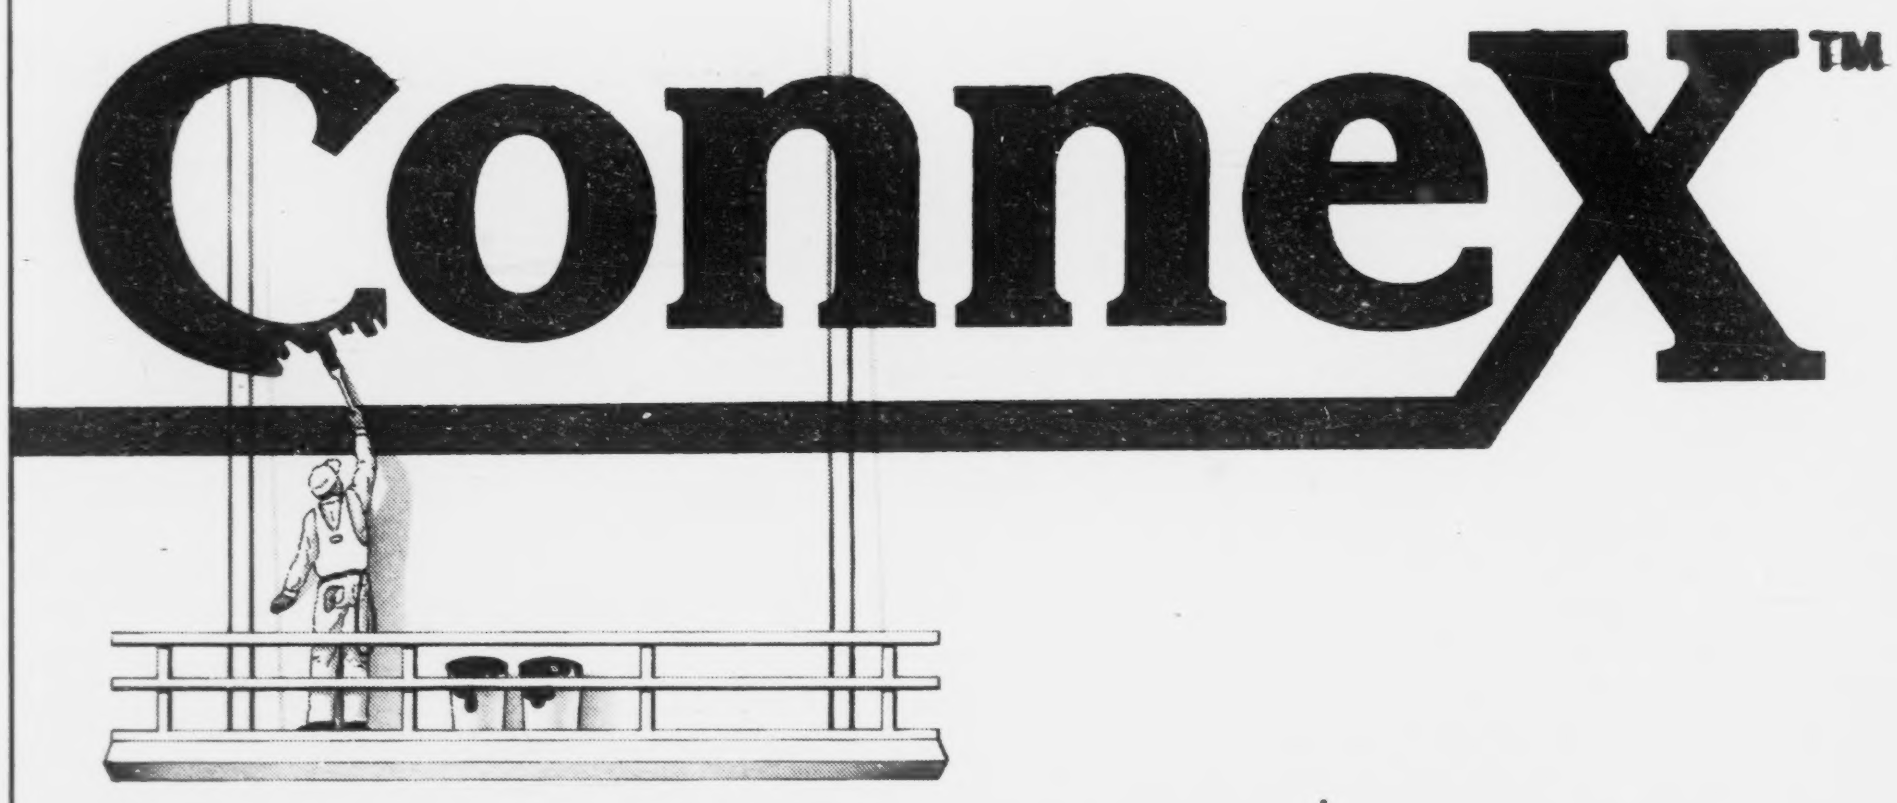
American Banker

Connex™ software for EFT is now available in your favorite shade of blue.



It used to be hard to find high-powered EFT software for large IBM® systems. Even when the color was right, the software's capacity was never large enough.

A.O. Smith Data Systems introduces fault-tolerant Connex™ software on an IBM mainframe system that's big enough for your EFT application. It can handle your ATM/POS terminals and your heavy transaction volumes. And we've already put it to the test on the largest EFT network in the nation.

Find out today how Connex software on an IBM system can help you meet your goals for high-powered EFT management — and position you for tomorrow's growth. Call Ken Byrne or Nancy Dokter at 1-800-558-6980.

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments. **Primary capital** is the sum of equity capital plus the allowance for loan and lease losses plus mandatory convertible debt plus the minority interest in equity accounts of consolidated subsidiaries minus "goodwill" placed on the books after 4/15/85. **Mandatory convertible debt** is the sum of equity contract notes and equity commitment notes issued prior to 5/15/85. **Total capital** is the sum of primary capital plus secondary capital. **Secondary capital** consists of limited life preferred stock and subordinated notes and debentures (not included in primary capital). **(c)**— Calculated by American Banker using the bank's federal regulatory report of condition and the definitions above. **(e)**— The figure shown is equity capital.

Random Thoughts

By SANFORD ROSE

How can banks achieve the benefits of specialization without its concomitant costs? If commercial lending departments were able to specialize in specific industries in well-defined locations, banks could achieve powerful economies of scale, reducing the functional cost of granting credit. They would also reduce the mathematical expectation of default — its mean value — because specialization would improve credit analysis.

However, banks would expose themselves to the risk of adverse environmental shocks affecting given industries and given locales. So while the mean value of loan losses would fall, the extent by which actual losses exceeded mean values — called the standard deviation — would become unacceptably large. The strategy would be rejected.

But if banks abandoned the philosophy of holding all or almost all the loans they originate, the strategy need not be jettisoned. Banks would originate loans only to industries and companies about which

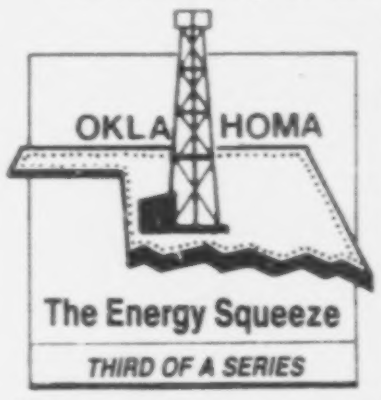
AN AMERICAN BANKER SPECIAL REPORT

Banks of Mid-America Treads Water, Waits for Cheap-Oil Flood to Subside

By JOHN MORRIS

OKLAHOMA CITY — There may be a few red faces over Banks of Mid-America's 1985 annual report. But that's the least of its worries.

Yet the irony of the cover picture is extreme. Two bar charts try to lure industry by advertising Tulsa and Oklahoma City as the cheapest of 14 cities in the region for gas and electricity. The bank couldn't have known those blessings would soon bite; that even-cheaper energy prices would wreck Oklahoma's economy and sideswipe its financial institutions.



The Energy Squeeze

THIRD OF A SERIES

The $3.5 billion-asset Banks of Mid-America Inc. didn't escape. It set aside an extra $20 million in the first quarter to cover possible loan losses, wiping out all profits and suffering a loss of $5.9 million. "This is the first time that both sides of our business — commercial loans and real estate — have been in the tank at the same time," bemoaned James Bruce, chief financial officer of the holding company and executive vice president of the $1.9 billion-deposit Liberty National Bank and Trust Co, the biggest subsidiary of Banks of Mid-America. (Its other large

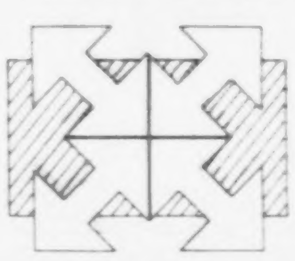
Fed Approves Wells Fargo Bid To Buy Crocker

Subject to Selling 7 Branches, Trimming $5.9 Billion in Assets

By ROBERT TRIGAUX

WASHINGTON — The Federal Reserve Board of Governors on Tuesday approved Wells Fargo & Co.'s application to purchase for $1.07 billion the Crocker National Corp. from Britain's Midland Bank PLC, subject to certain conditions.



Mergers,Acquisitions

The acquisition, which Wells expects to close on or about May 30, would make Wells Fargo the 10th largest bank holding company in the country and the second largest in California. Both banks have their headquarters in San Francisco. Wells Fargo is now the nation's 13th largest bank holding company; Crocker National is the 25th largest.

The Federal Reserve Board's approval was necessary before the merger could go through. It came on a 5-to-0 vote. The board said it was granting approval for the acquisition even though it would mean that California's third and fifth largest banks would be merging, creating a bank that will control 16.8% of the state's total bank deposits.

The central bank, ever concerned about large acquisitions that might reduce equity capital in the banking system, said that the Wells acquisition would not hurt the bank's financial strength. The Fed cited the fact that Wells' purchase of Crocker was more than 70% financed with equity, including $400 million issued in common stock.

However, the Fed said that Wells first must sell seven Crocker branch

Deposits Rise 8.1% at Top 5,000 Banks in 1985

By THERESIA E. TREPEL

NEW YORK — Total deposits of the top 5,000 banks in the nation rose 8.1% in 1985. This compares to a 6.7% increase in 1984. For the five-year period 1980-1985, deposits grew at an average annual rate of 8.6% at the top 5,000 banks.

These top banks had $1.91 trillion in deposits on Dec. 31, 1985, compared with $1.77 trillion a year earlier. On Dec. 31, 1980, the top 5,000 banks had $1.34 trillion in deposits.

Both the largest deposit gain and the largest deposit loss among the top 5,000 banks were posted by California-based banks. CivicBank of Commerce, Oakland, had a 1,865% deposit gain, and California Canadian Bank, San Francisco, had a 46.5% decline.

CivicBank began operations on Dec. 17, 1984, and its growth is attributable to its comparatively small deposit base of $2.9 million at yearend 1984. By yearend 1985, deposits totaled $56.1 million, to rank it as the nation's 4,254th largest bank.

California Canadian Bank, which is a subsidiary of Canadian Imperial Bank of Commerce, Toronto, had $199.8 million in deposits at yearend 1985 to rank 1,045th. A year earlier it ranked 530th, with $373.6 million in deposits. The decline is attributable to the sale of 11 of its branches to Barclays Bank of California, San Francisco, on Nov. 12.

These are some of the findings of the *American Banker's* annual listing of the top 5,000 U.S. commercial banks published today. The banks are ranked by their total deposits on Dec. 31, 1985. They are listed by state and by city, both of which are in alphabetical order. Within each city the banks are listed in order of deposit size.

The top 5,000 banks, which account for 32.7% of the 15,282 banks in the nation on Dec. 31, had 90.4% of the total deposits as of that date. A year earlier, this ratio was 90.9%. And in 1980, the ratio was 90.5%.

New York had 124 banks ranked among the top 5,000, and these banks had $432.4 billion in deposits — the largest amount of any state. California was second. Its 211 banks had $232.4 billion in deposits. Texas was third with $139.7 billion in 700 banks. And Illinois banks were fourth with $109.9 billion in 442 banks.

These top four states accounted for 47.9% of the deposits

IN THE NEWS

FHA Mortgages Halted

WASHINGTON — The Federal Housing Administration notified large banks to stop taking applications for government-insured home mortgages. A rush by consumers to refinance home mortgages at lower interest rates has pushed the agency to the limit of its $57.4 billion credit ceiling. The House has already passed a bill that would extend the agency's authority to $95 billion. A Senate vote on the issue was scheduled for Tuesday night.

Stock Offering Filed

MIAMI — Southeast Banking Corp. said it filed with the Securities and Exchange Commission to arrange a public offering of more than 1.7 million of its own shares, including 740,741 shares owned by First Atlanta Corp. The sale will end a mutual investment agreement signed between Southeast and First Atlanta in November 1983. As part of the deal, Southeast had purchased options to acquire shares in First Atlanta.

Acquisition Announced

NEW YORK — The $23.3 billion-asset Marine Midland Banks Inc., Buffalo, said it signed a definitive agreement to acquire Westchester Financial Services Corp. for $53 per share in cash. Westchester Financial is a $1 billion-asset thrift holding company based in New Rochelle. The transaction, which is subject to approvals from regulators and Westchester Financial shareholders, is expected to close in six months.

Home Sales Up

WASHINGTON — The Commerce Department said sales of new single-family homes in March reached a seasonally adjusted annual rate of 903,000, up 27.4% from February's rate of 709,000. The rate is also a 29% increase over the March 1985 rate of 698,000. A Commerce Department economist said the decline in home mortgage rates caused the jump.

Mutual Funds Sales Up

WASHINGTON — The Investment Company Institute, a mutual funds trade group, said March sales of mutual funds rose to $19.1 billion, up from sales of $15.4 billion in February. Sales of mutual funds for March 1985 totaled $6.1 billion. Stock, bond, and income funds, tracked by assets rather than sales, stood at $315.2 billion in March, up from $289.6 billion in February.

Tax Proposal Reduced

LONDON — The British government said it will cut to 1½% its proposed 5% tax on the conversion of U.K. stock shares into American Depository Receipts. ADRs are pieces of paper issued by American banks to permit trading of British stock shares outside of Britain. The tax, proposed in March, is aimed at eliminating the incentive to use ADRs for tax avoidance, the government said.

— Compiled by Don Munro

Will raising capital be hazardous to your health?

The way you raise capital and who buys it can have more of an impact on your organization than you might think.

There are right ways and wrong ways to raise new equity captial…that is, if you want to stay independent and grow.

Simply put, the way you raise your capital and who buys it can dictate your future direction and the health of your long-term independence.

That's why more and more regional and community banks and thrifts are relying on the expertise, distribution capabilities and integrity of Ryan, Beck when raising capital.

While Ryan, Beck services institutional accounts, its retail following of individual bank stock investors is second to none. Simply said, Ryan, Beck distributes stock among the many and avoids concentrating it among the few.

Importantly, Ryan, Beck remains a supporting element after the issue is sold. Today, Ryan, Beck ranks among the largest investment bankers dedicated to raising capital and maintaining trading markets for the banking and thrift industries. In 1985, Ryan, Beck managed, co-managed or guaranteed $300,000,000 in new capital financings, while maintaining primary trading markets in the stocks of over 500 community and regional banks and thrifts.

For more information about Ryan, Beck's services and how we operate, call Fenwick Garvey, Executive Vice President, 201-325-3000.

North Carolina Bankers Thwarted in Plan to Stop Credit Union's Formation

Special to the American Banker

RALEIGH, N.C. — North Carolina bankers have lost the latest round in their effort to prevent city and county employees from forming a statewide credit union.

A federal appeals court has upheld the local government workers' 14,000-member credit union, the North Carolina Local Government Employees Federal Credit Union, which was organized in 1983 after the bankers successfully prevented the North Carolina State Employees Credit Union from expanding its field of membership to the local-government workers.

A spokesman for the North Carolina Bankers Association said the decision, handed down by the U.S. Court of Appeals for the Fourth Circuit, Richmond, Va., is likely to be appealed before the U.S. Supreme Court.

Just as they had in the earlier case against the state employees' credit union — the third largest credit union in the nation — the bankers argued that an organization of workers from different cities and counties does not have sufficient "common bond."

Allowing the local government workers to form a credit union, the bankers' argument continued, constitutes unfair competition for other financial institutions.

James French, executive director of the North Carolina Local Government Employees Federal Credit Union, said he welcomes the appeals court's decision. That credit union has approximately $12 million in deposits, he noted, and its business is transacted through branches of the state employees' credit union, which charges 25% of income for the service.

The bankers' suit was filed against the local government credit union and the National Credit Union Administration, which approved the 1983 charter.

The suit charges that the charter was in violation of national law enabling formation of credit unions. The banks assert their "zone of interest" is jeopardized by the credit union.

The appeals court considered the question of whether banking operations were damaged, and rejected the claim. Judge J. Harvie Wilkinson 3d stated that the Federal Credit Union Act doesn't provide such protection.

"Congress acted to enhance credit availability for people of limited means and collateral," he said, "and evidenced no concern to protect or consider the interest of banks." ■

Union Planters Program Gets Memphis Award

MEMPHIS — Union Planters National Bank's Impact program has received the "corporate neighbor of the year" award as the top volunteer effort in Memphis.

Impact (Individuals Making Progress and Changing Tomorrow) was recognized for the 50,000 hours of volunteer work contributed by its employees, 30,000 hours of it in 1985 alone.

In its first public appearance, the Impact vocal group entertained at a reception at Memphis City Hall in honor of the Homecoming '86 Tennessee Volunteer Hall of Fame.

Union Planters also served as a site for the recent city-wide Health Fair, staffed by company volunteers and health professionals and screening about 250 Memphis residents. ■

Deposits Rise 8.1% at Top 5,000 Banks

Continued from Page 3

of the top 5,000 banks, compared with 48.8% in 1984 and 50.8% in 1983.

The state with the largest number of banks ranked among the top 5,000 was Texas, with 700 banks. Illinois again was second with 442 banks. California was third with 211 banks, up from 196 in 1984, when it ranked sixth. Michigan ranked fourth with 207 banks, up from 197 in 1985, when it ranked fifth. And Pennsylvania dropped to fifth place; it had 200 banks in 1985, compared with 207 in 1984, when it ranked third.

The states with the largest deposit growth were New Hampshire, with an increase of 28.2%; Delaware, with an increase of 27.1%; Connecticut, with a 23% gain; and Rhode Island, with a 19.6% increase.

The four states with deposit declines were: South Dakota, with a decrease of 10.6%; Montana, with a decline of 8.7%; Wyoming, with a 4% drop; and Oklahoma, with a 3% decline.

The 5,000th largest bank in the nation was the First National Bank, Wayzata, Minn., with $48.2 million in deposits, a decline of 10% from $53.6 million a year earlier, when it ranked 4,783rd.

In 1984, the Ames Bank in Omaha, with $45.7 million in deposits, was the nation's 5,000th largest bank. The Ames Bank ranked 5,270th on Dec. 31, 1985, with $45.8 million in deposits.

In 1982, the 5,000th largest bank in the nation was the Bank of San Felipe Green NA, Houston, with deposits of $39.4 million. At yearend 1984, the bank, which is now called MBank San Felipe NA, ranked 3739th, with $60.1 million in deposits. In 1985 this bank again rose in rank, to 2,526, with $91.3 million in deposits. ■

New York Assembly Mulls 10-Day Check-Clear Bill

Special to the American Banker

ALBANY, N.Y. — The settlement of checks drawn on banks outside the country and deposited for collection must be completed within 10 business days, and the funds must be credited immediately to customers' accounts, under legislation introduced in the New York State Assembly.

The proposal, sponsored by Assemblyman Alton Waldon, D-Queens, would provide for the regulation of this type of transaction and would establish a specific time frame for the transaction.

While the provisions of the bill allow the superintendent of banks to prescribe regulations that would allow exceptions should the 10-day period prove insufficient, the bill would void any previous agreement between the bank and the depositor.

In a related matter, a proposal to require banks to accept multiple-endorsed checks for deposit was introduced in the state Senate by Sen. Charles Cook, R-Del.

According to Sen. Cook, this measure would facilitate business transactions through the easy transfer of negotiable instruments by mandating banks to accept the multiple-endorsed checks, provided that the last endorser is guaranteed by a practicing New York State attorney. ■

Dear Reader, How Are We Doing?

The American Banker wants very much to make sure its coverage of the financial services industry meets your information needs. So would you spend a moment to give us some feedback on the **American Banker Listing of the Top 5,000 U.S. Banks** survey that appears in today's edition? Over the past year we have incorporated many of your suggestions to provide more meaningful information. Please return this questionnaire to L. Michael Cacace, Statistical Chief, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-4836.

AN AMERICAN BANKER SPECIAL REPORT

BancOklahoma Stung by Oil Price Drop Despite Keeping Energy Loans in Check

By JOHN MORRIS

TULSA, Okla. — Like lightning, collapses in energy prices care not where they strike. Just ask Leonard Eaton, chairman of BancOklahoma Corp., the state's second largest bank holding company with $2.9 billion in assets.

This seemingly prudent lender to the energy industry has been severely burned by the fastest drop in oil prices in recorded history. Energy loans make up less than one-sixth of its total loans — a surprisingly low level given Oklahoma's dependence on oil and gas — yet the plunge forced it to take more in losses in the first quarter of 1986 than it earned in the whole of the previous three years.

OKLAHOMA
The Energy Squeeze
LAST OF A SERIES

Mr. Eaton wears a frown on his face nowadays, although he tries to look cheerful. He doesn't sleep well at night, either, as he wonders what oil and gas prices will do next and what Oklahoma's economy will look like as a result. Part of his frustration is his inability to control the situation. All he can do is react.

"In November, I thought we were coming out of this. We were looking at 1986 as a growth year," he said. "Who would have guessed 12 months ago that the con-

Paradox: Consumer Credit Losses Up

Yet, More and More Major Banks Today Aggressively Seek Consumer Borrowers

By MICHAEL WEINSTEIN

NEW YORK — Consumer credit losses are up sharply at many of the nation's leading banks at a time when banks are lending more and more of their dollars to consumers.

In most cases, bad credit card debt is the biggest factor in higher loan losses. Lured by high profits, banks have promoted plastic aggressively to consumers around the country, turning up plenty of poor credit risks in the process.

But analysts do not anticipate a consumer debt crisis as long as the economy remains healthy. Overzealous credit card lenders, however, may take big hits, they say.

Meanwhile, big banks are expected to continue their emphasis on retail lending even though loan losses may be even higher this year.

Consumer lending, which has outpaced overall bank lending for three years now, appeals to banks for a number of reasons.

Sluggish demand and fierce competition in the commercial lending business has severely cut the profitability of making loans to big companies.

And banks have cut back on their international lending. "With that option being curtailed, banks in general are increasingly coveting the consumer," said Thomas H. Hanley, the director of the bank research department at Salomon Brothers Inc.

And credit cards have been a favored method for reaching consumers.

"There is no doubt about it that the fastest area of growth over the last couple of years, and especially during '85,

Limited-Service Banks Among Biggest Gainers

Asset Rankings of Top 2,500 Also Sees Leaps from Mergers

By L. MICHAEL CACACE

NEW YORK — Limited-service banks posted some of the largest gains in assets last year, according to the *American Banker*'s new survey of the top 2,500 commercial banks, ranked by assets.

Four limited-service banks in Delaware, established by some of the nation's largest banking companies, posted substantial asset gains last year. A limited-service bank, as defined for survey purposes, is one with a commercial bank charter, but which makes few or no commercial loans. In most cases these institutions have been used by a bank holding company to handle a particular function, such as their credit card operations, and to take advantage of higher usury ceilings and tax advantages.

Chase Manhattan Bank (USA), Wilmington, Del., posted the largest gain in rank among the nation's 100 largest banks, moving up 83 places in rank to 78th position. The bank — which han-

Indianapolis: A Fairy Tale Success

Indianapolis has been labelled the Midwestern "Cinderella City." In a survey of chief bank executives all over the United States, Indianapolis was expected to have "the most dramatic growth in the next decade" of any city in the midwest region. That's chosen from step-sister cities in all 11 states.

According to the research firm, it's "clearly a compliment." American Fletcher calls it more than a compliment: it's deserved recognition. And it fits perfectly. We know Indianapolis will be living successfully ever after.
